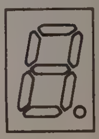
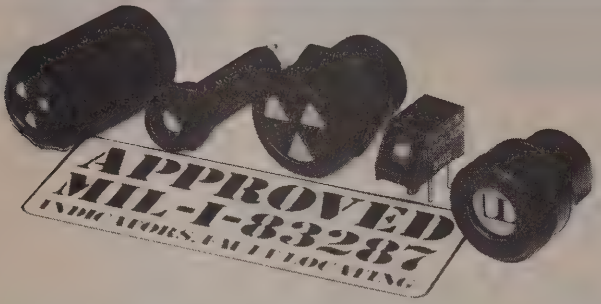
COMPLETE LINE OF LED'S AND LED DISPLAYS



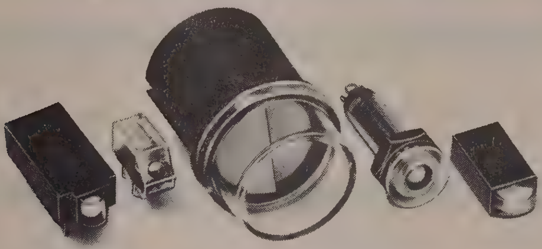
WE WOULD LIKE TO MAKE YOUR LIFE A LITTLE BRIGHTER WITH OUR FINE LINE OF MINIATURE LAMPS.
FOR COMPLETE PRODUCT LISTINGS AND SPECIFICATIONS, SEND FOR YOUR FREE CATALOG.

STATUS INDICATORS & DISPLAYS



Military - Avionics

- Electrical or Manual Reset
- Pulse Operated
- Latching Display
- High Visibility
- Environmental Seals
- TTL Operation
- SEM-E Module Mountings

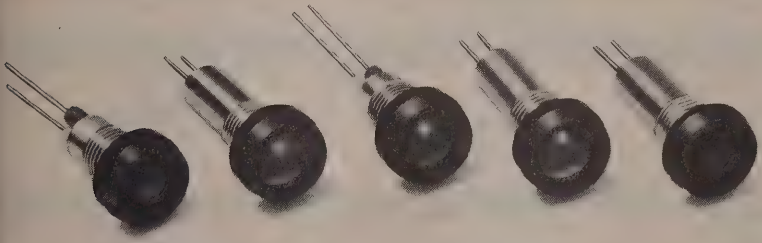


FAULT FINDERS for monitoring critical systems on computers, pipelines, generators, compressors, battery systems, and heavy equipment

Commercial Low-Power

- Low Cost
- Panel or Board Mount
- High Visibility
- Weather-Tight
- Wave Solderable

LED & INCANDESCENT INDICATORS

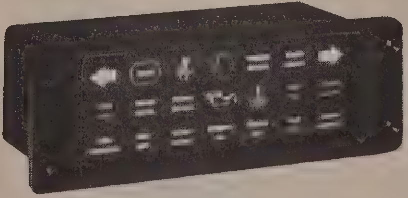


DESC 87019 & 85122, NVG & IR Secure, CECOM-SOW

- MIL Quality
- Environmental Seals
- Sunlight Viewable
- Ultra-Brite
- EMI-RFI Protection

VEHICLE DISPLAY PANELS

NVG AVIATION CAUTION PANEL
Meets military specifications:
MIL-L-85762
MIL-Q-9858
MIL-I-45208



ANNUNCIATOR LIGHT PANEL
Specifically designed for:
- automotive, truck and off-road vehicles
- heavy equipment
- marine and industrial applications

- Military
- Commercial
- LED
- Incandescent
- Sunlight Viewable
- Blackout
- IR Secure
- NVG Compatible
- EMI-RFI Protection

NON-VOLATILE

RUGGED

AIR & GROUND

OSHINO LAMPS LIMITED has been in business since 1931. We are a leading supplier of Sub-Miniature Lamps to the U.S. and European Aerospace, Automotive, Telecommunication and Computer Industries. We have a NATO Code Number S3774 and will certify lamps where applicable to U.S. Military Standards and Specifications and other international norms such as DIN, IEC and JIS. Our "OL" trademark stands for dependability, quality and reliability.

EXTRA BRIGHT SOLID STATE VISIBLE LED LAMPS

FEATURES

- IC COMPATIBLE
- 24° HALF INTENSITY ANGLE
- BINNED FOR BRIGHTNESS
- CHOICE OF COLORS
- TINNED LEADS

APPLICATIONS

- BACKLIGHTED PANELS
- STATUS INDICATORS
- OVERLAYS
- ALPHANUMERIC DISPLAYS
- LIGHTED SWITCHES

SHOGYO LAMPS AND BULBS

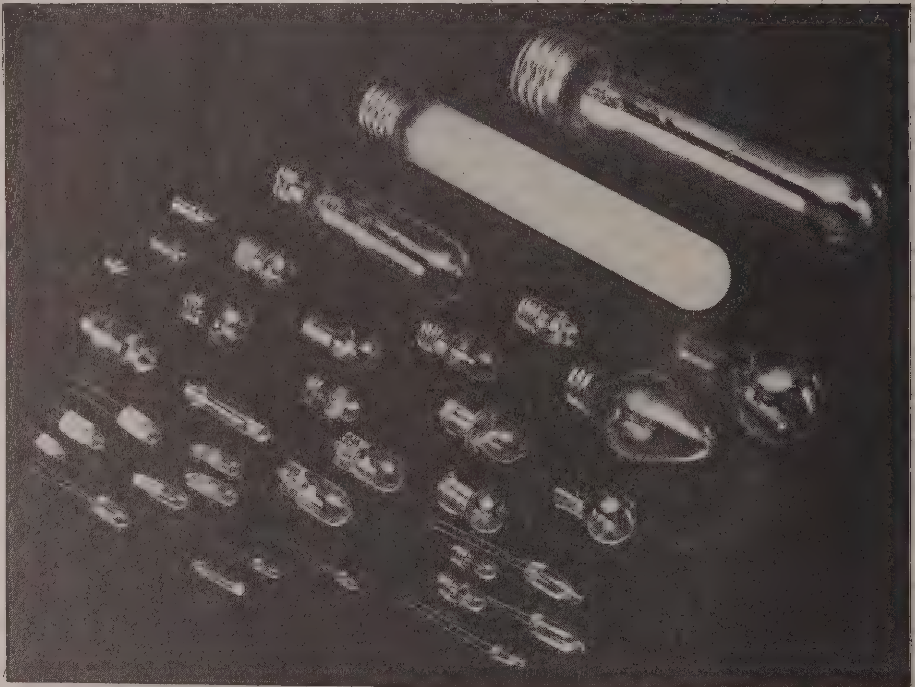
Your design deserves Shogyo quality and reliability.
You deserve...
Shogyo Service...comprehensive, responsive and fast
Shogyo Professionalism...the helpful experience you need
Shogyo Prices...always competitive, usually better
and...
Shogyo Selection...with complete custom design capabilities

Including a diverse offering of:

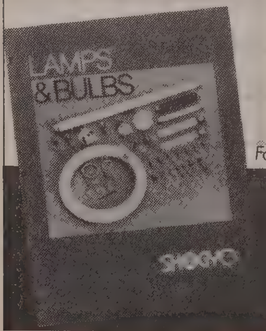
- Incandescent lamps
- Standard voltage lamps
- Fluorescent lamps
- Neon lamps
- Xenon flash tubes
- Bulbs
- Filaments
- Bases

And featuring:

- A comprehensive variety of styles, sizes, shapes, volts, amps, watts, filament shapes, and terminals (wire, bi-pin, flanged, wedge, knerled, midget grooved, bayonet and slide base).



For immediate assistance and specific information on the product(s) you require:
Dial 516-466-0911 or
FAX 516-466-0922



For complete product listings and specifications, request our free catalog.

SPECIFY SHOGYO. ELECTRONIC COMPONENTS AS GOOD AS YOUR DESIGN.

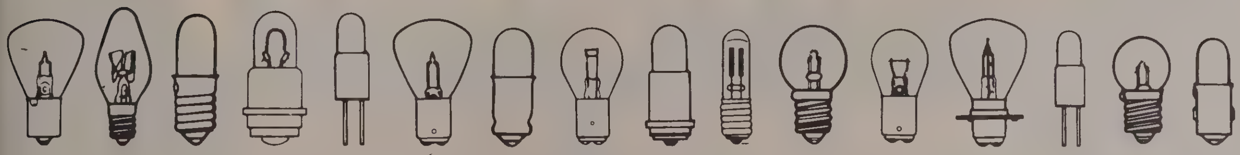
Miniature, Subminiature, Microminiature, and LED Lamps

SHOKAI GUARANTEED PERFORMANCE AT THE WORLD'S LOWEST PRICES!



- **Engineered and Tested for Longer Lasting, Perfect Performance in Every Project**
- **All Voltages . . . Shapes . . . Sizes—Standard Types or to Your Specifications**
- **On-Time Deliveries—Direct from Our Overseas Factory**
- **Also Available—Halogen, Xenon, Neon, Krypton, Fluorescent, Germicidal, Auto, Aircraft and Telephone Lamps for All Applications**

When you need OEM quality components, specify SHOKAI. The name you can depend on!

Our proven record of reliable customer service and on-time delivery is no accident. We control every aspect in the manufacture of our products. We selectively review and test each category of components. And we consistently ensure the highest standards of production and design. All resulting in an assortment of quality components designed to meet every customer need. That's why more and more component purchasers have turned to SHOKAI.

And even if we don't have exactly what you need, we can custom make it for you, to your exact specifications, in our own facilities.

Insist on SHOKAI. For consistent quality, competitive pricing, and unbeatable values.

We can also furnish other quality components, such as antennas, battery holders, buzzers, cables and cord sets, capacitors, connectors, microphones cartridges, potentiometers, speakers and tape heads.

Give us a call today for all your electronic needs.

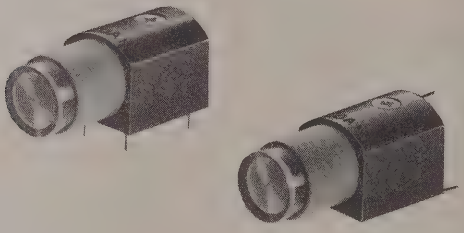
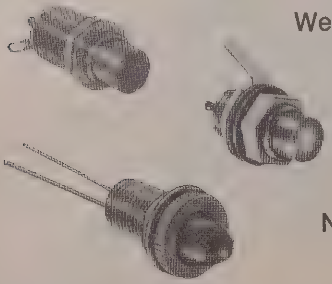
The Sloan Company

Indicator Lights

"The Touch of Brilliance in Panel Design"

You need a solution!
You need it soon!
We can help you and we will.
You need well packaged LED's.
Standard bright? Super bright?
Ultra bright? Multi chip?





We got'em!

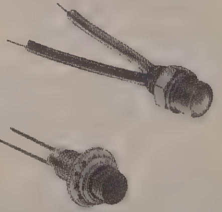
High Rel?

Waterproof?

Oiltight?

No Problem!

Maybe you have a high voltage circuit in a Radio Frequency sensitive environment. We handle that in every shape and size.



For the last 30 years The Sloan Company has been providing the finest indicator lights available.

For military applications, it's important to know that all of our material and processes meet or exceed military specs.

In the event that you don't see what you are looking for here, call us, you will find our staff most obliging. You will be pleasantly surprised to find how few you may have to order and how fast you can get them.

Free samples and prototypes available.

We will be glad for the opportunity to help you to find or develop the product you envisioned.

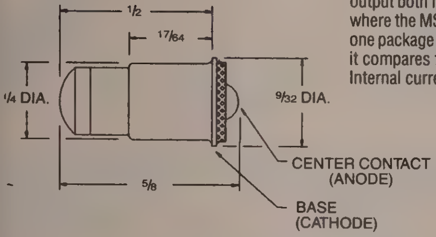
T-1¾ MIDGET FLANGED BASE LED

MODEL 510



½
17/64
¼ DIA.
9/32 DIA.
⅝
CENTER CONTACT (ANODE)
BASE (CATHODE)

The Model 510 six chip LED T1¾ Midget Flange Base lamp has abundant light output both front and side viewing, for use in indicator lights and other applications where the MS25237 (327, 328, etc.) incandescent lamps are used. The six chips in one package give far greater light output totally than earlier single chip LEDs so that it compares favorably in use with the incandescent lamp it is intended to replace. Internal current limiting resistors allow for supply voltages from 5 up to 28 volts.

BASE (CATHODE)

The 4L001, available in diffused lens material is the Sloan T-1 based LED designed to offer diode reliability as a replacement unit in T-1 hardware. When maximum light output is desired using based LEDs in indicator applications, it is recommended that the lens be of transparent material with Fresnel rings. If translucent material is desired, then the lens should be without Fresnel rings.

BASE (CATHODE)

The versatile T-1¾ based LED is available in red, green or amber. Viable voltage range is 2.1 volts to 28 volts with power dissipation up to 400mW. Built-in dropping resistors allow these units to be powered from sources up to 28 VDC. The higher voltage capability permits the Sloan T-1¾ based LED to be used as direct replacement for incandescent bulbs in applications where light intensity is not critical but diode reliability is required.

SUGGESTED MOUNTING
HOLE PATTERN

This is an extremely versatile device for a wide range of applications and space saving status indicator for horizontal mounting in printed circuit boards. The bi-level feature saves board space by cutting space requirements in half. Standard .100 inch center to center distance of the leads make it easy for both assembly and servicing of the circuit board.

This rugged unit houses high bright T1¾ LEDs in an all metal threaded housing. Termination is by wire wrap posts or solder lugs. Built in current limiting resistors allow these units to be powered from sources up to 28 volts.

3/8
19/64

Utilizes hermetically sealed solid state LEDs with high brightness and wide viewing angle. Can be supplied with standard, JAN Qualified, or JANTX LEDs. It can also be supplied with a current limiting resistor depending on your particular requirement. The Model 251 is supplied with an O-ring for proper panel sealing.

SLOAN™
Precision Optoelectronics

7704 San Fernando Road, P.O. Box 367, Sun Valley, CA 91353
(213) 875-1123 • TWX 910-498-2250 • FAX: (818) 768-8326

GENERAL INFORMATION:

- RFI shielding available with virtually all models.
- It is wise to avoid using blue or green lenses with neon lamps.
- It is also wise to avoid using blue lenses with LED lamps.
- Ultra-bright, multichip and other exotic lamps available.
- All materials meet or exceed applicable military specs.

HOW TO ORDER

LED LAMP INFORMATION

We have virtually any LED you want. The two basic sizes are T-1 and T-1¾ with flanged bases. The brightest varies with color, with green lowest to red highest. To order extra or super bright lamps simply add 01 or 04 to the model number. One more suggestion do not order LEDs with blue lenses.

NO.	LAMP TYPE	T-1	T-1¾
—	Standard-Bright	2 mcd	3-8 mcd
01	Extra-Bright	8-18 mcd	15-18 mcd
04	Super-Bright	20 mcd	60-80 mcd

MPRINTING

Lenses may be hot stamped, engraved, or opaqued and engraved so that the character only is displayed.

The chart below designates type size available for hot stamping. Size of lens determines size of type that can be used.

TYPE	ACTUAL SIZE	
	WIDTH	HEIGHT
2 Pt	.050	.060
6 Pt	.060	.080
8 Pt	.080	.110
10 Pt	.090	.120
12 Pt	.110	.160
NOTE: For other size type, contact factory.		

LENS STYLE

STYLE		DESCRIPTION
Q		Clear anodized bezel allows 180° visibility.
QB		Same as Q lens except with black anodized bezel.
DSC		Clear anodized bezel prevents sidelight emission.
DS		Same as DSC lens except with black anodized bezel.
STD		Full 180° visibility. Maximum illumination.
M		Large lens for maximum visibility from all angles. Engineered to offer the most uniform light distribution. Full 180° visibility.
MB		Same as M lens except with black anodized bezel.
D		Skirted lens covers metal parts for neat panel appearance. Large lighted surface assures positive indication.
SE		Edgelight for plastic panels. Small diameter light gasket minimizes wasted panel space.
DDS		DIMMER: Rotating outer collar changes light output from full to minimum. Rotation to dim can be clockwise or counter-clockwise. Easy adjustment with gloved hand.
U		UNLIMITED: Has no lens to diminish light output. Specifically suited to T-1¾ flanged based LED for maximum light output.

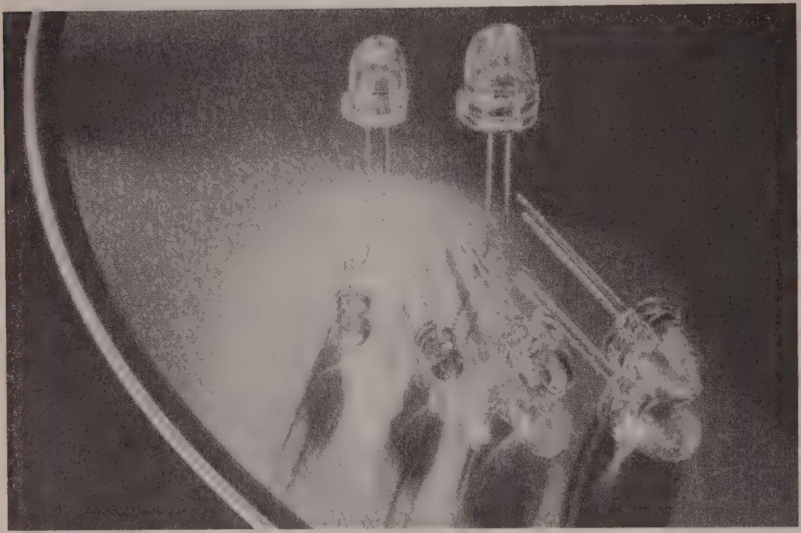
120 SERIES

STB		Full 180° visibility. Maximum illumination. Black bezel.
STC		Full 180° visibility. Maximum illumination. Clear bezel.
QB		Black anodized bezel allows 180° visibility.
Q		Same as QB lens except with clear anodized bezel.

STYLES

FLAT		NOTE: Lens style may be flat or domed, plain or lensed, meaning that the lens is provided with internal concentric rings on the inner face and flutes on the sides, thus giving better light distribution.
DOMED		

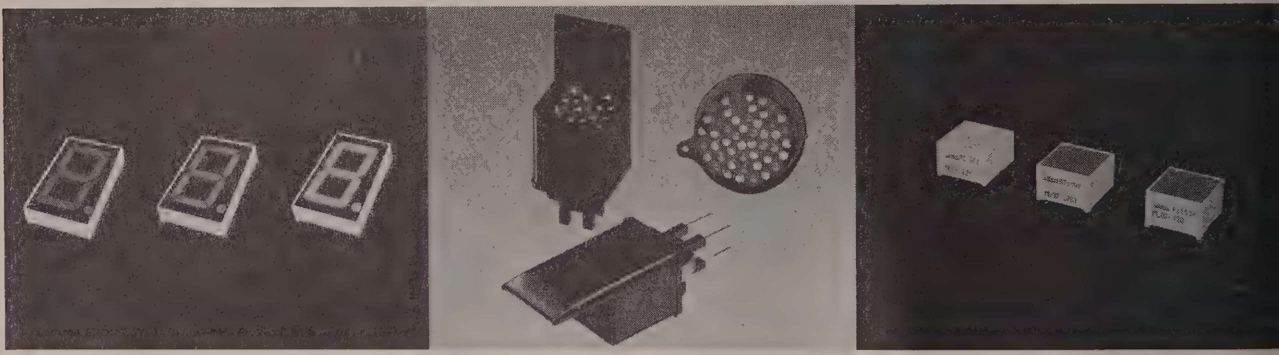
STANLEY WORLD LEADER IN LEDs AND LCDs STANLEY



The widest range of LEDs in the industry

APPLICATIONS:

Office automation
Hand-held instruments
Telephones, pagers
Computer products
Audio and video equipment
Switches
Displays and signage
Automotive
Medical instruments
Keyboards
Optical communications
Photoelectric controls
Bar code scanners



Models and types to match virtually any design requirement and operating environment, indoors and out!

- ***SUPERBRIGHT LEDs*** including reds to 3 cd, high intensity pure green, bright yellow and orange. Bulk or tape-and-reel packaging.
- ***SUPER-INTENSITY, HIGH-SPEED DN AND DNP TYPE INFRARED LEDs*** in T-1, T-1¾ and SMT packages with narrow or wide emission angle lenses.
- ***OUTDOOR, MULTI-COLORED, HIGH-VISIBILITY LED CLUSTERS*** readable in daylight at distances up to 1/2 mile. Weather resistant for outdoor signage, scoreboards and highway signs.
- ***SUPER-INTENSITY LEDs*** with emitted light intensity 8 to 10 times greater than typical rectangular LEDs. Available in red, green, yellow and orange.
- ***HIGH-INTENSITY DOT MATRIX DISPLAYS*** feature wide viewing angle; single, bi- or multicolored in sizes up to 40 sq. mm; and optimized lighting uniformity over total display area.
- ***LOW-CURRENT LEDs*** with a guaranteed luminous intensity at 2 mA vs. 20 mA for regular LEDs. Ideal for low power and battery-operated equipment.
- ***CHIP-TYPE SURFACE-MOUNT LEDs*** for high-density applications using automatic insertion machinery. Offered in virtually any combination of single or dual chips, emitted color, lens shape and polarity orientation.
- ***7-SEGMENT BI-COLOR LEDs*** in .4, .6 and 1 inch are suitable for instrumentation applications. Easily mounte on PCBs and in IC sockets.
- ***LIGHT BAR LED MODULES*** are excellent for backlighting and displaying characters, numbers or designs using mask patterns on the top surface.

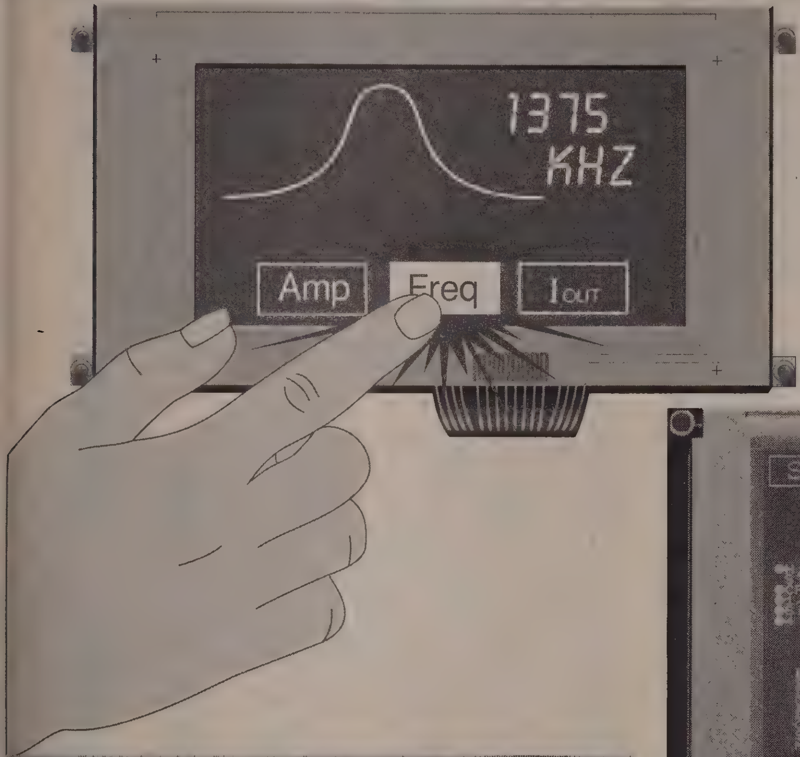
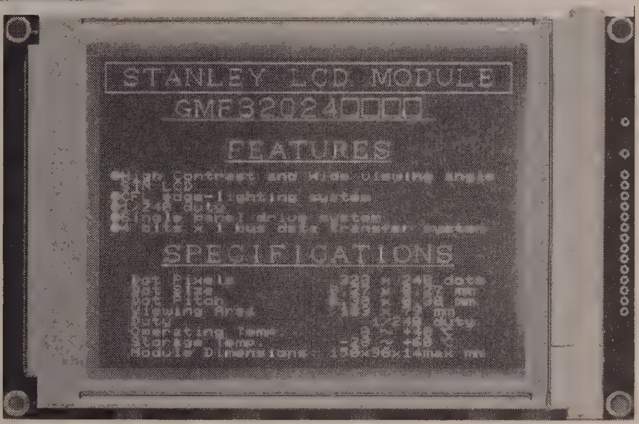
STANLEY WORLD LEADER IN LEDs AND LCDs STANLEY

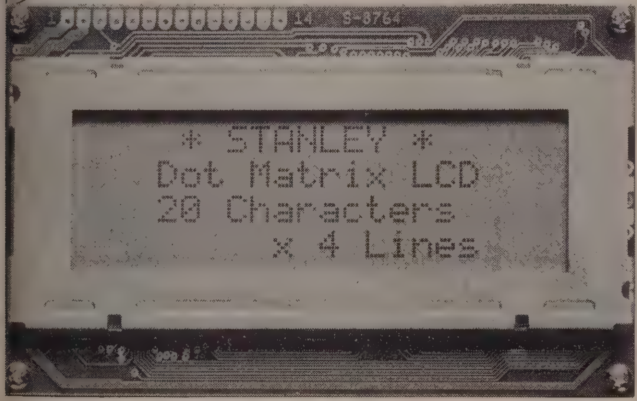


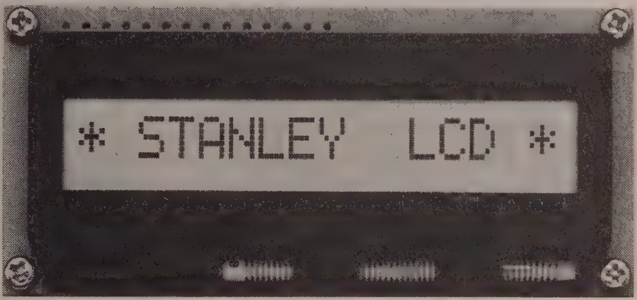
The widest range of LCDs in the industry

APPLICATIONS:

POS terminals
Display panels
Telephones
Copiers
Facsimile equipment
Process control
Medical instruments
Analyzers
Office automation
Computer products
Measuring equipment
Controllers







High contrast, high reliability LCD solutions for virtually any display application.

- ***LOW-PROFILE, LIGHTWEIGHT, CHARACTER-TYPE* LCDS** (GML series) that are industry-standard, but priced 30% below competition.
- ***COMPACT, FILM-COMPENSATED, 320 x 240 LCDs*** (GMF series) with enhanced resolution. Also available in blue mode STN with CFL backlighting or yellow mode STN with LED backlighting.
- ***CHARACTER, DOT-MATRIX LCDs*** with LED and CFL backlighting which ensures uniform lighting in any application.
- ***USER-PROGRAMMABLE, MULTI-FUNCTION TOUCH-PANEL LCDs*** with the lowest prices in the industry. Supertwist 256 x 64 and 256 x 128 configurations let you create your own character and graphic screens.

ANNUNCIATOR LAMPS AND COLOR CAPS

Long life annunciator lamps are designed for use in elevator panels, pushbutton stations, indirect decorative lighting and general signalling applications where a relatively high candlepower miniature light source is necessary. A high degree of light control is made possible by a self-contained aluminized reflector. Unique lighting and signalling effects are attainable using pyrex color caps shown in the chart. Ordering Data: For clear lamps, specify lamp number. For colored lamps, specify color as follows: 6RB/Red, etc. Caps are cemented to lamps when ordered in this manner. Caps may also be ordered separately.

SYLVANIA

SINGLE SOCKET INDICATOR LAMP ASSEMBLIES

Available sockets include P/N 30153 (round flange) and P/N 30151 (rectangular flange). Sockets may be used with or without colored lens cap covering end of bulb which extends .18" beyond .09" flange. Socket P/N 30153 (round flange) can also be used with round (.70" dia. × .48" high) or square (.70" × .70" × .48" high) lenses. Both sockets 1.14" M.O.L. Mounting hole, .50" dia. Sockets accept T-2 lamps rated 4, 5, 6, 10, 12, 14, 16, 18, 24, 28 or 48 volts.

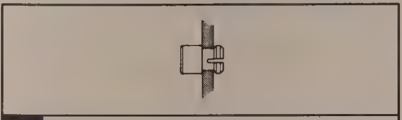
CLIPLITE® LENS/MOUNTS FOR 3mm & 5mm LEDs

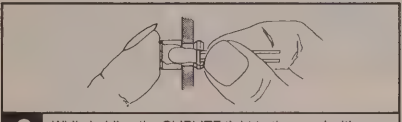
FEATURES

- Installs with finger pressure – no tools required – takes only six seconds
- Increases viewing angle up to 180 degrees using either diffused or point source LEDs
- Protects LED from being pushed back through panel – LED blackout
- Moisture seals easily to panel with the application of common sealants
- Intensifies apparent brightness up to 125% by the use of striated lines and fresnel rings
- Guards against IC damage by electrostatic discharge transmitted thru exposed LED

SIMPLE TWO-STEP INSTALLATION



1 Snap the CLIPLITE into panel hole.



2 While holding the CLIPLITE tight to the panel with your finger, insert the LED into the CLIPLITE from the back.

SPECIFICATIONS

MATERIAL Lens - Polycarbonate; Spacer - Nylon (U.L. Listed plastics).

DESIGN Standard and low profile lenses with fresnel rings and striated lines. A low profile lens without rings is available for direct sunlight applications.

MOUNTING: Mounts thru front of panel. Mounting holes should be deburred but not chamfered.
3mm (SML 190, SMB 200) mounts in .171 6.002 (4.34mm) hole on 1/4" centers. Panel thickness foe SML 190, 1/32" to 1/16"| SMB 200, 1/16" to 1/8".
5mm (CLF 280, CLB 300, CLR 301) mounts in .250 6.002 (6.35mm) hole on 3/8" centers. Panel thickness for CLF 280, 1/16" to 1/8"; CLB 300 and CLR 301, 1/32" to 1/4"; for panels less than 3/16", use SPC 125 spacer.

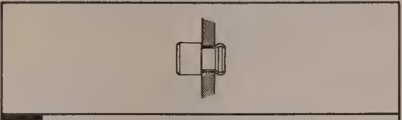
CUBELITE® SQUARE LENS/MOUNTS FOR LEDs

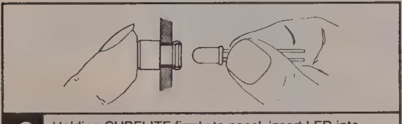
FEATURES

- Enhances aesthetics, square design in both standard and low profile configurations
- Mounts either as a single square lens or stacks in bar configuration
- Increases viewing angle up to 180 degrees using either diffused or point source LEDs
- Intensifies apparent brightness up to 140% by the use of striated lines and fresnel rings
- Installs with finger pressure – no tools required – takes only six seconds
- Guards against IC damage by electrostatic discharge transmitted thru exposed LED

EASY TWO-STEP INSTALLATION



1 Snap CUBELITE in a .250 inch panel hole.



2 Holding CUBELITE firmly to panel, insert LED into CUBELITE from the back. Installs in just 6 seconds.

SPECIFICATIONS

MATERIAL LENS - Polycarbonate; Spacer - Nylon (U.L. Listed plastics).

DESIGN Square lens, standard and low profile, fresnel rings and striated lines.

MOUNTING: Mounts thru front of panel. Mounting holes should be deburred but not chamfered.

3mm (SMQ 250) mounts in .171 6.002 (4.34mm) hole on 1/4" centers. Panel thickness from 1/16" to 1/8".

5mm (SQL 360) mounts in .250 6.002 (6.35mm) square punched hole on 3/8" centers. Panel thickness from 1/16" to 1/8".

5mm (SQB 400) mounts in .250 6.002 (6.35mm) round hole on 3/8" centers. Panel thickness from 1/32" to 1/4"; (for panels less than 3/16", optional SPC 125 is available).

Standard metal or plastic washers can also be used to increase panel thickness if necessary.

PUNCH SOURCES: Porter Precision, Cincinnati, OH Strippet, Houdaille Ind., Akron, NY Unipunch Products, Buffalo, NY Wiederman Co., King of Prussia, PA.

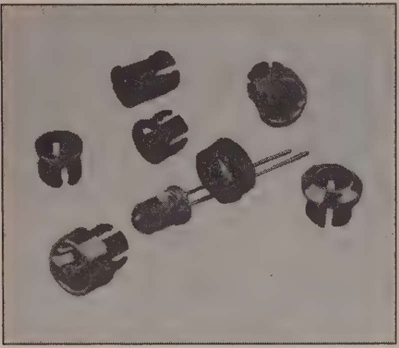
CLIPMOUNT CHROMED LED MOUNTING CLIPS

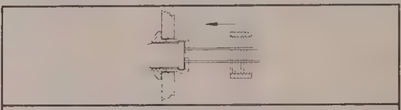


U.S. & For. Pat. Issued & Pend.

FEATURES

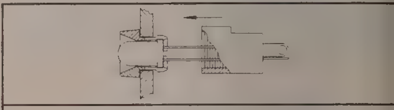
- Universal, used for mounting of all standard 5mm LEDs
- Low cost replacement for expensive plated metal assemblies
- Styles include inner/outer reflector, standard clip type, all in either chrome or black finish
- Low cost red 20mcd LEDs become sun light readable with chromed inner reflector mounts
- LEDs are replaceable when mount is used with Conxrite
- Clipmounts greatly increase the engineer's range of selection in the panel design process

CLIPMOUNT WITH RING



Snap the Clipmount into the panel • insert LED • Press the ring in place to complete the assembly.

CLIPMOUNT WITH CONXRITE



Snap the Clipmount into the panel • insert LED • Press the CONXRITE in place to complete the assembly.

SPECIFICATIONS

MATERIAL: Clip - Polycarbonate; Ring - Poly-propylene;

DESIGN: Style - Inner, outer reflector, standard clip Finish - Chrome or black.

MOUNTING: Mounts thru front of panel. Mounting holes should be deburred but not chamfered.

Hole size .252 (6.35mm) hole on 3/8" centers.

Panel thickness for CLP 125, CLP 127 & CLP 129, 1/32" to 1/8"; CLP 126, 1/8" to 1/4". Complete assembly with RNG 268. Clipmount with Conxrite, maximum panel thickness .110".

LEDs: 5mm standard or low profile, diffused, or non-diffused.

CONXRITE® SOLDERLESS LED CONNECTOR

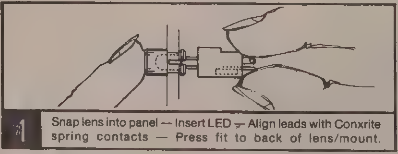
ACTUAL SIZE

U.S. & For. Pat. Issued & Pend.

FEATURES

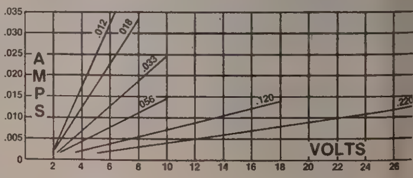
- Internal resistor for 3V to 28V circuits - when external resistor is required or desired. Conxrite is available without built-in resistor
- Requires no tools – provides a simple fast press-fit connection to either Cliplite or Clipmount
- Stress relieved connection controls the problem of broken LED leads
- When preassembled to the wiring harness final assembly of the panel mounted LED is greatly simplified
- Various colored Cliplite lenses are available for use with the Conxrite
- Makes field replacement of defective LEDs practical and cost-effective

EASY INSTALLATION



Snap lens into panel — Insert LED — Align leads with Conxrite spring contacts — Press fit to back of lens/mount.

RESISTOR SELECTION GUIDE



SPECIFICATIONS

MATERIAL:

HOUSING —	Polypropylene (natural).
TERMINALS —	Phosphor bronze, tin plated. Compatible with Terminals.
RESISTOR —	Melf 1/4 watt resistor provides current limiting to 28 volts.
PANEL MOUNTS —	Cliplite or Clipmount Series - Polycarbonate
NOTE:	Trim LED lead length to .275 +/- .010 (7.24 .254mm).

P-C-LITE® PCB MOUNTS FOR 3mm & 5mm LEDs

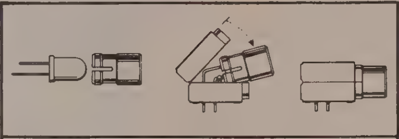
ACTUAL SIZE
3mm
5mm

U.S. & For. Pat. Issued & Pend.

FEATURES

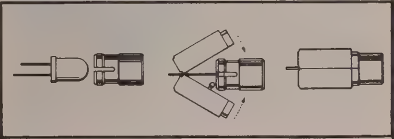
- Wave solders horizontally or vertically without special jogs or fixtures
- Stabilizes LED during packaging and physically protects after assembly
- Mounts flush, recessed or fully extended thru display panel without attachments
- Height compatible with switches and other circuit board mounted components
- Increases LED apparent brightness and viewing angle up to 180 degrees
- Guards against IC damage by electrostatic discharge transmitted thru exposed LED

HORIZONTAL MOUNT



Snap LED into lens — insert LED leads through holes in mount base — close mount, bending leads into position.

VERTICAL AMOUNT



Snap LED into lens — insert LED leads through holes in mount — close mount.

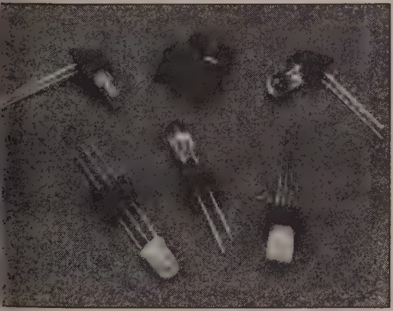
P-C-LITE® MOUNT FOR BI/TRI-LEAD LEDs

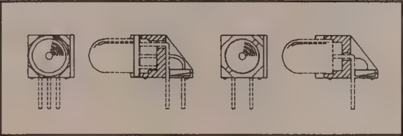


U.S. & For. Pat. Issued & Pend.

FEATURES

- Right angle PCB mount for bi and tri-lead LEDs for use as logic and diagnostic indicators.
- Accommodates round and rectangular shapes of LEDs with or without flanges.
- Dove-tail interlock feature allows mounting of both mono and multi-colored LEDs
- Mount forms LED leads which are locked into position by retaining tabs.
- Formed LED leads are staggered in their length permitting easier PCB insertion.
- Molded standoffs permit the easy cleaning of PCB after wave solding operation.

PCB MOUNTING OF BI & TRI-LEAD LEDs



Form leads with the mount, snap leads into retaining tabs.

MATERIALS: Housing – Nylon (black) U.L. 94 VO.

MOUNTING: PCH 175 – Right angle Thru-The-Hole mount for LEDs. Can be used as a single LED mount or banded together in an array with its dove-tail interlocking feature.

When banded together with the PCH 175 the LEDs are on .250" centers.

LED: 5mm size - round or rectangular shape with or without flange. Bi-lead, standard .100" lead spacing. Tri-lead, either .050" or .100" lead spacing. Both the bi-lead and tri-lead LEDs can also be combined in arrays with one another.

LED DATA:	Type – 3mm or 5mm Leads – Min. .017 (.43mm) round or square. Max. .030 (.76mm) thickness – .040 (1.02mm) width.

P-C-LITE® THT & SMT SOCKETS FOR LEDs

FEATURES

- Relampable – no direct soldering of LEDs
- Used to mount round, square, triangular, odd sizes and various shapes of LEDs
- Easy installation, replacement of phototransistors, IR emitters, incandescent bi-pin lamps
- Mounting of PCB status, logic, fault indicator lights
- Mounts horizontally or vertically – LEDs can b inserted from either end of socket
- Designed for lock type security of LEDs used in hig shock and vibration environments

P-C-LITE® BI/TRI-LEAD LED STANDOFFS

FEATURES

- Standoffs for mounting bi-lead, tri-lead LEDs, opto components on PC boards; used in industrial, commercial and medical products.
- Standoffs can accommodate various configurations of both bi and tri-lead LEDs. Lead spacing can vary from .050" to .100" on center. Standoffs will form the leads for easy insertion into the PCB.
- Provide component height control, help eliminat component tilting, lead shorting, while securin LEDs to the standoffs.
- Cylindrical plastic body has lead separation char nels, clearance pads for PCB cleaning, lead reten tion tabs to maintain standoff and component as unit prior to board insertion.

ELECTRONIC BALLASTS FOR FLUORESCENT LIGHTING

FEATURES:

- Low Cost Economic Design.
- High Frequency - 45 KHz, Resonant operation to provide high efficiency with 27% energy savings over electromagnetic ballasts.
- No flicker so they are easy on the eyes.
- Can also be used with circular or U-shaped lamps.
- Minimum starting temperature: 50 deg. F.
- Power Factor >97%.
- Total harmonic distortion:
  - – Rapid Start: 15% max.
  - – Instant Start: 11% max.
- Third harmonic distortion:
  - – Rapid Start: 10% max.
  - – Instant Start: 7% max.
- Crest factor: 1.4 typical.
- Sound rating: Class A.
- UL thermal rating: Class P.

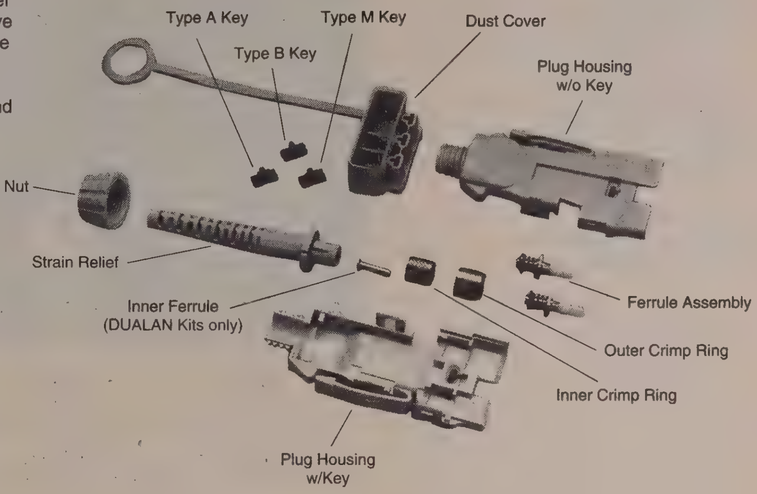
SD (Fixed Shroud Duplex) System

For more information request Catalog 82188

e AMP FSD (Fixed Shroud Duplex) System meets the quirements of the ANSI X3T9.5 Fiber Distributed Data Interface DDI) standard. The FSD System hardware is used for high rformance FDDI local area networks or other applications quiring duplex fiber optic interconnections. The FSD connector is wo-channel snap-fit connector that combines low loss (0.6 dB ical) with positive side-latch mating, polarization, keying and fiber ain relief. The fiber ferrules are 2.5 mm ceramic. A rigid protective roud guards the connector's free floating ferrules against damage m mishandling or mismating. The connector is available for field rmination or as a preterminated cable assembly. The FSD plug n mate directly to data links. A variety of connector couplings, and ll outlets for fixed building cabling are available.

Multimode
Meets requirements of FDDI PMD – ANSI X3.166 – 1990

DI Compatible, plug uses 2.5 mm ceramic free-floating rrules for low loss — 0.6 dB typical. Plug has positive de-latch mating, designed-in polarization, keying, and nd-limiting strain relief.



Hole Diameter (µm)	Plug Part Numbers		Replacement Ferrules
	Cable Type		
	DUALAN	Light Duty Dual	
125	501780-1	502015-1	501779-1*
140	501780-2	502015-2	501779-3*

art number is for individual ferrule IS 9373

FSD Receptacles

- Multimode
- Self-aligning, free-floating interface for constant, low loss mating.
- Conforms to the requirements of the FDDI PMD – ANSI X3.166 – 1990 Specification.

FSD Bulkhead Adapter

Connects FSD plug to two ST-Style plug connectors.

eying for FDDI All connectors and cable assemblies are shipped with color-coded keys to ensure oper connection. Key styles A and B are used with dual attach stations. Key styles M (master) and (slave) are used for the attachment of a single attach station to a concentrator, with M at the ncentrator end, and S at the station end. Three keys are provided (A, B & M), to be installed by the customer/user. The connector without a key installed is a type S, and will mate to any receptacle, regardless of its key style.

Specifications subject to change.

Multimode and Singlemode Cable Assemblies

Product Facts

- Standard and custom assemblies
- All use AMP's bend limiting strain relief
- Any connector style, cable type, strain relief, and length are available
- All cable is OFNR or OFNP rated
- All assemblies are 100% tested prior to shipment
- PC or SPC finished singlemode

FSMA Active Device Mounts

- Accepts TO-18, TO-46, TO-52 and Honeywell Low-Cost Plastic Sweetspot active devices
- PC Board and Panel Mount designs available
- Corrosion resistant construction
- Use with FSMA-I or FSMA-II plugs (see above)
- Environmentally sealed and unsealed versions available

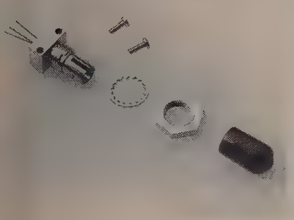
ST-Style Board Mount LED

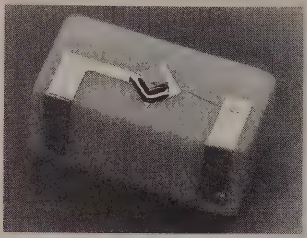


MP InGaAsP SLED ST-Style ADM roducts offer high coupled powers or digital fiber optic transmission pplications. Compatible with ndustry standards, AMP LED DMs consist of hermetically sealed O-18 style SLEDs which have een actively aligned for maximum oupled power. Also available in SMA, FC, SC and biconic active evice mounts.

roduct Facts

- High coupled power typically 75 µW into 62.5 µm fiber
- High reliability MTTW 2.3 x 10^8 hours
- Wavelength centered at 1320 nm
- -40° to +85°C operating temperature
- Hermetically sealed TO-18 style package installed in industry standard ADMs

Submounted PIN



Submounted PIN design balances high-speed performance with noise-free linear output. Spectral response has been optimized for the long wave-length region of 1150 nm to 1600 nm. Every component delivered has passed extensive high-temperature screening for long-term reliability.

Product Facts

- High reliability passivated planar structure
- High responsivity
- Low dark current
- Low capacitance
- -40° to +85°C operating temperature

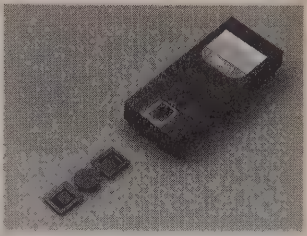
PIN/Preamp Module

The AMP PIN/Preamp module offers an InGaAs PIN photodetector coupled with a GaAs transimpedance amplifier in a hermetically sealed TO-18 package installed in an industry standard receptacle. The module also includes on chip AGC for wide dynamic range (36 dB optical) as well as low noise, wide bandwidth operation. The PIN/Preamp module is ideally suited for data rates ranging from 1 Mb/s up to SONET OC-1 fiber optic receiver applications. PIN/Preamp modules are processed to comply with Bellcore advisory TA-TSY-000983. Available in SC, ST and FC active mounts.

Product Facts

- 50 MHz analog bandwidth
- Low noise
- -43 dBm sensitivity
- Automatic gain control
- Industry standard ADM
- Each unit serialized

FSD Multimode Transceiver



The transmitter produces a shaped optical output signal from an ECL electrical input. The receiver produces an ECL signal from an optical input.

Product Facts

- Fiber Distributed Data Interface (FDDI) compliant
- 22-pin multisourced package
- AMP FSD (Fixed Shroud Duplex) Interface with field programmable keys
- Internally shielded plastic package with low EMI/RFI emission
- High optical power budget
- 125 Mb/s performance
- Compatible with all standard FDDI chip sets
- Single power supply

T-Style Board Mount PIN

MP InGaAs PIN photodetectors ffer high responsivity for nearly all igital and analog fiber optic pplications. Also available in SMA, FC, SC and biconic active evice mounts.

roduct Facts

- High reliability passivated planar structure
- High responsivity
- Low dark current
- Low capacitance
- Hermetically sealed TO-18 style package installed in industry standard ADMs
- -40° to +85°C operating temperature

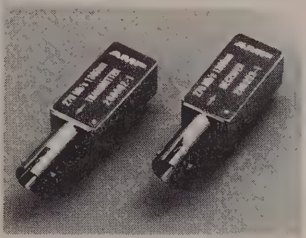
SC/PC and FC/PC Minicom Laser Module

The Minicom Laser module is a connectorized component with a standard SC/PC or FC/PC Type interface for singlemode fiber applications. The high temperature laser module incorporates a 1300 nm InGaAsP buried crescent laser diode. The Minicom Laser is ideal for most short and medium distance digital loop transmission applications over singlemode fiber. Laser modules are processed to comply with Bellcore advisory TA-TSY-000983.

Product Facts

- 1300 nm wavelength
- -40°C to +85°C operating temperature
- Hermetically sealed
- FC or SC connector interface
- High speed (1 GB/s)
- InGaAs monitor detector
- Four-lead package
- Each unit serialized

Small Outline Transmitter and Receiver 16-Pin FDDI Modules

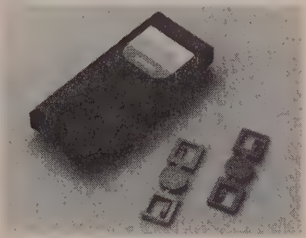


AMP Small Outline Datalinks provide Simplex logic-to-logic data transmission over a fiber optic transmission path. It has the advantage of small shielded rugged packaging which can be mounted on most circuit boards.

Product Facts

- Fiber Distributed Data Interface (FDDI) compliant
- 16-pin multisourced packages
- ST-Style optical interface
- High optical power budget
- Compatible with all standard FDDI chip sets
- Single power supply
- Temperature and power supply compensated transmitter optical output

Singlemode FDDI Laser Transceiver



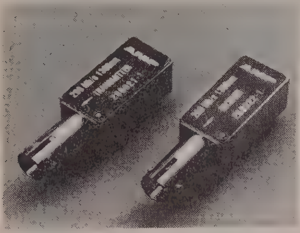
The transmitter launches a minimum of -19 dBm 1300 nm laser light into the 9/125 µm singlemode optical fiber.

Product Facts

- FDDI Category 1 singlemode compliant
- 22-pin multimode package
- Drops in to 22-pin multimode footprint
- AMP Singlemode FSD (Fixed Shroud Duplex) connector interface
- Field keyable case polarized for singlemode connector
- Internally shielded plastic package with low EMI/RFI emission
- Single power supply
- Compatible with all standard FDDI chip sets

Specifications subject to change.

Small Outline Transmitter and Receiver 16-Pin 200 Mb/s Modules



The AMP 200 Mbits/s Small Outline Transmitter and Receiver provide for 1300 nm wavelength high-speed transmission over 62.5/125 µm multimode optical fiber.

Product Facts

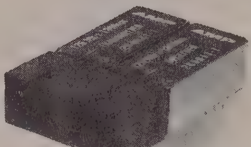
- 10 Mbits/s to 200 Mbits/s NRZ operation
- 16-pin multisourced packages
- ST-Style optical connector interface
- Single +5 V power supply

Applications

- High Speed Channel Extenders
- Low Cost Peripheral Link
- Channel Extenders
- Backbone

Note: RSD 200 Mb/s Transceiver also available

Small Outline SC DUPLEX FDDI Transceiver

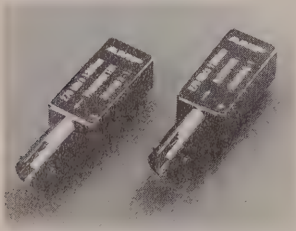


AMP SC DUPLEX Transceivers offer full functionality, for FDDI and related Data Link applications, in a new multisourced high density footprint.

Product Facts

- New multisourced footprint
- SC DUPLEX interconnect
- Compatible with all standard FDDI chip sets
- Single power supply
- Temperature compensated output
- Full FDDI 2 km budget performance
- Compatible with 10H, 10K and 100K raised ECL

Small Outline Transmitter and Receiver 16-Pin Fiber Channel Modules



AMP small outline 16-pin data links offer full functionality for 270 Mbits/s Fiber Channel applications.

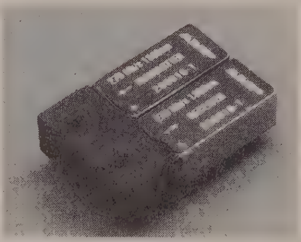
Product Facts

- 10 Mbits/s to 270 Mbits/s NRZ operation
- 16-pin small outline footprint
- Full FC-0 1 km budget performance at 270 Mbits/s per 25-M6-LE-1
- Single power supply
- ST-Style optical connector interface

Applications

- Fiber Channel FC-0
- Point to Point High Speed Serial Links
- Channel Extenders
- Backbone

Small Outline SC DUPLEX Fiber Channel Transceiver



AMP SC DUPLEX Transceivers offer full functionality, for Fiber Channel and related Data Link applications, in a new multisourced high density footprint.

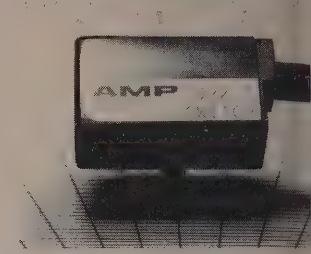
Product Facts

- New multisourced footprint
- SC DUPLEX interconnect
- Compatible with all standard Fiber Channel chip sets
- Single power supply

Applications

- Fiber Channel FC-0
- Point to Point Links for Peripheral I/O, PBX Internode Links, Multiplexers, Clock Distribution, Multi-processors
- Active Star Networks

Latching and Nonlatching Fiber Optic Switches



Single-pole, double-throw (SPDT) and double-pole double-throw (DPDT) switches permit the transfer of optic signals from an input fiber to either of two output fibers without significant loss. These miniature switches are well-suited to printed circuit board mounting.

Fiber Optic Switch Base Part Numbers

Style	Electrical Interface	Connector	Pigtail Options			
			1 x 2 SPDT, Low Proifle		Dual 1 x 2 DPDT	
			1.2 mm Loose Tube	3 mm Jacket	1.2 mm Teflon	3 mm Cable
Latching	Bent Pin	None	99400	99401	99961	99962

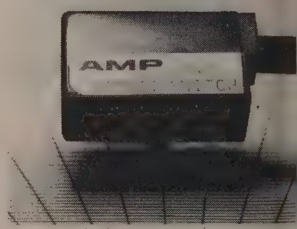
Dash Numbers

Fiber Size (µm)		
50/125	62.5/125	100/140
-1	-2	-3

Part Numbers
To determine a part number, select a base part number that describes the desired switch style. Add dash number suffix from the dash number table to specify fiber size.

Fiber Optic Bypass Switches



Fully reversing FDDI bypass switches provide bypass protection for token-passing, fiber optic ring networks per IEEE 802.5 and ANSI FDDI standards. A "self-test path" permits testing the node's transmitter against its receiver when the switch is in the bypass mode.

FDDI, Low Profile, 2 x 2 Fully Reversing Bypass Switches

Electrical Interface	Connector	Pigtail Options	
		1.2 mm Loose Tube	3 mm Jacket
Bent Pin	None	99404	99405
	ST-Style	99416	99417
Straight Pin	None	99422	99423
	ST-Style	99428	99429

Note: Use dash number table above to specify fiber size

Applications

- Logical ring networks
- FDDI installations

Specifications subject to change.

Call 1-800-522-6752 for product informatio
and 1-800-722-1111 for tooling informatior

For more information request Catalog 82188

ultimode Couplers

ultimode, bi-directional couplers split and ombine light from fibers without significant loss. hese branching devices are used in pplications of optical busses, communication nd local area networks, and test/sensor ystems.

art Numbers

o determine a part number, select a base part umber that describes the desired coupler style. dd dash number prefix and/or suffix from the ash number table to specify connectors and/or ber size.

-Port Coupler Heavy-Duty Package

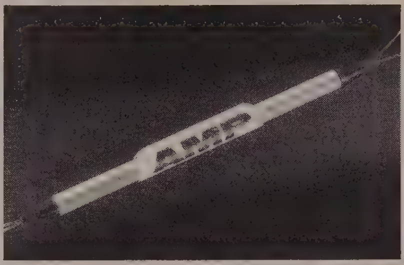
SMA II (906-Style)	-5	-1	-6	-2

ther connectors available. Also available w/o nnectors.

Singlemode Wideband Coupler/Splitter



Couplers are available in a wide range of styles and sizes to split and combine light without significant loss. These branching devices are used in applications of subscriber loop, broadband communication networks, and test/sensor systems.

Applications

- Communication system branching and duplexing (video and sensors)
- CATV
- Subscriber loop
- Taps for signal monitoring
- Test equipment

Note: Contact AMP for the full range of split ratios, package styles, specifications and connector types.

Wavelength Division Multiplexers (WDMs)

MULTIMODE MUX
AMP
S/M MUX

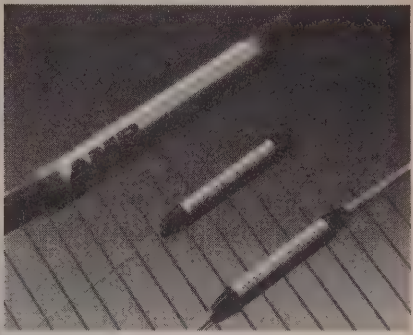
Multiplexers allow use of a single fiber for simultaneous transmission of two signals of different wavelengths (colors). They combine two signals for output onto a single fiber. Demultiplexers separate the combined wavelengths from the single fiber into individual fibers. They are available both for multimode as well as singlemode applications.

Note: Contact AMP for information on the complete line of WDMs and the various package styles, performance levels and connector options available.

Applications

- ISDN subscriber loop
- Long-haul telecommunication
- Multichannel video
- Broadband multichannel communication
- Terminal and telephone communication
- High-speed, computer-to-peripheral links
- Two-way, single-fiber CATV links
- CCTV
- LAN, MAN & WAN

Fixed Optical Fiber Attenuator 1310 or 1550 nm ±40 nm; 1200-1600 nm Broadband



In-Line Fixed Attenuators may be used to reduce optical intensity without introducing additional system noise or back reflections. The in-line fixed attenuator is wavelength insensitive and is used over a wide range of optical sources.

Product Facts

- Singlemode fiber
- Passive all-fiber design
- No additional back reflection noise
- In-line style
- Compact package
- Easily installed
- Environmentally stable

Singlemode Variable Attenuator

Part Number 107059

AMP's singlemode variable attenuator is a passive in-line component. It reduces optical power without introducing back reflection.

Product Facts

- Extremely low back reflection
- Completely bi-directional operation
- Temperature stable over range -40°C to +75°C
- Slimline design allows dense mounting and easy access to adjustment screw
- Wide range of connector and pigtail options

Dash Numbers for Connector Option	Part Number 107059

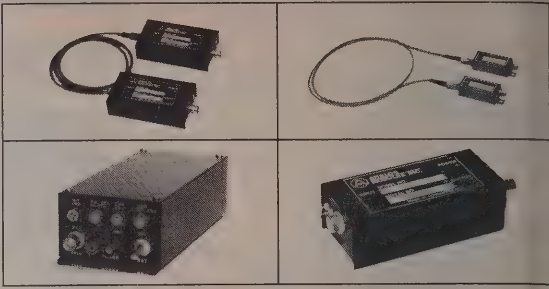
ANALOG MODULES, INC.

Specialists in Analog Electronics and Electro-Optics



Analog Modules, Inc. is a leader in analog electronics and electro-optic products. Since 1979, we have continued to provide solutions to otherwise difficult transmitter/receiver problems. Call our applications staff today to discuss your requirements.

- ■ **ANALOG FIBER-OPTIC LINKS**
- ■ **LED AND LASER DIODE DRIVERS/TRANSMITTERS**
- ■ **PHOTODETECTOR — AMPLIFIER MODULES**
- ■ **CUSTOM MODULES (MIL SPECS AVAILABLE)**

ANALOG FIBER OPTIC LINKS

Model	Type	Link 1. Bandwidth	Input TX 2. Output Rx	Dynamic Range (Min)	Wave-length	Supply Voltage (V)	Pkg. Dim. (Inches)	Special Features
731Tx	Analog	.005Hz-100MHz	0 to 1V (50Ω)	52db (voltage) peak signal to rms noise	780nm	+/- 15	3.5 x 2.03 x 0.92	High speed link with 1.2% THD typical. Adjustable scale factor and offset at Receiver.
731Rx	Analog		0 to 1V (into 50Ω)			+/- 15	3.5 x 2.03 x 0.92	
732Tx	Analog/Digital	DC-10MHz	±2.5V or 0-5V(50Ω)	55db (voltage) peak signal to rms noise	850nm	+/- 12	2.96 x 1.0 x 0.61	Transparent transmission of DC and AC information, Vin = Vout. No coding needed for digital use. Adjustable scale factor and offset at receiver.
732Rx	Analog/Digital		±2.5V or 0-5V (into 1KΩ)			+/- 12	2.96 x 1.0 x 0.61	

1. **Model 731** Tx/Rx offers DC restoration as an option. Other Bandwidths available. 2. Other Input/Output ranges available.

LED AND LASER DIODE DRIVERS/TRANSMITTERS

Model	Type	Pulse Rate	Output Current	Current Risetime	Pulse Width	Diode Voltage	Noise (A/√Hz)	Supply Voltage (V)	Pkg. Dim. (Inches)	Special Features
761	Laser Tx	To 100KHz	2 to 50	1 to 70nS	4 to 100nS	5-15V	N/A	+15 to +28 or 115VAC	6.016 x 1.5 diameter	Fast current risetime and tube mount design for easy alignment.
774	LED Tx	DC	5-100mA	DC	Continuous	10V	35pA	+24	3.12 x 1.5 x 1.09	Low noise current source for detector biasing or LED/Laser diode drive, 35 pA/√Hz over 40MHz bandwidth.
775	LED Tx	DC-100MHz	0-150mA	4nS	Set by control I/P	5V	2nA	-15	3.12 x 1.5 x 1.09	Wideband, programmable, current source for LED/Laser diode drive.
776	Laser Tx	100Hz-6KHz	10 to 50	70nS	100nS-1μS	15V	N/A	+28 or 115VAC	6.016 x 1.5 diameter	Longer pulsewidths and short current risetime with tube mount design for easy alignment.
778	Laser Tx	15Hz-1KHz	1-100	0.5 or 5μS	50μS-1mS Standard	20V	N/A	+12 to +28	7.38 x 3.1 x 2.0	High Power laser diode pulser, pulsewidths to 1 mS and duty factor >5%. Available in various voltage/current configurations.

PHOTODETECTOR—AMPLIFIER MODULES

Model	Input Photo-detector	Amplifier Type	Frequency 1. Response	Gain (V/W)	Noise (W√Hz)	Output Load (Ω)	Dynamic Range (Voltage)	Supply Voltage (V)	Pkg. Dim. (Inches)	Special Features 2.
711	Si, InGaAs	311	DC-1.5MHz	77V/nW to 0.5V/μW	0.1fW	50	> 45db	+/-15	3.12 x 1.5 x 1.09	Choice of various pin and APD detectors
712A	Si, InGaAs	312A	200Hz-80MHz	.05-7V/μW	9fW	50	> 45db	+15	3.5 x 2.03 x 0.92	Choice of various pin and APD detectors
713A	Si, InGaAs	313A	200Hz-300MHz	7.4-1500V/mW	0.1pW	50	> 45db	+15	3.5 x 2.03 x 0.92	Choice of various pin and APD detectors

1 DC response also available. 2. **Model 521** HV Power Supply and **Model 522** temperature compensated HV power supply available for APD photobiasing.

Also Available from Analog Modules, Inc.:

- ■ **AMPLIFIERS, VIDEO DISTRIBUTION AMPLIFIERS**
- ■ **FAST PEAK PULSE STRETCHERS**
- ■ **LASER RANGEFINDER ELECTRONICS**
- ■ **LASER POWER SUPPLIES AND ASSOCIATED ELECTRONICS**

EXFO
Electro-Optical Engineering

FIBEROPTIC TEST INSTRUMENTS

EXFO
Electro-Optical Engineering

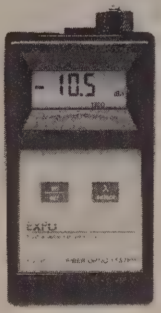
465 Godin Ave., Vanier, Quebec, Canada G1M 3G7 Fax:418-683-2170 **Tel.: 1-800-663-EXFO**

EXFO manufactures a complete line of fiberoptic test equipment for every application: network installation (LAN, WAN, ISDN, FDDI), telephony, manufacturing, laboratory etc. This page presents only a few of our high quality reputable instruments. Call now for more details.

FAX US THIS AD WITH YOUR NEXT ORDER AND GET A 2 % DISCOUNT

RUGGED POWER METERS: FOT-10 & FOT-20

- EXFO's most affordable meters.
- Perfect for LAN and FDDI.
- Measure at 3 wavelengths (630/820/850 or 850/1300/1550).
- Calibrated electronically for maximum reliability.
- Large dynamic range: +3 to -55 dBm.
- CATV (high power) version available.
- FOT-10 reads in dBm, FOT-20 reads in dB, dBm, and Watts.
- Comes with AC adapter, case, connector-adapter and battery.
- Pocket size: 5 3/4 x 3 1/8 x 1 1/2 in.
- Delivery from stock, from $495.00.



FOT-10

FOT-20

FOT-30

ATTENUATION TESTERS

Low cost attenuation meter (FOT-30)

- Source and meter in one instrument.
- Designed for bi-directional or loop-back testing.
- Performance and features of FOT-20.
- Choice of general purpose LED source: 850, 1300 or 1550 nm.
- Rugged, pocket size 6 x 3 1/4 x 1 3/8 in.
- Stock to 2 weeks, from $995.00.

HIGH PERFORMANCE TEST SET: FOT-50

- +3 to -70 dBm range, ± 0.2 dB accuracy.
- Reads in dB, dBm, and Watts.
- Optimal Singlemode or multimode source (850, 1300 or 1550 nm).
- RS-232 interface in option.
- Stores one reference for each wavelength.
- Measures at 20 wavelengths.
- Rechargeable battery, charger, case and connector-adapter included.
- Widely accepted by telephone companies.
- CATV version available.
- Compact, impact resistant casing 7 x 3 7/8 x 1 7/8 in.
- Delivery from stock, from $950.00.

FOT-50

LED AND LASER LIGHT SOURCES:

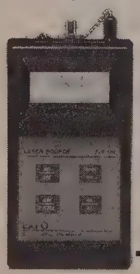
FOS-120

Inexpensive LED source (FOS-120)

- Choice of 850, 1300, 1550 and 850/130 nm.
- Two output powers: Low and High.
- Continuous or pulsed (2 kHz) transmission.
- Can be used for fiber identification purposes.
- Provided with ST, SC SMA or FC connectors.
- Singlemode or multimode applications.
- Small and light weight for maximum portability 5 3/4 x 3 1/8 x 1 1/2 in.
- Delivery from stock, from $495.00.

Low cost laser source (FLS-130)

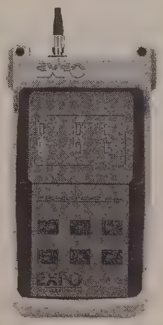
- Same features as FOS-120 except:
- Transmits at 1300, 1550 and 1300/1550.
- Connectors are ST and FC.
- Delivery from stock, from $1095.00.



FLS-130

VISUAL FAULT LOCATOR: FLS-230A

- Bright laser light at 650 nm (0.95 mW) shows through fiber jacket.
- Pinpoints faults, poor splices and connections, bends, etc.
- 2 output powers: Low (saves batteries) and High (maximum visibility).
- Operates on AC charger, NiCd or alkaline battery.
- Auto off to extend battery life.
- Sold with protective holster, charger, strap, stand and case.
- Delivery from stock, from $1795.00.



FLS-230A

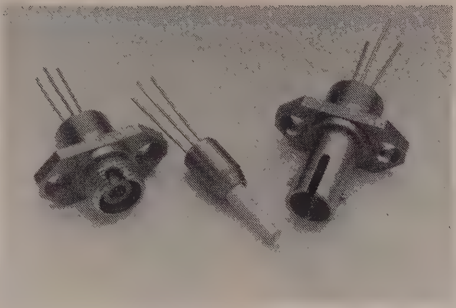
aser Diode, Inc.

Fully Integrated Opto-Electronic Components and Subsystems Manufacturer

FIBEROPTIC COMPONENTS

aser Diode, Inc. is leading manuacturer in the opto-electronics ndustry with over 25 years of expeience. The Company designs and roduces electro-optic semiconducor materials, components and subystems for applications in telecomnunications such as SONET, data ommunications, avionics, sensors, nd other applications requiring igh reliability, quality, and dvanced performance.



Laser diode packages: FC/PC receptacle, pigtailed coax and ST receptacle

1300nm, 1500nm and 830nm Lasers

Laser Diode's series of long wavelenth lasers consist of an InGaAsP buried crescent laser chip coupled to a singlemode or multimode fiber pigtail.

Light Emitting Diodes

Laser Diode manufactures many models of both edge and surface emitting LEDs. These devices are available at wavelengths of 1300, 1550 and 830nm, and are supplied in dual in-line (DIL), FC/ST receptacles, or coaxial pigtail packages.

Laser Diode, Inc.

A Fully Integrated Opto-Electronic Components and Subsystems Manufacturer

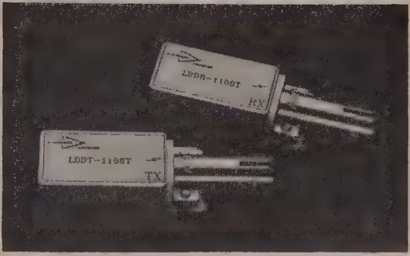
FIBEROPTIC DATA LINKS

Laser Diode, Inc. offers a full range of fiber optic transmitters & receivers which utilize the company's high performance optical components. State of the art hybrid technology is incorporated to achieve products which find applications in advanced systems requiring unique performance, such as burst data operation, or rugged screening to MIL-STD-883C. Transmitters & receivers are available with TTL, ECL or PECL interface. Connectorized or pigtailed units operating over singlemode of multimode fiber are available. Call the Sales department for complete data sheets.



ECL/PECL Laser Transmitters

Wide Temperature uncooled or T.E. cooled options.

SI UNITS

RELATIVE QUANTITY SYMBOLS

≠	not equal to
≈	approximately equal to
∝	proportional to
<	smaller than
≤	smaller than or equal to
«	much smaller than
>	larger than
≥	larger than or equal to
»	much larger than
≡	identical to or equivalent
↑	increases
↓	decreases

PREFIXES FOR SI UNITS

Multiple	Prefix	Symbol
10^{12}	tera	T
10^9	giga	G
10^6	mega	M
10^3	kilo	k
10^{-3}	milli	m
10^{-6}	micro	µ
10^{-9}	nano	n
10^{-12}	pico	p

Quantity	Symbol	SI Unit	Symbol	Derivation
acceleration	a	m s^{-2}	—	velocity/time
acceleration due to gravity	g	m s^{-2}	—	velocity/time
amount of substance	n	mole	mol	mole fraction (n) used
amplification factor	μ	*a ratio*	—	—
angle	$\theta_1, \varphi_1, \alpha_1$	—	—	—
angle of incidence	i	degree or radian	°	—
angle of refraction	r	degree or radian	°	—
angle, Bragg	θ	number	—	—
angle, critical	c	degree or radian	°	—
anode slope resistance	R_A	ohm	Ω	$\Delta V_a / \Delta I_a$
area	A	metres squared	m^2	$l \times b$
atomic number	Z	a number	—	number of protons
Avogadro constant	L, N_A	number	—	—
breadth	b	metre	m	fundamental unit
capacitance	C	farad	F	charge/p.d.
charge, electric	Q	coulomb	C	current × time
charge on electron	e	coulomb	C	$1{\cdot}6 \times 10^{-19}$ C
conductance	G	ohm^{-1}	Ω^{-1}	reciprocal of resistance
current, electric	I	ampere	A	fundamental unit
decay constant	λ	*a ratio*	—	—
density	ρ	kg m^{-3}	—	m/V
distance along path	s	metre	m	fundamental unit
efficiency	η	*a ratio*	—	work output/work input
electrochemical equiv.	z	g C^{-1}	—	mass/charge
electromotive force	E	volt	V	energy/charge
electron	e	—	—	—
energy	E	joule	J	N m
energy, kinetic	E_k	joule	J	N m. $E_k = 1/2mv^2$
energy, potential	E_p	joule	J	N m. $E_p = mgh$
Faraday constant	F	coulomb mol^{-1}	C mol^{-1}	96,500 C mol^{-1}
field strength, electric	E	V m^{-1}	—	potential gradient: p.d./dist.
field-strength magnetic	H	ampere-turns	—	current × no. of turns
flux, magnetic	Φ	weber	Wb	e.m.f/rate of change of flux
flux density	B	tesla	T	flux/area
focal length	f	metre	m	—
force	F	newton	N	kg m s^{-2}
free energy	ΔG	joule	J	—
frequency	f	hertz	Hz	oscillations/time
gas constant	r	joule	J	energy
half-life,radioactivity	$t_{1/2}$	second	s	fundamental unit
heat capacity	C	J K^{-1}	—	quantity of heat/temp. rise
heat of reaction	ΔH	joule	J	heat energy
heat capacity, specific	c	J K^{-1} kg^{-1}	—	heat capacity/mass
heat, quantity of	q	joule	J	energy

SI UNITS

Quantity	Symbol	SI Unit	Symbol	Derivation
height	h	metre	m	fundamental unit

inductance, mutual	M	henry	H	induced e.m.f./rate of change of current
inductance, self	L	henry	H	—
intensity of radiation	I	*a number*	—	—
latent heat	L	joule	J	quantity of heat
latent heat, specific	l	J kg^{-1}	—	quantity of heat
latent heat, molar	L_m	joule mol $^{-1}$	J	quantity of heat
length	l	metre	m	fundamental unit
magnetizing force	H	ampere-turns	—	—
magnetic moment	m	Wb m	—	torque in unit magnetic field
magnification, linear	m	*a ratio*	—	—
mass	m	kilogramme	kg	fundamental unit
mass number	A	*a number*	—	number of neutrons + protons
molar volume	V_m	(dm^3)	—	volume of 1 mole
molar solution	M	*a ratio*	—	moles/dm^3
moment of force	—	N m	—	force × perp. distance
neutron number	N	*a number*	—	number of neutrons
number	n	—	—	—
number of molecules	N	—	—	—
number turns on coil	n	*a number*	—	—
number order spectrum	p	*a number*	—	—
object distance	u	metre	m	fundamental unit
peak current	I_o	ampere	A	see current
peak e.m.f.	E_o	volt	V	see e.m.f.
period	T	second	s	fundamental unit
permeability	μ	H m^{-1}	—	henry/metre
permeability, vacuum	μ_o	H m^{-1}	—	—
permeability, relative	μ_r	*a ratio*	—	$\mu = \frac{\mu}{\mu_o}$
permittivity	ε	F m^{-1}	—	farad/metre
permittivity, vacuum	ε_o	F m^{-1}	—	farad/metre
permittivity, relative	ε_r	*a ratio*	—	$\varepsilon_r = \frac{\varepsilon}{\varepsilon_o}$
potential, electric	V	volt	V	energy/charge
potential difference	V	volt	V	energy/charge
power	P	watt	W	J s^{-1}
pressure	p	pascal	Pa	N m^{-2}: force/area
radius	r	metre	m	fundamental unit
reactance	X	ohm	Ω	E_o/I_o
refractive index	n	*a ratio*	—	—
resistance	R	ohm	Ω	p.d./current
resistivity, electrical	ρ	ohm-metre	—	resistance × length
relative density	d	*a ratio*	—	ρ_{sub}/ρ_{water}
r.m.s. current	$I_{r.m.s}$	ampere	A	see current
r.m.s. voltage	$V_{r.m.s}$	volt	V	see e.m.f.
slit separation	s	metre	m	fundamental unit
tension	T	newton	N	see force
temperature, Celsius	θ	degree C	°C	from kelvin
temp. interval	θ	degree	° or K	—
temp. absolute	T	kelvin	K	fundamental unit
thickness	d	metre	m	fundamental unit
time	t	second	s	fundamental unit
torque	T	Nm	—	see moment
turns ratio	T	*a ratio*	—	n_{sec}/n_{prim}
(unit of electricity)	—	kW h	—	kilowatt × hour
velocity	u, υ	ms^{-1}	—	distance/time
velocity, angular	ω	second^{-1}	s^{-1}	angle/time
velocity, e.m.waves	c	m s^{-1}	—	—
velocity of sound	υ	m s^{-1}	—	—
volume	V	metre cubed	m^3	l × b × h
wavelength	λ	metre	m	fundamental unit
work	w	joule	J	force x distance (Nm)
weight	W	newton	N	kg m s^{-2}or mg

Fiber Optic Solutions from Litton

From Components to Complete System Engineering Capabilities

Our expertise covers a wide variety of digital and analog data transmission systems for military, industrial and commercial applications. We can work to your specifications or design and manufacture systems or sub-systems to meet your specific requirements.

Transmitters and Receivers

Miniature, Hybridized units for Point-to-Point and Data Bus Applications

AC or Edge-coupled with data rates up to 100 Mbps NRZ. Transmitters with high launch power, and receivers with superior sensitivity and broad dynamic range. Electrical interface compatibility includes PECL, ECL and TTL. Qualifiable to MIL-STD-883. Products specifically designed to meet the requirements of:

- ARINC 629
- ARINC 636
- MIL-STD-1773
- STANAG 3910

Couplers

A full line of couplers is available including singlemode couplers and multimode star couplers. Used in both commercial and military systems, including many applications requiring full MIL specification. Will operate in a temperature range of -55° to 125°C. These couplers are designed to meet environmental conditions for land, shipboard and aircraft.

Video/Data Transceiver Modules

For Security Applications

E04330/4331 sends control information and returns video signals over a single fiber when remote CCTV cameras require pan, tilt and zoom (PTZ) control signals. The video signal portion is compatible with a variety of EIA CCTV standards including RS-170, RS-330 and RS-343. The data portion of the transceiver is capable of transmitting either RS-232, RS-422 or TTL data.

E03691 is an extremely flexible and versatile multiple format digital data transceiver module that functions as a data link/converter/repeater. The unit provides inputs and outputs for RS-232, RS-422 and TTL data format devices, allowing the unit to be used for a variety of control signal applications without the need to stock transceivers for each specific data format.

NEW Litton's new FM video system is capable of providing one to three video channels plus bi-directional voice and data signals over a single fiber. The use of FM technology permits multiplexing of video, data and voice channels on a single fiber. The video portion is compatible with a variety of EIA CCTV standards including RS-170, RS-330, and RS-343. The data portion is capable of transmitting RS-232, RS-485, and TTL data up to 1Mbps. Voice channels provide quality voice communications (300Hz - 3.5KHz)

Fiber Optic Rotary Joint (FORJ)

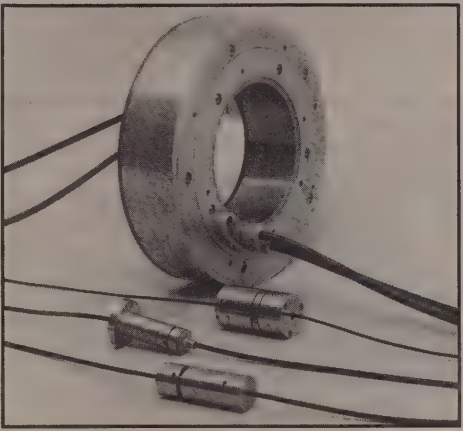
A FORJ is designed to provide a single optical path across a rotating interface. Litton offers several FORJs:

On-Axis: A compact, totally passive single fiber device which occupies the centerline of rotation.

Low Cost: This small unit offers a low cost alternative to our on-axis FORJ.

Off-Axis: A multi-channel active/passive device with 4" bore (for running hydraulic or pneumatic lines, or structural members). Transmitter and receiver are supplied with the FORJ. Data rates up to 50 Mbits/sec.

Single Mode: Provides rotary coupling for single mode fiber links.



Rack-Mounted Transmitter and Receiver Systems

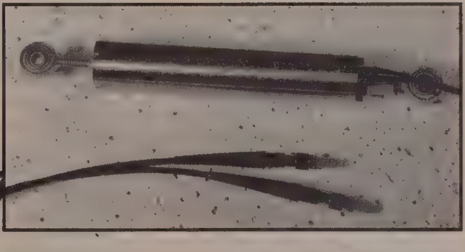
Many of our traditional components are available in modular, 19" rack-mounted versions. Ten bays can accommodate up to twenty standard transmitters and receivers plus a common power supply. Connected to a 110 VAC outlet, it has a master on/off switch and a fuse for protection from overloads.

All connections (electrical and optical) are on the backplate of the modules. SMA receptacles for optical interfaces and BNC connectors for the electrical interface are standard. Other connector interfaces are available upon request.

Optical Sensors

Environmental (pressure, liquid level, vibration, chemical, etc.) and position (rotary and linear) are available. Custom sensors can be designed and manufactured to meet your specific needs.

Also available are sensor systems combining computer control of optically integrated modules containing emitters, detectors, optical splitters, WDMs, filters and spectrum analyzers.



We speak the language of LIGHT

Fiber Optic Solutions from Litton

From Components to Complete System Engineering Capabilities

Our expertise covers a wide variety of digital and analog data transmission systems for military, industrial and commercial applications. We can work to your specifications or design and manufacture systems or sub-systems to meet your specific requirements.

ALL NEW with this edition of EEM

GET ORGANIZED!

Are your catalog files organized? Can you find any given catalog in a matter of seconds? If your answer is "Yes," you probably already have the EEM File System. But, if you said "No," you really ought to look into this simple system. It will save hours of time and tons of aggravation.

The EEM File System was invented over twenty-five years ago to help people who specify, buy, or work with electronic products and equipment. It is upgraded on a constant basis to reflect the current state of the art. It's easy to use and easy to customize to your particular needs.

You say you want to file catalogs by type of product? That's easy to do with the System. But, what are you going to do when there are multiple products in one catalog? Take Mallory for example. There are all kinds of products in the Mallory Short Form Catalog. With the EEM File System all you do is file the catalog under "M" for Mallory and refer to it on all of the cross reference cards that apply.

There are thousands of EEM File Systems in everyday use in engineering and procurement offices all over the world. Shouldn't you be using this proven system?

The EEM File System is shipped in one neat package. The package contains everything you need to set up your very own filing system. Best of all, it's easy to get and very affordable. Send a check or money order for $25.00 and EEM will pay the postage and sales tax. If you must use a purchase order, please add $5.00 for postage and handling. An invoice will be mailed to you under separate cover.

Don't waste any more time. Get organized now!

EEM FILE SYSTEM,

IGH RESOLUTION VIDEO RANSMISSION SYSTEMS

o transmit sharp, flawless high resolution graphics from ne location to another via fiber, Optelecom provides:

- High resolution RGB/VGA video transmission systems that send 75MHz bandwidth video signals 3.5 miles. These units support pixel clock rates up to 120MHz.

ATA COMMUNICATION PRODUCTS

or top of the line data communication products that keep our bottom line looking good, Optelecom offers a wide election of modems and multiplexers that transmit and eceive RS232, RS422, TTL and/or clock signals over one r more fibers.

MODEL 3710AT
VIDEO/VOICE/DATA

VIDEO, VOICE AND DATA TRANSMISSION SYSTEMS

Ideal for CCTV, video conferencing, and broadcast applications, Optelecom's video, voice and data transmission systems send multiple signals in one or both directions over one or more fibers, without crosstalk or interference.These systems use superior PFM technology to transmit high quality signals over a longer distance at a lower cost and include:

- Single fiber transmission systems that combine video, voice and data signals into one optical signal that can be transmitted 12 miles.
- Broadcast quality transmission system that exceeds RS250C medium haul requirements and sends video and audio signals 25 miles over a single fiber.

DEDICATED CUSTOMER SERVICE & SUPPORT

Optelecom's commitment is to provide you with one complete source of fiber optic transmission systems combined with total customer support.

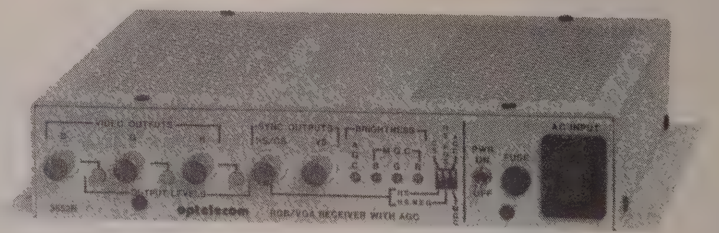
HIGH RESOLUTION RGB/VGA VIDEO TRANSMISSION WITH AUTOMATIC GAIN CONTROL VIA 3 FIBERS

CALL OPTELECOM

1-800-BY-FIBER



MODEL 3652

Extend the transmission distance of a graphics workstation to 21,000 feet via fiber optics with Optelecom's Model 3652 High Resolution RGB/VGA Video Transmission System. The Model 3652 transmitters and receivers are compact stand alone wall or desk mount units. Front panel switches let the user program the transmitter for sync on all colors, sync on green, or external sync input scenarios. Consult factory for rack mount versions.

POWERFUL ADVANTAGES INCLUDE

- Transmits high resolution RGB or VGA signals 21,000 feet via 3 multi mode fibers.
- Transparent to all VGA modes and software.
- Colors are balanced automatically with AGC circuitry.
- Contains switch selectable inputs for sync on all colors, sync on green, or external sync.
- Transmits 2Hz to 75MHz bandwidth and supports pixel clock rates up to 120MHz.
- Available with SMA or ST™ connectors.

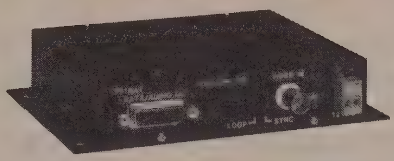
REAL TIME VIDEO AND BI-DIRECTIONAL VOICE AND DATA TRANSMISSION OVER LONG DISTANCES VIA ONE FIBER

CALL OPTELECOM

1-800-BY-FIBER



MODEL 3710AT

Transmit and receive real time video and bi-directional voice and data signals 12 miles over a single fiber with Optelecom's Model 3710A and Model 5710A fiber optic transmission system. Using superior PFM technology, these units operate without adjustment and are versatile and easy to install.

The Model 3710A is a compact, stand alone unit. The Model 5710A is a circuit card that plugs into Optelecom's System 5000 chassis.

POWERFUL ADVANTAGES INCLUDE

- Transmits 12 miles (20km), depending on the model.
- Transmits composite video in one direction and audio and RS232, RS422, or TTL/CMOS compatible data signals in both directions over a single optical fiber, without crosstalk or interference.
- Supports 4KHz audio bandwidth, DC to 19.2 baud data rate (up to 3 channels).
- Uses PFM, FDM, and PCM techniques for high quality, adjustment free operation.
- Available with SMA, ST™ or FC connectors.

VIDEO AND AUDIO TRANSMISSION VIA A SINGLE FIBER

CALL OPTELECOM
1-800-BY-FIBER

Transmit and receive 10MHz bandwidth video and 50KHz audio signals up to 20km over a single fiber with Optelecom's Model 3257 and Model 5057. The Model 3257 transmitters and receivers are small stand alone units and the Model 5057 are circuit cards that plug into Optelecom's System 5000 chassis. All units use band limited Pulse Frequency Modulation or "square wave FM" techniques to transmit video and audio on two different FM carrier frequencies. These techniques provide adjustment free operation over a wide dynamic range.

POWERFUL ADVANTAGES INCLUDE

- Transmits high quality composite or monochrome video and audio signals up to 20km, depending on the model, over a single optical fiber. Consult factory for longer distance versions.
- Wide dynamic range (22dB).
- PFM (pulse frequency modulation) techniques eliminate the need for Automatic Gain Control (AGC) circuitry.
- 10MHz video bandwidth, 50KHz audio bandwidth.
- Available with SMA, ST™ or FC connectors.

ASYNCHRONOUS AND SYNCHRONOUS RS232 DATA TRANSMISSION VIA A SINGLE FIBER

CALL OPTELECOM
1-800-BY-FIBER

Transmit and receive full duplex synchronous or asynchronous RS232 signals 1.6km over a single multimode fiber with Optelecom's Model 4151. This small modem communicates with DTEs (data terminal equipment) and operates in Data Transmission Mode (one high speed channel and two low speed channels) or Modem "Handshake" Mode (one high speed channel with handshaking).

POWERFUL ADVANTAGES INCLUDE

- Transmits 1.6km via a single multimode fiber.
- Plugs directly into DTEs (data terminal equipment).
- Male or female DB25 I/O port.
- Compatible with EIA RS232D (CCITT V.24).
- Transmits one data and two control lines in each direction.
- Available with SMA, ST™ or FC connectors.
- Verifies proper system operation with remote loopback and SYNC indicator.
- Supports external clock input.
- Consult factory for longer distance versions.

1 Kilometer

Signal transmission not affected by shock, vibration or change in light intensity.

POWER REQUIREMENTS:

Transmitter:

115V/230V 50/60Hz and 12V DC powered, with integral charger. Optional remote on/off controlled by separate fiber optic cable. Standard battery provides 8-15 hours of operation between charges, longer available. Also isolated power source available for continuous operation without integral battery from power source at ground potential.

Receiver:

115V/230V 50/60Hz or 12V DC powered.

Voltage input range can be extended in 15KV increments to 900KV PK by Ross Engineering Corporation's wide-band voltage dividers.

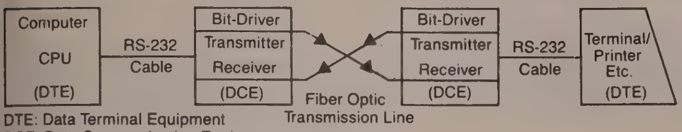
S.I.TECH

Fiber Optic Modems & Multiplexers

PO BOX 609, Geneva, IL 60134 • TEL: 708/232-8640 • FAX: 708/232-8677

TYPICAL APPLICATION



DTE: Data Terminal Equipment
DCE: Data Communication Equipment

Designed to convert various computer interfaces to optical and reconvert at remote end. Typical application shown in the diagram at left. Fiber optic communication is immune to EMI/RFI, lightning, ground loops and can be used for secure data. Cables are small, lightweight, lower loss over large transmission distances, and provide error free data communications. Glass fibers of various sizes such as 50/125, 62.5/125 & 100/140 can be used. Most have a range of 6600 ft. (2 Km), 15000 ft. (5Km) optional.

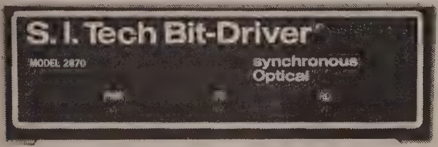
STAND ALONE FIBER OPTIC MODEMS

it Driver is a simplex or full duplex system capable of transmitting data
p to 56K bps over fiber optic cable. Stand alone component with RS-
32 interface and input/output transmission connection. LEDs indicate
tatus. 6000 ft maximum distance capability. Operating temperature is
rom 0° to 50°C. AMP Optimate connector receptacles with SMA/ST
onnections optional. UL & CSA listed.

S.I. TECH #	Enclosure	Operating Mode	Price ea.
2001	Metal	Asynchronous	100
2004	Metal	Synchronous	400
2005	Metal	Asynchronous	300

These modems can be obtained in card style to fit Model 3000 Card Cage.

OCAL AREA NETWORK - FIBER OPTIC MODEMS



ach modem is designed to operate with various networks (see table).
iber optic bit drivers eliminate many disadvantages of standard
ansmission lines. All types are stand alone and allow easy change from
xisting lines to fiber optic line using 2 SMA (ST-option) connector fiber
ptic receptacles. Also comes with power supply and status indicators. 2
M standard, 5 KM & 1300 nm options. UL & CSA listed.

S.I. TECH Number	Interface	Network	Data Rate/MBps
2105 Mini	RS-232	RS-232 Ring	0.1
2107 Mini	RS-485	Unisys	2.0
2117 Mini	RS-485	IBM RS/6000	0.2
2836	Twinax	IBM/36/38/AS/400	1.0

2877	IBM TP	IBM TokenRing	16.0/4.0
2890	Coax	T-1	1.54

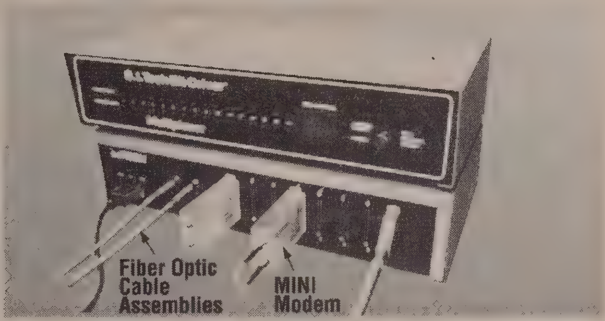
IBER OPTIC IDEO SYSTEM

esigned for CCTV with color or black & white video. Can be applied to
V monitors, security system, surveilance and industrial applications.
as BNC bulkhead jack with 75 ohm impedance, with an input voltage of
Vpp. SMA or ST connectors. Maximum operating distance to 5000 ft. in
mperature range of 0° to 50°C. Plastic case is 6" x 6.5"

.I. TECH Number
309 Transmitter
310 Receiver

ack mounted, mini & card types available. 1300 nm option for long distance.

MINI OPTICAL BIT DRIVERS



Features simplex or full duplex operation, SMA (ST-option) receptacles, DTE, or DCE switch selectable, LED Indicator for transmit and receive data and RS-232C connectors (cable not required). 2505 is 0 to 56K bps asynchronous operation up to 5000 ft. maximum operating distance. Requires Type 2101 external transformer. 2507 is 50 to 19.2K bps asynchronous operation up to 3000 ft. maximum operating distance. Powered by DTE. See picture above. Long distance options.

S.I. TECH Number	Data Rate/MBps	Distance	Features
2101	—	—	Power Supply
2106	56.0	5000	RS-422
2110	56.0	5000	RS-485 JohnsonControl
2116	38.4	5000	RS-422, C, X, L BUS

2505	56.0	5000	RS-232, Pin9 or 2101Power
2506	19.2	3000	RS-232, Handshake Lines
2507	19.2	3000	RS-232, DTE Power

FIBER OPTIC MULTIPLEXERS

Time division multiplexers with various interfaces. Status indicators show activity of each channel & the integrity of fiber link. Standard models 6600 ft. (2Km) with 5 Km optical, SMA connectors are standard with ST optional UL, CSA, FCC certified. See picture above.

FIBER OPTIC MULTIPLEXERS

MINIGLOSSARY
SERVO COMPONENTS

SPECIFICATIONS

Excitation: The input voltage and frequency.

Transformation Ratio: The ratio of the output voltage, at maximum coupling, to the input voltage.

Phase Shift: The lead or lag of the output voltage with respect to the input voltage. For most synchros and resolvers, the phase shift can be approximated by the angle whose tangent is the ratio of the primary winding's DC resistance to its reactive component.

mpedance: Specified as R + jX, where R is the AC resistive component and X s the reactive component. Important mpedances are: (a) Z_{po} (or Z_{ro} for rotor primary units), which is the impedance of the primary winding with he secondary open; (b) Z_{so}, which is he impedance of the secondary winding with the primary open; and (c) Z_{ss}, which is the impedance of the secondary with the primry shorted (essentially when driven by a low impedance).

Null Voltage: The voltage remaining when the unit is at electrical zero or in he minimum coupling position.

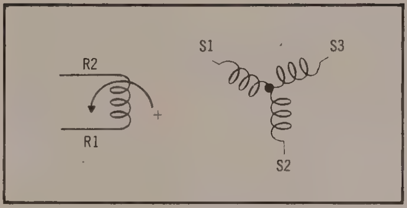
Accuracy: The error of the position of he rotor with respect to the electrical angle. It is defined as the output voltage driven by the "speed" (pole pairs) of he unit, referenced to the starting point f the calibration (usually the electrical zero position). Error is commonly xpressed in minutes of arc (1/60 of a egree) or in seconds of arc.

oads: For a transmitting unit, the impedance that the output voltage signal aces. This can be a receiver, a differential with its load, a control transormer, an A/D converter, etc.

peration Temperature: The ambient emperature range over which the unit erforms its primary function.

UNCTIONS

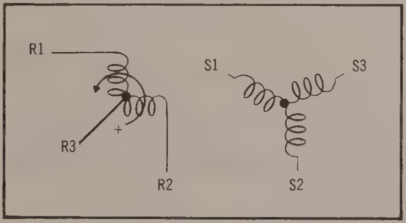
ransmitter: A unit with a Y-conected stator that outputs a signal proortional to the position of its singlehase excited rotor. High power units, alled "torque transmitters," are used o drive one or more receivers. Low ower transmitters are used to drive ontrol transformers.



Receiver: A unit with a three-phase stator excited by the input, usually from a torque transmitter, and a single-phase rotor that follows the resulting stator field. Usually used to drive a position pointer.

Control Transformer: A unit with a three-phase stator excited by the input from a transmitter and a single-phase rotor mechanically driven to the null position by an external motor or other device.

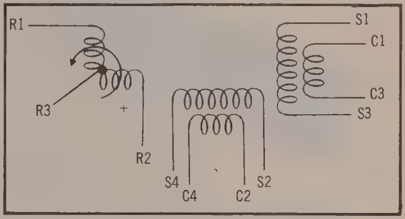
Differential: A unit with a three-phase stator and a three-phase rotor. It is usually connected between a transmitter, which excites its stator, and a receiver or control transformer. It can be used to "dial in" correction factors for the synchro chain.



Transolver: A unit with a three-phase stator and a two-phase rotor that can be used either as a control transmitter (with one rotor phase excited and the other shorted), or as a control transformer with the signal obtained from one phase of the rotor—making sure the other phase is equally loaded to prevent unbalances.

Differential Resolver: A unit with a two-phase stator and a three-phase rotor that is used as a transolver with the advantage that when connected as a control transformer, the signal does not travel through slip rings.

Resolver: A unit with a two-phase rotor and a two-phase stator that is used to create or receive SIN-COS signals such as vector resolutions for solving inertial platform coordinate transformations, unknowns of right triangles, etc. Resolvers can also be used as transmitting, differential, or receiving elements by proper choice of impedances. It is also possible to use resolvers as phase shifters where, in one mode, one rotor phase is excited and the two stator windings are feeding an appropriate RC network and indicating a phase shift, referred to the input, that corresponds to the rotor position.



Compensated Resolver: A unit with a "2×2" phase stator and a two-phase rotor used as a resolver with the added benefit of feedback windings in parallel with the stator windings that increase the useful accuracy over a wide range of environmental operating conditions.

Linear Transformer: A unit with a single-phase stator and single-phase rotor designed to provide a linear output voltage that is directly proportional to the rotor input angle. It operates over a range of less than ±90°, and is analogous to a potentiometer providing infinite resolution, but without contact between the elements. It can be used only with AC voltages.

Brushless Synchro: Available in two types—hairspring and bobbin. Hairspring synchros use spiral wound conductor springs to pick off the rotor signal, and are generally limited to a ±165° rotation. Most have mechanical stops to prevent damage due to overrotation. Bobbin synchros pick off the rotor signal with rotary transformers inside the unit, allowing the rotor unlimited motion.

Pancake Unit: A name derived from the physical dimensions of the unit, which has a diameter that exceeds axial length. Sizes range from under 1" to 20" or more. The unit is frequently used as a gimbal pickoff element and is designed to fit a particular application envelope. It can be supplied as a rotor and stator only.

These Slip Ring Assemblies have found wide use in gyro gimbal and instrument applications. The fully enclosed and tested assemblies feature fine diameter gold alloy brushes mated to compatible gold alloy rings for excellent noise characteristics at low torque levels. Although miniature in size, the assemblies are surprisingly rugged and are able to withstand most military environmental specifications.

Units have been fully tested to the environmental parameters listed below, proving their ruggedness and reliability. All units are factory tested before shipment and a copy of the test data is available with each unit upon request.

The units shown here are only a sample of those available which include a 50 ring capsule of .685 diameter.

SPECIFICATIONS

MECHANICAL

1. Rings: Gold alloy
2. Brushes: Gold alloy wire, spring temper
3. Ball Bearings: Stainless steel, shielded
4. Shaft: Stainless steel
5. Housing: Anodized aluminum
6. Rotation: Bi-directional

ELECTRICAL

1. Current: Signal level to 1 amp maximum
2. Voltage: Micro-volts to 110 volts rms
3. Dielectric Strength: 500 volts rms (all combinations)
4. Leadwire: #30 AWG teflon insulated, 15″ long minimum
5. Noise: ±5 micro-volts per ma

ENVIRONMENTAL

1. Temperature Shock: +85°C for 1 hour and immediately transferred to −55°C for 1 hour
2. Shock: 18 shocks, 20 "g" with duration of 11 ±1 ms (MIL-E-5272C, Procedure V)
3. Vibration: MIL-STD-202B, Method 204, test condition B
4. Altitude: 50,000 ft. and −55°C
5. Humidity: MIL-E-5272C, Procedure III (95% R.H. @ 120°F for 360 hours)

CAY-150
UP-TO **48** RINGS

These assemblies, specially designed for gyro-rate table and centrifuge applications, have found wide use because of their versatility and compact size. The standard assembly, can be supplied (at slight extra cost) with internally shorted rings for double and triple current ratings, and with single, double and triple shielded wire. Featuring gold alloy wire brushes and compatible gold alloy rings, these assemblies are manufactured from proven production tooling at a very nominal cost. Special assemblies with switching circuits and others with non-standard materials for use in severe environments are available.

SPECIFICATIONS

DAY-705

These slip-rings are built to your order using many standard components which have proven themselves over many years of reliable operation. The "platter-type" design includes one coin silver ring on each side of each molded sub-assembly; and, leaf type silver graphite brushes which are molded in an insulating block and perfectly matched to the face of each ring. Inasmuch as the assemblies are the stack-up type, we are able to custom build them to your specifications—using our standard components—with a very minimum lead time required.

DAY-710

Similar in construction to our DAY-705, this platter type unit features two coin silver rings on each side of each platter for greater package density, and a "through bore" design which can be used for the passage of fluid or gas lines.

SPECIFICATIONS

MECHANICAL

1. Rings: Coin silver
2. Brushes: Silver graphite
3. Ball Bearings: Stainless steel, shielded
4. Shaft: Anodized aluminum
5. Housing: Anodized aluminum
6. Speed: 500 rpm maximum
7. Rotation: Bi-directional

SPECIFICATIONS

1. Rings: Coin silver
2. Brushes: Silver graphite (two per ring)
3. Brush Leafs: Beryllium copper
4. Insulation: Phenolic
5. Leadwire: Available upon request
6. Speed: 750 rpm max.
7. Life: 1000 hours @ 100 rpm
8. Current: 5 amps per rings; 10 amps per rin when 4 brushes are used
9. Voltage: 300 VRMS
10. Dielectric Strength: 500 Volts rms (all combinations)
11. Insulation Resistance: 10 megohms minimum at 500 VDC
12. Noise: The contact resistance change i each circuit shall be less than .005 ohms a maximum speed
13. Units with less than 11 rings have one bracket per brush block

Spring: AHW-15
Holder: AHW-14
Cap: AHW-13
Silver Graphite Brush: ABR-12-1

CAY-125

A general purpose, off-the-shelf slip ring assembly especially applicable for strain gage and thermocouple measurements where rotating detector circuits must be brought out to stationary measuring equipment.

CAY-755

The standard cartridge, (AHW-16), has been used for many years on our CAY-125 assembly and is now available with the CAY-755 which is also drawn, or individually, for use on any ring which is a minimum of ⅛" wide. The silver graphite brushes, coil springs, caps and holders may be purchased individually or as an assembly and are all available from stock.

SPECIFICATIONS

MECHANICAL

1. Rings: Coin silver
2. Brushes: Spring loaded silver graphite, two per ring
3. Torque: 0.2 in-lbs. per ring
4. Speed: 5000 rpm maximum
5. Life: 1000 hours minimum @ 500 rpm
6. Rotation: Bi-directional

ELECTRICAL

1. Current: 10 amps per circuit with two brushes per ring
2. Voltage: 0-250 Volts AC or DC
3. Dielectric Strength: 500 Volts rms (all combinations)
4. Contact Resistance Variation: 10 milliohms maximum at maximum speed
5. No. of Rings: 30 maximum

ENVIRONMENTAL

1. Operating Temperature: 0° to 200°F
2. Humidity: 85%

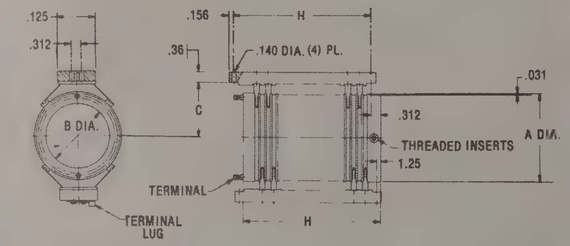
CAY-731/740
UP TO 50 RINGS



To determine "H" dimension
use the following formula:
"H" = .750 + .1875 x (No. of Rings)

These assemblies, designed for use in commercial equipment, have been used in applications ranging from thermocouples to the transmission of medium power. They feature coin silver rings, silver graphite brushes, convenient terminals on both the slip ring and brush blocks, and a rotor design which allows the leadwires to be exited through the shaft bore, or under the bearing when a shaft clearance hole is required. The wide variety of sizes and configurations available, including "in-between" shaft diameters, allows the designer to select a standard assembly for his application, eliminating time consuming and costly design charges.

SPECIFICATIONS

MECHANICAL

1. Frame: Anodized aluminum (DAY-490/DAY-499 only)
2. Rings: Coin silver
3. Brushes: Silver graphite, two per ring
4. Leafs: Beryllium copper
5. Insulation: Epoxy or laminated plastic

ELECTRICAL

1. Current: 10 amperes per circuit (20 amperes available at extra cost)
2. Voltage: 250 Volts maximum AC or DC
3. Dielectric Strength: 750 Volts rms (all combinations)
4. Insulation Resistance: 50 megohms minimum at 500 VDC
5. Contact Resistance Variation: 10 milliohms maximum at maximum speed
6. No. of rings: 50 maximum

ENVIRONMENTAL

1. Operating Temperature: 0 to 250°F
2. Humidity: 95% maximum

For use when bearing mounted assemblies ar not practical, the CAY-731/CAY-740 should b specified.

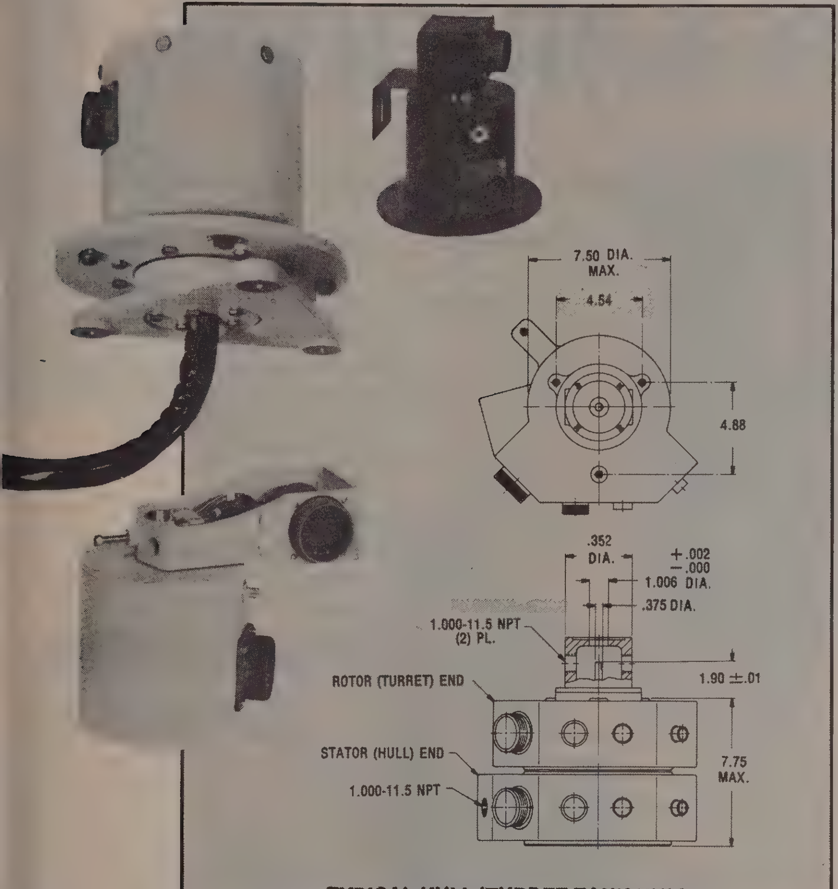
Airflyte ELECTRONICS CO.

VEHICLE SLIP RING ASSEMBLIES



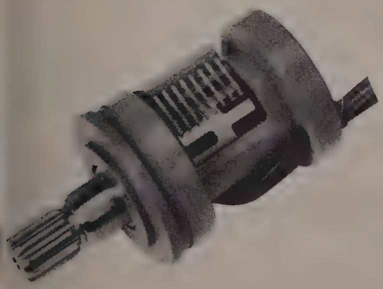
TYPICAL HULL/TURRET TANK UNIT

Airflyte Electronics has experience in the design and manufacture of assemblies for personnel carriers, tanks and other military vehicles. We have built slip rings for periscopes, turrets and commander stations. These assemblies range in size from 6″ or less in outside diameter to slip rings with clearance holes larger than 28″. This type of assembly is characterized by its rugged construction, usually has two high power rings, several low power and up to 50 signal rings. Illustrated are several of the configurations we have built in production quantities.

SPECIFICATIONS

1. Voltage: from 28 VDC to 208 VAC
2. Current: from 1 amp to 600 amps
3. Frequency: DC to 100 MHz
4. Speed: Usually about 20 rpm
5. Noise: Less than 10 mΩ peak to peak
6. Hydraulics: 3000 psi operating
7. Pneumatics: 1500 psi operating
8. Torque: 15 ft.-lb. max. (no hydraulics)
9. Life: 3000 hrs.
10. Environmental: Vibration, shock, etc. per MIL SPEC
11. Terminations: Connectors & fittings customer compatible

ENCODERS & SWITCHES



Airflyte encoders and rotary switches feature drum construction with solid gold alloy conducting segments embedded in epoxy and machined flush. Brushes are multi-strand, spring-temper gold-alloy. As small as ½″ diameter.

ENCODERS

Special encoders with BCD, Gray, True Binary or non-standard codes are available. Units supplied with or without logic circuitry.

SWITCHES

When close accuracy, repeatability and size are important, specify Airflyte rotary switches for timing and positioning applications. Successfully replaces snap action switches and cams. Pre-set to eliminate installation time. Zero hysteresis.

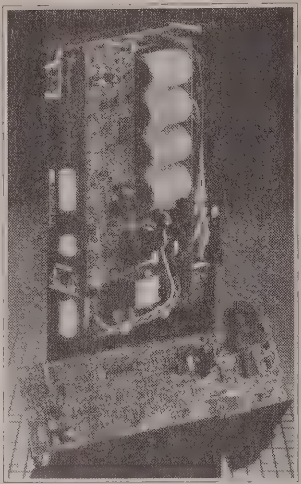
Embedded OEM Servo Solutions



ALC-CM Torque Mode Servo Amplifier

Faster Throughput, Higher Reliability, Lower Cost...

You've pushed your stepper solutions to the max, and now you need to close the "servo" loop for higher performance motion control.

Only two problems. With all their "features", the standard servo packages still don't meet your needs and your customers can't afford them!

Fortunately, Automotion has a solution. The new brushless **ALC-CM** torque mode servo-amplifier family. It's a modular, pre-engineered drive family, meaning you choose just the amount of capability and features you need to get the job done, and no more.

The Servo-Amplifier of the 90's

What's more, the ALC-CM, designed to mate with today's high bandwidth motion controllers, offers several advantages over traditional velocity compensated amps.

- **No Pots!** Factory-tuned to your motor characteristics so there are no pots to adjust on the driver, ever.
- **Velocity Loop Parameters in Software!** Variability due to manual field adjustment is history. Larger loads and load to inertia mismatches (100:1) are easily controlled.
- **Direct Torque Limiting & Monitoring** With software control, torque monitoring and profiling is direct, simple and more cost-effective than with velocity amps.

Speed, Peace of Mind and Savings...

Three good reasons to find out more about the performance and cost advantages of Automotion's new "off-the-shelf" embedded Servo-Amplifiers and torque mode control solutions. Contact your local Automotion representative or call us direct at 313/662-7771.

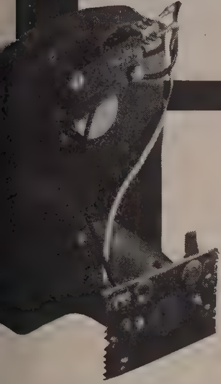
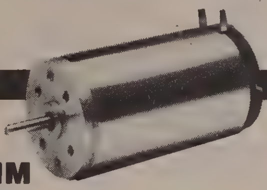
BARBER-COLMAN

subfractional motion control

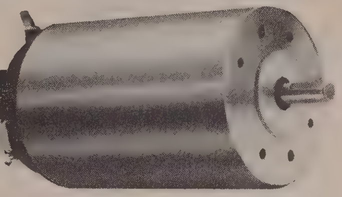
NEW PRODUCTS



D26
DC gearmotor
6–24 Volts
Low cost plastic gearbox
Torque to 7 lb-in.
Optional features:
- Control circuits
- Limit switches
- Many shaft configurations

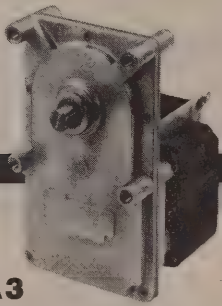


LYMM
1.56″ diameter DC motor
6 to 36 volts
18 Watts Output
Stall torque to 50 oz-in
- The LYMM offers superior magnetic circuit design and higher torque constants than motors of equal size and resistance.

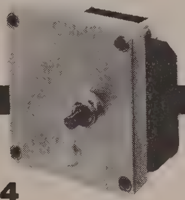


MYMM
Long life high torque DC motor
Stall torque to 125 oz-in.
EMI filtering
Optional features:
- Optical encoders
- Gear boxes

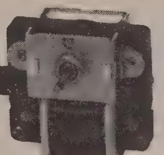
AC MOTORS



A3
Torque to 160 lb-in.
Speed 1-200 RPM

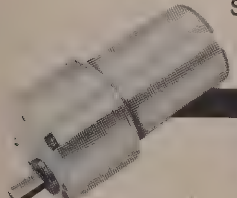


A4
Torque to 60 lb-in.
Speed 1–800 RPM

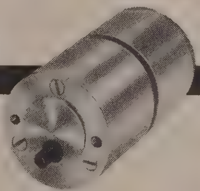


YAA
Rated HP to .005
Small and compact

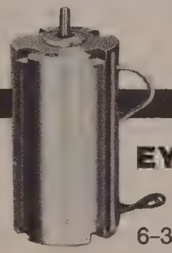
DC MOTORS



EYQE
Torque to 11 lb-in.
1.5″ max. dia.



CYHC
Torque to 15 lb-in.
2.0″ max. dia.



EYQM
6–32 VDC
1.18″ dia.
2.16″ max. length

CYHM
6–36 VDC
2.0″ dia.

Our manufacturing experience and engineering content assure consistent quality—from simple drive motors to sophisticated "motion control packages." Our motors are available with multiple types of companion gearheads and may be combined with options like magnetic tachs, optical encoders, ball bearings, and electrical filtering for exact start-stop and speed control. Barber-Colman now offers 43 standard products through a national network of stocking distributors, and a newly organized team of manufacturer's representatives who are available to serve you in 48 states across the U.S.

For ordering information, application assistance, or to receive the name of the nearest Barber-Colman representative or distributor nearest you, contact our office at the address below.

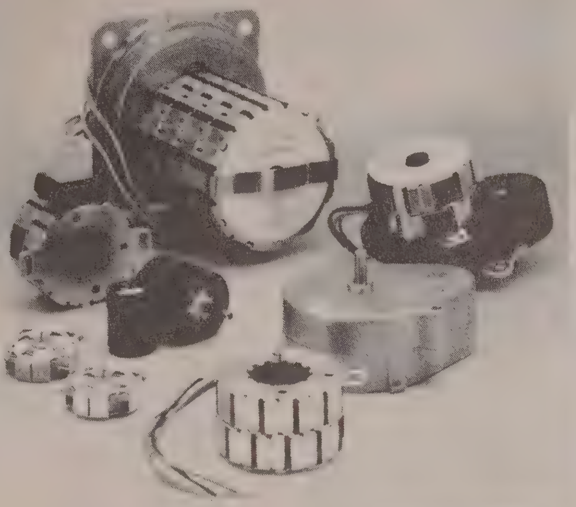
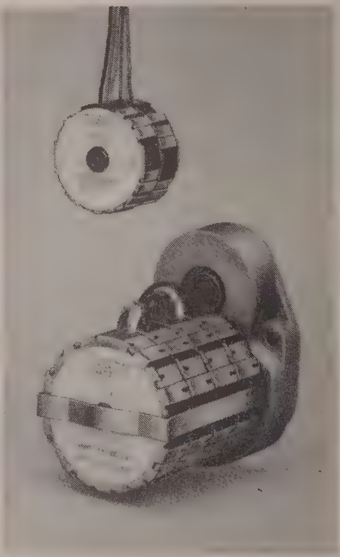
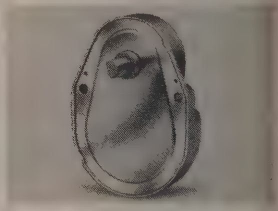
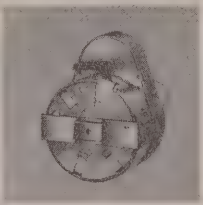
BURGESS-SAIA PRODUCTS MEET **ISO 9001** STANDARD

PRECISION MOTORS









Burgess-SAIA is an international supplier of ultra-high quality OEM products. Motor fabrication and assembly of millions of electrical motors, timers, and switches takes place in our Murten, Switzerland facilities, offering complete customer support worldwide.

UNIDIRECTIONAL SYNCHRONOUS MOTOR – SERIES UDS 1, For single phase AC and with permanent magnet rotor, the direction of rotation is not given by the supply system, so that starting in the correct direction is predetermined by the design.

A wide selection of rated voltages and gear boxes including heavyduty are available. Approved by all major national and international testing authorities UL, CSA, VDE.

REVERSING SYNCHRONOUS MOTORS – SERIES UAT, UBR, UDR 1, UFR 1, UFM 1, UFR 4, UHM 1, Single-phase AC with permanent magnet rotor require at least two stators or stator windings. The electrical reversal of the direction of rotation is performed by a single-pole changeover switch. Reversing synchronous motor with four stators are available and it consist of two series or parallel connected synchronous motors with two stator windings.

REDUCTION GEARS – SERIES A, D, M, B, F, V, and J, The ruggedly designed reduction gears consists of hardened, polished steel. Gears are maintenance-free permanently lubricated in an enclosed housing.

Torque range 32 cNm (45.3 oz in) to 1500 cNm (2126 oz in), speed range 5/12 s to 100 days, motor and gear combined by means of a snap-on clip, heat-treated gear-wheels in gears where T>250 cNm (354 oz in), various single-way and two-way slipping clutches, special output shafts available.

STEPPER MOTORS – Series UBB / UBD, UDB, UFB / UFD, UFB 3 and 4, URD, UKD, UAF 1, UAG The principal advantage of the step motor lies in the fact that its rotational position can be constantly monitored without need for a position feedback system. It is also possible for a step motor to be accelerated without loss of its positional accuracy. It is eminently suited as a digital actuator in conventional hydraulic, pneumatic, and mechanical applications. Burgess-SAIA STEP MOTORS are simple in design, have a remarkable power capacity and they are competitively priced. Custom windings are available upon request and engineering support for any OEM designs.

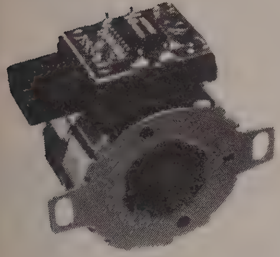
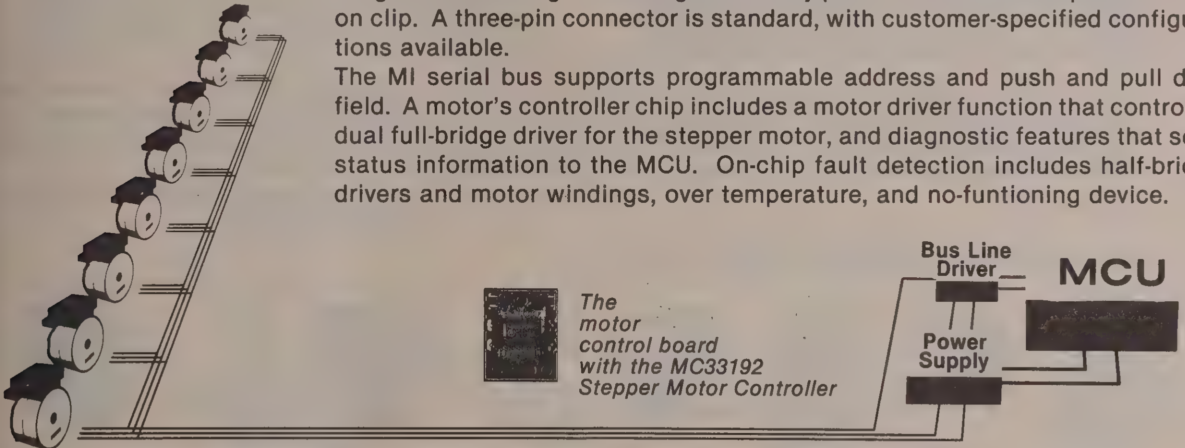
BURGESS-SAIA PRODUCTS MEET **ISO 9001** STANDARDS



Intelligent Stepper Motor – Up to eight intelligent stepper motors, with integrated controller chips, can be operated on a single, three-wire, serial Motorola Interconnect Bus (MI BUS). Two wires of the MI bus carry power to the motors, while one wire carries coded control data between a master control unit (MCU) and the controllers in each motor. Use of a serial bus, with integrated motor controllers, eliminates the bulky and expensive wiring looms, and the possibility of electromagnetic interference, associated with the conventional approach of housing a motor's control circuits in a separate module. The intelligent, two-phase stepper motor has reversible direction of rotation, with a step angle of 15°, or 24 step per revolution. Rated voltage is 12V DC. Output power, with 100 ohms/phase per winding, ranges from 85 mW to 260 mW, and torque from 7 mNm to 3.3 mNm, over the frequency rang 50 Hz to 300 Hz. Operating temperature range is –40° C to +85° C.

Dimensions of the motor are 36 mm diameter and 21 mm thickness. The weight is about 75 g. Mounting can be any position with a screw plate or snap-on clip. A three-pin connector is standard, with customer-specified configurations available.

The MI serial bus supports programmable address and push and pull data field. A motor's controller chip includes a motor driver function that controls a dual full-bridge driver for the stepper motor, and diagnostic features that send status information to the MCU. On-chip fault detection includes half-bridge drivers and motor windings, over temperature, and no-funtioning device.



The motor control board with the MC33192 Stepper Motor Controller

Stepper and Synchronous Motor – Series UAG 1, 2, 3, 4, and UAT1 – A tin-can type 20 mm motor is available in two operational modes. There is a stepper series (UAG) and a reversing synchronous series (UAT). External dimensions of the UAG/UAT motor are 20 mm diameter and 17.2mm thickness. The weight is 25 grams.

Stepper units have holding torques from 4.2 mNm (UAG 2, 4-phase) to 7.0 mNm (UAG 3, 2-phase) at rated voltage of 6V, 12V, or 24V. The step angle is 18°. Synchronous units (UAT) develop running torque of 2 mNm at speeds of 600 rpm or 720 rpm. Rated supply voltage is 24V or 48V, 50 Hz or 60 Hz.

Ambient temperature rating for operation of the synchronous version is –15° C to +65°, with continuous running permitted. Steppers are rated for ambient temperature of –40° C to +85° C.

In addition to units with a standard rotor, versions are also available with a reinforced rotor made of neodymium, a high-quality magnetic material. Hardened, ground and polished steel is used for the rotor spindle. The rotor-spindle bearings are self-lubricating, sintered bronze.

Assembly of this motor into equipment is simplified by the use of a self-stripping ribbon cable for interconnection of the motor with its power source. Connections to all the wires in the cable are made with one step in a press-fit action that pierces the cable's insulation and terminates the wires. A complete assembly with ribbon cable and an AMP Micro-Match plug is available. The motors can be mounted in any position with a screw plate.

This 20 mm motor has the small dimension, low weight, and high performance-to-volume ratio needed for use in smaller, thinner, and lighter end products.

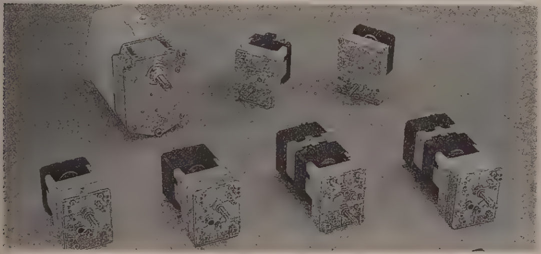
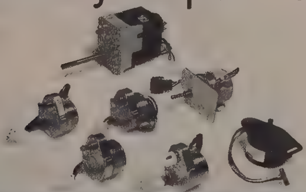
Shaded Pole Gearmotors



Instrument-grade shaded pole gearmotors are designed for exceptionally low noise operation and long life. Features of this high quality line include rugged die-cast gear case, optional fast stopping brake, and choice of metal or delrin gears. Output speeds range from 5 to 120 RPM and dynamic torque ratings range from 5 to 50 in.lbs.

Assembly Capabilities



One of Crouzet's specialties is creating and supplying motor "packages". Our ability to supply motors complete with connectors, capacitors, protective sleeves, various shaft attachments, special mounting plates, and even switches, allows us to meet virtually any application requirement.

Crouzet will help you save time, money, and aggravation, with a complete motor package.

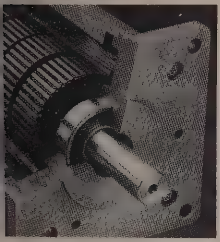
f ±3% noncumulative.
These units will pro-
luce exceptionally high
orque/size ratios, are
asily controlled by dig-
tal commands and oper-
te at slewing rates of
0,000 steps/second
nd higher.
izes: 8, 11, 15, 18,
0, 23, 34, and 42
idirectional.



LINEAR ACTUATORS

Based on our 1.8° permanent magnet stepping motors, these linear actuators transform rotary motion of the rotor into linear motion of the lead screw.

Units operate over a wide temperature range and offer extremely fine resolution and high linear force up to 1 ton.

The threaded shaft does not rotate, therefore critical speed problems associated with rotating a long shaft are eliminated. Standard units feature a CRS rolled thread shaft and a bronze rotating nut.

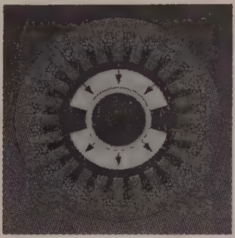
Sizes: 23, 34, and 42.

BRUSHLESS DC MOTORS

When life, EMI generation, maintenance costs, efficiency, and output-per-cubic-inch are important factors, brushless DC motors offer an attractive solution. New electronic components and rare earth magnets increase the growing popularity of these motors.

Sizes: 8, 10, 15, 18, 23, 31, 34, and 39.

Drives: Unipolar and bipolar to 20 amps and 350 VDC.



SYNCHRONOUS MOTORS

EAD is the North American leader in the design and manufacture of hysteresis/synchronous motors.

Sizes: 10 to 56, to ½ HP.

Synchronous (hysteresis and reluctance) motors produce smooth operation and precise speed which will not vary with load or voltage.

Hysteresis-synchronous motors develop smooth, constant starting and accelerating torque. They synchronize any load within their torque rating regardless of inertia.

Available in 1-, 2- and 3-speed designs.

BLOWERS, FANS

Move air from 3 to 2000 cfm quietly. From 1½″ to 10″ in diameter.

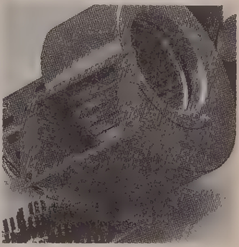
Centrifugal blowers: Deliver air at relatively high static pressure.

Tubeaxial fans: Move air through a wide range of volumes at medium pressure.

Vaneaxial fans: Move air axially over a wide range of volumes at relatively high pressure.

Propeller fans: Move air in large volumes at low pressure.

Mixed flow fans: Move air where it needs to be dispersed radially.



LOSED-LOOP TEPPING MOTORS

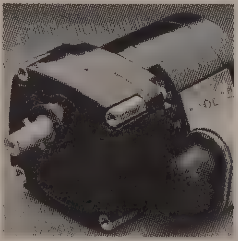
INSTRUMENT MOTORS AND GEARMOTORS

Our compact, permanent split capacitor motors and gearmotors are made in induction, torque, and synchronous versions.

Sizes: 25 and 29.

Available with 2, 4, or 8 poles, single or 2-phase, 50 and 60 Hz, gear ratios to 1800:1, output to 150 oz. in. Motors up to 1/100 HP.



SERVO MOTORS AND GEARMOTORS

Servo motors are 2-phase AC induction motors with permanently lubricated and shielded ball bearings. They can be controlled by solid state amplifiers, offer precise control, fast response, and are inherently impedance protected. Servo gearmotors have a high torque-to-inertia ratio. Reductions from 3:1 to 3600:1.

Sizes: 8 thru 23 for 50/60 or 400 Hz operation.

Gearmotors offer smooth, low-speed operation at moderate output torques. Lubricated motor ball bearings for maintenance-free operation. Outputs 1/500 to 1/20 HP AC.

TORQUE MOTORS

Torque motors offer smooth, moderate accelerating torque and low speed, with speed ranges from near zero to near synchronous. Options include shaft styles and extensions, nonstandard voltage and frequency, various mounting styles.

Sizes: 25, 34, and 44 open or totally-enclosed construction.

INDUCTION MOTORS

1-phase and 3-phase models and both high and low slip.

Single-phase motors available in permanent split capacitor and capacitor start versions.

Sizes: 10, 18, 25, 31, 34, 39, and 44.

Outputs to ½ HP. Available in both 50/60 Hz and 400 Hz versions.

OTHER PRODUCTS

Alternators, all frame sizes.

Precision military motor tachometers, sizes 11, 15, 18.

Rotor/stator sets, all frame sizes.

ELTROL
ELTROL CORPORATION

DC SERVO SYSTEMS

For applications requiring closed servo loop performance

MODEL 7-300-030-00
BRUSHLESS D.C. VELOCITY SERVO SYSTEM

The basic system includes the following:

- Brushless DC servo controller
- Brushless DC motor
- Commutation position encoder
- Incremental optical encoder

The system provides precise velocity control in a complete package: Internal D.C. power supplies, crystal reference, controls for bidirectional rotation and variable speed, digital speed readout, operating controls and status indicators.

Instantaneous speed regulation to ±.001%

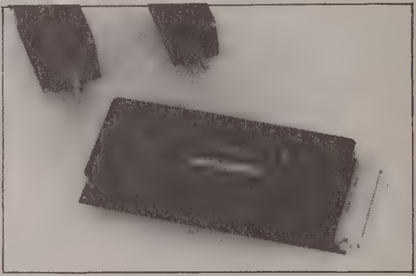
Fault protection: Overtemperature, shorts to ground, shorts across motor

Current loop: High bandwidth with current limiting

Input power: 115/220VAC, 1 ϕ, 50–60 Hz

The Eurocard Phase Lock Servo Controller included in Model 7-300-030-00 is available as a separate item.

MODEL 5-156-028-00
BRUSH OR BRUSHLESS D.C. SERVO CONTROLLER

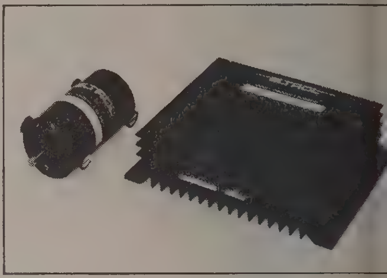


This EUROCARD provides closed loop four quadrant PWM control of motor velocity or torque. It offers maximum flexibility. Many operating features are set by pluggable jumpers. Variable compensation and gain by plug-in component carrier and trim pots simplify set up of closed loop operation.

FEATURES

- Single 24–60 volt P.S.
- Adjustable current 5–15 amps
- High efficiency 24KHZ PWM drive scheme minimizes EMI in noise sensitive applications
- Fault protection for excess temperature, speed, voltage, current, and motor stall
- Digital inputs command enable/reset, brake, and ± travel limits
- Differential amplifier for ± 10V input command
- Velocity F/B from commutation sensors, encoder, or DC tachometer

MODEL 6-120-024-00
BRUSH-TYPE LINEAR D.C. SERVO CONTROLLER



Motion control of position, velocity, c torque.

Simple adjustments for application adaptation

Peak output current: 2–10 amps

Linear operating mode: No switching EMI, high servo stiffness, no torque dead zone

Fault protection: Shorts across moto shorts to ground, peak and time dependent continuous foldback curren limits, external fault indication and reset.

The Eltrol motor-tach shown above is ideally suited to take full advantage of the servo controller's capabilities.

Eltrol Corporation is an engineering oriented firm specializing in D.C. servo systems. We provide standard, modif standard or custom designed systems to your electrical and mechanical specifications.

SLIP RING SEPARATES

/hen a "capsule" slip ıg is not practical due to ystem size constraints or ɔst limitations. We will rovide a slip ring (rotor) nd brush block (stator) s separate components be mated by the cus- mer. The rotor will be upplied in a drum onfiguration. The drum pproach features con- ecutive individual rings ong the axis of rotation.

STANDARD SLIP RING ASSEMBLIES

2235 Series

1. Material: **Rings:** Coin Silver
Brushes: Silver Graphite
Housing and Shaft: Aluminum

2. Electrical: **Current:** All rings 5 Amps max.
Wire: All wire 22 gauge Teflon-E,
Noise: 8 Milliohms peak/ring at max. speed
Hi-Pot: 500 VAC between all conductors
Insulation Resistance: 200 Megohms min. at 500V DC
Static Resistance: .40 Ohms max/ring
Voltage: 0-115 VAC or VDC

3. Mechanical: **Speed:** 1500 RPM max
Torque: 1/2 in.-oz. per circuit max.

Electro-Miniatures Corp.

Electro-Miniatures Corporation has been in business for more than thirty-five years. We design and manufacture slip ring assemblies for all branches of the US Armed Forces, a large number of primary defense contractors, and many commercial/industrial concerns.

Over the years, EMC has designed and built thousands of slip ring assemblies ranging from economical "off-the-shelf" assemblies to the most sophisticated slip rings available. Most units are designed to meet rigid and detailed customer specification where high reliability in a hostile environment is a requirement. Whether the end use be ground based, ground mobile, shipboard, airborne or space, we can meet your production, reliability and workmanship needs.

Slip ring assemblies provide a means of transferring electrical energy from stationary to rotating structures. Slip rings may also contain pneumatic couplings and hydraulic joints accomodating a large range of operating pressures and flow rates.

ctro-Miniatures – The Leader In Slip Rings And Slip Ring Technology.

CHARACTERISTICS

RPM: Rigid one piece housing eliminates bearing alignment problems

RINGS: Coin Silver Rings

BRUSHES: Silver Graphite
Fabricast Grade FAG 180 (80% AG – 20% C)
Two brushes per ring (5 AMP)
Four brushes per ring (10 AMP)
Brushes individually removable and replaceable

NOISE: 10 Milliohms dynamic resistance MAX
5 Milliohms MAX with 4 brushes per CKT

HI-POT: 1000 VAC 60 CYCLE for 15 seconds.

ROTOR: One piece steel sleeve
Ring complement vacuum cast on sleeve as unit with epoxy dielectric

COVER: Easily removable for brush and ring inspection

BEARINGS: Shielded or sealed ball bearings

BRUSH MATERIAL

- Fabricast grade Fag 180, the universal low noise level grade used for all standard brush assembles.
- Fabricast grade FAG 193, the lowest noise level grade, however, the ring surface speed is limited to 250 SFM.
- Fabricast grade FAG 150, the highest surface speed grade, however, noise levels are compromised.

Grade No.	Composition	Recommended Surface Speed	Carrying Capacity
FAG150	50% silver, 50% graphite	Over 3500 ft. per min.	100 Amps per sq. in.
FAG180	80% silver, 20% graphite	Up to 3500 ft. per min.	250 Amps per sq. in.
FAG193	93% silver, 7% graphite	Up to 250 ft. per min.	300 Amps per sq. in.

SLIP RING ASSEMBLIES SELF—CONTAINED RIGID TUBE HOUSING

3

DISTINGUISHING CHARACTERISTICS

Rigid one piece housing eliminates bearing alignment problems. Larger section bearings are generally used in these units for a more rugged unit.

CHARACTERISTICS

RINGS: Coin Silver Instrumentation Rings
Copper Power Rings

BRUSHES: Silver Graphite.
Fabricast Grade FAG 180 (80% AG – 20% C)
Two brushes per ring (standard)
Brushes individually removable and replaceable.

NOISE: 10 Milliohms dynamic resistance MAX.
5 Milliohms max with 4 brushes per CKT.

CURRENT: Noted in tabulated block.

HI-POT: 1000 VAC 60 cycle for 15 seconds.

ROTOR: One piece steel sleeve.
Ring complement vacuum cast on sleeve as unit with epoxy dielectric.

ROTOR LEADS: 5 AMP Leads – 20 GA per MIL-W-16878 TYPE "E"
50 AMP Leads – 8 GA – Teflon
Lead exit as shown on most units. Maximum ring complement may require smaller wire or leads to exit both ends.

BRUSH BLOCK: Glass epoxy laminate.
Optional mounting methods shown.

PART NUMBER CODING – Specify fully when ordering.

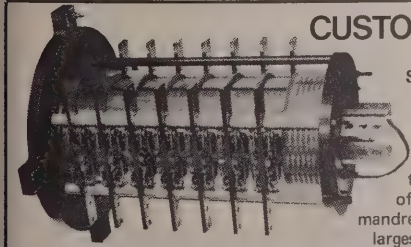
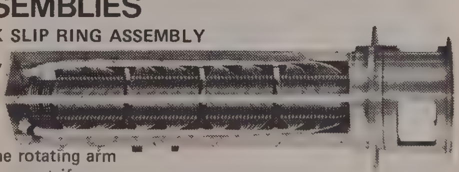
CUSTOM DESIGNED SLIP RING ASSEMBLIES



CUSTOM 7000 AMP SLIP RING ASSEMBLY

This slip ring assembly, as designed and manufactured by Fabricast, Inc., is used to supply 7000 amperes of current to the rotating mandrel of the world's second largest spin forging machine.

CUSTOM 222 TRACK SLIP RING ASSEMBLY



This slip ring assembly, as designed and manufactured by Fabricast, Inc. was used to complete the electrical circuits to the rotating arm of an astronaut carrying centrifuge.

The unit consists of 50 amp. power, 5 amp. instrumentation and 50 megacycle coaxial modules.

CONTACT FABRICAST WITH YOUR SPECIFIC APPLICATION, WE WILL MODIFY AN EXISTING DESIGN OR CUSTOM BUILD A SLIP RING TO YOUR SPECIFICATIONS.

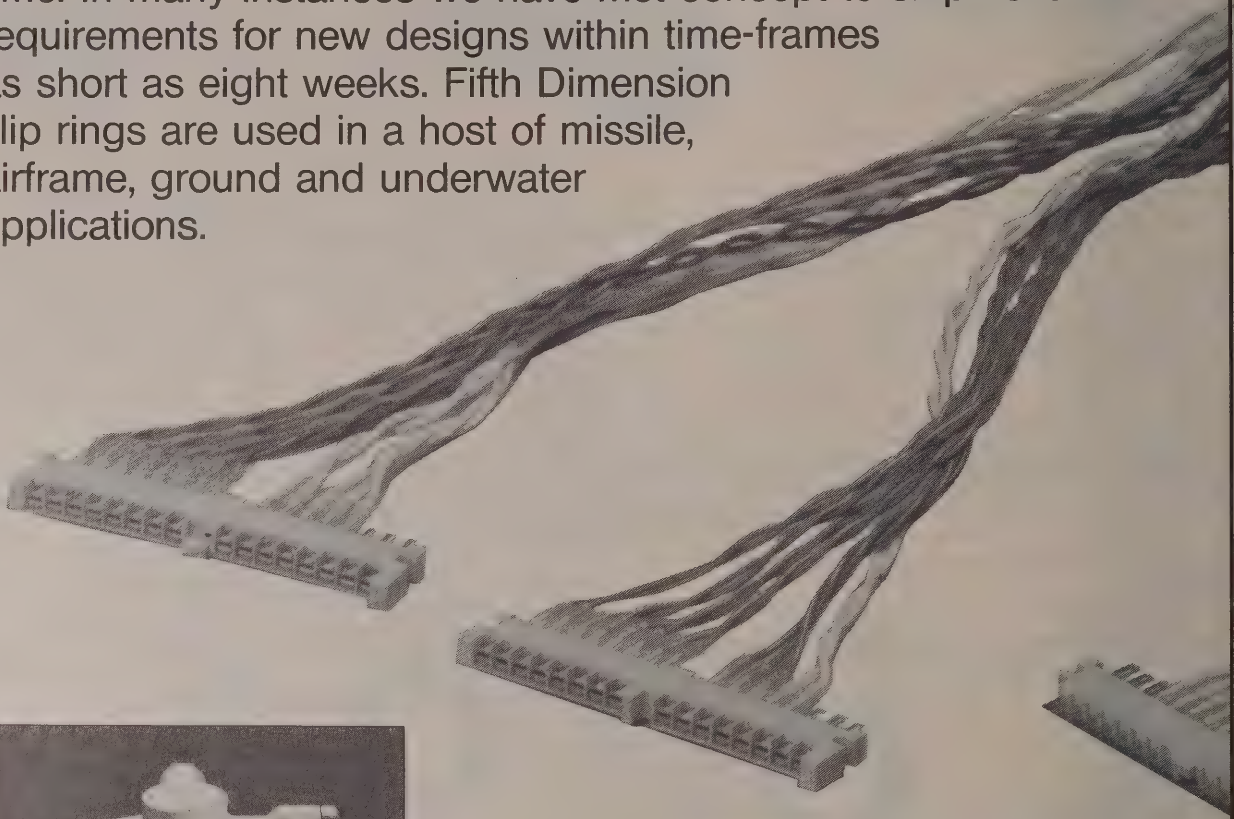
FIFTH
DIMENSION
INC.

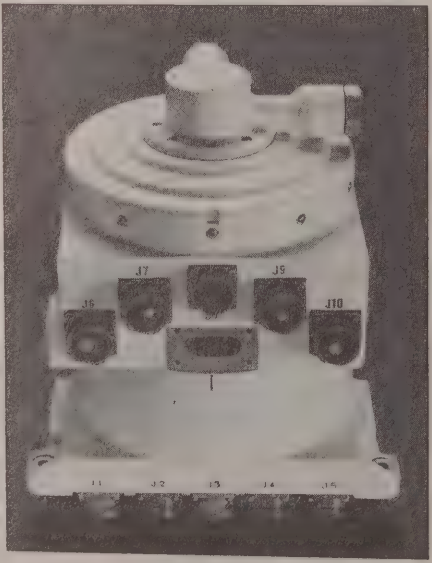
Slip Rings

High-Precision, Short Delivery Cycle

Look to Fifth Dimension Inc. for the development and production of high-precision, high reliability slip rings in remarkably short time. In many instances we have met concept-to-shipment requirements for new designs within time-frames as short as eight weeks. Fifth Dimension slip rings are used in a host of missile, airframe, ground and underwater applications.



Miniature slip ring capsule used in the gimballed pitch, roll and azimuth axes of the Trident II Mark VI Inertial Guidance System. Its small size was achieved without sacrificing reliability.



Electro-hydraulic/pneumatic vehicular slip ring assembly used in the gun turret of the M1A1 tank.

Fifth Dimension slip ring capabilities include:

- Miniature
- Helicopter
- Vehicular
- Pedestal
- Cable Reel
- Robotic
- Twist Capsules

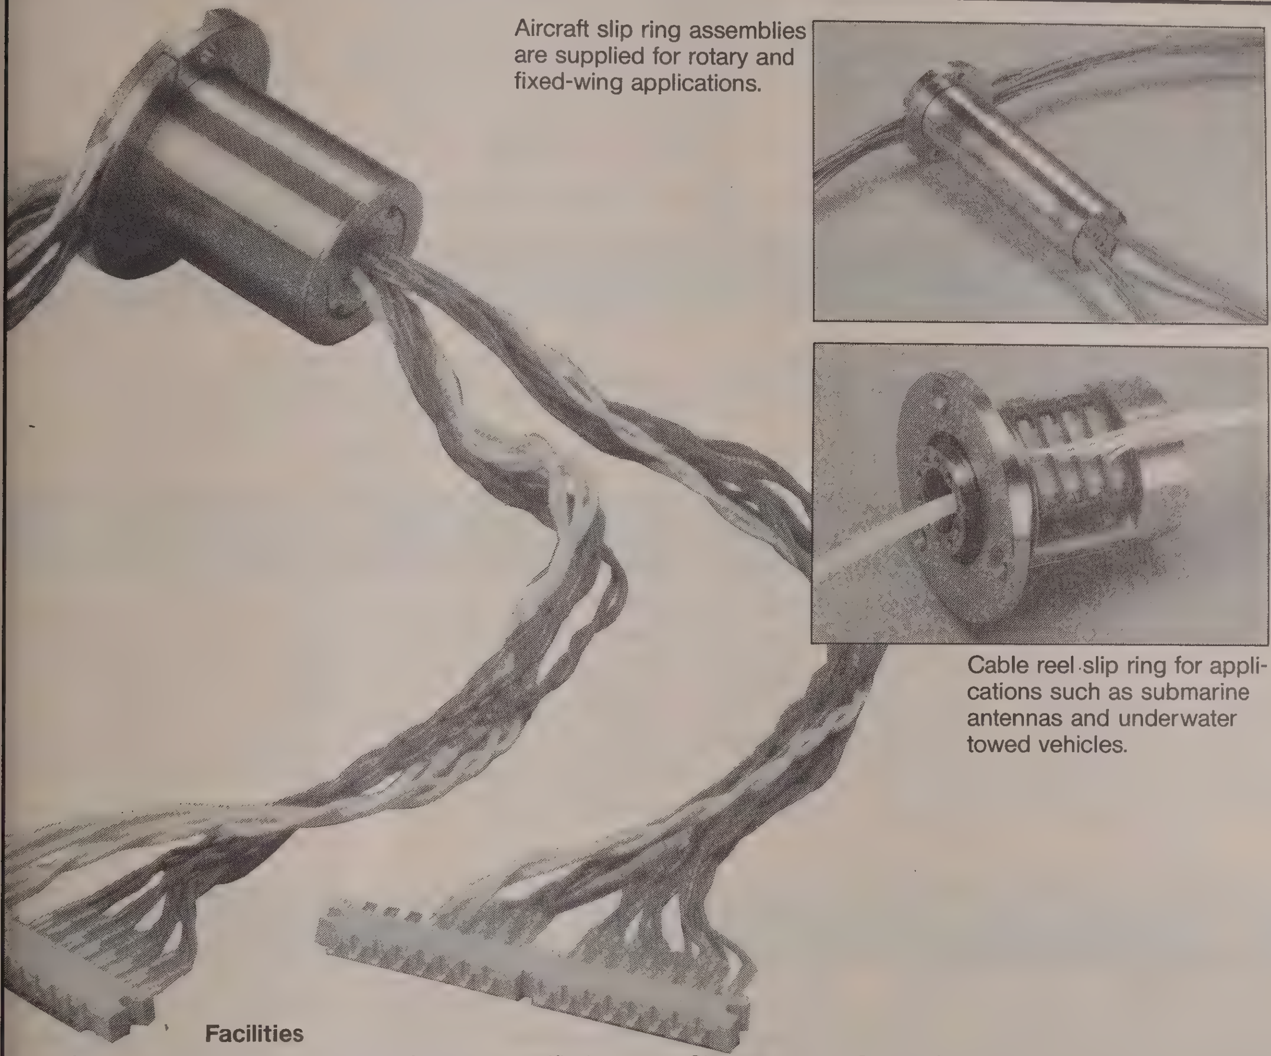
FIFTH DIMENSION INC.

801 New York Avenue, Trenton, NJ 08638-3982 • Tel: (609) 393-8350 • FAX: (609) 599-9508

FIFTH DIMENSION INC.

Slip Rings

High-Precision, Short Delivery Cycle



Aircraft slip ring assemblies are supplied for rotary and fixed-wing applications.

Cable reel slip ring for applications such as submarine antennas and underwater towed vehicles.

Facilities

- Clean rooms for slip rings manufacturing certified to meet Class 100,000. Critical final assembly takes place on laminar flow benches certified to Class 1.
- Complete machine shop
- Mold tool and die fabrication
- Extensive precious metal plating capabilities with laboratory-type control
- Epoxy casting and molding
- Automatic noise and torque test stations
- Comprehensive electrical, mechanical and environmental testing laboratory

Documentation

Where required, documentation can be as comprehensive as Class 1 wherein each manufacturing step requires operator sign-off and complete traceability of all component parts is maintained.

Short Delivery Cycle

At Fifth Dimension, project management is geared to short delivery cycles without compromising high quality. We invite you to write or call to discuss your slip ring requirements.

GTK GLENTEK Motion Control Systems

SINUSOIDAL BRUSHLESS (PWM) SERVO AMPLIFIERS

Description: Glentek's sine wave based brushless amplifiers and motors are used in appllications which require excessively high RPM and/or maintenance of standard brushtype servo motors is impossible. It should be noted that sine wave based amplifiers provide optimum performance at the high end with unsurpassed smoothneses at the low end.

Model	Output Voltage (Typical)	Output Current (RMS)	Output Current (Peak)	Carrier Frequency	Package Configuration
GA5505	24-80VDC	6 Amps	12 Amps	20KHZ	1, 2, 4, 6 and 8 Axes
GA5520	**45-170VDC**	**15 Amps**	**30 Amps**	**20KHZ**	**1, 2, 4 and 6 Axes**
GA5550	45-170VDC	30 Amps	60 Amps	20KHZ	1, 2, and 4 Axes
GA5570	45-170VDC	50 Amps	100 Amps	20KHZ	1 and 2 Axes

Note: All models listed above come standard with:

☐ Protection Circuits for the Amplifier ☐ Protection Circuits for the Motor ☐ End of Travel Limits ☐ Total Inhibit ☐ Complete LED Diagnostics

☐ Higher buss voltages available, consult Glentek.
☐ Glentek stocks a wide variety of inductors and isolation power transformers to accommodate all your servo system requirements.
☐ Models listed above in **Bold Print** are UL recognized.

GTK GLENTEK Motion Control Systems

PERMANENT MAGNET BRUSHLESS SERVO MOTORS

Description: To accommodate your complete servo system needs Glentek stocks a wide range (.2 to 7 HP) of permanent magnet brushless servo motors. All models come standard with square flange mounts, integral brushless resolver, and thermostat protection. The GMB2600 series through GMB4500 series motors come wired with MS connector, mating connector, and strain relief. The GMB5600 series motors have a pipe thread with PCB temination. All motors are sealed to IP65. Motors can be supplied with hall sensors, brakes and gear reducers. Custom shafts and mounting flanges are also available. If you have any difficulty in locating a particular motor for your requirements please contact a Glentek Representative. Many specialty motors are stocked, however their specifications are not listed on this data sheet. Please feel free to contact a Glentek applications engineer to assist you in making the proper motor selections. Prototype quantities are immediately available from stock.

GTK GLENTEK Motion Control Systems

PERMANENT MAGNET BRUSH TYPE SERVO MOTORS

Description: To accommodate your complete servo system needs Glentek stocks a wide range (1/16 to 15 HP) of permanent magnet servo motors. All models can be equipped with square flange mounts, shaft seals, amphenol connectors, and encoder or resolver feedback packages. If you have any difficulty in locating a particular motor for your requirements please contact a Glentek Representative. Many specialty motors are stocked, however their specifications are not listed on this data sheet. Please feel free to contact a Glentek applications engineer to assist you in making the proper motor selections. Prototype quantities are immediately available from stock.

Notes:
1. Motors can be supplied with:
   ☐ Square flange mounting faceplates ☐ Encoder or resolver feedback packages
   ☐ Oil seals ☐ Amphenol connectors ☐ Brakes ☐ Gear reducers
2. Motors come standard with ½" NPT for fluid tight connections.
3. Motor lengths shown avove include a tachometer mounted. For more detailed dimensions and data please refer to a Glentek installation drawing.
4. Models listed above in **Bold Print** are UL recognized.

GRAPHALLOY®

SILVER GRAPHALLOY BRUSHES and BRUSH & SLIP-RING ASSEMBLIES...

USED IN MICROWAVE EQUIPMENT · SERVO SYSTEMS · SYNCHROS · INVERTERS · THERMOCOUPLE and STRAIN GAGE CIRCUITS · PULSE SYSTEMS · COMPUTER GROUNDING CONTACTS · TORQUE INDICATORS · MEDICAL EQUIPMENT · PACKING MACHINERY

GRAPHALLOY® BRUSHES

Silver-Graphalloy Brushes have been widely used because of low *and* constant contact drop, extremely low electrical noise, *and* long life. Over 100 grades are now serving in a wide variety of applications. Silver-Graphalloy Brushes on ½-inch-diameter coin silver slip rings have operated successfully in highly critical electrical circuits at speeds up to 100,000 r.p.m.

Standard sizes from ⅛"-square to ¾"-square. Many sizes in stock.

Our Engineering Department will assist you in determining the exact grade of GRAPHALLOY for your needs. *Ask for our Brush Inquiry Form 109.*

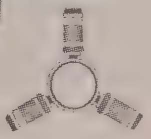
GRAPHALLOY® SLIP RINGS

We supply Coin Silver and Bronze Slip Rings, both *cylindrical* and *flat* types ...and recommend three brushes per ring...spaced at 120°...for best contact. The cylindrical type are designed for press fitting over standard steel shafting. The flat type rings are designed for nesting either on an insulated plate or for molding into insulation. Insulated slip rings of either type, or slip-ring assemblies, can be furnished with leads attached.

No. 168 Series FLAT TYPE to 20" O.D.

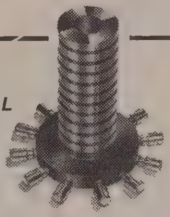
Standard FLAT Rings have ¼" radial contact surface and ⅛" radial spacing between adjacent rings.

No. 116 Series CYLINDRICAL TYPE to 36" O.D.



Typical Layout

Model 319 CYLINDRICAL SLIP-RING Assembly



SOLID COIN SILVER RINGS

Model	Rings	Length
319-4	4	2 9/16"
319-6	6	3 5/16"

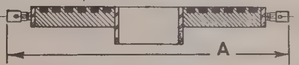
319-14	14	6 5/16"

O.D. Slip Ring 1⅝"
Terminal 4"
Assembly I.D. .814/.813"

Model 409 FLAT SLIP-RING Assembly

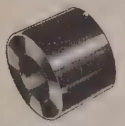


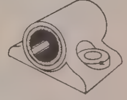
SOLID COIN SILVER RINGS

Model	Rings	O.D. "A"
409-2	2	5½"
409-4	4	7"
409-6	6	8½"
409-10	10	11½"

Hub O.D. 2" I.D. 1.753/1.751"
Length 1⅛" To 5 Amps., 125 V.
More rings on application.

GRAPHALLOY BUSHINGS and PILLOW BLOCKS





Survive unlubricated! Replace oil-lubricated bushings in synchros, instruments, timers and missiles. Advantages:

1. Lower friction at room temperatures;
2. No oil to solidify at low temperatures;
3. No oil to carbonize at prolonged elevated temperatures.
4. No oil or grease drag.

Ask for Data Sheets 270 and 277 on Miniature Bronze-Graphalloy Bushings.

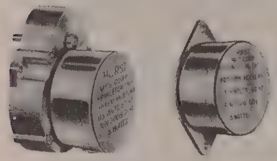
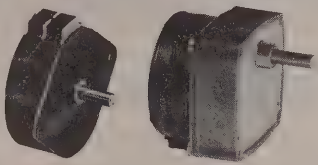
STEPPING AND SYNCHRONOUS MOTORS



A SERIES

Designed for long life at rated loads. Geared models have hardened steel gears and pinions running on steel studs. Hi-Torque rotors available; also voltages other than those shown may be specified. Widely used in applications requiring high quality components.

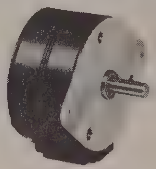
Dim. Geared: 2.81″ H x 1.63″ D
Direct Drive: 1.94″ H x 1.02″ D



S SERIES

Compact direct drive or geared motors for applications where space is limited and precise performance is required. Geared motors have typical torque ratings to 200 oz-in @ 200 p/s (max. gear train loading). Dual-stack motors featuring greater torque are now available. Call or write for complete specifications.

Dim. Geared: 2.45″ H x 1.78″ D
Direct Drive: 2.28″ H x .97″ D



SC SERIES

SC Series stepping motors have approximately 66% greater torque yet are only ⅔″ longer than the popular SAS Series motors. Dual sleeve bearings are standard but ball bearings as well as double ended shafts may be specified.

Dim. Direct Drive: 3.13″ H x 1.41″ D

BA SERIES

This exceptionally small stepping motor — a mere 0.895″ x 1.438″ — has a relatively high torque to inertia ratio. Its design recognizes the demand for small components to fit where space is severely limited. Applications are found in a wide range of medical and scientific instruments and robotics. These stepping motors are also recommended for low duty-cycle, battery operated equipment.

Dim. Direct Drive: .895″ H x 1.438″ D

*Maximum gear train loading

NOTES
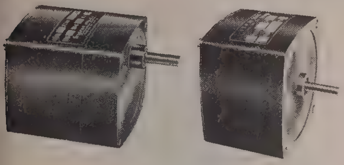
1. Capacitors furnished with most standard synchronous motors.
2. All synchronous motors shown on this page operate on 115 VAC, 60 Hz.

HURST HURST MANUFACTURING DIVISION,
EMERSON ELECTRIC COMPANY, BOX 326, PRINCETON, IN 47670. TELEPHONE (812) 385-2564. FAX (812) 386-7504

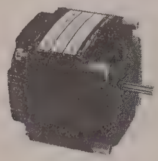
STEPPING AND SYNCHRONOUS MOTORS



T SERIES

Compact, rugged and efficient, TS Series motors are designed for heavy-duty applications. Geared models offer hardened steel gears and pinions with dynamic torque ratings up to 250 ounce-inches. Both geared and direct drive motors have machined die cast housings. Sleeve bearings are standard but ball bearings may be specified on the output shaft.

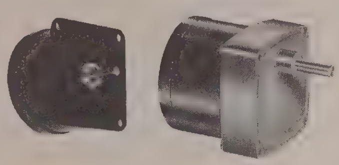
Dim. Geared: 2.38" H x 2.53"D
Direct Drive: 2.38" H x 1.75" D



KVS SERIES

KVS Series motors are hybrid permanent magnet types. The motors are constructed with multitoothed rotors and stators of unequal tooth number so that a vernier effect provides the equivalent of a large number of poles and small step angles without the necessity for gearing. Standard KVS motors are furnished with 6-lead bifilar windings for 12 VDC operation. Other voltages and 2-phase, bipolar windings may be specified.

Dim. Direct Drive: 2.38" H x 2.44" D

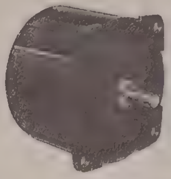


P SERIES

PAS and PBS Series motors provide users with a choice of direct drive or geared models, standard or Hi-Torque rotors and, for direct drive models, a choice of mounting plates. Voltages other than those shown may be specified.

Gearing is scaled to provide a maximum dynamic gear train loading of 200 ounce-inches.

Dim. PAS Geared: 2.38" H x 2.25" D
PAS Direct Drive: 2.28" H x 1.56" D
PBS Geared: 2.38" H x 2.13" D
PBS Direct Drive: 2.28" H x 1.41" D



R SERIES

Designed specifically to combine greater torque and small size, RAS and RBS stepping motors meet many industrial and instrument requirements. Standard 7.5° step angle motors have a torque rating at 4-5 p/s of 23 ounce-inches. The Hi-Torque model is rated at 29 ounce-inches. Models with 15° step angles are rated, respectively, 13 and 17 ounce-inches.

Dim. Direct Drive: 2.88" H x 1.84" D

DIRECT DRIVE STEPPING MOTORS

	TS	KVS	PAS and PBS	RAS and RBS
STEP ANGLE (degrees)	7.5	1.8 and 3.75	7.5 and 15	7.5 and 15

*Hi-Torque rotor

GEARED STEPPING MOTORS

	TS	PAS and PBS
REDUCTION	300 to 2	300 to 2
STEP ANGLE (degrees)	0.025 to 0.375	0.025 to 3.75
STEP PER REVOLUTION	14,400 to 96	14,400 to 96
OUTPUT SPEEDS @ 200 p/s (rpm)	.83 to 125	.83 to 125
TYPICAL TORQUE @ 200 p/s (oz-in)	250* to 7.5	200* to 7.5
INPUT POWER (Watts)	8.5	8, 8.5
WINDING RESISTANCE (Ohms)	31	32 and 35
WEIGHT (oz)	27	18

NOTES
1. (PAS and PBS). Square mounting plate is standard for direct drive motors.
2. (TS, RAS and RBS). Standard motors have 4-phase bifilar windings (6 leads) for 6, 12, or 24 VDC operation.
3. All stepping motors shown here can be driven with Hurst Stepping Motor Controls.

DIRECT DRIVE SYNCHRONOUS MOTORS

	T and TA	PA and PB	RA
SPEED @ OUTPUT SHAFT (rpm)	300 or 360	300 or 600	300
RATED TORQUE (oz-in)	6.6 to 10.25	5.5 to 11	15 or 20
INPUT POWER (Watts)	6 to 9.5	7.5 to 11	11 or 14.5
CAPACITOR VALUE (mfd)	.68 to .85	.68 to 1	1.0 or 1.3
FULL LOAD TEMPERATURE RISE (°C)	27 to 38	31 to 45	37 or 46
WEIGHT (oz)	20	13	26

GEARED SYNCHRONOUS MOTORS

	T and TA	PA and PB
SPEED @ OUTPUT SHAFT (rpm)	1 to 150	1 to 360
RATED TORQUE (oz-in)	13-250*	6 to 200
INPUT POWER (Watts)	7 or 9.5	7.5 to 11
CAPACITOR VALUE (mfd)	.68 or .85	.68 to 1
WEIGHT (oz)	27	18

*Maximum gear train loading

NOTES
1. Capacitors furnished with most standard synchronous motors. (No capacitor furnished with TA or BA Series motors).
2. (PA and PB). Square mounting plate is standard for direct drive models.
3. All motors except some TA Series motors operate on 115 VAC, 60 Hz. Some TA models operate on 115 VAC. 50 Hz.

HURST

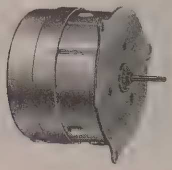
HYSTERESIS SYNCHRONOUS, REVERSIBLE MOTORS



CA SERIES

Efficient, compact CA Series hysteresis synchronous motors have a range of standard speeds from 1200 rpm (direct drive) to ⅓ rpm (geared). Gear train materials include high quality bronze bearings, brass gears, hardened steel pinions and wheel shafts.

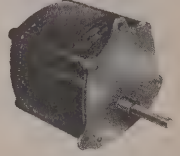
The gear torque rating is 100 ounce-inches at 1 rpm.

Dim. Geared: 2.13″ H x 2.5″ D
Direct Drive: 1.63″ H x 2.5″ D

DA/DB SERIES

Heavy duty DA and DB gear motors maintain timing accuracy and are offered in a broad range of shaft speeds 120 rpm through 24 rpd. They are recommended for applications requiring high gear torque ratings (100 oz-in max.) and small size.

Dim. DA 1.8″ H x 2.5″ D
DB 2.05″ H x 2.5″ D



GA SERIES

GA Series motors provide the highest torque ratings of all the Hurst gear motors — 600 oz-in at 1 rpm. A choice of 14 different speeds, from 1 to 300 rpm, are available as stock models for operation at 115 VAC, 60 Hz. Other speeds may be specified. High quality construction throughout assures dependable field performance.

Dim. Mounting holes: 2.99″ W x 2.37″ H x 3.06″ D

MB SERIES

MB Series motors have inverted rotors and at 60 Hz have a synchronous speed of 1800 rpm. The "fly wheel" effect of the increased rotor inertia provides smooth operation with more uniform angular velocity characteristics than other types. These motors are particularly suited to applications requiring low flutter, direct drive, synchronous operation.

Dim. 2.66″ H x 2.0″ D

DIRECT DRIVE OR GEARED MOTORS

	CA	DA/DB	GA	MB
SPEED @ OUTPUT SHAFT (rpm)	⅓ to 1200	1 to 120	1 to 300	1800
RATED PULL-OUT TORQUE (oz-in)	100 to 0.10	100 to 1.25	600 to 2	5.50$^{(C)}$ 5.25$^{(A)}$ 6.00$^{(B)}$
INPUT POWER (Watts)	5	5	10	30
CAPACITOR VALUE (mfd)	.50	.50	1.0	2.0
FULL LOAD TEMPERATURE RISE (°C)	40	40	50	40
WEIGHT (oz)	15	14	40	28

(A) Pull-in torque
(B) Locked rotor torque
(C) Pull-out

NOTES
1. Capacitors are furnished with most motors.
2. MB Series. Thermal protection available.

CUSTOM DESIGNED MOTORS
A HURST SPECIALTY

For more than 30 years we have been providing top-drawer companys with special purpose motors. Often they are adaptations of standard Hurst motors, thus costs are kept to a minimum. In other cases, completely new motors are designed to exacting specifications.

BRUSHLESS D.C. MOTOR CAPABILITIES

Over the past several years our design, engineering and production groups have become completely familiar with brushless D.C. motors. Sophisticated machine tools are in place and meeting production needs for these motors. We invite your inquiries.

Virtually all piece parts of Hurst motors — rotors, shafts, gears, pinions, etc. — are produced in-house for stricter quality control. That is why all of our motors bear this symbol of precision:

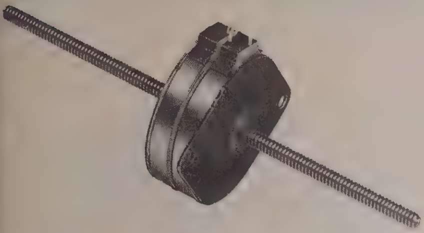
LINEAR ACTUATORS, Stepping or Synchronous



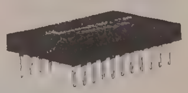
Stepping (SLS Series) or synchronous (SL Series) linear actuators are reversible, permanent magnet rotor types. An integral part of the rotor assembly is a sintered bronze nut for extended life. The nut accepts a ¼″ diameter, .048 pitch Acme screw that provides linear motion for pushing, pulling, lifting and positioning applications. Standard 8″ lead screws have a maximum travel of 6.75″ and a maximum thrust of 25 pounds. Screws of other lengths may be specified. Ball bearings are standard. SL (synchronous) Series motors provide travel of .24 inch per second. SLS (stepping) Series motors have a resolution of .001″ per step or 1000 steps per inch.

New 600 rpm versions of these motors are now available. They have all the quality features of the SL and SLS Series. The direct drive model has a linear travel rate of .48″/sec. The stepping version has 500 steps/in. Consult the factory for complete specifications.

CONTROLS FOR STEPPING MOTORS

MODEL 220001

The 220001 is a DIP package containing all the basic circuitry required for operation of a 4-phase, unipolar stepping motor: a pulse generator, bidirectional logic sequencer, and phase drivers. It is fabricated as a thick film hybrid circuit using CMOS and bipolar components for small size and low power consumption.

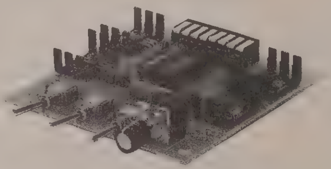


FEATURES:

- 5V logic level control of
  - — rotational direction
  - — run/hold
  - — single step (jog)
  - — phase driver disable
- 2-on, 2-off phase sequencing
- drivers rated at 500 ma per phase
- operation from single 6 to 24 VDC supply

MODEL EPC-016

The EPC-016 is a PC board assembly containing the 220001 hybrid, power drive transistors, and all external components needed for manual control of a stepping motor. A motor, DC power supply, and this board form a complete system.



FEATURES:

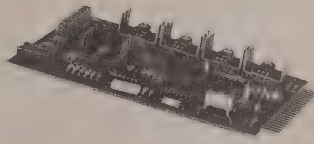
- 3 position switch for operation of motor in continuous step, jog, or hold mode
- CW/CCW rotation selection switch
- phase disable switch
- step frequency adjust potentiometer
- 2 amp per phase drive capability
- operation from single 6 to 24 VDC supply
- Dimensions: 4″ x 4″

MODEL EPC-013

The EPC-013 is a PC board assembly with additional stepping motor control capabilities.

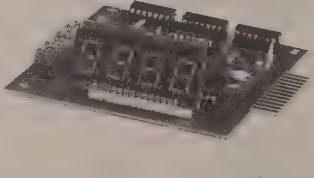
FEATURES:

- sequencing and drivers for 3 or 4 phase unipolar motors
- 3 modes of excitation
  - — full step, 2 phases on
  - — full step, 1 phase on
  - — half step, alternating 1-2 phases
- ramping oscillator for step rate control
- adjustable ramp rates
- linear or exponential ramp profile
- single step (jog) input
- gating for external control of input pulses
- manual or digital interface to control functions
- 2 amps per phase drive capability
- operation from single 6 to 30 volt supply
- 5V regulator output available for external use
- Dimensions: 6.5″ x 4.5″



MODEL EPC-014

The EPC-014 is a general purpose presettable counter/display PC board assembly suitable for use with most stepping motor drive systems. In a typical application, it is preset with a number of motor steps, counts and displays the steps as executed, and provides a control signal when the preset count is reached. It is also suitable for count and control applications using input pulses derived from sources other than step commands, e.g., from an external encoder or other sensor.

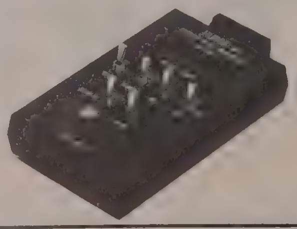


FEATURES:

- 4 decade counter/display
- manual count preset via BCD switches
- optional remote location of count preset switches and display
- manual or digital control of enable input
- 5V logic level output latch
- operation from 5VDC supply
- Dimensions: 4.0″ x 4.5″

MODEL EPC-015

The EPC-015 is a totally encased, hand-held driver containing all the control features of the EPC-016 plus selectable display of step frequency or step count. A motor, DC powder supply, and this controller form a complete control system.



FEATURES:

- 4 decade frequency/count display
- all control features of EPC-016
- 1 amp per phase motor drive capability
- operation from a single 6 to 24 VDC supply
- compact size: 1″ x 3.5″ x 6″

NEW! FOUR SIZES OF HIGH TORQUE BRUSHLESS DC MOTORS

These small brushless DC motors are virtually maintenance-free. They have outstanding torque/size ratios (see chart below). Easily controlled, they are reversible and start and stop precisely. They are engineered for intermittent or continuous duty.

Hurst's BLDC motors may be applied wherever brush servo motors are used. A leader in brushless motor technology, we fabricate in-house many of the component parts. The result: stricter quality control.

A recently completed expansion of our manufacturing facilities is devoted soley to the production of brushless DC motors. Special equipment has been installed that let us design to tolerances which were impractical to specify only a decade ago.

Designing sub-fractional motors for specific applications has been a Hurst specialty for many years. Brushless DC motors are no exception. Your inquiries will receive immediate attention.

Today, get complete specifications including performance curves. Call, write or FAX Hurst Manufacturing Division, Emerson Electric Co., Box 326, Princeton, IN 47670. Telephone 812-385-2564. FAX 812-386-7504.

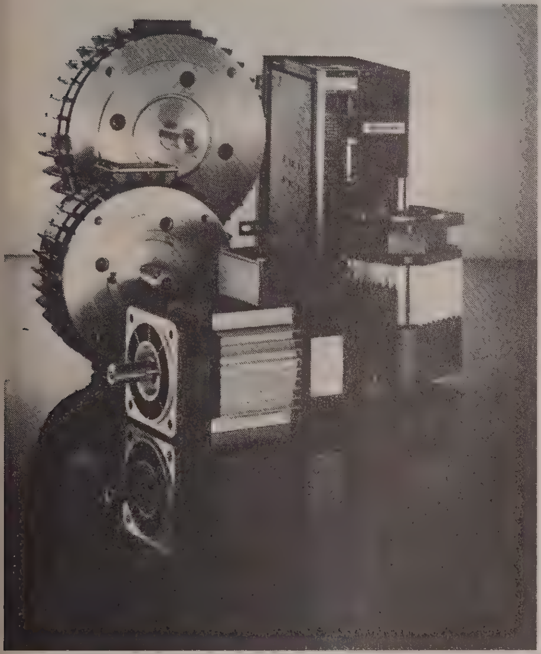
INFRANOR AUTOMATION TECHNOLOGIES

Toll-Free
800-237-3786

Specialists in Flexible, Integrated Automation

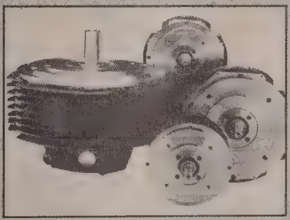
- Engineer to Engineer application support
- Servo and Stepper engineering specialists
- Pancake, cylindrical and linear servo systems
- Brush and Brushless systems



- Zero cogging to 0.1 RPM
- Speeds to 10,000 RPM
- Torques to 3,000 IN-LB
- Internal tachs, brakes encoders, resolvers
- Complete line of matched amplifiers and positioning controls
- New equipment & retrofits

SERVING U.S.A. & CANADA WITH FACTORY DIRECT SUPPORT.
WE CAN HELP YOU AUTOMATE!

COMPACT DC SERVOS

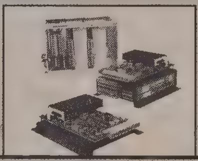


- Compact, Pancake Design
- Speeds to 10,000 RPM
- Torques to 3,000 in-lb.
- 15,000 hour brush life
- Cog-free to 0.1 RPM
- Efficiencies to 91%
- UL Recognized
- Ironless, wire-wound industrial strength rotor handles 10X overcurrent

COMPACT BRUSHLESS SERVOS

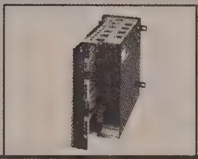
- Compact, pancake design
- Speeds to 6,000 RPM
- Torques to 1363 in-lb.
- Low inertia disc rotor
- Ceramic rare earth magnets
- 3 Ms mech. time constant
- Compact resolvers
- Built-in brakes

DC AMPLIFIERS



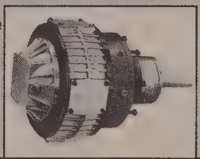
- Compact design
- Power outputs to 15 kW
- Peak currents to 120 A
- Non-audible switching
- I^2t overcurrent protection
- 8 axes fit 19" rack
- Efficiency to 96%

BRUSHLESS AMPLIFIERS



- Drive any AC or DC brushless motor
- 6 axes fit 19" rack
- Power outputs to 12 kW
- Peak currents to 80 A
- 220 VAC single power source
- I^2t overcurrent protection
- Four quadrant operation

PRECISION SPEED REDUCERS



- Zero backlash models available
- Input speeds to 6,000 RPM
- Torques to 51,000 in-lb.
- Low input inertia
- Efficiencies to 94%
- Variety of ratios
- 200% overload capability

Movinor DC SERVOS

- Sizes 23,34 and 42
- Torques from 10 oz-in. to 335 in-lbs.
- Ceramic or rare earth magnets
- Square flanges match stepper mounts
- Ideal for use with PWM drives

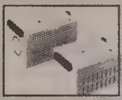
BL BRUSHLESS SERVOS

- Low inertia, high response
- 3" to 6" frame sizes
- Torques to 345 in-lbs.
- Low ripple brushless tachometers
- Matched amplifiers
- High bandwidth system performance

STEPPING MOTORS

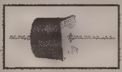
- Sizes 23,34 and 42
- Standard 1.8 degree step angle
- Dynamic torques to 840 oz-in.
- Holding torques to 1125 oz-in.
- Single and double-ended shafts
- Matching drives for optimum performance

STEPPER CONTROLS



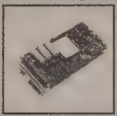
- Bi-level drive outperforms other drives
- Complete control in a single package
- Single and multi-axis control
- Translators and preset indexers
- Full, half and microstep operation
- RS232, RS422, PLC and switch inputs

LINEAR ACTUATORS



- 1.8° step motor with internal conversion to linear output
- Microstepped for smoothness and resolutions to 20 micro-inches/step
- Linear forces to 200 pounds
- Variety of leadscrew pitches and number of starts, motor sizes 23 and 34

AC INVERTER DRIVES



- Cost effective, adjustable speed, board level inverter card
- Drives 3-phase motors rated up to 1 HP
- Constant motor torque to 60 Hz
- Frequency range 0 to 400 Hz

DATA CONVERTERS

- Change RS232 data streams to RS422
- Changes RS422 to RS232 signal levels
- Enhances communications with step motor controllers
- 3 models, variety of pin configurations
- Allows RS232 devices to communicate with RS422 devices

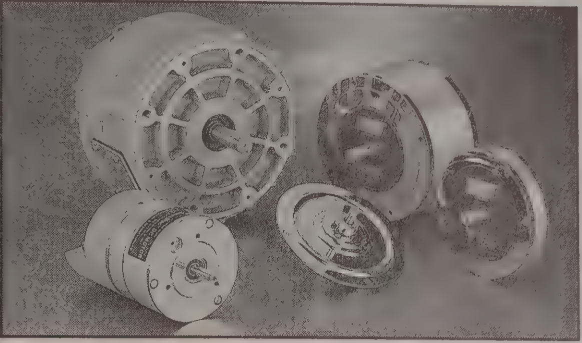
Motion Control Components



DC Servomotors

High performance disc armature design
Full torque from 0 to 4000 rpm
Zero cogging at all speeds
Unique flat package

The ServoDisc™ line offers the design engineer a wide range of high performance DC servomotors employing the unique PMI flat disc armature. This ironless, low inertia armature delivers high acceleration and zero cogging in an exceptionally compact package. Power outputs range from 1/30 to 10 hp. These motors are offered in a wide range of configurations from flat "pancakes" to heavy-duty industrial designs. They are available as complete actuator packages that can include tachometers, encoders, brakes, gearboxes and matching amplifiers.

* UL Recognized Versions Available

Servo Amplifiers

Matched to PMI's disc armature servomotors
Single and multi-axis designs
Extensive fault protection
Low form factor to 1.005

PMI's PWM (pulse-width modulated) servo amplifiers are designed specifically to match the ServoDisc™ motor lines. Voltage and current ratings guarantee maximum motor performance with complete protection from accidental motor overload. Packaging options accommodate both single and multi-axis applications. The exceptionally low form factor contributes to high efficiency motor operation. Extensive fault protection, self-diagnostics and electronic current limiting protect the complete system for fail-safe operation.

* UL Recognized Versions Available

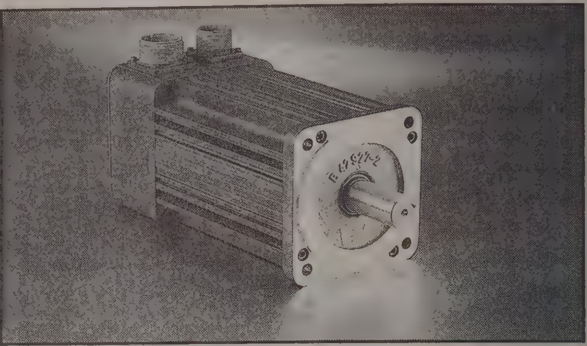
Servo System Performance



Brushless servomotors incorporate highest rare earth neodymium-iron-boron magnets and excellent thermal design, providing high acceleration and torque in an extremely compact package. Its rugged design, without brushes, means extremely low maintenance. We offer both conventional and pancake designs to meet your machine's unique space requirements. Many of our brushless servomotor amplifiers are micro-processor controlled with wide bandwidths and extensive diagnostics for long-term reliable operation.

GOLDLINE Motors

Three series of **GOLDLINE** motors offer the following features:

- Long life
- Class H insulation
- Continuous torque ranges from 0.62 to 82.0 lb-ft
- Small package
- Rugged resolver feedback
- Encoder

Available options include:

- Fail-safe brakes
- IP-67 sealing, MS connectors
- Analog tachometer
- Special mechanical modifications to meet customer requirements
- Precision gearheads

B-Series

- Extremely low inertia for quicker indexes
- Greater throughput from your machine
- UL recognized

M-Series

- Medium inertia motors to maximize performance on large inertia compliant loads
- UL recognized

EB-Series

- Explosion-proof motors rated for Class Group I, Division C & D environments
- UL listed

PWM Servo Amplifiers

Kollmorgen Servo Amplifiers offer built-in overload protection circuitry and high bandwidth in a complete family of products.

BDS4 Amplifier Series

- Available in 7 module sizes
- Power ratings to 22 KVA continuous (44 KVA peak)
- Current ratings from 3 to 55 amps RMS continuous and up to 110 amps peak
- Patented torque angle control for increased motor performance
- Optical encoder card, eliminating the need for an additional encoder
- UL Listed

BDS5 Amplifier/Positioner

- Full-featured, high performance brushless positioning servo in one compact enclosure
- Combines a positioner, a servo amplifier and I/O interface in one unit
- Simple programming language
- Advanced motion control moves
- Electronic gearbox
- Motion rating and registration
- Self-turning
- Digital servo loops
- 32 I/O sections
- Serial communications including RS-232 for typical terminals or RS-422/RS-485 for multidrop communication
- Powerful PC-based programming and start-up environment

Available options include:

- DEP-01 data entry panel
- Hand-held terminal
- I/O32-OPTO interface

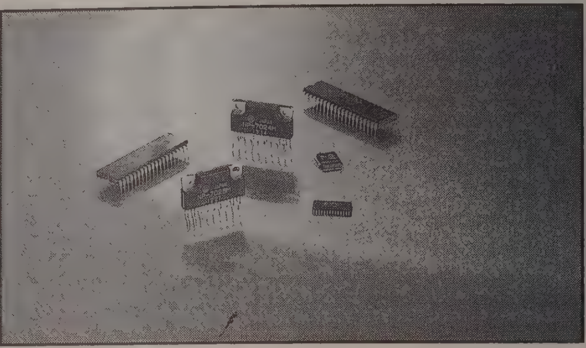
Step Motor Controllers



Low Cost Imaginative OEM Solutions and Quick-start Development Tools.

Pulse & Direction Controls:

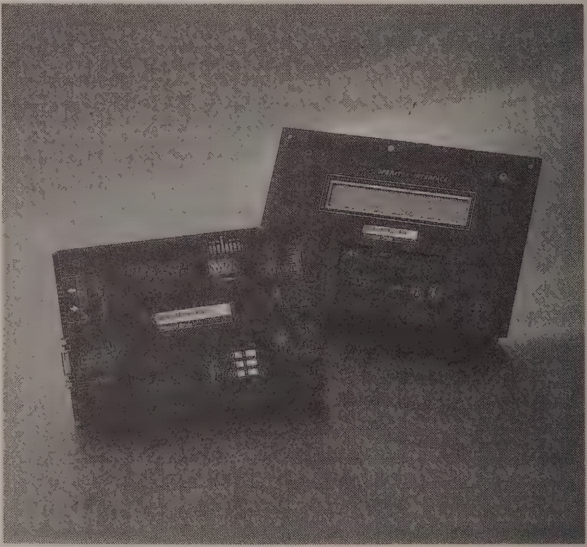
SMC-100 (unipolar, full/half stepping) and SMC-150 (bipolar chopper, full/half stepping) and SMC-155 (bipolar chopper, microstepping). Single power supply, simple operation. 12-32 Volts DC. 2 amp and 4 amp models.

Programmable Motion Controllers for Step Motors:

SMC-400 (full/half stepping) and SMC-500 (microstepping) programmable motion controllers have built-in bipolar chopper drivers, built-in nonvolatile RAM for program storage, four each programmable inputs and outputs, in addition to the dedicated inputs (CW & CCW home limits, E stop), and an extremely powerful English-like command set. RS232 serial interface to a PC. Multidrop pollable software – up to eight units can be daisy-chained and individually or collectively addressed. Single power supply operation. Cable kits and program development kits are provided for quick start-up. 32 Volts DC, 2 amp or 4 amp models. Higher power units (SMC-1502/1402, 100 Volts DC, 8 amps) are available with or without encoder based closed loop operation.

Intelligent Operator Panels with Built-in Nonvolatile Memory or Removable Data Cartridge:

OP-1 & OP-2 are designed to be used as operator panels for the SMC series programmable motion controllers. OP-1 has built-in 8K bytes of nonvolatile memory, and OP-2 has 8K bytes of removable memory in a data cartridge. A powerful command set enables the user to program up to 16 variables. The values of these variables can be entered with the front panel push-button switches. Built-in intelligence enables the programs to be written in plain English, making the operator interface exceedingly simple. Eight programmable inputs add to the versatility of these devices.



Step Motors

PF Series Canned Stack Step Motors

25, 35, 42 and 55 mm OD. 3.75°, 7.5° and 15° step angles. 96, 48 or 24 steps per revolution. Choice of four magnet materials (including Neodymium) with or without gear heads. Wide variety of gear ratios. Sleeve bearings are standard, ball bearings are optional. Unipolar or bipolar windings. "T" thin versions with narrow profile available on the 35 and 42 mm sizes.

Model	Dia (mm/in)	Length (mm/in)	Step angle	Max (oz-in)
PF25	25/0.98	15/.59	7.5° or 15°	2.5
PF35	35/1.37	31.8/1.25	7.5° or 15°	3.0
PF35T	35/1.37	15/0.59	7.5°	5.0
PF42	42/1.65	21.8/0.86	7.5°	14.0
PF42T	42/1.65	14.9/0.59	7.5° or 3.75°	8.0
PF55	55/2.16	25/0.98	7.5°	23.0

SM & PJ Series Hybrid Step Motors

Size 17 (1.65" square), Size 23 (2.3" OD), Size 34 (3.4" OD) and Size 42 (4.2" OD). 0.9°, 1.8° or 3.6° step angles. 100, 200 or 400 steps per revolution. Standard ball bearings.

Model	Dia (mm/in)	Length (mm/in)	Step angle	Max (oz-in)
SM39	39/1.53	24/1	0.9°, 1.8°, 3.6°	7.8
SM42	42/1.65	34/1.34	1.8°, 3.6°	9.5
PJ39	56.4/2.2	39/1.54	1.8°	27.8
PJ42	56.4/2.2	42/1.65	1.8°	34.7
PJ50	56.4/2.2	50/1.97	1.8°	69.4
PJ55	56.4/2.2	55/2.17	1.8°	83.3
PJ80	56.4/2.2	80/3.15	1.8°	111.1
SM3424-170	86.4/3.4	61/2.4	1.8°	156
SM3424-400	86.4/3.4	93.3/3.67	1.8°	312
SM3424-350	86.4/3.4	127/5.0	1.8°	469
SM4270-340	106.7/4.2	176/6.93	1.8°	1349
SM4288-890	106.7/4.2	153.5/2130	1.8°	2130

PCL series high speed programmable pulse generators offer simpler control of motion with an external CPU, reduced board space and reduced overall cost in high performance step or servo motion control systems.

The PCL series can be used to generate preprogrammed pulse rates with controllable ramps and cyclic functions. Parameters can be changed "on-the-fly" upon cue from the CPU. PCL-3AM features max programmable frequency up to 3 M Hz and built-in facility to close the position loop with an encoder. PCL-240AK has similar features with a max programmable frequency of 240 K Hz. Lower cost, lower speed chips (PCL-AK) and surface mount versions (PCL-240MK and PCL-MK) are also available.

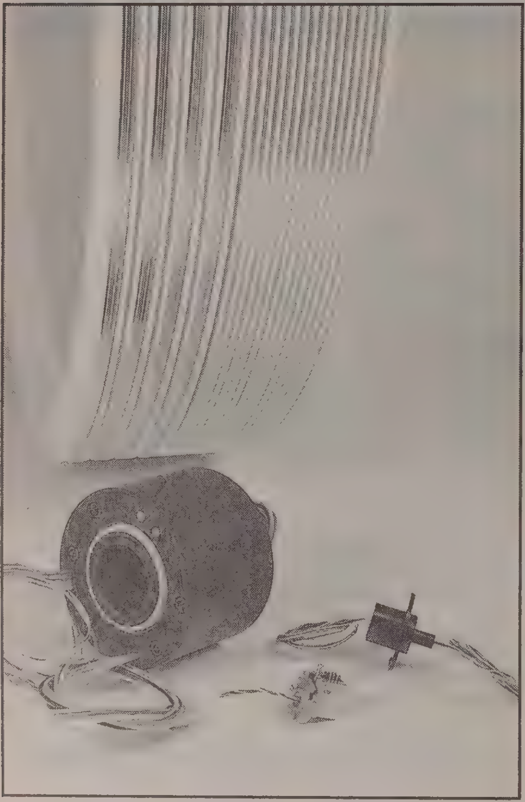
Slip Rings



If you design rotating machinery, here's something to think about.

Slip rings are devices used to pass power or data from a stationary to a rotating structure. Slip ring assemblies can be used in any mechanical system that requires unrestrained, continuous rotation while transmitting power and data.

Poly-Scientific is the largest slip ring manufacturer in the world. We have developed over 4,000 slip ring designs, many of which are available for use in their existing configuration, or they can be modified to meet specific requirements. New designs can be created to meet the most demanding specifications.

There was a time when slip rings were too complicated, too big and too expensive for many commercial/industrial designs. But due to advances in manufacturing methods, we are now able to offer compact, low maintenance slip rings for commercial use that feature the same high reliability contact technology found in our military and aerospace slip rings. These are mass-produced, off-the-shelf assemblies which are immediately available for a wide variety of applications. They are successfully operating in such diverse environments as packaging, food processing, CCTV and revolving doors, to name a few.

The next four pages describe our commercial slip ring assemblies. The following three pages describe our slip rings for space/vacuum, vehicular, helicopter, pedestal and other demanding environments, as well as slip ring separates and twist capsules. Our slip rings are used in some of the most sophisticated and demanding military and industrial applications imaginable.

There are two pages describing our "special" assemblies including cable reel and mooring slip rings, and our line of fiber optic rotary joints (the optical equivalent of a slip ring).

The last page of our slip ring section is "How to Specify A Slip Ring", a paper that guides the design engineer through the process of specifying a slip ring to make certain that it meets all system requirements.

New to our section this year are products from Litton Clifton Precision. We have consolidated the operations of Clifton Precision and Poly-Scientific, allowing us to offer a full line of rotary components. The three pages describing Clifton products give a brief overview of their product line including brush and brushless DC motors, digital and brushless resolvers, torque motors and DC servo motors.

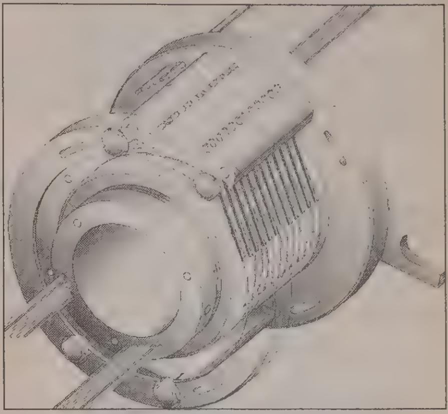
Commercial Slip Ring Assemblies

AC4598/AC4831

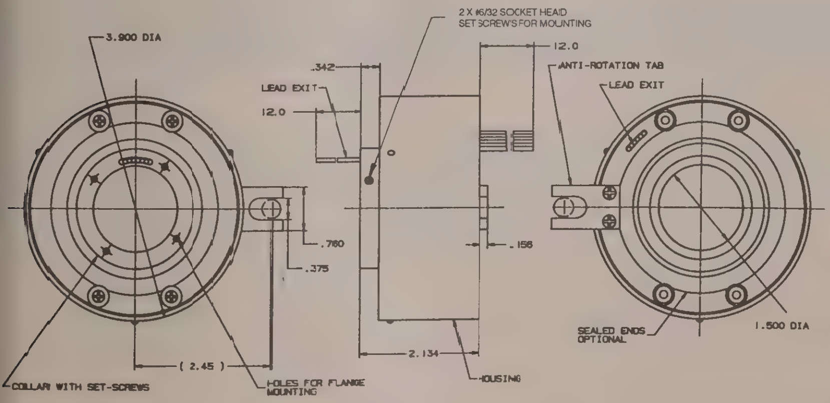


This device is compact and maintenance-free (no lubrication required) and is a standard design available with short delivery. Each slip ring assembly features Litton Poly-Scientific's patented fiber brush technology.* The fiber brush contact allows greater rotational speeds (up to 250 rpm**), while minimizing contact wear to extend operational life. Radial contact ball bearings are used for smooth, quiet operation. Precious metal-plated rings are used for enhanced conductivity and low electrical noise. Up to 24 circuits, in six circuit increments, provide system engineers with additional design flexibility. Available in either 5 Amp per circuit (AC4831) or 10 Amp per circuit (AC4598) versions.

The 1½" unobstructed bore through the center provides routing space for hydraulics, pneumatics, or for a concentric shaft mount. The frame, standard bearing, and cover are molded of high-impact, engineering thermoplastics.

General Specifications

- Radial contact ball bearings.
- Operating speed of 0-250 rpm continuous.**
- Contact Materials: rings - precious metal plated.
  brushes - fiber (multifilament silver alloy wire).
- Maximum voltage rating per circuit of 220 VRMS.
- Noise rating per circuit less than 100 milliohms peak.
- Standard lead wires are 12", premium 16 gauge, color-coded.
- Operating temperature 80°C max.



Part #	# of Circuits	Current Rating Per Circuit	Size - Diam. x Length
AC4598-6	6	max. 10A	3.9" x 2.2"
AC4598-12	12	max. 10A	3.9" x 3.1"
AC4598-18	18	max. 10A	3.9" x 4.1"
AC4598-24	24	max. 10A	3.9" x 5.0"
AC4831-6	6	max. 5A	3.9" x 2.2"
AC4831-12	12	max. 5A	3.9" x 3.1"
AC4831-18	18	max. 5A	3.9" x 4.1"
AC4831-24	24	max. 5A	3.9" x 5.0"

- *Continuous 360° rotation for transmission of power or data signals*
- *5A or 10A circuit models*
- *6, 12, 18 or 24 circuit assemblies available as standard parts*
- *Up to 250 rpm continuous***
- *Rugged design*

Examples of applications include machining centers, rotary index tables, heavy equipment turrets or cable reels, test equipment, packaging machines, palletizing machines, magnetic clutches, robotics, process equipment, rotary sensors and emergency lighting.

Standard Options

- 5.0" O.D. flange with 4 mounting holes *(slips over the collar for flange mounting).*
- Splash seals for dust and moisture resistance.

Custom Options - contact a sales engineer

- Various axial and radial lead exits.
- Higher rotational speeds with alternate bearings.
- Higher current capacity per circuit.
- Signal and power circuit combinations.

---

* U.S. patent #4398113 and other foreign patents.

** Sustained high speed operation will reduce overall, effective operational life.

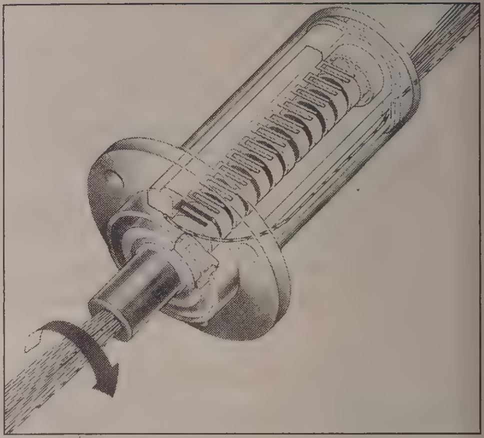
Commercial Slip Ring Assemblies

AC4023



The AC4023 was specifically designed to be a standard, off-the-shelf product for use in industrial and commercial applications. The size of the envelope is optimized for maximum economy.

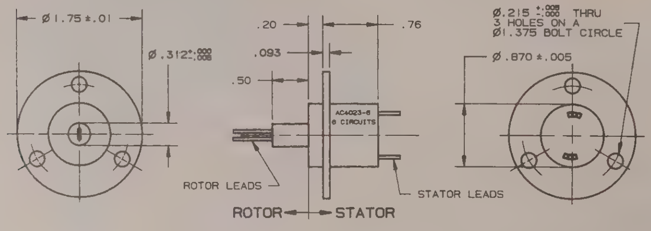
Available in four basic configurations, the capsules range from 1.46 to 2.90 inches in length and come with your choice of 6, 12, 18 or 24 two Amp/210 VDC circuits. The housing is made from tough, durable engineering thermoplastic. The use of precious metal contacts and precision ball bearings provides life that meets or exceeds the requirements for most industrial/commercial applications. Please note that the operational life of the unit is dependent upon rotational speed.

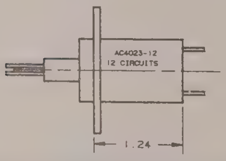
- *Continuous 360° rotation for transmission of power or data signals*
- *2 amp/210VDC circuits*
- *6, 12, 18 or 24 circuit models*
- *Up to 500 rpm**

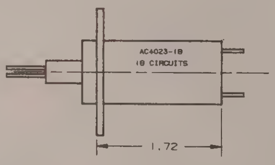
Examples of applications include CCTV pan/tilt camera mounts, manufacturing equipment such as indexing tables, robotics (end-effectors, arms, vision systems, sensors), and electrical test equipment.

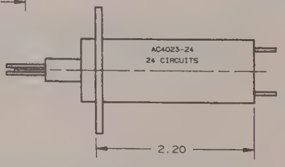
General Specifications

- Operating Speed of 500 rpm.*
- Contact Material - precious metal plated.
- Voltage rating range per circuit is low millivolts to 210 VDC.
- Electrical noise is < 20mΩ @ 5RPM, 6VDC, 50mA.
- Lead wires are 10", 26 gauge color-coded. 24" or 36" leads are optional.
- Operating temperature 80°C max.









Part Number	Number of Circuits	Current Rating per Circuit**	Dimensions		
			Barrel Diam.	Flange Diam.	Length
AC4023-6	6	max. 2A	.875"	1.75"	1.46"
AC4023-12	12	max. 2A	.875"	1.75"	1.94"
AC4023-18	18	max. 2A	.875"	1.75"	2.42"
AC4023-24	24	max. 2A	.875"	1.75"	2.90"

* Sustained high speed operation will reduce overall, effective operational life.
** Full current load of 2 amps per circuit for continuous use is not recommended.

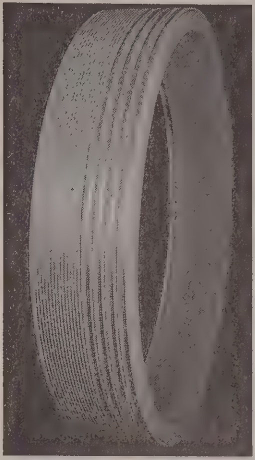
Large Industrial Slip Ring Assemblies

Utilizing a new fabrication process - a breakthrough in slip ring technology - we are able to offer an economical large slip ring that is mass producible. Using this new process, we can quickly install individual rings on a CNC-machined epoxy base. This operation can be done in an assembly-line fashion that eliminates dependence on time-intensive electro-forming processes, making these large slip rings quite economical.

Our patented fiber brush technology* minimizes contact wear and resultant debris while it extends operational life. The patented high frequency design provides excellent digital data transfer, even at a 50 megabit/second NRZ data rate.

We offer slip rings with an inside diameter up to 50", length up to 18" and rotation speeds up to 120 rpm. The length is dependent on the number of circuits and the power requirements.



- *Up to 20 signal circuits rated at 1 amp / 1000 VDC or VAC*
- *Up to 120 rpm*

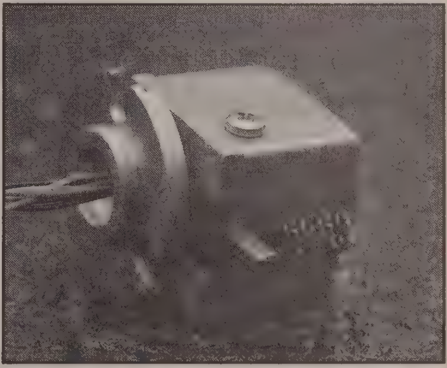
Examples of applications include slip rings for CT scanners, cranes, off-shore mooring, amusement rides, or any industrial application requiring a large diameter slip ring.

Miniature High Speed Slip Ring Capsules

EC3848

The EC3848 features precious metal contacts at the rotary interface. Flying lead wires on the rotating side and solder terminals on the stator side complete the electrical connections. Precision ball bearings and the patented fiber brush design* allow operation up to 10,000 rpm without the need for cooling equipment.

The capsule is available with up to 10 circuits rated at 1 amp, 100 VDC.



- *1 amp / 100VDC circuits*
- *10 circuits*
- *Up to 10,000 rpm*

Examples of applications include centrifuges and various high speed instrumentation applications such as tire testing.

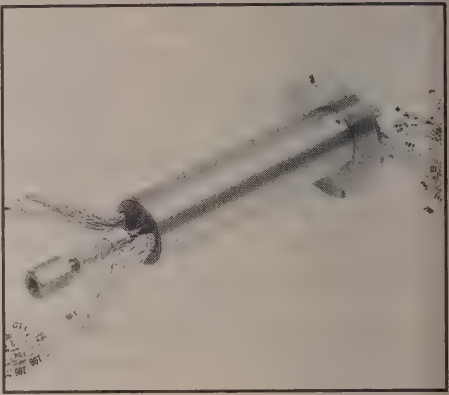
High Speed Slip Ring Capsules

For successful slip ring operations at or above several thousand RPM, important design and material changes must be incorporated. These changes address increased structural demands and frictional heating at the sliding contact surface.

Applications for high speed slip rings include centrifuges, aircraft turbine testing, gasoline or diesel engine testing and other high speed instrumentation applications.



The following table presents a cross-section of selected Poly-Scientific high speed designs.

Number of Circuits	Part Number	Length	Diameter	Bore	Brush	Notes
28	3042	2.43	1.25	N/A	Gold	Liquid Cooled
28	3762	1.67	1.0	N/A	Gold Fiber Brush	Gas Cooled
36	3757	2.53	1.625	N/A	Gold Fiber Brush	Gas Cooled
40	1823	4.08	1.63	N/A	Composite	
64	4160	5.0	3.5	1.5	Gold Fiber Brush	
100	3057	6.40	1.5	N/A	Gold	Liquid Cooled
200	4064	10.0	2.25	N/A	Gold	Liquid Cooled
300	4075	11.75	2.28	N/A	Gold	Liquid Cooled

Miniature Low Speed Slip Rings

Miniature slip ring capsule assemblies address both critical space and weight limitations. These smallest of all slip ring assemblies are widely used in the pitch, roll and yaw axes of inertial navigation systems where there can be no sacrifice in reliability to achieve packaging density. Very tight pitch controls are maintained in individual ring locations with center-to-center spacings as small as 0.015 inch between adjacent rings. Miniature slip rings are available with 7-95 circuits. Some designs feature a through-bore. Poly-Scientific miniature slip ring assemblies are currently performing in Boeing's 747, Jaguar, F14, F15, F18, KC135, and the Cruise and Trident missile weapons systems. Existing designs for miniature slip rings are available, or they may be modified for your needs. We can also design a custom miniature slip ring.

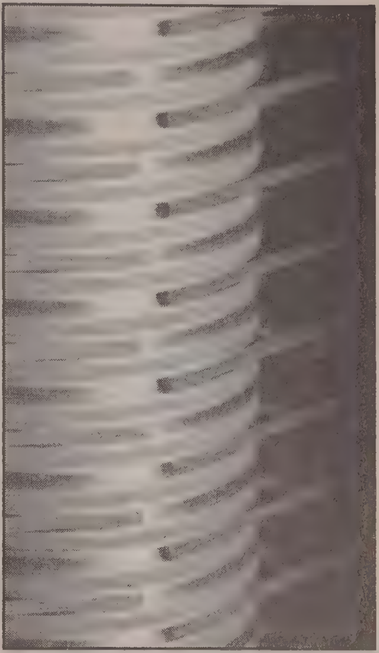
Space / Vacuum Slip Rings



Generally aerospace slip rings and brushes (sliding electrical contacts) are designed using traditional contact technologies such as lubricated monofilament wire brushes or self lubricating composite brushes. These traditional approaches have been proven successful many times through testing and actual flight experience.

An alternative to traditional aerospace slip ring contact designs is the use of Poly-Scientific's patented fiber brush contact design.* Fiber brush is the term for a patented design of sliding electrical contacts. Fiber brushes are simply a group of individual metals fibers (wires) that are collimated by and terminated into a metal tube. The free, unterminated end of the fiber brush bundle rides in a groove on the ring surface in the fashion of a paint brush. Ring groove geometry will differ depending on the required system parameters for the respective circuit (power transfer, signal transfer, etc.). The axial space consumed by each fiber brush circuit will depend on factors such as voltage and current ratings for the circuit, crosstalk isolation and capacitance limits.

Fiber brushes have several distinct advantages over conventional slip ring contacts:
- Multiple points of contact per brush bundle to provide low electrical noise.
- Low contact wear rates to provide long life.
- Low contact force per fiber to eliminate the need for lubrication.
- Ability to perform in ambient conditions as well as in vacuum conditions.

The following table compares three types of brush technology, all of which are used by Poly-Scientific depending upon system requirements.

Composite Brushes Ag/MoS$_2$/Graphite	**Monofilament Brushes** Lubricated	**Fiber Brushes** Unlubricated
Most flight history	Considerable flight history	Limited flight history
Meets outgassing requirements	Does not meet outgassing requirements	Meets outgassing requirements
Self lubricating contacts (solid lubricant in brushes)	Requires liquid lubricant on contact surface	No oil or dry film lubricant application required
Requires largest ring to ring axial pitch	Requires smallest axial pitch (50% of composite brush pitch)	Requires less axial pitch than composites (70% of composite brush pitch)
Manufacture subject to greatest number of process variables	Manufacture subject to few process variables	Manufacture subject to few process variables
Greatest amount of wear debris generation (approx. 100 times the wear rate of fiber or monofilament brushes)	Small amount of wear debris generation	Smaller amount of wear debris generation than monofilament brushes
High electrical noise if operated in humid environment	Low electrical noise in air and vacuum	Low electrical noise in air and vacuum
Must operate in vacuum or dry inert atmosphere	Operational in air or vacuum with lubricant present	Operational in air or vacuum
Wide operating temperature range	Viscosity limited operating temperature range	Wide operating temperature range
Wide range of surface speeds	Limited range of surface speeds	Wide range of surface speeds

Satellite systems using Poly-Scientific fiber brush slip rings include:

- *Olympus*
- *Intelsat Test Program*
- *Eurostar*
- *Inmarsat*
- *Orion*
- *Hispasat*
- *Telecom II*

---

* U.S. patent #4398113 and other foreign patents.

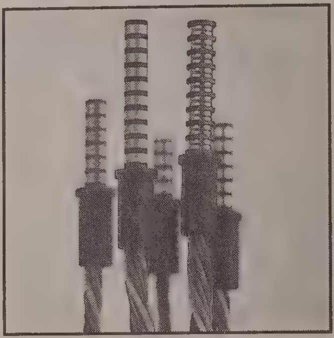
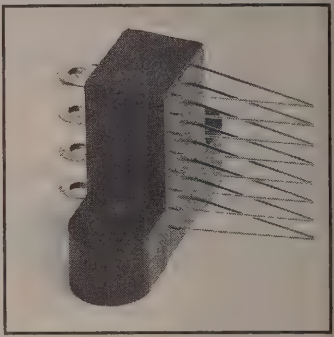
Slip Ring Separates

Sometimes a self-contained "capsule" slip ring is not practical due to system size constraints or cost limitations. We can provide the slip ring (rotor) and brush block (stator) as separate components to be mated by the customer in his system. The rotor can be supplied in either a drum or pancake configuration. The drum approach features consecutive individual rings along the axis of rotation. With the pancake approach, individual rings are positioned concentrically on a flat surface. Miniature separates may have slip ring rotor diameters less than 0.100 inch.





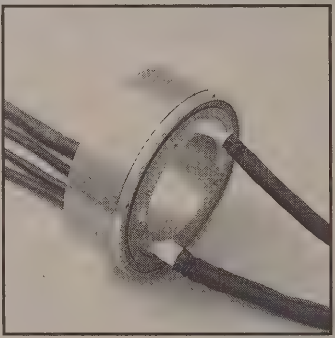
The following table presents a cross-section of selected Poly-Scientific separates designs.

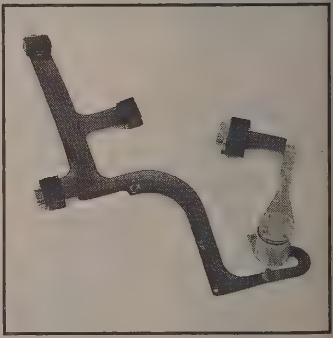
Number of Circuits	Mating Part Number	Brush Block	Ring O.D.	Back Ring Pitch	Back Shaft Diameter	Shaft Length	Flange Diameter	Special Features
1-10	2690	259	.081	.050	.125	.250	.150	FB, RB, P, VG, UG, S
1-12	4183	4184	1.320	.100	1.360	.375	N/A	.985 Bore
1-20	1202	262	.125	.050	.250	.375	.312	FB
1-37	2731	262	.220	.050	.250	.375	.312	RB, FB, VG, UG
3	2384	2981 2385	.067	.025	.071	.070	.115	Double V-Groove
5	3046-1	3046-2	.550	.060	.580	.640	.580	.376 Bore, RB, VG
6	3795	3416	.067	.025	.061	.125	.109	Double V-Grooves
8	1454	1455	.550	.060	.584	.640	.580	.376 Bore, RB, VG
19	2037	2038	1.860	.030	1.880	.685	1.880	1.500 Bore, VG

Abbreviations Used: FB - Flat Barrier VG - V-Groove RB - Raised Barrier UG - U-Groove P - Plastic Backshaft S - Stainless Steel Backshaft
Circuits 1-10 -- Option of having 1 through 10 circuits. Shaft lengths shown are for maximum number of rings (circuits).

Poly-Twist or Twist Capsules

The Poly-Twist is a reliable slip ring substitute for limited rotation applications, up to 1½ turns of rotational freedom. Sometimes called a twist-cap, this device resembles miniature slip ring assemblies in size and appearance and provides a self-contained, no-sliding contact rotary interface using flexible circuit tapes for those applications where continuous rotation is not required. We have designed and produced Poly-Twists with 14 to 1,920 circuits. Poly-Twists feature low torque, no noise and a very long performance life. Although the majority of applications for the thousands of units supplied to date have required miniature twist-cap assemblies, some very large designs have also been provided.





Applications include:

- *LANTIRN*
- *F18 FLIR*
- *Toronado*

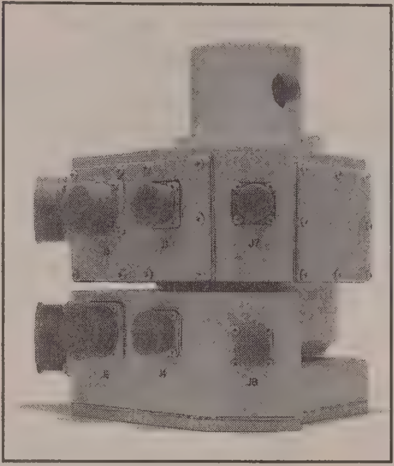
Vehicular Slip Rings

Electrical slip rings are used in vehicles such as tanks, retrievers, mobile missile launchers, and armored personnel carriers. A typical vehicle might contain slip rings in the turret, the commander station and the infrared sight. In each of these applications, slip rings have provided reliable signal and power coupling for the most rugged battlefield conditions.

In addition to producing compact slip rings for minimal space applications, we have provided units which combine conventional electrical slip rings with hydraulic joints to form electro-hydraulic slip rings, meeting pressure requirements of 3000 psi and flow rates of 30 gpm. Pneumatic couplings through slip rings for high or low pressure air transfer is another area where we can offer field-proven experience.



Current applications include:

- *M48 & M60 Tanks*
- *M2/M3 Bradley Fighting Vehicle*
- *LVT P7 Vehicle*
- *V150 Commando Vehicle*

The following table presents a cross-section of selected Poly-Scientific vehicular designs.

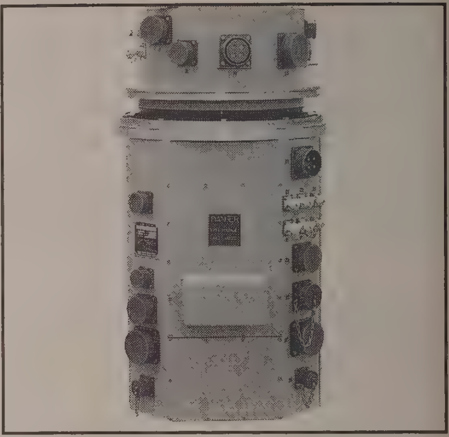
Pedestal Slip Rings

Typically found in radar, missile and gun fire control systems, pedestal slip rings contain varying combinations of logic, control, and high frequency analog signal and power circuits.

Our standard pedestal slip rings typically include shrouded compartments to minimize EMI, special provisions to reduce VSWR and crosstalk; removable cover plates for field servicing; rotary seals for protection from hostile environments; and clearance holes through the center of the slip ring for routing wave guides. Ruggedness, long life and the ability to operate in harsh environments are standard requirements for pedestal slip rings. These slip rings are usually custom designed to meet specific application requirements.

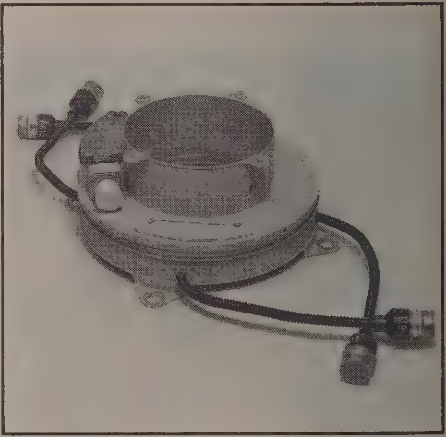


Applications include:
- *AWACS*
- *Aegis gun director*
- *MK 75 3" gun*
- *ASR 9 Radar*

Helicopter Slip Rings

Slip rings that power de-icing and blade folding systems must transfer high current levels to blade systems rotating at high speeds. Main rotor slip rings must also transfer signal level circuitry for control gauges mounted on the rotor blades. Most main rotor capsules incorporate angle sensing devices for proper blade folding or blade pitch control. They must also withstand vibration levels and environmental hazards typical of helicopter operation. The latest de-icing applications include both main and tail rotor slip rings, with main rotor current levels to 60 amperes and tail rotor speeds to 1,500 rpms.

Our slip rings meet stringent EMI requirements, and, in the case of the tail rotor slip ring assemblies, accommodate rotor misalignment while simultaneously operating in heavy rain conditions. These units are usually custom designed to meet specific application requirements.



Applications include:
- *Apache*
- *Blackhawk*
- *Seahawk*
- *V22 Osprey*

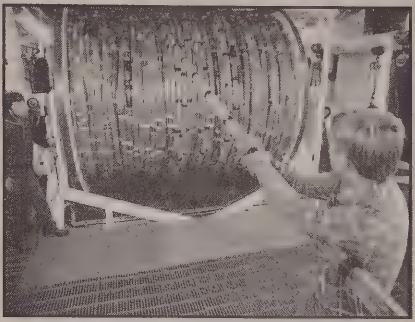
Special Slip Rings

Cable Reel Slip Rings



Cable reel slip rings can be found in a wide range of military and industrial applications including marine/seismic exploration, underwater towed vehicles, remote tele-operated vehicles, construction cranes and buoyant submarine antennas. These slip rings are designed for particularly rugged environments while also providing field accessibility of the brush block assemblies if repairs are necessary. With access plates in place, sealed bearings and integral gasketed connectors, the internal portion of the unit is well protected from environmental conditions. For many reel applications, our compact packaging allows the slip ring to be installed in the reel axle (inside diameter) to eliminate an obtrusive and damage-prone cantilever mount.

Mooring Slip Rings

Deep water oil production requires a slip ring that allows complete freedom to weathervane for floating power generation stations (SALM type installations). Experience to date in mooring applications include current to 600 amps, voltages to 35,000 volts (transmission of 36 megawatts of power) in sizes to 8 feet in diameter by 10 feet in length. One such unit has been operating continuously for 10 years in a petrochemical application off the coast of Santa Barbara, California.

Fiber Optic Rotary Joints *(FORJ)*

A Fiber Optic Rotary Joint is a device used to pass fiber optic signals from a stationary structure to a rotating mechanism in a fiber optic system. They provide the same unlimited rotational freedom for fiber optic systems that the slip ring provides for electrical systems. We offer several FORJs:

On-Axis Fiber Optic Rotary Joint

(On-Axis FORJ) FO3585

The On-Axis FORJ is a single channel device which has only one fiber. It is a totally passive device that is designed to provide a single optical path across a rotating interface. It occupies the centerline of axis of a rotating system, hence the term "on-axis". The device is fully bidirectional and will allow light transmission simultaneously in both directions.

Features

- Provides rotary coupling for multimode fiber links.
- Wide operating wavelength range for wavelength multiplexing.
- Completely bidirectional.
- Available in wide range of fiber sizes and pigtail lengths.
- Can be integrated into existing slip ring designs.

Applications include:

- *Cable reels*
- *Medical systems*
- *Two axis milling machines*

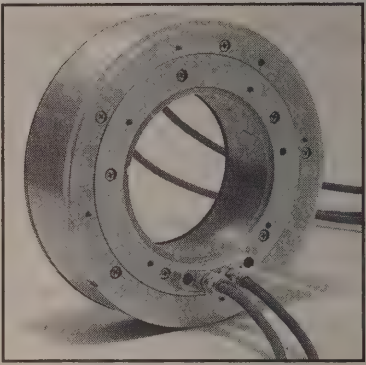
Fiber Optic Rotary Joints *(FORJ)* continued

Off-Axis Fiber Optic Rotary Joint

(Off-Axis FORJ) FO3595



The Off-Axis FORJ is a multi-channel device which contains a 4 inch bore along the axis. The design is rugged and environmentally sealed. The unit is available with 1 to 6 bidirectional optical channels. Designs are also available with integrated slip rings for electrical signals. Due to the optical design, the unit must be ordered with specially designed transmitters, receivers, and repeaters.

Features

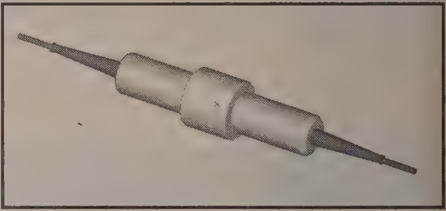
- Provides rotary coupling for multimode fiber links.
- Completely bidirectional.
- The unit may be hard mounted to either the inner or outer housing and soft mounted or derotated on the opposite housing using the built in features.

Applications include:

- *Computerized pipe bending*
- *Marine propulsion system*
- *Four axis milling machines*
- *Industrial and military*

Singlemode Fiber Optic Rotary Joint

(SMORJ) FO3588-1



Provides rotary coupling for singlemode fiber links and offers a wide operating wavelength range for wavelength multiplexing.

Features

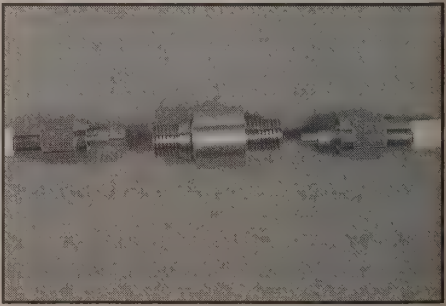
- High bandwidth for multi-gigahertz operation.
- Completely bidirectional.
- May be combined with existing slip ring designs.

Applications include:

- *Tethered robotic vehicles*
- *Towed array*
- *Aircraft antenna*

Low Cost Fiber Optic Rotary Joint

(Low Cost FORJ) FO4698



A low cost alternative to the FO3585 On Axis FORJ, this device features a smaller package design.

The units are designed for easy hook up to 906 SMA or ST style fiber optic cable assemblies. The units are not intended for the harsh environments of the FO3585 On-Axis FORJ.

Features

- Provides rotary coupling for multimode fiber link.
- No collimating lens required.
- Quick and easy hook-up to ST or SMA connectors.
- Completely bidirectional.

Applications include:

- *Security Systems*
- *Medical Systems*
- *Other clean environments*

How to Specify a Slip Ring

Many of the more than 4,000 Poly-Scientific slip ring designs are available for use in their existing configuration, or they may be modified to meet your specific requirements. New designs can also be created to meet the most demanding specifications.

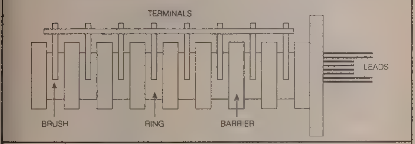
Our engineers are experienced in a wide range of slip ring applications. We utilize resources such as the Anvil computer-aided design (CAD) system. And, a very active in-house quality circle program solicits the best inputs from all of our many skilled craftspeople, from start to finish.

This section is designed to guide you through the process of specifying a slip ring. We've outlined below the major considerations that a slip ring engineer will need to know about your application.

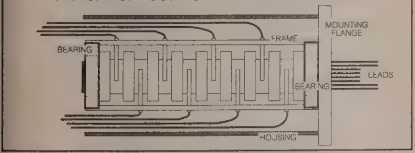
Basic Slip Ring Design

Throughout these pages, you will see the terms "slip ring capsule" and "slip ring separates". The term "separate" indicates an individual rotor/brush block combination. The term "capsule" is used to denote a self-contained unit consisting of a rotor, stator and its own integral ball bearings.

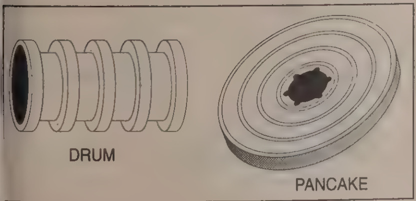
SEPARATE BRUSH BLOCK AND ROTOR



TYPICAL CAPSULE SLIP RING ASSEMBLY



There are two basic slip ring configurations to consider based on space allocation in your system: the more common drum approach where each ring is adjacent to the next along the centerline, somewhat like the threads on a bolt, and the pancake approach where the rings are concentric with one another like the grooves on a phonograph record. The pancake approach is used when length is at a premium but diameter is less restrictive.



Defining the Mechanical Envelope

The envelope is, of course, largely dictated by the space available in the system. The slip ring engineer should be given the maximum space available in the system so all existing candidate designs can be considered. It is imperative that the space required for the slip ring be specified in the early stages of the system design and that it be consistent with the structural and electrical demands.

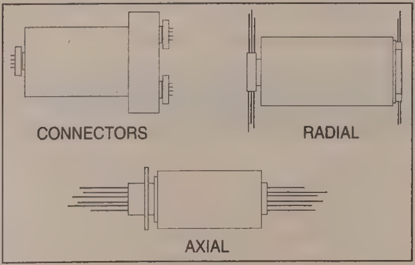
Defining System Interface Requirements

The slip ring engineer will need to know these system interface considerations:

1. Is a bore required through the slip ring for routing coolant plumbing, hydraulic lines, pneumatic lines, waveguides, etc? In such applications, the slip ring actually mounts concentric with these lines in the system.

2. How will the slip ring attach to the system? It is never advisable to hard mount both the rotor and the stator to the system since the slip ring bearings may overload if there is any misalignment between them and the system bearings.

3. How should the electrical connections to the slip ring be made? Is it desirable to have connectors integral with the slip ring on both the rotor and stator, or would flying leads on one or the other ends be desirable? And if flying leads are preferred, should they exit the rotor in a radial or axial direction, and what length should the leads be?



Defining Electrical Requirements

The current specified enables the slip ring engineer to propose a unit with the appropriate cross-sectional area of the rings, brushes and lead wires. The specified voltage dictates the spacing between adjacent rings and brushes. It is helpful in achieving the most cost effective and smallest practical envelope not to rate all circuits at the maximum level. For example, if you need 20 circuits total, three of which must carry ten amps, designate three for high current. Don't go for 100% functional interchangeability by specifying that all 20 be able to carry ten amps. And, if the ten amps is a surge current with a continuous current of only two amps, tell us that, too. There is no reason for you to pay for ten amps continuous capacity when you only need two.

Be aware that voltage surges and spikes are the major cause of system slip ring failures. Poly-Scientific uses a very conservative approach to circuit design, however, it is not uncommon in some power supply systems to see voltage spikes ten or more times the normal operating voltage. We strongly recommend surge protection on all power supplies.

Most smaller slip rings will satisfactorily conduct signals to 1 MHz or 500 Kilobits. Special slip rings can be used to pass broadband signals from dc to 1 gigahertz and data rates of 500 megabits or even higher. Cross-talk, insertion loss and bit error rate information can be provided if data rates, formats and impedances are defined.

Defining Mechanical Requirements

1. Operating speed (rpm's). Almost any slip ring can operate successfully at speeds to 100 RPM although many applications only require operation at a few rpm. But slip rings are also routinely used to instrument jet turbine engines operating at speeds in excess of 20,000 RPM. The operating speed in conjunction with the diameter dictates the surface speed of the brush relative to the ring and hence the internal design approach and material selection.

2. What rotational life is necessary for your application? Will the unit oscillate or rotate at a continuous speed?

Defining the Environment

The environment in which the slip ring must survive is a key factor. Operating temperature is important in specifying the proper lubricant. And if the slip ring will operate exposed to the elements or to a hostile environment, integral seals must be included in the design. Any unusual shock or vibration should also be specified.

Many of the designs and manufacturing processes described in these pages are proprietary and are covered under one or more U.S., European or Japanese patents. Poly-Twist is a registered trademark of Litton Poly-Scientific. The information provided in these pages is intended to assist the system engineer in initial discussions and is not intended as a specification.

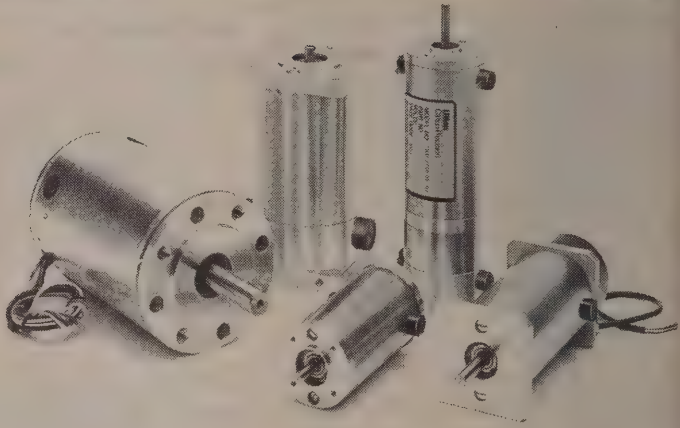
DC Motors

Permanent Magnet DC Motors

2" to 4" Diameter - With Integral Feedback



Magnets: Ceramic, for high coercivity
Insulation: Class F, 155°C
Bearings: Double shielded, permanently lubricated
Shafts: Carbon steel, in custom configurations
Brushes: Replaceable, long life
Endcaps: Custom mounting configurations

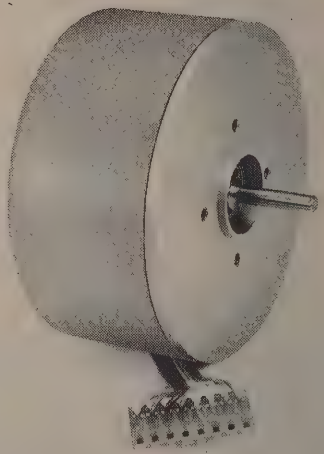
Litton Clifton Precision offers a complete line of 2" to 4" diameter permanent magnet motors, available with integral feedback devices for closed-loop control.

Optional pre-aligned encoders and rugged brushless resolvers provide accurate positioning and displacement feedback. Integrally mounted tachometers are available on the 2¼" diameter motors.

The permanent magnet motors offer continuous torques from 10 to 560 oz-in, peak torques from 90 to 3500 oz-in, and lengths from 3 to 9 inches. They have extended-life brushes; double-shielded, permanently lubricated bearings; and stainless steel shafts.

Brushless DC Motors

for high-torque applications
BOH-3500 series

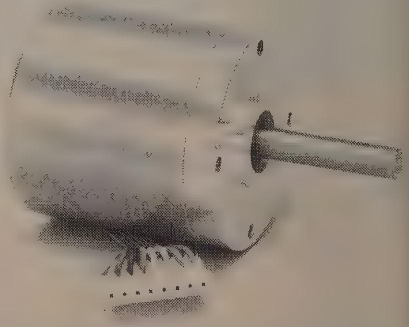


The powerful BOH-3500 series motors are well-suited to continuous use, with a brushless design that generates very low noise and heat, while ensuring long life and a wide degree of speed control. Designed to achieve high operating efficiencies, these maintenance-free DC motors are an ideal choice for virtually any prime mover requirements.

These motors feature outside rotor construction which provides the benefits of low cost, ease of manufacturing, and high output power for continuous speed applications. Typical motors in this series are 3.74 inches in diameter and less than 2 inches in length. Magnet options range from bonded ferrites to bonded rare-earth material which provide continuous torque ranges from 30 oz-in to 80 oz-in. Other standard features include low-loss M19 silicon steel laminations, stainless steel shafts, and die-cast aluminum housings.

Brushless DC Motors

for extremely reliable, controlled high-speed, continuous operation
BOH–1600 Series



These motors are designed for use in high-speed, continuous operation applications where they operate with low noise levels, low heat, and high reliability. Electronic commutation ensures exceptionally long life and speed control over a broad range.

A typical motor in this series features a diameter of 1.75 inches and a length of 1.8 inches. It incorporates sintered ferrite magnets and delivers up to 8.5 oz-in of continuous torque. Typical no-load speeds range from 1000 to 20,000 rpm. Precision ball bearings and stainless steel shafts are standard. Options include integral drive electronics which allow these motors to directly replace brush type dc motors.

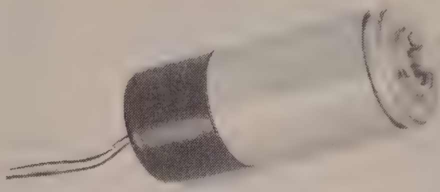
Digital Resolver

Model DRBB-11-AA-01AA
DC Input/Digital Output

FEATURES

- ○ Size 11 heavy-duty brushless resolver
- ○ Totally digital input/output
- ○ Absolute position data output
- ○ Incremental encoder with A Quad B and North Marker outputs
- ○ 12-bit resolution standard
- ○ Maximum system error of ±15 arc minutes
- ○ High readout rate
- ○ Mechanical modifications to order



Litton's new digital resolver was designed for rugged OEM applications where reliability, size, system cost, data transmission and simple interface with computers are prime considerations. The resolver is an absolute position sensor based upon proven resolver technology, but transformed through combination with new semiconductor technology. The result is a universal device for the measurement of mechanical rotation with outstanding accuracy even in hostile environments. Brushless resolvers are superior to encoders in terms of ruggedness, accuracy, and resolution. Resolvers have low sensitivity to variations in voltage and perform efficiently under temperature extremes, humidity, shock and vibration.

Model DRBB-11-AA-01AA requires five inputs* and provides four outputs, all of which are TTL compatible. This unit can be used with a differential line driver/receiver for high ambient noise and long distance data transmission applications.

Applications include:

- *Position & velocity sensing*
- *Brushless dc servo communication*
- *Robotics & factory automation*
- *CNC machine tools*
- *Material handling*
- *Medical devices*

TYPICAL OUTLINE DRAWING

SCLK	Blu				

---

* Not required for incremental encoder outputs.

Brushless Resolvers

Brushless resolvers are economical, highly accurate motion feedback sensors that can be used to provide position and velocity information for closed-loop control, as well as brushless DC motor commutation. They contain no internal electronics or optics, and are unaffected by heat, electrical noise, shock, and vibration.

Clifton's Size 11 housed and Size 15 and 21 pancake brushless resolvers feature a compact size, high accuracy and exceptional reliability which makes them an ideal choice for absolute position measurement in a wide range of industrial and medical equipment. Coupled to A/D converters, they provide a digital interface to computerized motion control systems.

Accuracies of ±7 minutes for the Size 11, and ±15 minutes for the Size 15 and 21 pancake designs are standard. Multispeed windings, higher accuracies, and custom modifications are available.

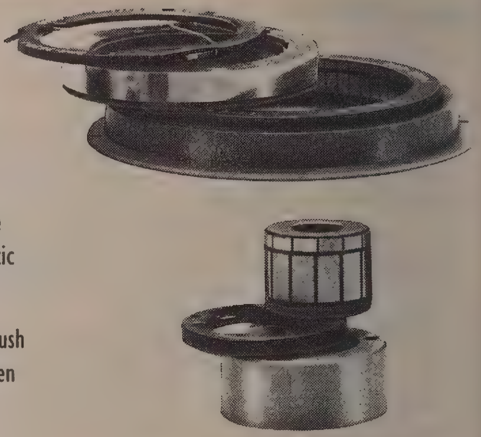
Torque Motors

FEATURES

○ Torques from 6 oz-in to 1000 lb ft.
○ 1.1 inches 40 inch O.D.
○ Precision tolerances
○ Gold commutators
○ High reliability



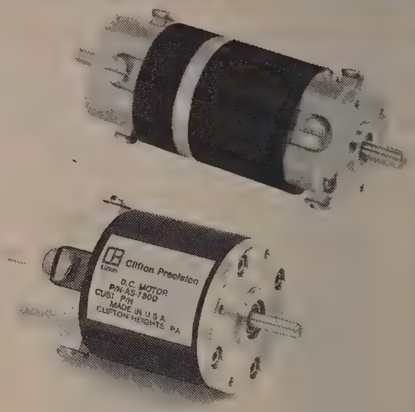
Clifton Torque motors feature double insulated high temperature magnet wire to minimize le current and promote superior insulation. Our molded brush block assembly has interchangeable brush blocks, optimizing brush position on the commutator. Brush contour is done on automatic tooling rather than "run-in" individually.

Brushes are mechanically fastened to the brush spring in addition to soldering to assure top brush alignment during soldering operation plus establish a fine mechanical and electrical bond between spring and brush.

Miniature High-torque, DC Servo Motors

FEATURES

○ High torque-to-inertia ratio
○ Up to 50 oz-in peak starting torque
○ AS-780D highly resistant to demagnetization
○ Low cost
○ Weighs only 6.8 oz
○ Samarium cobalt or Alnico magnets
○ Encoder and tachometer packages
○ Custom modifications



The series AS-780D samarium cobalt servomotors provide fast response and high starting torque, but are priced significantly less than comparable samarium cobalt motors. They offer high coercivity and high flux density for greater mechanical output.

Samarium cobalt motors are lightweight, yet highly reliable. They will not demagnetize under severe conditions.

The series AS-718D Alnico motors are an economical alternative for less demanding applications.

Custom-modified shaft designs, mounting configurations, speed variations, and input drive voltages are available. Consult our engineering department to help you develop a motor that is tailored to your application.

Applications include:

- *Robotics & factory automation*
- *Medical equipment*
- *Process control equipment*
- *Computer peripherals & office equipment*
- *Portable, battery-operated equipment*

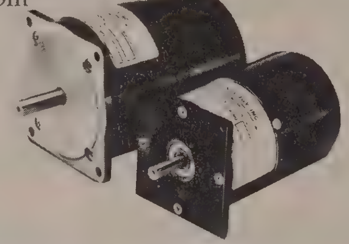
BRUSHLESS SERVO MOTORS & CONTROLLERS

LEADERS IN HIGH PERFORMANCE AND PRECISION MOTION CONTROL

Complete Velocity and Positioning Servo Systems. Interface with User Host Computers and Controllers.

New!...and only from MFM Technology.
Brushless NEMA 23 and 34 frame size servo motors replace stepper and DC brush motors. Advantages of these MFM brushless servo motors:

* smooth at all speeds - no cogging!
* instantaneous linear acceleration
* full torque to 6,000 rpm
* no resonance effects
* cool operation

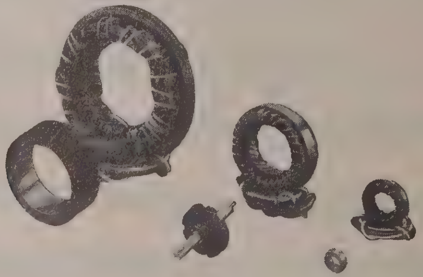


Using samarium-cobalt magnets, MFM brushless DC motors are available in 10 frame sizes from 1.25 inch through 10.0 inch diameter with peak torque ratings from 13.5 oz-in. to 4500 lb-in.

Modular motor components are matched to provide optimum performance using many standard rotor configurations.

No cogging!

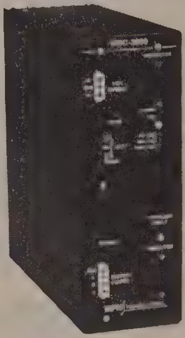
Unhoused motors are supplied as kits for better performance and cost savings for direct mounting onto the driven shaft. Eliminate performance-reducing effects of conventional couplings, belts, or pulleys. Choice of Hall sensor, optical encoder, or resolver commutation. No cogging!



Servo *Master* is a complete brushless servo system consisting of a programmable motion controller, power supply, brushless servo amplifiers, and brushless DC motors with shaft encoder feedback.

This system provides closed loop control of up to three axes, and makes possible micropositioning of mechanical stages, combined with high speeds.

Model BDC 2000 is a four quadrant sine-wave PWM brushless motor drive. Output bus rating is 160 Volt at 8.0 Amp. Velocity or current loop control accepts a ±10 volt analog command signal. Resolver-to-digital conversion provides electronic commutation, absolute shaft position, and velocity control.



Emulated channel A, B and index encoder output is provided for use with a motion controller. Other models offer power ratings to match a broad range of motor speed and torque requirements.

Precision air or ball-bearing spindles with embedded brushless DC motors are available with micro-inch shaft run-out tolerances.
Model BDC 0550 linear sine-wave drive offers programmable acceleration/deceleration, virtually no EMI/RFI, closed loop servo control and IEEE-488 or RS-232C digital interface.
Speed accuracy > .001% with smooth speed from less than 1 rpm to more than 15,000 rpm.

Immediate Solutions by Phone and FAX

At Motor Technology we solve most applications over the phone lines.

Your call to us goes straight to a competent motor application engineer, never to a clerk, correspondent or some other non-technical person. You discuss your project with a highly qualified engineer who is experienced with motors—motor application problem solving, motor design, and motor related hardware.

For a lot of projects, you won't always know the exact torque or speed you need. Or, maybe there's a voltage variation you're not sure how to cope with. The odds are 100:1 we've had experience with a similar application. So, basically, all you need to do is explain the conditions and what you want the motor to do. We help fill in the blanks, then come up with a design that's cost efficient for you.

If you're ready to talk about a prototype, the same application engineer will give you the price and a firm ship date—all in the span of a single phone call. (We don't shuffle you to other departments or make you wait days for the answers you need.)

Get an immediate solution by phone or FAX from Motor Technology the next time you have an application. And have the prototype on your desk within a few days.

Custom Prototypes in Three to Four Days

Motor Technology is a quick response company.

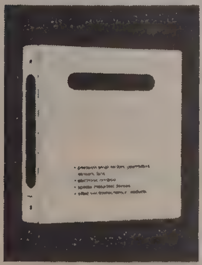
We custom engineer while you're on the phone, then follow-up with your prototype 3-4 days later. A distributor might be able to deliver as fast, but he couldn't match Motor Technology's factory engineering assistance. And our solution comes to you with two important guarantees:

1 We guarantee performance—the torque you need, over the speed range required, at the voltage selected. The motor, motor tachometer or gearmotor will do exactly what we say, or you don't pay for it.

2 We guarantee the prototype to be production feasible. That's assurance you aren't likely to get with a "kludge" assembled by a distributor technician.

Motor Technology is the quick response company that starts you off with a prototype that's engineered to be right for your breadboard and cost efficient in production.

To find out more about us, write or call for our extensive catalog. Or, just phone and/or FAX the problem to us.



The Motor Technology Catalog

Wide range of standards, with complete performance and specification data. Includes short course on how to predict performance when torque, speed or voltage conditions vary. Shipped UPS, same day.

MINIGLOSSARY

SERVO COMPONENTS

SPECIFICATIONS

Excitation: The input voltage and frequency.

Transformation Ratio: The ratio of the output voltage, at maximum coupling, to the input voltage.

Phase Shift: The lead or lag of the output voltage with respect to the input voltage. For most synchros and resolvers, the phase shift can be approximated by the angle whose tangent is the ratio of the primary winding's DC resistance to its reactive component.

Impedance: Specified as R + jX, where R is the AC resistive component and X is the reactive component. Important impedances are: (a) Z_{po} (or Z_{ro} for rotor primary units), which is the impedance of the primary winding with the secondary open; (b) Z_{so}, which is the impedance of the secondary winding with the primary open; and (c) Z_{sH}, which is the impedance of the secondary with the primry shorted (essentially when driven by a low impedance).

Null Voltage: The voltage remaining when the unit is at electrical zero or in the minimum coupling position.

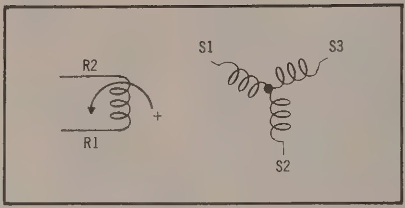
Accuracy: The error of the position of the rotor with respect to the electrical angle. It is defined as the output voltage driven by the "speed" (pole pairs) of the unit, referenced to the starting point of the calibration (usually the electrical zero position). Error is commonly expressed in minutes of arc (1/60 of a degree) or in seconds of arc.

Loads: For a transmitting unit, the impedance that the output voltage signal faces. This can be a receiver, a differential with its load, a control transformer, an A/D converter, etc.

Operation Temperature: The ambient temperature range over which the unit performs its primary function.

FUNCTIONS

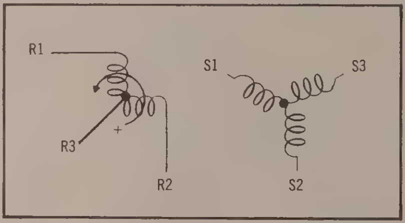
Transmitter: A unit with a Y-connected stator that outputs a signal proportional to the position of its single-phase excited rotor. High power units, called "torque transmitters," are used to drive one or more receivers. Low power transmitters are used to drive control transformers.



Receiver: A unit with a three-phase stator excited by the input, usually from a torque transmitter, and a single-phase rotor that follows the resulting stator field. Usually used to drive a position pointer.

Control Transformer: A unit with a three-phase stator excited by the input from a transmitter and a single-phase rotor mechanically driven to the null position by an external motor or other device.

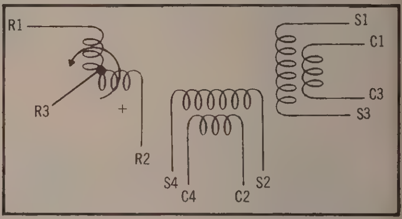
Differential: A unit with a three-phase stator and a three-phase rotor. It is usually connected between a transmitter, which excites its stator, and a receiver or control transformer. It can be used to "dial in" correction factors for the synchro chain.



Transolver: A unit with a three-phase stator and a two-phase rotor that can be used either as a control transmitter (with one rotor phase excited and the other shorted), or as a control transformer with the signal obtained from one phase of the rotor—making sure the other phase is equally loaded to prevent unbalances.

Differential Resolver: A unit with a two-phase stator and a three-phase rotor that is used as a transolver with the advantage that when connected as a control transformer, the signal does not travel through slip rings.

Resolver: A unit with a two-phase rotor and a two-phase stator that is used to create or receive SIN-COS signals such as vector resolutions for solving inertial platform coordinate transformations, unknowns of right triangles, etc. Resolvers can also be used as transmitting, differential, or receiving elements by proper choice of impedances. It is also possible to use resolvers as phase shifters where, in one mode, one rotor phase is excited and the two stator windings are feeding an appropriate RC network and indicating a phase shift, referred to the input, that corresponds to the rotor position.



Compensated Resolver: A unit with a "2×2" phase stator and a two-phase rotor used as a resolver with the added benefit of feedback windings in parallel with the stator windings that increase the useful accuracy over a wide range of environmental operating conditions.

Linear Transformer: A unit with a single-phase stator and single-phase rotor designed to provide a linear output voltage that is directly proportional to the rotor input angle. It operates over a range of less than ±90°, and is analogous to a potentiometer providing infinite resolution, but without contact between the elements. It can be used only with AC voltages.

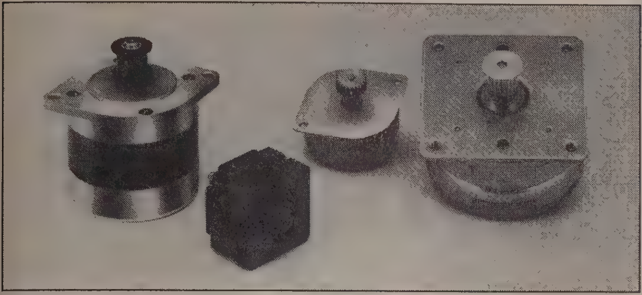
Brushless Synchro: Available in two types—hairspring and bobbin. Hairspring synchros use spiral wound conductor springs to pick off the rotor signal, and are generally limited to a ±165° rotation. Most have mechanical stops to prevent damage due to overrotation. Bobbin synchros pick off the rotor signal with rotary transformers inside the unit, allowing the rotor unlimited motion.

Pancake Unit: A name derived from the physical dimensions of the unit, which has a diameter that exceeds axial length. Sizes range from under 1" to 20" or more. The unit is frequently used as a gimbal pickoff element and is designed to fit a particular application envelope. It can be supplied as a rotor and stator only.

NMB TECHNOLOGIES INC.

PRECISION STEPPING MOTORS

ASTROSYN STEPPING MOTORS HYBRID CONSTRUCTION



Laminated and Press Construction

FEATURES and BENEFITS

- Quiet, reliable performance, long life
- Wide range of laminated and press construction models – standard or custom designs
- Step Angles – 0.9°, 1.8°, 2.0°, 3.6°, 3.75°, 5.0°, 7.5°, 15° and 18°

COMPETITIVE PRICING

- Vertically integrated processing for total quality control
- Precision automated production
- In-line quality control and testing

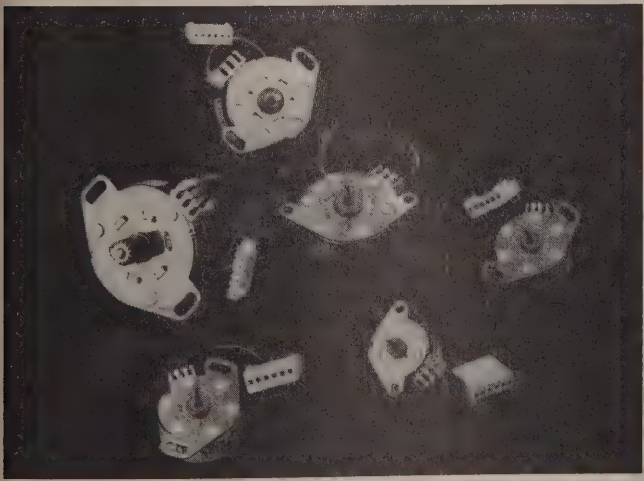
NOTES:

1. First two digits on P/N denote frame diameter size in inches x 10. Example: 23 LM C006 has a frame size of 2.3 inches.
2. Most motors are available with single or double-ended shafts.
3. Options available include lead screws, gears and pulleys.
4. Standard drivers are available for all standard motors. For special designs contact NMB application engineers.

PERMANENT MAGNET CONSTRUCTION



FEATURES and BENEFITS

- Superior torque and heat dissipation
- High quality - fully automated coil asembly
- Low failure rate
- Low cost

Type	Number of Steps per Rotation	Holding Torque (g·cm)	Torque Characteristics		Driving Conditions

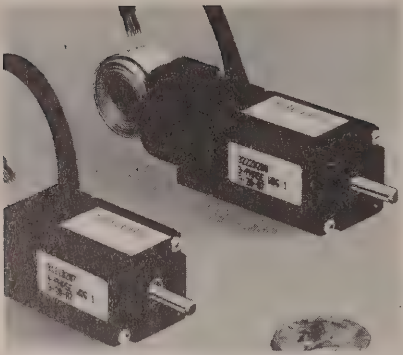
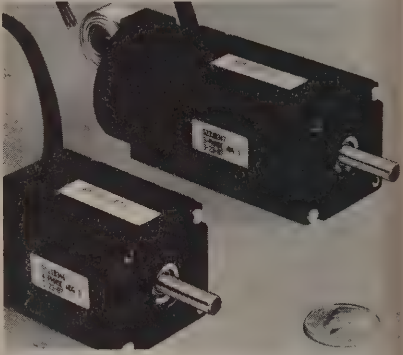
Demonstrably superior brushless servo motors



Series 3000 30mm sq. frame size; lengths of 55.2 and 65.4mm. At 7,200 rpm, longest motor develops 1/15 hp, continuous duty, with normal heat sink.

Series 4000 40mm sq. frame size; lengths of 67.8, 75.3, and 83.0mm. At 7,200 rpm, longest motor develops 1/6 hp, continuous duty, with normal heat sink.



Series 5000 50mm sq. frame size; lengths of 77.4, 90.1, and 102.8mm. At 7,200 rpm, longest motor develops 1/3 hp, continuous duty, with normal heat sink.

- Samarium cobalt rotor construction
- Exceptional thermal efficiency
- Negligible magnetic cogging
- Very low winding inductances
- High torque to inertia ratios
- Low mechanical time constants
- Capable of high speed operation
- Optional patented 12-step drive for minimum commutation torque ripple
- Conventional 6-step drives, digital control systems, and power supplies available from Pittman

PITTMAN
LO-COG

Series 6000 65mm sq. frame size; 202mm long. Internally mounted 1,000 line, 3-channel optical encoder. At 3,600 rpm, develops 1 hp, continuous duty, with normal heat sink.

Options for Series 3000, 4000, and 5000 include optical encoders and/or planetary gearheads. Get the whole story on unique Pittman® ELCOM® electronically commutated servo motors by calling (215) 256-6601. Fax (215) 256-1338.

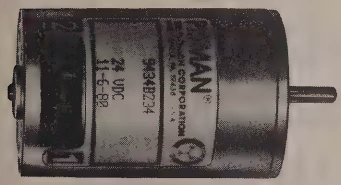
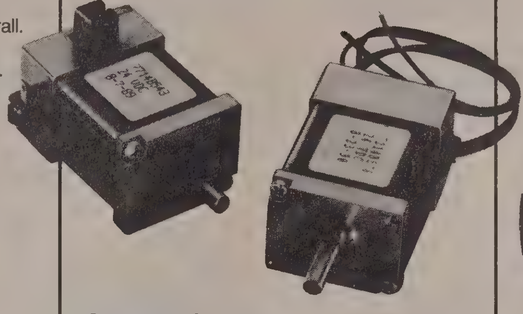
Series 8000 LO-COG® Servo Motors. 7-slot armatures. Voltage inputs to about 40 VDC. Nominal O.D. 1.2 in.; 3 lengths to 2.4 in. overall. Stall torques to 17 oz.-in. Mechanical time constants as low as 14.1 ms. (some models).



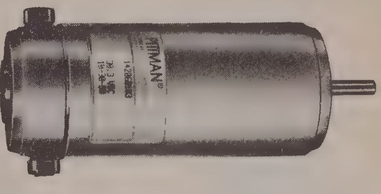
Series 9000 LO-COG® Servo Motors. 7-slot armatures. Voltage inputs to about 40 VDC. Nominal O.D. 1.6 in.; 3 lengths to 2.5 in. overall. Stall torques to 24 oz.-in. Mechanical time constants as low as 14.7 ms. (some models).



Series 7000 Servo Motors. 13-slot armatures. 4 pole samarium cobalt fields. Voltage inputs to about 40 VDC. 1 in. x 1.25 in. cross section; lengths to 1.85 in. overall. Stall torques to 24 oz.-in. Mechanical time constants as low as 4.8 ms. (some models).

PITTMAN®
9434B234
24 VDC
11-6-88

Series 9030 Servo Motors. 7-slot armatures. Voltage inputs to about 40 VDC. Nominal O.D. 1.6 in.; 3 lengths to 2.5 in. overall. Stall torques to 41 oz.-in. Mechanical time constants as low as 9.2 ms. (some models).



Series 14000 Servo Motors. 11-slot armatures. Voltage inputs to about 40 VDC. Nominal O.D. 2.13 in.; 4 lengths to 5.2 in. overall. Stall torques to 286 oz.-in. Mechanical time constants as low as 6.2 ms. (some models).

Computer tested brush-commutated DC motors

Every Pittman® motor is thoroughly evaluated just before shipment by a sophisticated computer controlled test array which checks all significant performance parameters and records the measured values. Options for most models include spur and/or planetary gearheads as well as integrally mounted, metal-housed, optical encoders. We welcome the opportunity to quote value added assemblies including but not limited to pinions, timing belt pulleys, cable harnesses/RFI networks, and electric brakes. To suit your requirements, our advanced production facilities have the flexibility to permit efficient handling of small orders as well as reliable deliveries of thousands of motors per week. Contact us for complete data and application assistance. Phone (215) 256-6601. Fax (215) 256-1338.

Tachometers, Encoders, Brushless Tach/Commutators.

dc tach generators

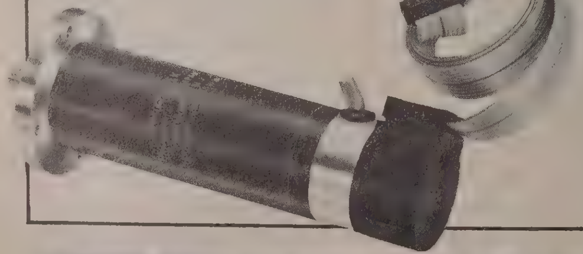
Servo-Tek 1.135″ OD tachometer generators are built to last. With silver-alloy commutators, stainless-steel shafts and bearings, brushes rated for 100,000-hour life, temperature compensation, and full factory run-in, our tachs deliver stable, long-term performance. A complete line with a variety of mechanical and electrical characteristics is available from stock. Output ratings from 1 to 45 V/1000 rpm.

incremental encoders

These high-resolution (100 to 512 pulses/revolution) optical encoders are offered both as options on 1.135″ Servo-Tek rotating components (pictured) and as stand-alone feedback devices. All configurations provide 3-channel (2 in quadrature and 1 index) LSTTL logic output. Combination units give position, speed, and direction feedback.

5 Vdc supply; 3.2 mA output standard; 16 mA with standard amplifier, others available, STTL.

For inexpensive single-pulse-train feedback, Servo-Tek Pulsers are your best bet. 4 to 12 pulses/revolution; 4.5 to 15 Vdc supply; stand-alone and add-on models.



tachsyn® brushless tach/ commutators

Does your brushless dc drive require
- High-accuracy commutation?
- Linear, low-noise tach signal?
- Elevated-temperature operation?
- No electronics in the motor?
- Low-inertia rotor?

The new patented Tachsyn tach/commutator from Servo-Tek may be the ideal transducer for your exacting requirements.

The Tachsyn brushless three-phase transducer is available in 4-, 6-, and 8-pole configurations to match your motor. With remote signal conditioning electronics, it provides accurate 6-step Hall-equivalent or sine-wave signals plus a low-ripple analog dc tachometer output.

The rotor is a low-inertia, passive component suitable for high speeds. Overhung mounting eases addition to your motor–no extra bearings or couplings are required.

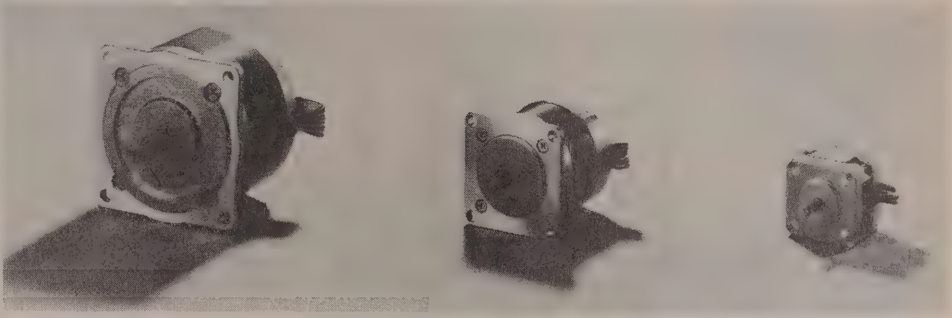
STEPPING MOTORS

Sizes: 15 (35mm), 17 (39mm), 23 (56mm) & 34 (83mm). **Step Angles:** 0.9°, 1.8°, 3.6° & 3.75°. Hybrid, unipolar or bipolar, precision ball bearings 3% accuracy, state-of-the-art performance. **Applications:** Disk drive, tape streamer, printers, plotters, medical equip., office automation machines.



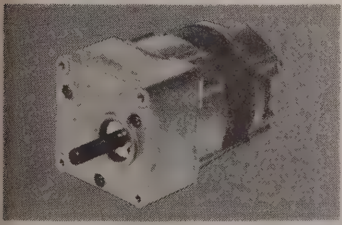
LINEAR ACTUATORS

Efficiently translate rotary to linear motion. Based on a size 23 hybrid stepper motor with a modified threaded rotor and fitted with a leadscrew shaft. **Applications:** XY tables, medical pumps, valve actuators and test equipment.

BRUSHLESS DC MOTORS

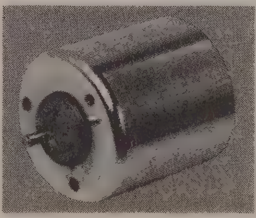
Rare earth magnets, 3 phase bipolar winding, efficient radial gap, precision ball bearings, outer or inner rotor available, with or without Hall sensors. **Applications:** Tape streamers, laser scanners, computer peripheral equipment, medical equipment and air movers.

AC & DC GEARED MOTORS



Induction motors, frame sizes of 60 to 100 mm dia. 120 or 220 vac, 50 or 60 HZ, torque ratings up to 70 KG-CM at 70 RPM. DC motors, frame sizes of 50 & 70 mm, various voltage ratings, torque ratings up to 40 KG-CM at 82 RPM.

CORELESS DC MOTORS



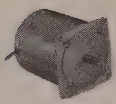
Ironless rotor, 23mm to 50mm dia., 8.5 to 1400 GM-CM starting torque. **Options:** Ball bearings, tachometer, terminals. **Applications:** Medical equip., office equip., recorders, small printers, plotters.

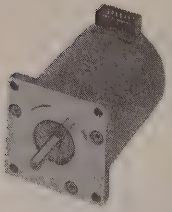
DC SERVO MOTOR AND ENCODER

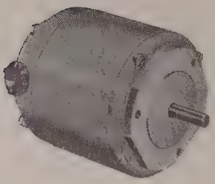
State of the art performance, output range: 12 watts to 330 watts. Torque constant up to 1.8 KGCM/AMP, DIA: 38, 50, 52 and 72 mm. Precision ball bearings, high energy magnet, incremental encoder, all steel construction **Applications:** Robotics, NC machines, office automation, computer peripherals.

SLO-SYN® DC Stepping Motors

Permanent magnet type stepping motors that provide high torque-per-pound and torque-to-inertia ratios. Can be driven to speeds above 20,000 steps/second with low power input. Motors have Class B insulation and can be operated at an ambient temperature range of –40°C to +65°C. Continuous duty temperature is 65°C. Standard 1.8 degree step angle motors can be half-stepped or microstepped with accuracies of ± 5% or ± 3% noncumulative. Holding torque ratings from 53 to 5000 oz-in. To simplify installation and connections, new quick-connect, plug-in types are available. Motors have no brushes, ratches or gear and use shielded ball bearings to ensure reliability and long life.







BASIC MOTOR SERIES	MINIMUM HOLDING TORQUE,(2)(5) OZ-IN(6) (kg-cm)	MINIMUM RESIDUAL TORQUE,(5) OZ-IN (kg-cm)	NOMINAL ROTOR INERTIA, LB-IN^2 (kg-cm^2)	TYPICAL TORQUE TO INERTIA RATIO (RAD/SEC^{-2})	SHAFT DIAMETER, INCHES (mm)	MAXIMUM OVERHANG LOAD, LBS (kg)	MAXIMUM THRUST LOAD, LBS (kg)

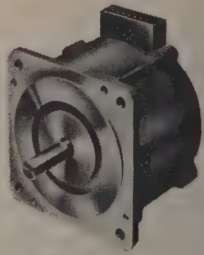
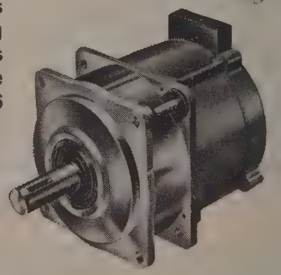
(2) Both windings energized at rated current.
(3) Calculated from holding torque in oz-in and rotor inertia in oz-in-sec^2 (lb. in^2/24).
(5) Values are subject to change without notice. Parameters used as part of a specification should be verified with the factory.
(6) Operation below rated current will reduce torque and may degrade step accuracy.

SLO-SYN® AC Synchronous & Gearmotors





Provide slow basic shaft speed synchronous with line frequency. Allow direct load coupling without gearing. Instantaneous starting, stopping and reversing eliminate clutching and braking. Simple single-pole, 3-position switch provides complete forward, reverse and off control. Will not overheat or be damaged if stalled. Starting and running currents nearly identical. Conventional motors have speeds of 72 and 200 rpm at 60 Hz and torque ratings from 25 to 1800 oz-in.

New **high torque models** provide more power per frame size than any other synchronous motors. Types offered in NEMA frame size 23 and 34 with minimum running torque ranging from 60 to 420 oz-in. Shaft speed is 72 rpm at 60 Hz, 60 rpm at 50 Hz. **AC gearmotor models** offer torque ratings to 5000 oz-in and shaft speeds as low as 0.72 rpm at 60 Hz. All are designed for quick-connect, plug-in connection with optional mating connectors having 36 in. minimum length leads.

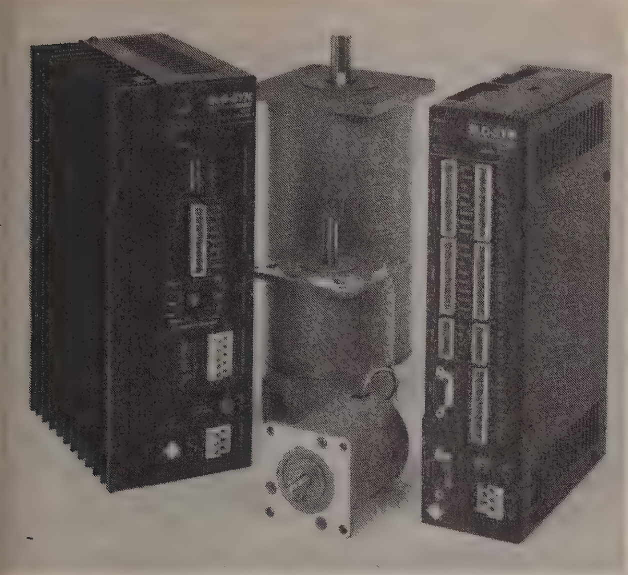
SLO-SYN®
Series 2000 Motion Controls



UL Recognized Components (File No. E146240)

Bipolar Chopper Drive SS2000D6

- Provides position control from any pulse and direction input
- Fully protected against short circuits and over/undervoltage conditions
- 10 switchable motor resolutions from 200 to 50,000 pulses/revolution; from full step to 1/250 microstep
- Switch-selectable currents from 1 to 6 amperes
- Matched step motors produce optimum torque throughout the speed range

Programmable Motion Control SS2000I

- Dual drive capability. Non-sequential operation of 2 drives for 2 axes of control for the price of one
- New, English language IBM PC compatible software simplifies programming
- Program flexibility for complete machine control
- 16 versatile, optically isolated, single point inputs (13 programmable, 3 dedicated high speed) and 8 fully protected programmable outputs
- Optional plug-in module for closed loop operation

Modular Drive SS2000MD7

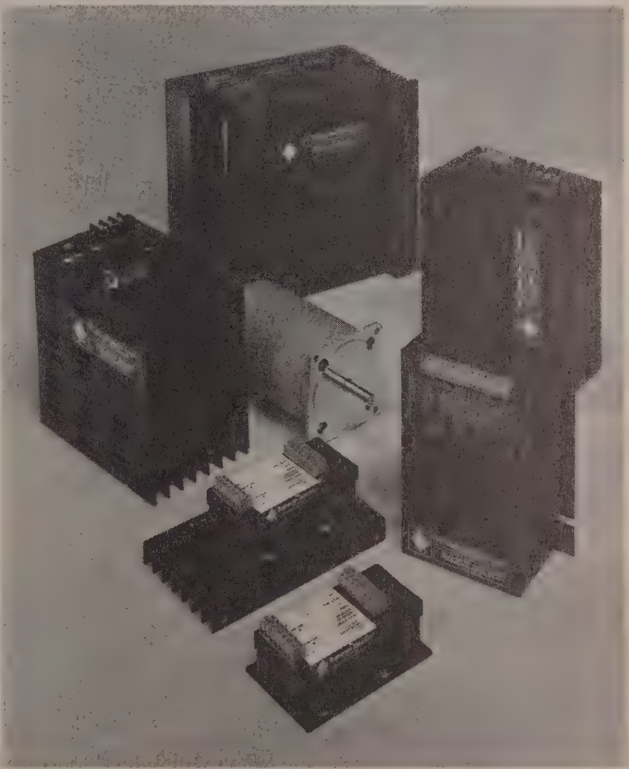
- Powerful bipolar PWM design provides maximum torque over a wide range of speeds
- Full short circuit, under/overvoltage and thermal protection
- Operates SLO-SYN® DC Step Motors in switch-selectable 1/2, 1/10, 1/25 or 1/100 microsteps
- Switch-selectable current levels from 1 through 7 amperes — no external resistors or jumpers
- Control signal optically isolated from the drive signal
- Separate power supply can operate several drives
- Small, compact, rugged design

Micro Series Step Motor Drives & Motion Controls

230 & 430 Series Translator Drives

All types in these series are available as modules for use with user supplied power supplies or packaged with all necessary power supplies.

- Bipolar chopper, 2-phase step motor drives
- 230 Series units are 2 A, 30 VDC
- 430 Series units are 3.5 A, 30 VDC
- Capable of operating at reduced currents
- Full/half step operation
- Optically isolated inputs
- Modular units can be used alone or as integral PC board components with user supplied power supply
- Can be packaged with an integral power supply
- Also available with the following motion control features:
  - Oscillator for internal pulse source
  - Preset indexer for simple motion control
  - Fully programmable indexer for more sophisticated motion control

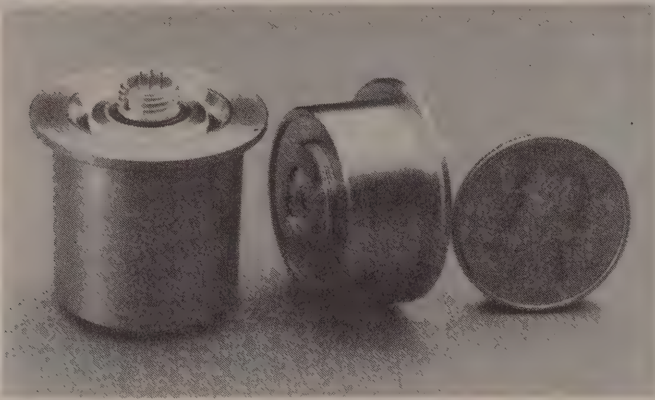


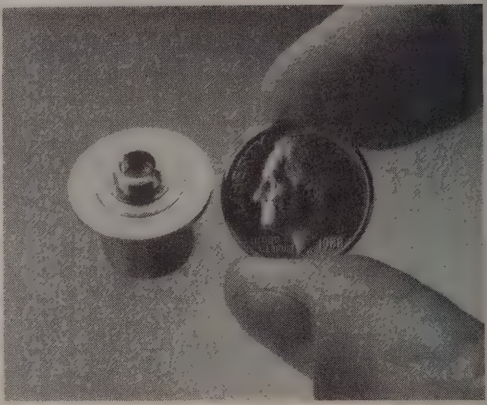
440 Series Translator Drives

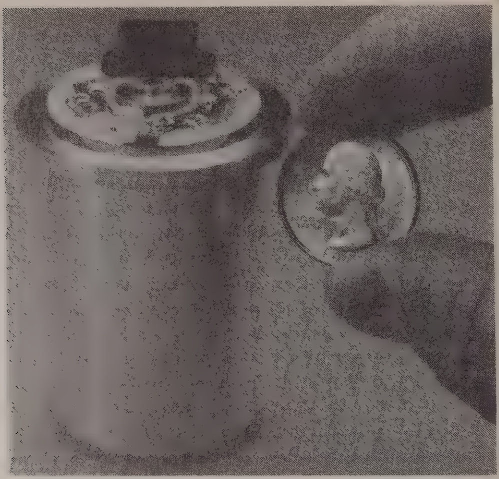
- Bipolar chopper, 2-phase step motor drives
- 1, 2, 3 or 4 A switch selectable motor current, 36 VDC
- 1/5 - 1/10 or 1/125 microstep operation gives smoother performance and resonance-free operation
- Optically isolated inputs
- Full short circuit, undervoltage and transient overvoltage protection
- Available in easily mounted packages, power supply not included

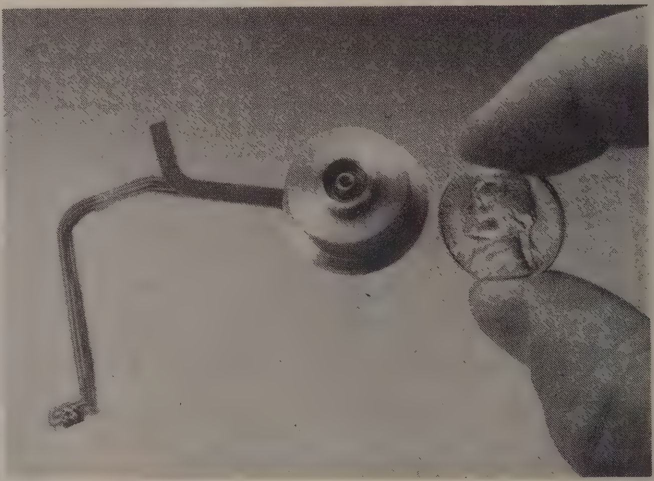
SYNEKTRON
A TDK GROUP COMPANY

SPINDLE MOTORS









Synektron D.C. Brushless Motors offer low acoustical noise, exacting runouts and ceramic or rare earth magnet materials. In addition, you get U.S. engineering support and Far East manufacturing.

Custom designs are our expertise.
Applications include computer peripherals (magnetic and optical), laser scanners and printers.

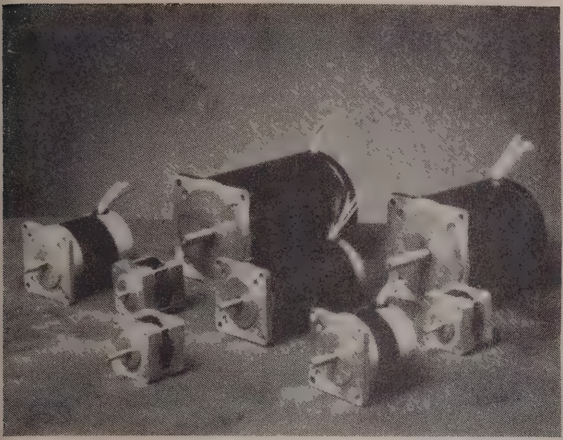
TECO STEPPING MOTORS



TECO is the third largest manufacturer of electric motors worldwide. For the past five decades they have led the field in technology, R&D, and specialized custom motors. Teco offers the Hybrid Stepping motor in NEMA sizes (17 - 23 & 34).

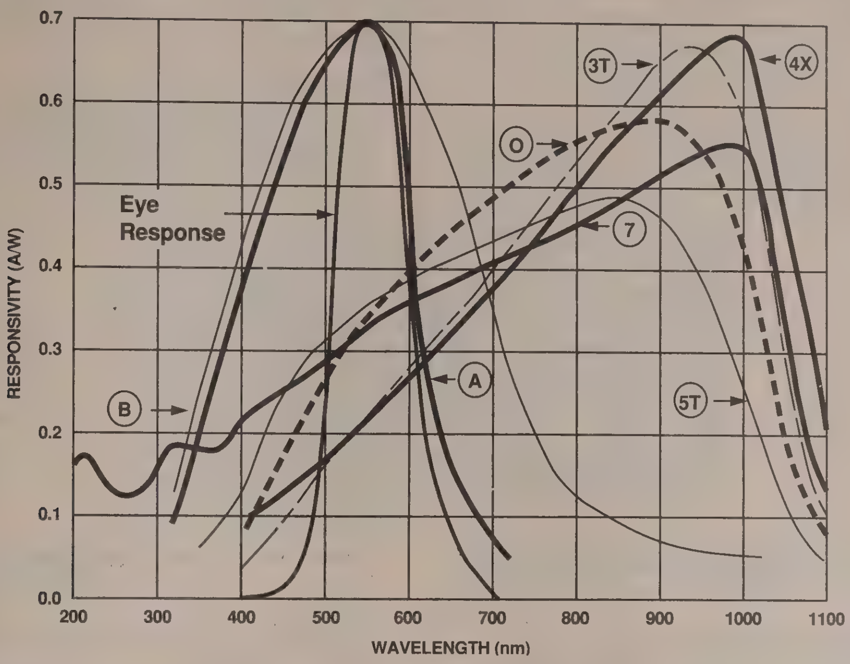
CENTRONIC . . . *The Right Choice*



Photodiode Selection Guide

Series	Features	Spectral Range	Response Characteristics	
		nm	Test Wavelength nm	Curve Code
Series - 0 General Purpose	These devices exhibit low capacitance, high speed and a broad spectral response range. Available in single, dual, quad and array configurations, they may be packaged in a variety of standard and custom package options.	430 - 1064	900	0
Series - 3T High Speed IR Pulse Operation	Specially designed and processed to achieve high speed detection of pulsed near IR radiation. Available in seven (7) standard package outlines and several "application specific" engineered configurations.	400 - 1100	900	3T
Series - 4X Low Capacitance Pulsed Laser Detection	Optimized response to the 1064nm wavelength for laser applications.	400 - 1100	1064	4X
Series - 5T Blue Enhanced	Exhibiting excellent sensitivity in the blue spectral range, these strong signal-to-noise ratio devices are particularly useful in low light level applications	350 - 1100	436	5T
Series - 7 Super UV	The Super UV series provides UV sensitivity with high shunt resistance. The response of this series is particularly useful in the 190 - 400 nm range.	190 - 1100	254	7
Series - 29 Specialty Products	A variety of standardized single, dual, quadrant and high speed devices for cost effective volume applications.	400 - 1100	Various	Various
Series - OSI Photodiode / OP/AMP	Centronic high performance single element devices with selected operational amplifiers. Series prefaced by the OP/AMP Development System.	400 - 1100	Various	Various
Series - E Eye Response	High quality color correcting filters are combined with high performance Series 5T devices to produce spectral responses approximating that of the human eye.	380 - 750	Photopic	A B Relative Response Curve

Order Series 29 by Type Number Listed.

Optical Silicon Integrated Detector

The OSI Series integrates Centronic high performance single element photodiodes with selected operational amplifiers in a single hybrid package. The photo response and transimpedance gain of the devices can be tailored to fit any application. Custom designs are welcome including multi-channel, thermo electrically cooled, fiber-coupled, and others to fit your application.

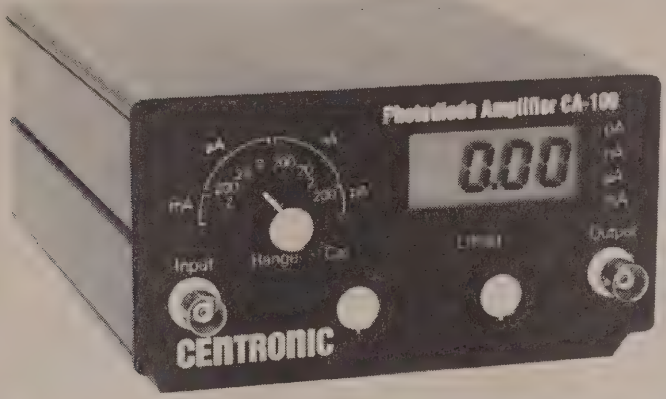
CENTRONIC . . . *The Right Choice*

Photodiode Amplifier CA-100



High Performance

The CA-100 Photodiode Amplifier is a general purpose, high-performance unit that converts the signal from Centronic detectors into a voltage that can be used to drive oscilloscopes or other voltage sensing equipment. This compact, low cost amplifier generates up to ±2 Volts from 8 gain settings ranging from 10^3 to 10^{10} V/A with high gain accuracy and low noise.

Optical Power Mode

In normal Current Meter Mode, the CA-100 displays the photocurrent directly on a 3½ digit LCD. The unit can also be operated in an Optical Power Mode in which the Calibration Adjust knob sets the amplifier to a known optical power and the LCD display presents the optical power directly. An Offset Adjust knob allows the user to null out room light or photodetector leakage current.

CENTRONIC OFFERS CALIBRATED DETECTORS SUCH AS THE OSD 100-0BNC FOR USE WITH THE CA-100

Specifications

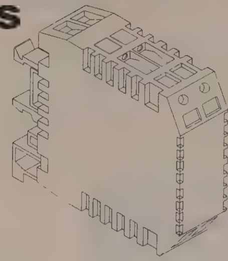
CLAROSTAT

ELECTRO-OPTICAL EQUIPMENT

T-60 SERIES

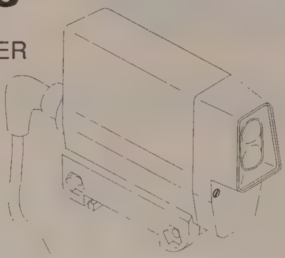
LED MODULATING
AMPLIFIER



These controls provide ambient light immunity in a DIN Rail mountable DC powered package. Each control modulates the LED or IRED source of a reflective scanner or thrubeam pair, and responds only to photodetector signals with the same modulation frequency.

C-80 SERIES

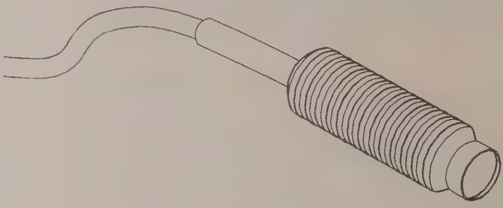
MODULATED
REFLECTIVE SKANNER



These controls provide ambient light immunity in a DIN Rail mountable AC or DC powered package. Each control has a modulated red LED source and responds only to photodetector signals with the same modulation frequency.

L33/P33 SERIES

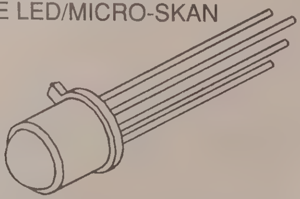
THRUBEAMS/MINIATURE
LED PAIR



The L33/P33 Series is a rugged LED thrubeam combination in a miniature size, designed for use under conditions of severe shock and vibration.

S-27 SERIES

REFLECTIVE SKANNERS/
SUBMINIATURE LED/MICRO-SKAN

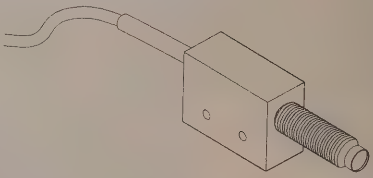


The MICRO-SKAN is a specially constructed LED sensor, specifically intended for the OEM and high volume industrial market.

The LED directs infrared energy through a formed epoxy lens to the target. The reflected energy is received by a fiber optic rod at the lens center, then passes through an ambient light filter to the photodetector.

S-35 SERIES

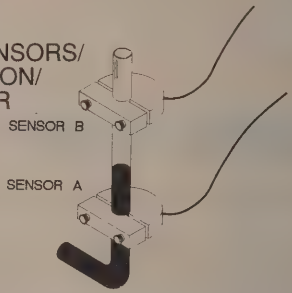
SPECIAL PURPOSE SENSORS/
COLOR DETECTION SKANNER



The S35 Series Color Detection Skanner is designed to detect a wide range of colored marks, including blue, green, yellow, orange and red. The units contain an incandescent lamp, a photodetector, a combination of optical filters, and feature the fiber optic construction of the S30 Series SKAN-COAX.

S-19 SERIES

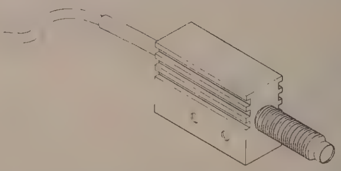
SPECIAL PURPOSE SENSORS/
LIQUID LEVEL DETECTION/
SIGHT GLASS SKANNER



The S19 Series Sight Glass Skanners contain a light source and photodetector mounted in a rugged aluminum housing. The housing clamps onto the sight glass tube with two thumb screws with tension springs for easy positioning.

S30 SERIES

SELF-CONTAINED PHOTOELECTRIC
CONTROLS/AMPLIFIED COAXIAL/SKAMP

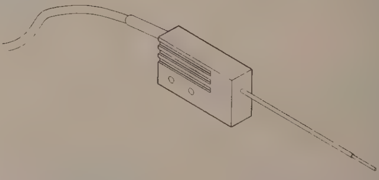


The S30 Series is a photoelectric skanner designed to provide sensing and control capability from a single convenient point.

The S30 Series is available with either an incandescent or LED light source in models wired for light energized or dark energized operation.

C56 SERIES

SELF-CONTAINED PHOTOELECTRIC
CONTROLS/FIBER OPTIC FLEXIBLE SNOUT/
NANO-SKAMP



The C56 NANO-SKAMP is a self-contained photoelectric skanner/amplifier designed to provide sensing and control capability from a single convenient point. It combines the fiber optic construction of the NANO-SKAMP with a hybrid amplifier in a compact integral package.

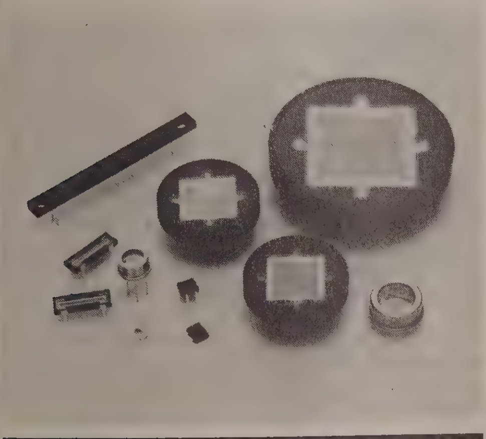
Ⓐ Dual-element cell. Listed data is for one element.

Ⓑ Measured 10 seconds after removal of incident illumination of 10 lux.

Ⓒ Measured with a tungsten lamp of 2856K.

Position Sensitive Detectors (PSD)

The position sensitive detector (PSD) is a sensor used to detect the location of light spots by using the surface resistance of the semiconductor. Because various types of non-separable elements are used, in contrast to MOS and CCD components, electrical signals which correspond to consecutive 1- or 2-dimentional positions can be obtained, providing this unit with superb characteristics such as position analysis and response characteristics.



A Variety of 1-dimensional & 2-dimensional PSDs

Type No.	Active Area	Package
One-dimentional Type		
S3271	1x2 mm	4-pin epoxy mold
S3272	1x2.5 mm	
S3273	1x3 mm	
S3274	1x3.5 mm	
S3979	1x3 mm	Metal case (TO-5)
S3931	1x6 mm	4-pin Ceramic case (4.8x9.2 mm)
S3932	1x12 mm	4-pin Ceramic case (4.8x15.2 mm)
S1662	13x13 mm	Ceramic case (ø 28 mm)
S1352	2.5x34 mm	Ceramic case (9x57 mm)
S3270	1x37 mm	Ceramic case (5x55 mm)
Two-dimentional Type		
S1300 (Duo-lateral type)	13x13 mm	Ceramic case (ø 28 mm)
S1743 (Tetra-lateral type)	4.1x4.1 mm	Metal case (TO-8 ø 14 mm)
S1200 Tetra-lateral type)	13x13 mm	Ceramic case (ø 28 mm)
S1869 Tetra-lateral type)	27x27 mm	Ceramic case (ø 52 mm)
S2044 (Pin-cushion type)	4.7x4.7 mm	Metal case (TO-8 ø 14 mm)
S1880 (Pin-cushion type)	12x12 mm	Ceramic case (ø 28 mm)
S1881 (Pin-cushion type)	22x22 mm	Ceramic case (ø 52 mm)

Spectral response range is either 320 to 1100 nm or 700 to 1100 nm.

MINIGLOSSARY
OPTO SEMICONDUCTORS

Avalanche Photodiode: A photodiode that takes advantage of avalanche multiplication of photocurrent. It is particularly suited to low noise and/or high speed applications.

Contrast: A noticeable difference in color, brightness, or other characteristics in a side-by-side comparison.

Chrominance Contrast: The color contrast between two adjacent surfaces of identical area, shape, texture, and luminance. The human eye is more sensitive to differences in color than it is to differences in brightness.

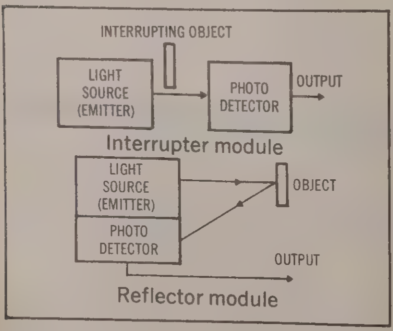
Current Transfer Ratio: The ratio of an optocoupler's output current to input current at a specified bias.

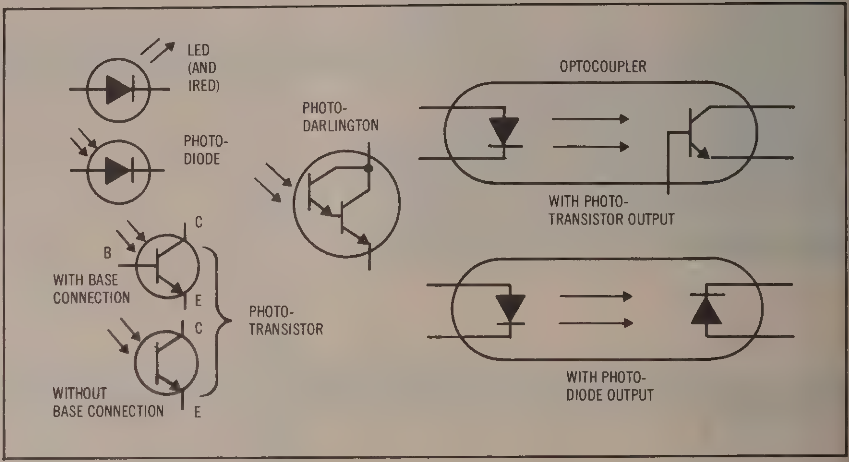
Dark Current: The leakage current of a photodetector with no incident light.

Dominant Wavelength: The wavelength that is a quantitative measure of apparent color of light as perceived by the human eye.

Infrared Radiation: The electromagnetic wavelength region between approximately 0.75 and 100 micrometers longer than the wavelength of visible light.

Interrupter (module): A device that produces an electrical output signal when an object breaks the light (visible or invisible) between a light source and a photodetector.





IRED: An infrared-emitting diode. See light-emitting diode.

Light Current: The current that flows through a photodetector when it is exposed to radiant energy.

Light-Emitting Diode (LED): A semiconductor diode that emits incoherent light at its PN junction when forward biased. The light can be in the visible or invisible (infrared) wavelength region.

Luminance Contrast: The observed brightness of a light-emitting element compared to the brightness of the "surround," an integral part of the device and inseparable from it.

Optocoupler: A device that transmits electrical signals, without electrical connection, between a light source (input) and the receiver (output). The input is generally an LED; the output might be a photodiode, phototransistor, a photo–Darlington, etc. Sometimes referred to as optoisolator.

Peak Wavelength: The wavelength at the peak of the radiated spectrum of an emitter.

Photo–Darlington: A light-sensitive Darlington-connected transistor pair. The photo–Darlington has a very high sensitivity to illumination or radiation.

Photodetector: A device that provides an electrical output signal when subjected to radiation in the visible, infrared, or ultraviolet regions of the electromagnetic spectrum. Photodiodes, phototransistors, and photo–Darlingtons are the most common type of photodetectors.

Photodiode: A junction diode that is responsive to radiant energy. Photodiodes have a high degree of linearity between the input radiation and the output current, and faster switching speeds than phototransistors.

Photothyristor: A thyristor whose switching action is controlled by light applied to the thyristor gate.

Phototransistor: A light-sensitive transister that delivers an electrical output proportional to the light intensity at its input. The low-level photocurrent that is generated is amplified by the current gain of the transistor. The base region (or gate in a FET) may or may not be brought out as an external terminal.

Point Source: A source with a maximum dimension less than one-tenth the distance between sources and detector.

Reflector (module): A device containing a light source and a photodetector that detects any object that reflects light produced by the source back to the detector.

LDM 145

LASER DIODE MODULE

- Visible or infra red
- CW or modulated
- Spot or line optics
- Adjustable focus
- Emission Indicator
- Compact (49 x 16mm)
- Power stabilisation
- Polarity protected
- Rugged and reliable
- OEM versions

The LDM 145 is a precision laser diode module ideally suited to applications where size, reliability and a lifetime's use are the key issues. You can rest assured that by using these high quality devices from IMATRONIC your reputation will be in safe hands.

MICRO SWITCH
a Honeywell Division

Solid State Sensor Capabilities

Honeywell, MICRO SWITCH division, means one-stop shopping for all commercially available sensors - from electromechanical through solid state.

Solid state sensing capabilities include: optoelectronic, Hall effect, pressure, temperature, air flow, optoelectronic airborne-ordnance-marine sensors, and fiber optic interconnect local area network (LAN) components. We are the complete single source for solid state components to meet your requirements. Our worldwide field specialists can recommend the best sensing solution for all your application needs.

Hall effect, pressure, temperature and airflow sensors are in the Switches section 5100.

Our Richardson, Texas facilities consolidate a full sensor/integrated circuit design capability with a "Class 10" wafer fabrication operation. Our sensor design specialists utilize the most up-to-date technologies and processes to provide you with the best quality solutions, at the best prices worldwide. Real time, Honeywell operated data links allow us to meet your JIT and SPC requirements.

You can get the world's largest lines of standardized catalog listings and customized sensing solutions in:

- Optoelectronic sensors
- Fiber optic sensors
- AOM (airborne-ordnance-marine) optoelectronic sensors.

We offer optoelectronic fiber optic components, modules, and integrated interfaces such as ethernet. Also available are custom-designed or off-the-shelf components and value-added assemblies for government, military and other applications requiring high reliability, radiation hardened, or special packaging. Applications range from satellites to missiles to drilling equipment.

Optoelectronic Sensors

Optoelectronics, the integration of optical principles and semiconductor electronics, has become the technology of choice for many sensing applications. Products include:

- **IREDs** (Infrared Emitting Diodes)
  Hermetic IREDs
  Plastic Encapsulated IREDs
- **Sensors**
  Hermetic Sensors
  Plastic Encapsulated Sensors
  Hermetic Optoschmitts
  Plastic Encapsulated Optoschmitts
- **Transmissive Assemblies**
- **Reflective Assemblies**

General application areas include:

- Object presence sensing
- Motion sensing
- Position encoding
- Non-invasive medical applications
- Limit sensing

Some specific application for Honeywell sensors are:

- Printers
- Tape drives
- Copiers
- Flow meters
- Drop sensors
- Liquid-level sensing
- Thread-break sensing

One of Honeywell's many advantages is the unique transfer molded T-1 package which has no parting line in the optical lens area to interfere with beam emission.

The sensors in Catalog 25 are the standard listings. They offer a broad selection of low cost, off-the-shelf solutions for many applications.

Telephone: 1-800-367-6786
In Texas: 214-470-4271

In addition to the standard products offered in Catalog 25, Honeywell can also provide custom solutions, ranging from special parameter selections, special marking or packaging, to completely customized sensors. Honeywell has a staff of experienced design engineers who are available to provide assistance at any stage of the product development, from R & D through production. Contact one of Honeywell's field sales engineers for further information or design assistance.

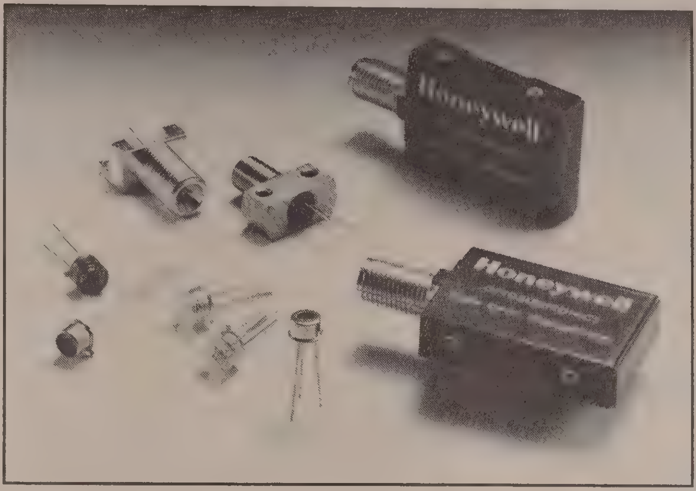
MICRO SWITCH
a Honeywell Division

Other Optoelectronic Products

FIBER OPTICS

Honeywell is a leader in the field of fiber optics. The Fiber Optics group specializes in the design, development and manufacture of active optoelectronic components and subassemblies for the short-haul fiber optic datacom market. Honeywell active fiber optic products are compatible with the majority of standard multimode fiber optic connectors and cables now available in the industry.

Honeywell also offers custom fiber optic products (Dash 900). These products are Honeywell standard products with special testing, selection, documentation and/or minor physical changes to meet special requirements. In addition, Honeywell has the capability for major development programs for new innovative fiber optic products. Technical assistance and additional product data as well as custom capability are available from the Honeywell Sales Offices.



The **Fiber Optic Components Selection Guide** lists the Honeywell standard products now available and includes:

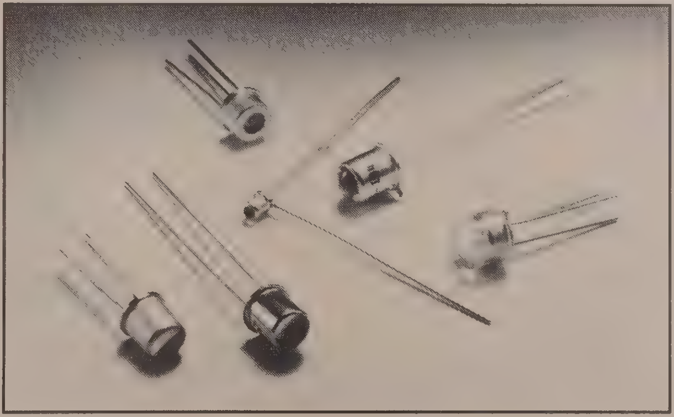
- Connectorized Components
- Fiber Optic Modules
- Fiber Optic LEDs and Integrated Transmitters
- Photo Diodes and Integrated Receivers
- Conversion Information

HIGH RELIABILITY PRODUCTS

Honeywell Optoelectronics has been a leader in advancing both fiber optic and optoelectronics technology. Its products have been used in many different commercial and military applications all over the world.

Both individual optoelectronic components and custom designed and manufactured sub-assemblies have been used in aerospace, missile, land vehicles, aircraft and shipboard systems. Honeywell Optoelectronics' products and sub-assemblies, for example, have been used in the TOW and Hellfire anti-armor missile systems, the Trident submarine navigation system, the heat-seeking Sidewinder air-to-air missile, PAVEWAY glided bombs, and in the M1 Main Battle Tank's fire control system.

Because Honeywell is a leading supplier of both commercial and high-reliability military specification optoelectronic components, it has the largest selection of emitters and detectors of any manufacturer in the industry.



Many of these proven commercial components undergo additional testing in accordance with MIL-S-19500 for vibration, thermal shock, burn-in, constant acceleration and hermeticity. They can be designed for radiation hardened applications, qualifying them for use by defence contractors in their products.

High reliability optoelectronic components from Honeywell are the choice of many major defense contractors because of their proven reliability, their electrical performance and because Honeywell delivers on-time.

SALES AND SERVICE

MICRO SWITCH serves its customers through a worldwide network of sales offices and distributors. For ordering, application assistance, pricing or name of nearest Authorized Distributor, contact a nearby MICRO SWITCH sales office. See the EEM Yellow Pages or contact:

sensors

Pyroelectric Infrared Sensor IRA Series

FEATURES
- Low cost
- Broad band response
- High sensitivity
- No cryogenics
- HIC® H8D1779 type preamplifier is available for dual elements.

APPLICATIONS
- Passive IR Intruder Alarm System
- Automatic Door
- Light Switch
- Physical Detectors
- Toy, etc.

Notes

1. Contains the groups – 21 and – 22, which are marked accordingly.
2. Contains the groups – 51 and – 52, which are marked accordingly.

MAGNETIC FIELD SENSORS

TYPE	PACKAGE OUTLINE	FIELD RANGE (kA/m) (note 1)	SUPPLY VOLTAGE (V)	T_{amb} (°C)	SENSITIVITY mV/V kA/m	BRIDGE RESISTANCE (kΩ)
KM110B/1	SOT-195	– 2.0 to 2.0	5	– 40 to 150	1.7	2.1
KMZ10A	SOT-195	– 0.5 to + 0.5	5	– 40 to 150	16	1.2
KMZ10A1	SOT-195	– 0.5 to + 0.05 (note 2)	5	– 40 to 150	22 (note 2)	1.3
KMZ10B	SOT-195	– 2.0 to + 2.0	5	– 40 to 150	4	2.1
KMZ10C	SOT-195	– 7.5 to + 7.5	5	– 40 to 150	1.5	1.4

Notes

1. In air, 1kA/m corresponds to approximately 12.5 G or 1.25 mT.
2. With switched Hx.

SENSOR HYBRID MODULES

Sensor for rotational speed measurement and reference- mark detection

TYPE	PACKAGE OUTLINE	SENSING DISTANCE (mm) (note 1)	SENSING FREQUENCY (Hz)	MOUNTING DIRECTION RELATIVE TO GEAR WHEEL	DETERMINATION OF ROTATIONAL DIRECTION
KM110BH/11	fig. 1	2.5	0 to 3000	tangential	N
KM110BH/12	fig. 1	3.5	1 to 3000	tangential	N
KM110BH/13	fig. 2	2.5	0 to 3000	radial	N
KM110BH/14	fig. 2	3.5	1 to 3000	radial	N
KM110BH/31	fig. 3	3.0	2 to 50,000	radial	Y

Note

1. Gear wheel: pitch diameter = 44 mm; width = 16 mm; module 2; material; steel (1.0715).

Sensor modules for angle measurement

TYPE	PACKAGE OUTLINE	ANGLE RANGE (deg)	OUTPUT VOLTAGE (note 1) (V)	SUPPLY VOLTAGE (V)	T_{amb} (°C)
KM110BH/2130	fig. 4	30	0.5 to 4.5; linear	5	– 40 to 125
KM110BH/2190	fig. 4	90	0.5 to 4.5; sinusoidal	5	– 40 to 125

Note

1. Sensor signal is generated by a magnetic field H = 100 kA/m. For example: rare earth magnet, 11.2 × 5.5 × 8.0 mm, distance 2.5 mm from KMZ chip.

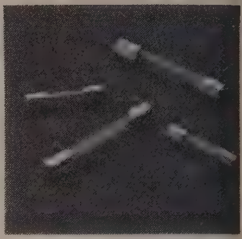
FUSE PRODUCTS



bel...Defining a degree of excellence

bel...defining a degree of excellence in quality and service for over 40 years in the electronics industry. bel is your full line fuse source, worldwide. bel specializes in:

- **Lightning Surge Fuses**
- **Slow Blow Micro Fuses**
- **Pre-assembled Fuses & Clips**
- **Locking Fuse Clips**
- **"Euroform" Micro Fuse**
- **UL /Semko Approved Fuses**

When you need miniature or micro fuses, magnetic products, custom thick film hybrids, or delay lines...come to bel, the company who has been supplying the world with electronic components since 1949.

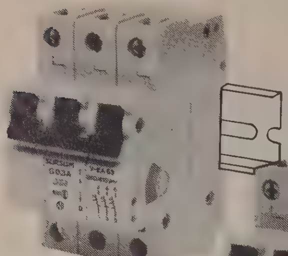
CIRCUIT PROTECTION DEVICES, 35mm DIN Rail Mount

Energy Limiting Circuit Breakers



3G

2G

1G

Altech/Sursum V-EA miniature circuit breakers provide reliable and cost effective circuit and equipment protection against overload (thermal trip), short circuit (magnetic trip) and energy let-through (current limiting). Enhance the value of your product or system by using circuit breakers instead of fuses, or use in addition to existing fuses to provide tighter protection and fuse-saving selectivity.

One, two, three and four pole mini circuit breakers snap easily onto standard 35mm DIN rail, saving space and assembly time. No need to drill mounting holes. They are available in six standard European trip characteristics: CENELEC Euro-norm ("B" and "C") with VDE stamp typically used for household applications; CENELEC ("D") for industrial motor/transformer; ("G") for traditional industrial applications; ("Z") for semiconductor protection; and ("L") for special purpose applications.

Excellent European ratings, including breaking capacity > 10kA to DIN/VDE0641 and 15kA/P-2 to VDE0660/IEC 157-1, rated voltages 415/240V AC, 48VDC one pole, and 110VDC two pole, etc. Rated current range: 0.3A to 63A (refer to Altech Catalog No. 310).

Ask about one and three pole plus neutral, four pole versions and accessory devices.

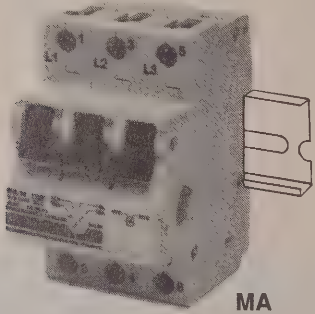
UL Testing: V-EA-G motor starting and group fusing applications at up to 480V/277VAC are part of an extensive, on-going UL testing program. UL Recognition should be achieved before publication date. Contact Altech for testing and US/UL applications data.

Three Phase Motor Protector



MA

Altech/Sursum DIN rail mount MA Three Phase Motor Protectors feature an adjustable thermal trip for fine tuning (overload protection), fixed magnetic short-circuit protection, energy (current let-through) limiting, and manual ambient temperature compensation.

Use of the MA allows finalization of design and procurement even though motor nameplate FLAs are not precisely known, as tight overload protection can be dial-set at start-up.

Overload trip is at 115% of the dial-set current (<1 hour) and magnetic trip is at a nominal 1100% of the maximum dial-set current (IEC-292-1). Screw-cage clamp terminals accept up to 3 AWG wire, and power feed can be to either top or bottom terminals. Maximum operating voltage and rated insulation voltage is 500V AC.

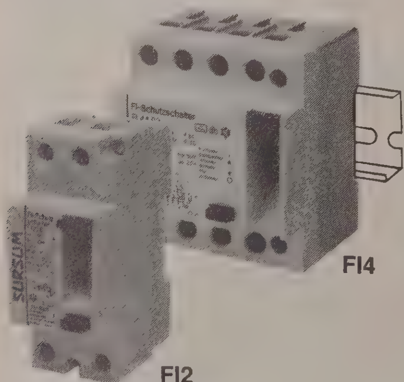
UL Testing: Applications in group motor circuits with high available fault currents are part of an extensive, on-going testing program. UL Listing should be achieved before the publication date. Contact Altech for testing and US/UL applications data.

Earth Leakage Circuit Breakers



FI4

FI2

Compact DIN rail mount Earth Leakage Circuit Breakers detect and interrupt ground faults. They are VDE approved for the European system of protecting people, animals, equipment and property from dangerous line-to-ground and shock hazard currents.

Trip-capable on decayed line voltage, marked approval of DIN/VDE 10kA interrupt rating, marked "Snowflake" temperature range, marked trip sensitivity to pulsed as well as sinusoidal fault currents, integral test circuit, insensitive to vibration, etc.

US applications include ground fault protection of equipment (GFPE) using the 10mA and 30mA fault current ratings, especially when high distributed capacitance or other leakages cause excessive nuisance trips at lower fault currents. Applications for the 300mA rating are equipment protection and fire prevention by limiting the energy of a fault to less than the minimum ignition energy for many materials.

AII

AMBER INDUSTRIES, INC.

3312 Wiley Post Road - Carrollton, Texas 75006 - P.O. Box 802822 - Dallas, Texas 75380 - (214) 490-9801

AC POWER LINE AND DATA LINE TRANSIENT SUPPRESSORS

SINGLE PHASE PROTECTION

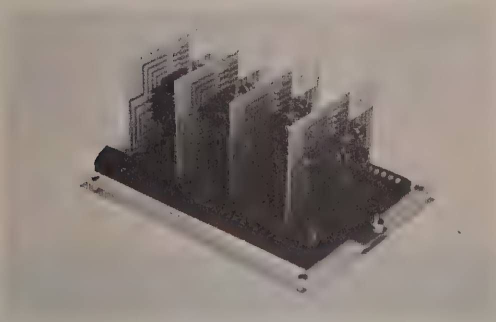
Both the OEM series and CM series AC transient suppressors attenuate spikes and fill notches throughout the full 360 degrees of the AC sinewave. Unlike other suppressors which merely clamp a transient hundreds of volts above or below reference, Amber operates within +/- 1 volt variation of the sinewave instantaneous voltage. The CM series adds common mode protection (hot to ground and neutral to ground). Both OEM and CM series are UL 1449 approved (file #E103476). Models are available with either screw terminals or wire leads. Models are also available for DC power and "line cord" protection. Not only does Amber outperform other approaches in both categories of IEEE-587; it also outperforms the competition in the new (1992) IEC and ANSI standards.

THREE PHASE PROTECTION

Amber's three phase protection is available for either the OEM or full facilities protection. The small size and mounting profile allow them to be used in many locations where mounting larger units would be impractical or impossible. These protectors are designed so as to be installed in either the user's electrical panel or the equipment manufacturer's enclosure. The 1135 models have built-in self diagnostics and alert of any fault. Both OEM and facilities models are available for all service types and voltages. Amber's three phase protectors are among the most cost effective on the market today. The OEM version of the three phase protector is UL approved to 1449 (file #E103476).

DATA LINE PROTECTION

The Amber ACS system protects digital data lines, sensor and transducer lines, plus 4-20mA current loops. Each ACS enclosure will protect up to 32 single-ended data lines or 16 differential pairs or 4-20mA loops or 8 RS-232 sets. A Nema type 1 enclosure is standard, with type 4 or type 12 available as options. Each line is separately protected up to 3000 surge amps with only 10 ohms maximum impedance. The modular construction of the ACS system allows different data types to be protected in the same enclosure.



THE AMBER DIFFERENCE

Amber Industries Inc. is a technology leader in single phase, three phase and data line surge suppression. We invite you to let us know what your specific requirements are. Our applications and engineering departments will work directly with your engineers to assure a quality design based on the most up-to-date suppression technology available.

3SB1	1	250	3SB8	8	250
3SB1.2	1-2/10	250			

Listed by Underwriters' Laboratories through 8 amperes. Certified by Canadian Standards Association through 8 amperes.

Type 3SB fuses, described as slow blow, are designed to prevent unnecessary blowing in circuits where transient surges are anticipated. Protection against short circuit or continued overload is still maintained. Pigtail leads (Type 3SBP) are available when direct soldering into circuits is desired.

3SF630	.630	250	3SF10	10	60

Approved by SEMKO from 315 mA through 10 A.

Type 3SF fuses are designed to meet the electrical and mechanical requirements of IEC 127, CEE 4, Standard Sheet IV. They carry the SEMKO mark in the values specified as SEMKO approved. They are mechanically interchangeable with Type 3AG, the 1/4 × 1-1/4 normal blow fuse. However, since the fusing characteristics specified in IEC 127 and UL 198G are different, it is important that the designer carefully compare the blowing curves of the two types before substituting one for the other. They permit manufacturers of equipment built to United States/Canadian standards to substitute a fuse acceptable and available in the European market without changing board layouts or fuse mountings. Pigtail leads (3SFP) are available when direct soldering into circuits is desired.

*Pigtail (AP)

Listed by Underwriters' Laboratories through 7 amperes. Certified by Canadian Standards Association through 5 amperes.

Type 8AG is designated as a normal blow fuse for use in general circuit protection. Their smaller size permits use where space limitations prevent use of Type 3AG. Pigtail leads (Type 8AP) are available when direct soldering into circuits is desired.

			5MF8	8	125

Listed by Underwriters' Laboratory from 50 mA to 8 amperes. Certified by Canadian Standards Association through 8 amperes.

Type 5MF fuses, described as fast acting are manufactured to meet the requirements of UL 198G and CSA 22.2. They permit European manufacturers of original equipment to substitute a fuse listed or certified by UL/CSA when exporting their equipment to the United States or Canada without making costly changes in mountings and printed circuit board layouts. Since fusing characteristics are different than those specified by IEC 127 for specific ratings, a careful analysis of the blowing curves should be made before determining the proper substitution. The small size of these fuses also offer the American/Canadian designer a protective device where space limitations are an important consideration. Pigtail leads (5MFP) are available when direct soldering into circuits is desired.

Listed by Underwriters' Laboratories from 50 mA to 5 amperes. Certified by Canadian Standards Association through 5 amperes.

Type 5MT fuses, described as time lag offer additional surge protection for circuits where momentary transients are anticipated. They are built to meet the specifications of UL 198G and CSA 22.2. They permit the European manufacturers of original equipment to substitute a fuse listed or certified by UL/CSA when exporting their equipment to the United States or Canada without making costly changes in mountings and printed circuit board layouts. Since fusing characteristics are different than those specified by IEC 127 for specific ratings, a careful analysis of the blowing curves should be made before determining the proper substitution. The small size of these fuses also offer the American/Canadian designer a protective device where space limitations are an important consideration. Pigtail leads (5MTP) are available when direct soldering into circuits is desired.

Approved by SEMKO for 80 mA, 125 mA, and from 250 mA through 6.3A.

Type 5SF fuses, described as quick acting, low breaking capacity, are manufactured to the specifications of IEC 127, CEE 4, Standard Sheet II (Type F). Used throughout Europe, they carry the SEMKO mark in the ratings indicated. They are used for general circuit protection in electrical and electronic equipment where momentary transients are not anticipated. Pigtail leads (5SFP) are available when direct soldering into circuits is desired.

5TT800	8/10	250	5TT7	7	125

Listed by Underwriters' Laboratories from 50mA to 5 amperes and certified by CSA through 5 amperes.

Type 5TT fuses, described as slow blow, are designed to withstand higher surge currents occurring at switching during the normal life of equipment than the 5MT series. They are built to meet the specifications of UL 198G and CSA 22.2. They permit the European manufacturers of original equipment to substitute a fuse listed or certified by UL/CSA when exporting their equipment to the United States or Canada without making costly changes in mountings and printed circuit board layouts. Since fusing characteristics are different than those specified by IEC 127 for specific ratings, a careful analysis of the blowing curves should be made before determining the proper substitution. The small size of these fuses also offer the American/Canadian designer a protective device where space limitations are an important consideration.

Pigtail leads (5TTP) are available when direct soldering into circuits is required.

Type 5HF fuses are SEMKO approved and UL recognized.

Type 5HF fuses are quick acting, high breaking capacity, in accordance with specifications of IEC-127-2, Standard sheet 1 (type F).

Pigtail fuses are not covered in IEC-127-2, therefore, type 5HFP fuses are not eligible for SEMKO approval. Type 5HFP do meet the electrical characteristics of IEC-127-2, standard sheet 1 (Type F).

Both 5HF & 5HFP are UL Component recognized for the electrical characteristics in IEC 127-2.

PACKAGING

Cartridge fuses can be provided pre-assembled in clips.

Pigtail fuses can be provided:
1. In bulk.
2. On Axial Tape & Reel.
3. Radial Formed & Cut
4. With Heat Shrink Tubing over body.

Type 5HT fuses are SEMKO approved and UL recognized.

Type 5HT fuses are time-lag, high breaking capacity, in accordance with specifications of IEC-127-2, Standard sheet 5 (type T).

Pigtail fuses are not covered in IEC-127-2, therefore, type 5HTP fuses are not eligible for SEMKO approval. Type 5HTP do meet the electrical characteristics of IEC-127-2, standard sheet 5 (Type T).

Both 5HT & 5HTP are UL Component recognized for the electrical characteristics in IEC 127-2.

PACKAGING

Cartridge fuses can be provided pre-assembled in clips.

Pigtail fuses can be provided:
1. In bulk.
2. On Axial Tape & Reel.
3. Radial Formed & Cut
4. With Heat Shrink Tubing over body.

MAGNETIC CIRCUIT BREAKERS

GENERAL PRODUCT GUIDE			Product Name:	**M-Series**	**A-Series** (Handle Type)	**A-Series** (Rocker Type)
Description:	Miniature rocker breaker for those demanding applications up to 25 amps where space, aesthetics and snap-in front panel mounting are important. LEDs or neon bulbs provide rocker illumination. Rocker guard prevents inadvertent actuation of rocker.	Compact, temperature stable design for precision operation in OEM markets requiring general purpose as well as full load amp applications.	Features the unique Visi-Rocker two-color actuator which can indicate either the ON mode or the TRIPPED/OFF mode. Available in three Visi color combinations and seven Solid colors.
Number of poles:	1-2 poles	1 - 6 poles	1 - 3 poles
Available Delays:	Instant, Short, Medium - AC/DC	Instant, Ultra-Short, Short, Medium and Long (motor loads) AC, DC, AC/DC. High Inrush (AC) - Short, Medium, Long	Instant, Ultra-Short, Short, Medium and Long (motor loads) AC, DC, AC/DC. High Inrush (AC) - Short, Medium, Long
Maximum current & voltage ratings:	0.02-15FLA, 32VDC, 125VAC, 1-pole 15.1-25GPA, 32VDC, 125VAC, 1-pole 0.02-15FLA, 65VDC, 250VAC, 2-pole 15.1-25GPA, 65VDC, 250VAC, 2-pole 0.02-12FLA, 250VAC, 1-pole 0.02-7.5GPA, 50VDC, 1-pole	0.02-30A @ 277VAC, 65VDC 31.0-50A @ 125/250VAC, 32VDC	0.02-30A @ 277VAC, 65VDC 31.0-50A @ 125/250VAC, 32VDC
Maximum interrupting capacity:	1000A @ 65VDC, 2-pole 1000A @ 32VDC,1-pole 1000A @ 250VAC, 2-pole 1000A @ 125VAC,1-pole	3000A @ 65VDC (UL only) 3500A @ 65VDC w/fuse backup 3000A @ 125/250VAC (UL only) 5000A @ 277VAC w/fuse backup	3000A @ 65VDC (UL only) 3500A @ 65VDC w/fuse backup 3000A @ 125/250VAC (UL only) 5000A @ 277VAC w/fuse backup

QUALITY BY DESIGN

MAGNETIC CIRCUIT BREAKERS

			B-Series	**C-Series**	**D-Series**	**E-Series**
Designed specifically for world market applications requiring compliance to VDE and IEC spacing requirements.	Designed for those applications requiring higher current and voltage capability while retaining a compact size. Featuring back connected stud and screw terminals.	Designed for DIN rail mounting on either a 35mm x 7.5mm, or a 35mm x 15mm Symmetrical DIN rail. Available with a handle or Visi-Rocker two-color actuator. Features dead-front, wire-ready screw terminals.	Ideally suited for higher current and voltage applications. Available as a Branch Circuit Breaker, Manual Motor Controller or Supplementary Protector. Features front and back terminals and other mounting options.
1 - 6 poles	1 - 6 poles	1 - 4 poles (Handle), 1 - 3 poles (Rocker)	1 - 6 poles

corcom

Transient Voltage Suppressor

Corcom, Inc.
1600 Winchester Road
Libertyville, Illinois 60048 USA
TEL: 708-680-7400 FAX: 708-680-8169

Electronic design trends toward compact packaging use a high density of small, sensitive components. This increases the likelihood of damage to a design by power surges. Surges have therefore become a necessary consideration when designing electronic systems to guarantee performance and reliability.

Traditional surge suppression products such as MOV's and gas arrestors offer limited protection against voltage variances. There is a trade-off between speed and reliability; MOV's offer quick response but short life; gas arrestors provide a long useful life but slower response time to clamping. Corcom's TS series voltage suppressors combine the characteristics of both to assure the reliability of quick and continuous response. A TS connected between lines immediately returns the surge back to its source, via the other line, when the surge exceeds the line voltage.

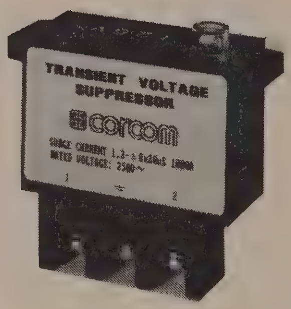
Generally, gas arrestors are slow to react; but by incorporating the varistor *inside* the arrestor, the varistor can absorb the initial impact of the surge. The reaction of the varistor triggers an ionization process of the gas inside the TS suppressor to sustain the duration of the surge without degradation of the varistor.

The TS series transient voltage suppressors are designed to protect single phase normal and common mode circuits. Used in conjunction with capacitors, they provide superb lightning surge suppression. Available for 125 and 250 volt circuits, these products provide the highest reliability for protection of critical electronic designs.

TS125W/TS250W

1
2
TRANSIENT
VOLTAGE
SUPPRESSOR
corcom
1000A

TS125S/TS250S



TS Series suppressors are available with wire leads or screw terminals.

- TS 125 allows 145 VAC maximum line voltage.
- TS 250 allows 300 VAC maximum line voltage.
- Response times for all units 50 nS maximum.
- Maximum discharge current 1000 AMP (8/20 uS).

Screw terminal units feature an indicator light to verify ongoing operation. These products enable manufacturers to meet or exceed the specifications of IEC 801-4 for transient voltage protection and should be used in instances where reliability is essential.

See our pages in Vol. A Section 2700; Vol. C, Section 2100.

corcom Solutions to Power Line Problems.

FAST BUCK or LONG-TERM VALUE.
E-T-A
250V~ 28V==

If your only concern is initial cost, then you'll save a few bucks by choosing fuses over E-T-A Circuit Breakers.

But fuses blow . . . and can drive up your total operational costs including warranties, replacement, service, even product liability.

E-T-A Circuit Breakers, on the other hand, add value to your product. They provide better circuit protection and performance characteristics than fuses. They're trip free and foolproof . . . and can actually lower your total costs.

So forget the fast buck. Go for the long-term value of E-T-A Circuit Breakers . . . 100% quality tested and approved for use worldwide.

Commercial & Military Approved Panel Mount Fuseholders

- Superior Clip Design for Solid Fuse Contact
- UL Recognized & C.S.A. Certified
- Most Commercial Models are recognized under the Marine Electrical and Fuel System (PEQZ2) as "Ignition Protected Devices"
- Blown Fuse Indicating & Non-Indicating
- High Impact Plastic for Superior Strength
- Dead-Front, Watertight
- Military Versions Meet MIL-F-19207

Commercial Fuseholders All Recognized by Underwriters Laboratories

Heinemann® Circuit Breakers First in Features, First in Quality

Heinemann offers the widest choice of styles and current ratings in high-quality, reliable circuit protectors. Ratings range from 0.01A to as high as 700A. Their applications are as diverse as medical equipment, computers, industrial air conditioners, electric locomotives and telecommunications equipment.

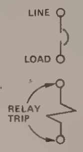
Heinemann can also supply circuit breakers that provide auxiliary functions. For example, a heavy-duty relay, an on/off switch and a hydraulic-magnetic circuit breaker, all in one economical and compact unit.

Use this condensed guide to locate the type of circuit breaker that best meets your requirements. Then write or call us for a copy of the appropriate product bulletin containing detailed specifications and ordering information. Or call one of our technical assistance engineers to dicuss your particular application.

Technical assistance, important features and quality products...three reasons why it pays to look to Heinemann "When your reputation's on the line."

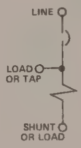
SPECIAL-FUNCTION CIRCUITS

Heinemann circuit breakers (except for PS1, KD, TX and Hector) can be furnished with a number of special-function internal circuits. They permit a single protector to perform the protection and control functions of several components.



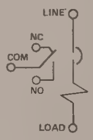
RELAY-TRIP

Permits remote actuation using a separate control circuit. Electrical isolation allows use of a different current or voltage from contact circuit. Both time delay and non-time delay constructions are available.



SHUNT/TAP

Use of third terminal permits remote tripping by utilizing line voltage with or without a time delay response. On breakers rated up to 1A, the trip point may be raised by shunting with an external resistor on the shunt/tap terminal.

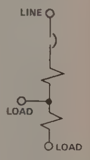


AUXILIARY SWITCH

Used for logic functions, alarms, lights and other circuits. Miniature snap-action SPDT or DPDT switch is mounted on the back of the breaker, mechanically connected to the switching mechanism. Contact capacity: 10A at 125/250 V, 50/60 Hz; 4A resistive at 30 Vdc; 2.5A inductive at 30 Vdc. Minimum operating voltage 6 Vdc or ac, at 3 VA dc or ac.

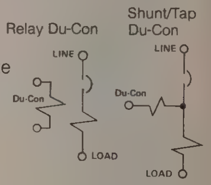
SERIES TRIP (Standard internal circuit)

Ideal for use as both power switch and overload protector. Usually installed in series with line and load terminals to provide circuit interruption in the protected circuit.



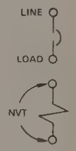
DUAL RATING

Two concentrically-wound sensing coils provide two discrete current ratings in the same breaker. Protects equipment designed to operate at two different current levels or supply voltages within certain limitations.



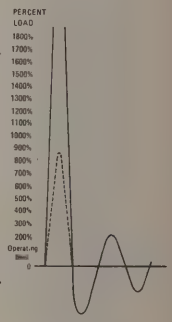
DU-CON™ (DUAL-CONTROL)

Provides sensing of both overcurrent and separate voltage signals in the same pole through a small, non-continuous-duty voltage sensing coil. DU-CON overload and voltage coils must be specified separately.



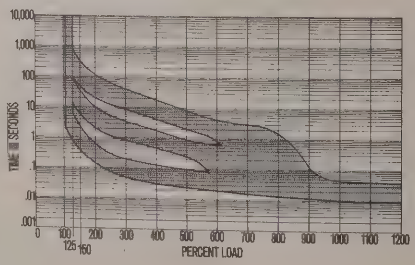
NO-VOLTAGE TRIP

Prevents uncontrolled re-start of equipment after power outage. Used in ground-fault interrupters and other safety applications. Not intended for overload protection without one pole connected in series-trip configuration.



HIGH-INRUSH

Economical protection of high-reactance loads, which draw starting surges often as high as 30 times normal load current in a 50/60 Hz 1/2-cycle pulse, such as ferro-resonant power supplies and distribution transformers. Eliminates nuisance tripping without derating or special circuitry.



Typical Time Delay Curves

Circuit breakers are available in a variety of time-delay curves for applications such as high-inrush, 50/60 Hz and dc as well as with no intentional delay.

EATON

Heinemann® Circuit Breakers
First in Features, First in Quality

	PS1 FUSE-SWITCH	RE-CIRK-IT® SERIES KD1	TYPE TX	SERIES RX
					Fuse-Switch provides ON/OFF control and fuse protection in a single low-cost component. Its use eliminates a hole and interconnecting wiring and makes it easy to re-fuse from the front panel. It accepts standard 1/4-inch diameter by 1¼-inch fuses. An adapter is available for 5 mm x 20 mm fuses. Can be supplied for normally open or normally closed operation.	A low-cost, pushbutton supplementary protector for electrical equipment, designed to fit in a standard 5/8-inch round or "D" fuseholder panel cutout. Resettable at up to 1000% of its rated current from 2.5A through 15A, 500% from 0.25A through 2A. Slide-on retaining ring included.	The attractively designed Type TX circuit protector doubles as an economical ON/OFF switch and with an optional lamp as a power indicator. Rocker arms available in a variety of colors; in one and two pole models. Its trip free design cannot be held closed against a fault. Features quick-connect terminals and snap-in mounting.	A compact hydraulic-magnetic circuit breaker featuring snap-in mounting and rocker handle operation. Over-the-center, non-teasable mechanism prolongs contact life by reducing arcing. Available with long, short and no deliberately imposed time delay.
APPLICATIONS	Consumer and industrial products that would otherwise use a separate ON/OFF switch and fuse holder.	Consumer and industrial products, office machines, appliances, power supplies, convenience outlets, electronic games.	Commercial and consumer products, power supplies, medical electronic equipment, office and reproduction equipment, data processing equipment.	OEM (power supplies, medical-electronic equipment, control systems, office and EDP equipment).

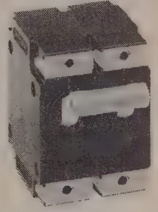
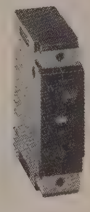
EATON

Heinemann® Circuit Breakers First in Features, First in Quality

SERIES HM	SERIES L	SERIES J/S	SERIES AM	SERIES AM-MIL
				




Lightweight, subminiature, multi-frequency circuit breaker designed to withstand severe environmental extremes such as shock, vibration and high humidity. Housed in a corrosion-resistant brass case, nickel plated. Meets MIL-C-39019, is explosion- and fungus-resistant, operates in any position. Silver contacts provide good conductivity with low power loss.	This compact hydraulic-magnetic circuit protector provides the same quality, precision and choice of time delays found in larger Heinemann magnetic circuit breaker. Over-the-center, non-teasable mechanism provides snap-action operation that prolongs contact life by reducing arcing. Handles available in seven different colors for decorative or circuit-identification purposes.	Compact, lightweight, moderately-priced circuit breaker for single or multi-pole OEM applications. Also available with snap-in mounting or rocker handles. Sealed mount models are also available, single pole only. Series J/S breakers are suitable for domestic or world-market applications. Models also available for marine applications.	A low-cost, lightweight breaker available in single or multi-pole configurations, the Series AM features rear-connection studs, a high level of moisture resistance, and a current range up to 100A dc or 60A ac. Qualified under MIL-C-55629 to 50A dc and ac.	Heinemann Series AM-MIL breakers are specifically built and tested in accordance with the requirements of MIL-C-55629. Fungus- and moisture-resistance is provided by treating all ferrous parts with a special finish, and by using special springs and inherently fungus-resistant phenolic cases, covers and handles.
Military programs and commercial products, power supplies, mining and medical applications where hermetically-sealed circuit protection is required.	OEM (power supplies, medical-electronic equipment, control systems, office and EDP equipment).	OEM (power supplies, medical-electronic equipment, control systems, office and EDP equipment), control panels, marine equipment, field instrumentation. Heinemann® Circuit Breakers First in Features, First in Quality

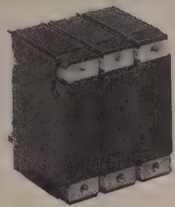
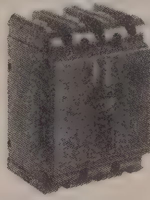
SERIES AM/S	SERIES CF E-FRAME	SERIES GH EH-FRAME	SERIES GJ	SERIES GJ1P
				




Series AM/S "world class" circuit breakers meet International Standard IEC 380 and German Standard VDE 0730. The 8-mm spacing requirement and dielectric-withstand specification are incorporated into the standard AM breaker housing without changes in size, thereby eliminating mounting procedure modifications or the need for adapter plates.	Priced considerably lower than competitive E-frame breakers, the Series CF is the most compact and versatile circuit breaker available for equipment and branch-circuit protection. Single- and multi-pole models are stocked in a wide range of standard ratings for fast, off-the-shelf delivery.	This rugged new EH-frame breaker offers all the advantages of a completely magnetic, three-pole breaker with 14,000A interrupting capacity for less than most thermal units. Compact, environmentally stable and to 100A at 480 Vac and 250 Vdc.	Where space is at a premium and current capacity up to 250A is called for, the Series GJ is the answer. Available in one-, two-, or three-pole models, it is especially suitable for panelboards, service entrances, and electric vehicles.	GJ1P parralel-pole breakers incorporate Precision Current Equalization (PCE) to automatically distribute current equally through the current-sensing elements. PCE thereby minimizes nuisance tripping which can occur with conventional parallel-pole breakers. An optional shunt permits metering of current. Since shunt output is only 25 mv, light-gauge wiring can be used between shunt and meter.
OEM (data processing equipment, mobile applications, humid environments).	Panelboards, switchboards, branch circuits, EDP equipment, machine tools, environmental systems, single- and three-phase applications.	Motor controls, air conditioning, electric heating, computer main frames, transportation, indoor or outdoor installations.	Commercial, industrial, and residential service — entrance or panelboard applications; lighting, appliance, transformer, electric vehicles, EDP power supplies, heating, air conditioning, and electronic circuit protection.	Telecommunications, transportation, air conditioning, other outdoor "heat-loaded" equipment.

METAL OXIDE VARISTORS

SERIES VXXX KXX

- Very non-linear bidirectional breakdown
- High non-linear exponent (>20)
- Very low leakage current
- High current density capability
- Reliable and Effective Suppression in a small package
- Can be used in place of Filters, Zeners, Selenium Cells
- Applications: Computers, Telecommunications, Consumer Goods, Measuring Devices
- T/R Available on K5 and K7 Sizes
- Lead Forming Available on All Sizes
- Durez or Epoxy Coatings Available
- UL File Number E 103662

Operating Ambient Temperature	—40°C to +85°C
Voltage Temperature Coefficient	—0.05%/°C
Nominal Voltage Defined at (DC)	K5 (0.1 mA) K7, 10, 14, 20 (1 mA)
Tolerance of V_N	±10%

* Additional Literature Available upon request.
* Custom Designing of Protection Assemblies Also Available. Call us with your design problems.

A metal oxide varistor (MOV) is a voltage dependent non-linear resistor with V-1 curves similar to back-to-back zener diodes. The current through the varistor is exponentially dependent on the voltage. It is intended for safeguarding sensitive electronic components against voltage surges.

[1] Measured at less than 10% rated current
[2] Measured at 100% rated current

ELECTRICAL CHARACTERISTICS:

% of Ampere Rating	Opening Time
100%	4 Hours, **Minimum**
200%	1 Second, **Maximum**
300%	0.1 Second, **Maximum**

APPROVALS:

Recognized under the Components Program of Underwriters Laboratories and Certified by CSA.

Interrupting Rating:
50 amperes at 250 volts AC

Operating Temperature:
–55°C to 125°C

Materials:
Body: UL94VO Epoxy Coating, Green
Leads: Solder Coated Copper

RECOMMENDED SOLDERING PARAMETERS:

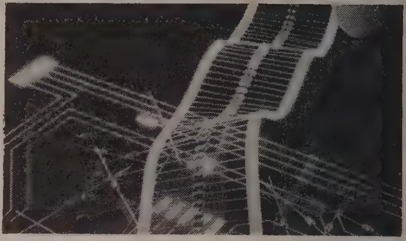
Reservoir Temperature: 500°F Maximum
Dwell Time: 10 Seconds Maximum
Lead Soldering: 1/8 Inch Minimum from Body

PACKAGING:

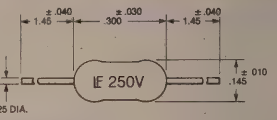
Fuses packaged to comply with EIA Standard 296. To order, add the prefix "R" and the suffix "T1" [52.4mm (2.062") tape spacing]. Contact factory for other packaging options.

PATENTS:

Patented.



DIMENSIONS:



NOTE: LF logo and amperage rating, laser marked on one side, LF and 250V on the other side.

PICO-SMF™

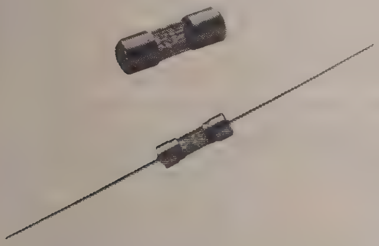
2AG SUBMINIATURE FUSES



Cartridge Size:
.177" Dia. x .58"
Axial Lead Size:
.19" x .60" (leads 1.50" x .025" Dia.)

FAST ACTING TYPE (225 & 224)

Opening Time: 110%, 4 hrs. min.; 135%, 1 hr. max.; 200%, 1 sec. max.
Interrupting Rating:
10,000 amperes at 125 VAC (0.1-10A)
35 amperes at 250VAC (0.1-1A)
100 amperes at 250VAC (1.5-3.5A)

SLO-BLO® TYPE (229 & 230, 229S & 230S)

Opening Time: 110%, 4 hrs. min.; 135%, 1 hr. max.; 200%, 3 sec. min./20 sec. max.
Interrupting Rating:
10,000 amperes at 125 VAC (0.25-3.5A)
400 amperes at 125VAC (4-7A)
35 amperes at 250VAC (0.25-1A)
100 amperes at 250VAC (1.5-3.5A)
Approvals: U.L. Listed and Certified by C.S.A. thru 3.5 amps. U.L. Recognized 4-7 amps.
PATENTS: U.S. Patent 4,409,729 and 4,445,106.

PACKAGING:
224 + 230/230S available on tape and reel to comply with EIA Standard 296. To order, add the prefix "R" and the suffix "T1" for 2.062" (52.4mm) tape spacing. Contact factory for other packaging options.

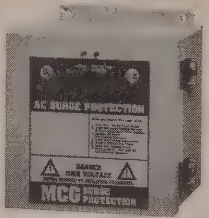
Indicating feature (changes color from clear to yellow/brown), available for **229** and **230** by adding **"S"** after catalog number.

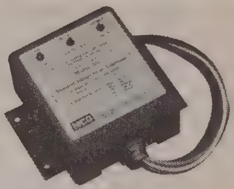
MAXIMUM SURGE PROTECTION

Effective Protection Where It Counts

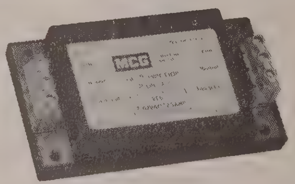
On the AC Power Lines



Service Entrance/Panelboard Protectors - SPC/SPB/SPA+
The SP series are compact, rugged, yet cost-effective shunt-installed panel protectors. Large transient energy absorption, nanosecond fast and modular construction make the SP series a very viable choice for difficult situations. Models available 120VAC to 480VAC, 1 phase and 3 phase service.

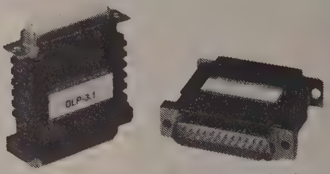


Light Industrial Protection- 160 Series
The 160 series AC voltage surge suppressors are high speed, solid state transient surge protectors designed for up-close protection of sensitive equipment. The 160's ease of installation and sophisticated diagnostics make it ideal for very cost sensitive applications. LED status indicators verify the presence of power and protection. Models available for use on 120VAC, 1 phase and 3 phase service.

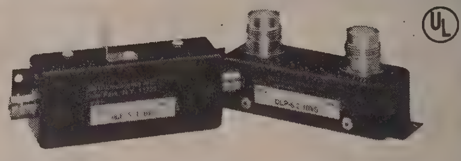


Equipment Level Protectors - 407, 415, 416, 417
The 400 series are compact, low profile protectors installed "within" a piece of equipment. The units employ a sophisticated combination of brute force surge protection and impulse filtering to prevent equipment damage or malfunction. Reaction time is less than 1 nanosecond with automatic reset after the transient has passed. Models available for use on 120VAC and 240VAC, single phase to 25A RMS.

On the Data/Control Lines



Computer/Peripheral Protection - DLP 3 Series
The DLP 3 series protects I/O ports on computers and peripherals from damaging transients caused by lightning and switching surges. Installs in minutes in series with data line permitting a quick retrofit for existing equipment or new installations. Available in a variety of connector combinations, the units protect RS232 lines at +/-25V. Protectors are designed to withstand multiple "hits" without degradation when used within rating. Models are provided with hardware package to permit installation to connectors of either gender.



Wideband Coaxial/Twinaxial Protectors - DLP 5 Series
The DLP 5 series of video/wideband protectors prevent cable from transmitting damaging transients to sensitive loads by shunting the transients to earth ground. The units are ideal for computer systems having long exposed cable runs and where bandwidth vs. attenuation is critical. The protectors are installed in-line by simply plugging your cables into the protector at each end of your system and grounding to chassis.

Multi Signal/Data Line Protection - DLP 10/20/30
The protectors guard computer mainframes, terminals, printers, process controllers, data loggers and other complex instrumentation from damage due to lightning and switching transients. Providing multiple line protection for 2 to 24 wires, the units are hardwired and ready to be installed anywhere. Protection voltage available from 5V to 200V.

Call 1-800-851-1508 for Immediate Application Assistance.

MP INC

AMERICA'S LARGEST DOMESTIC PRODUCER OF THERMAL-CORRELATING CIRCUIT PROTECTION SYSTEMS

For over 50 years, manufacturers have looked to MP to provide reliable circuit protection for a multitude of purposes. We operate two 50,000 square foot plants in Jackson, MI and Hollywood, MD, incorporating comprehensive research and testing capabilities. MP offers a full line of quality devices, ranging from economical products for consumer use to life-protecting units integrated into medical equipment, industrial controls, commercial and military aircraft. NASA has recognized MP among the top forty suppliers to the Space Shuttle Program, out of a list of over 10,000. Systems are UL, CSA and VDE approved, and many meet a variety of military specs. Comprehensive customer support is offered for all applications.

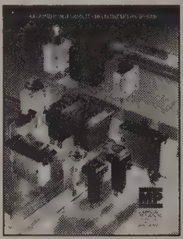
MANUFACTURES A COMPREHENSIVE LINE OF BOTH SWITCHABLE AND PUSH-TO-RESET CIRCUIT BREAKERS

Whether for Aerospace, Defense, Commercial or Consumer applications, MP manufactures reliable, high-quality circuit protection systems. The pages below describe our commercial Switchable product line. On the two pages that follow, you can review the comprehensive family of commercial Push-To-Reset circuit breakers.

Ask For Our Full-Line Catalog

Our 84-page full-line catalog offers detailed support for specifying MP Circuit Protection Devices. Call (517) 782-0391 and request a free copy TODAY.



Switchable Circuit Protectors

For Push-To-Reset Circuit Protection, see the following two pages

SERIES NO(S)	CONFIGURATION	PHYSICAL DIMENSIONS: INCHES	FEATURES	OPERATING CHARACTERISTICS						REGULATORY APPROVAL			
				CALIBRATION @ 25° C.		OVERLOAD TRIP TIME: (in sec.)			INTER-RUPT				
				HOLD	TRIP	200%	500%	1000%		UL	CSA	VDE	OTHER

Patrick J. McCleer, Ph.D., P.E. serves as a consultant to MP. He wrote this book while on the faculty of the University of Michigan, Department of Electrical Engineering and Computer Science.

We Wrote the Book on Circuit Protection

If your need for information extends beyond the limits of the material presented, you may be interested in the book The Theory and Practice of Overcurrent Protection written by Patrick J. McCleer. This 233 page book is an in-depth look at low power circuit protection and the many devices used to meet the industry need.

International "Touchproof" Fuseholders

Interpower™ fuseholders accept both sizes of fuses that are used in the world today: the North American 3AG (1/4 x 1-1/4"/6.3 x 32mm) and the international 5x20mm fuses. International "touchproof" fuseholders have four important characteristics: 1) Fuseholder is accessible with a tool only; 2) Contacts are recessed and protected; 3) Fuse carrier is insulated; 4) Fuse carrier is retained in a spring-loaded carrier.

Three body styles are available, each with four contact styles. Order fuse carriers and fuses separately.

Maximum panel thickness: .762mm (.30")
Materials: Body molded from polyphenylene sulfide thermoplastic resin; contacts, tin-plated brass. UL 94-V0 flammability rating.
Markings: All parts are marked "80910"

CIRCUIT BREAKERS

Airpax® circuit breakers are rated at 50 milliamps to 160 amperes in more than 50 configurations and styles. And we can design one to your exact specifications. Contact Philips Technologies , Woods Road, Box 520, Cambridge, MD 21613. (410) 228-4600. Fax (410) 228-8910.

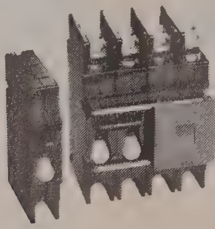
Models AP and UP**

Hermetically sealed. DC, 50/60 Hz or 400 Hz versions. Various delays to meet your needs. UP version has wide glass terminals.
Specifications: 1 to 3 poles. Ratings: 0.05-20A, 240 VAC, 50 VDC, Interrupting capacity: AP MIL, 500A @120 VAC, 50 VDC; 300A @ 240 VAC. UP 1000A @ 32 VDC, 240 VAC.
Approval: Ⓒ Ⓢ ЯU QPL: MIL-C-39019

**(UP, single pole, series only)

Models SNAPAK®, IEG, IEL, and IML (Midtrip)

All conform to VDE and IEC spacing requirements.
Specifications: SNAPAK: 1 or 2 pole ratings. 7.6 to 20A at 32 VDC/125 VAC, 0.10 to 7.6A at 65 VDC/240 VAC.
2-pole only (2-pole breaking) and ratings: 7.6 to 20A at 125/240 VAC, 32/65 VDC. Interrupting capacity: 1000A at 125 VAC, 240 VAC, 32 VDC and 65 VDC
Approval: IEC VDE*
IEG and IEL Ratings: 0.05-50A, 277 VAC, 80 VDC (Model IEG). 0.05-100A, 277 VAC, 80 VDC (Model IEL, IML). Interrupting capacity: 3500A, 277 VAC max., 5000A, 80 VDC (Model IEG). 5000A, 277 VAC max., 7500A, 80 VDC (Model IEL, IML).
Approval: Ⓒ Ⓢ ЯU VDE*



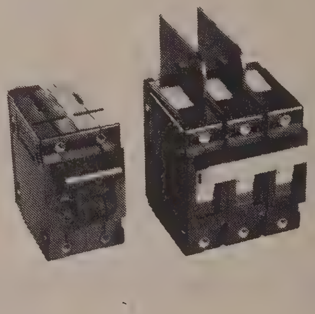
Model 209

Ideal for branch circuits. Mounts in switch boards, panel enclosures, panel boards, junction boxes. Series includes 219 manual motor controller, 229 appliance controller. 229D marine UL 1500, 259 marine power selectors.
Specifications: 1 to 6 poles. Ratings: 0.10-100A, 125 VDC; 0.10-77A, 600 VAC; 0.10-100A, 120, 240, 277 and 480 VAC. Interrupting capacity: 5000A.
Approval: Ⓒ Ⓢ ЯU

*Limited approvals, consult factory

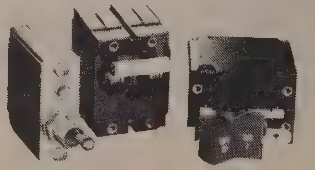
Model IELHR

IELHR designed for 35 mm symmetrical DIN rail; quick mouning, easy removal. Handle assembly available in 7 colors.
Specifications: Ratings: 0.05-70A, 80VDC and 277 VAC.
Operating temperature: –40°C to + 85°C.
Approval: Ⓒ ЯU VDE



Models APL/UPL and 205

These breakers offer precision operation for critical service. Series, shunt and relay configuration options. Choice of delays, ratings. 205 is dust-sealed for harsh environments.
Specifications: 1 to 9 poles. Model APL/UPL Ratings: 0.05-20A, 277 VAC; 0.05-50A, 240 VAC; 0.05-100A, 65 VDC. Interrupting capacity: 5000A, 120 VAC; 3000A, 65 VDC. Model 205 Ratings: 0.05-30A, 277/480 VAC; 0.05-50A, 240 VAC; 0.05-100A, 65 VDC. Interrupting capacity: 5000A, 277/480 VAC; 5000A, 240 VAC; 3000A, 65 VDC.
Approval: Ⓒ Ⓢ ЯU QPL: MIL-C-55629



Models APG/UPG/IPG

Low-cost, precision operation. Multi-pole assemblies, single or multi-handle. For data processing, broadcast equipment, vending machines, controllers, etc.
Specifications: 1 to 4 poles. Ratings: 0.02-30A, 277 VAC, (Model IPG, 240 VAC), 65 VDC, 31-50A, 50 VDC. Interrupting capacity: 1000A, 277 VAC; (Models IPG, 240 VAC), 2000A, 65 VDC; and at 5000A, max. ratings of 30 A 120 VAC, 20A at 240 VAC, 10A at 277 VAC, (Model IPG, 240 VAC).
Approval: Ⓒ Ⓢ ЯU QPL: Mil-C-55629 Model IPG-VDE*

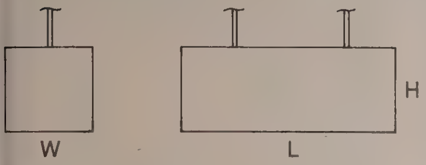
PPD ARC ⚡ SURGE suppressor

SINGLE PHASE



Dimensions

Box: H = 0.935" W = 0.6" L = 1.25"
TERMINATIONS: Stranded Copper 18 ga. × 6" INSULATED.
OPTIONAL Solid Copper wire, 20 ga. × 0.75" long
OPERATING TEMPERATURE −35°C to +85°C.

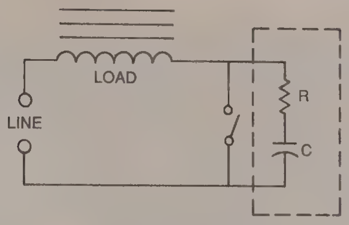
Applications:

Use PPD ARC/SURGE SUPPRESSORS TO PREVENT:

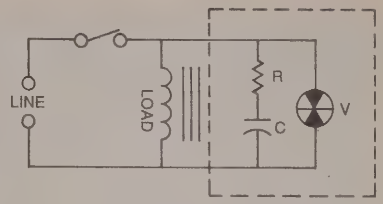
(1) ARCING and VOLTAGE SURGES when disconnecting RELAYS, CONTACTOR COILS, & SOLINOID VALVES

(2) Breakdown of DIODES, SCRs, and TRIACs.

(3) Transient overvoltages in COMPUTERS, and ELECTRONIC CONTROLLERS.



ARC SUPPRESSION



VOLTAGE SURGE LIMITING

CONSTRUCTION:

A 0.47 MFD Metallized Film Capacitor, in series with a Carbon composition 0.5W Resistor, in the 22-680 Ohm range. This assembly, with or without a VARISTOR, is sealed with Flame Retardant Epoxy resin in a molded plastic box.

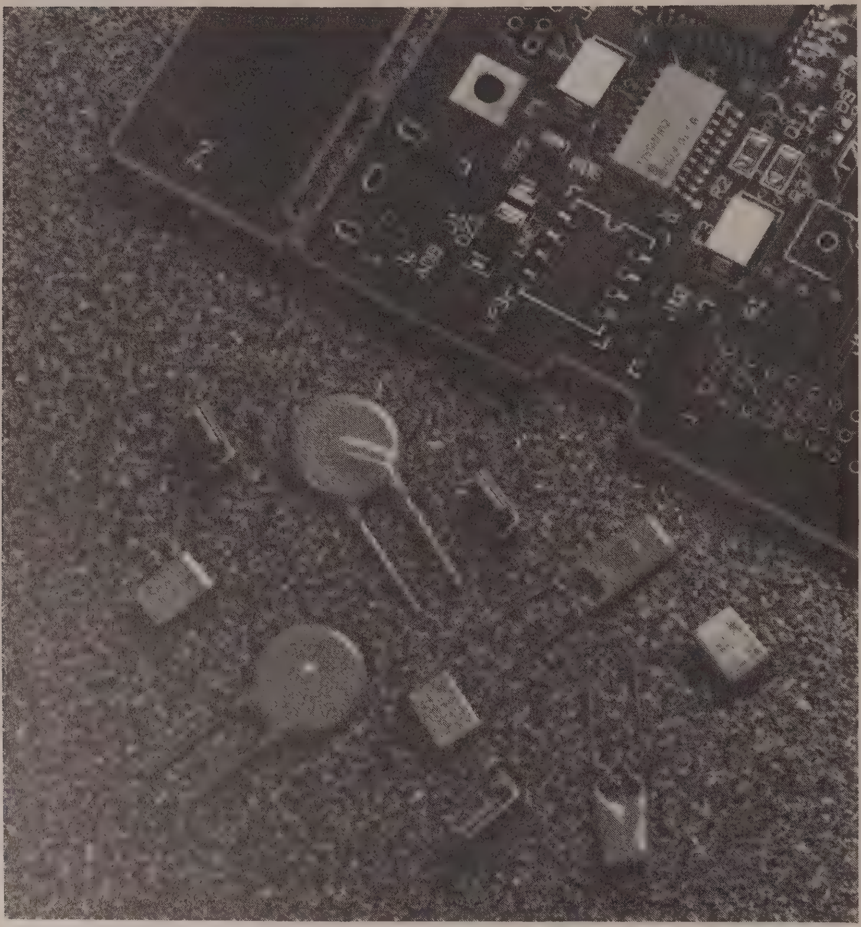
PolySwitch® **Resettable** Fuse Devices



PolySwitch® "Resettable fuses" protect the DC Power Circuit and provide fail safe protection against short circuit of the motherboard.

PolySwitch devices are used in a variety of applications:

- Instrumentation and control
- Security systems
- Medical equipment
- Batteries
- Computers and peripherals
- Audio visual equipment
- Toys
- Telecommunications networks
- Modems
- Transformers

PolySwitch devices have distinct advantages over other methods of circuit protection:

- Remotely resettable, they can automatically reset themselves thousands of times, thus eliminating unnecessary product downtime.
- Low resistance means low voltage drops in power circuits.
- UL, TUV, and CSA recognized components.
- Radial-leaded and surface-mount packaging make installation easy.

PolySwitch circuit protection devices protect electrical and electronic circuits against excessive current, voltage, and temperature. Like fuses and circuit breakers, PolySwitch devices interrupt the flow of dangerously high currents, whether due to excessive voltage or to a fault condition within the circuit. But unlike fuses and circuit breakers, PolySwitch circuit protectors automatically reset themselves after the fault that caused them to trip is corrected.

PolySwitch devices are positive temperature coefficient (PTC) resistors that rapidly increase resistance in response to excessive currents or temperature. When the current flowing through a PolySwitch circuit protector is within its maximum rating, its "base" resistance is very low. If the current rises above its rated current, the PolySwitch device's resistance abruptly rises. Then, as circuit resistance is increased, the current decreases until thermal equilibrium is achieved.

Depending upon the PolySwitch model and the amount of current, the trip time required to reduce the current can be as short as one-tenth of a second. Once power to the protected circuit is removed, the PolySwitch device's resistance begins to drop towards its normal value, in essence resetting the device so that normal operation can resume when the fault is corrected and the power reapplied.

SURFACE MOUNT – SUBMINIATURE

OMF 63V

New

Fuse now available pre-inserted into fuseholder

- Super quick-acting (<1s @ 200%, <10ms @ 400%)
- UL, CSA approved 63mA-5A / 63V
- Measures 7.4 x 3.1 x 2.6 mm
- U.S. Patented
- Solderability: 235°C for 2 seconds (IEC 68-2-58,Td)
- Soldering heat resistance: 260°C for 10sec. (IEC 68-2-58,Td)
- UL 94 V-O material
- Available in bulk or tape & reel packaging
- Optional surface mount fuseholder

Order Numbers: OMF 63V fuse

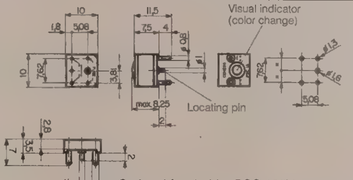
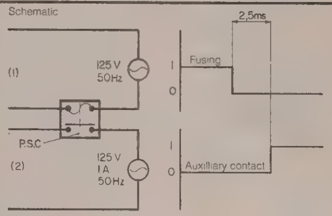
** 10-piece magazine holder per order number*



Optional fuseholder PSC 125V
Order No.: 7149.9017.01 (10-piece box)



MSA 125V

Ceramic cartridge with plastic insulating sleeve

- Quick-acting (≤10A=5s max. @ 200% and 30ms max. @ 400%)
- UL approved 63mA-10A/125V, CSA certified 63mA-7A/125V
- High breaking capacity: 300A/125V ac/dc
- Soldering heat resistance according to IEC 68-2-20
- Available in bulk or tape and reel packaging (IEC 286-1)

Order Numbers:

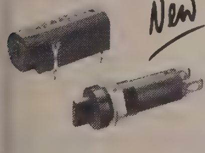
Fuses available with plug-on pigtail leads for through-hole mounting (for fuses with rated current up to 8 amps. Contact Schurter at 707-778-6311 for ordering information)

***Notice:** All CENELEC countries shall require a high-breaking capacity fuse, if the short circuit current through the fuse is more than 35A or 10 x I_n, whichever is greater, no later than January 1st, 1993.*

INTERNATIONAL SHOCK-SAFE FUSEHOLDERS – IEC 257 / VDE 0820, IEC 65 / VDE 0860, IEC 529

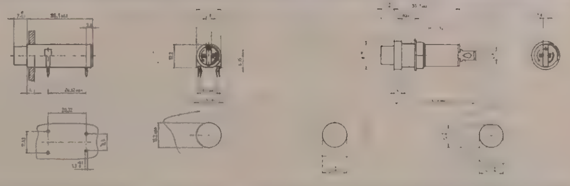
FBS (Medical)

New



UL, CSA, VDE, SEMKO, SEV, CS approved 10A/250V. Fuseholder and carrier complete in one unit. Solder/quick-connect terminals 4.8 x 0.5 mm. Super shock safe, for 5 x 20 mm fuses.

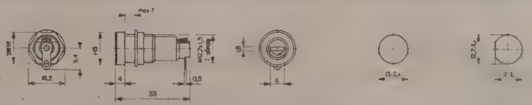
031.3901	Front panel mount (slotted carrier)
031.3911	Front panel mount (finger grip carrier)
031.3981	PCB mount (slotted carrier)
031.3991	PCB mount (finger grip carrier)



FEF

UL, CSA, VDE rated 10A/250V for 5 x 20 mm fuses.

031.1085	Fuseholder/slotted carrier, screw-on mount, solder terminals
031.1165	Fuseholder/slotted carrier, push-on mount, solder/fast-on terminals



SCHURTER

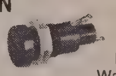
P.O. Box 750158 • 1016 Clegg Court • Petaluma, CA 94975-0158 • 707-778-6311 • FAX 707-778-6401

FUSES AND FUSEHOLDERS •

ISO 9001
Quality Certified

INTERNATIONAL SHOCK-SAFE FUSEHOLDERS, cont'd

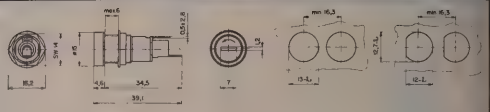
FIN



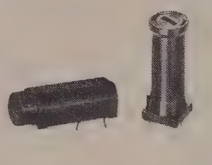
IP 67
Watertight

UL, CSA, rated 10A/250V, VDE rated 6.3A/250V. Watertight, for 5 x 20 mm fuses with solder/fast-on terminals .110" x .020"

031.1351	Complete fuseholder with carrier, axial terminals
031.1353	Complete fuseholder with carrier. End term. 90° off axis.

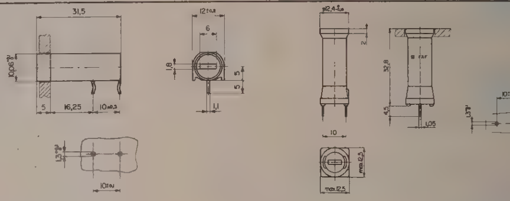


FAF



UL rated 12A/250V, CSA 10A/250V, VDE 6.3A/250V. For 5 x 20 mm fuses, pcb mount, flux proof. Unsealed or sealed (IP 54).

031.3558	Complete fuseholder with fuse carrier, IP 40, horizontal
031.3751	Complete fuseholder with fuse carrier, IP 40, vertical
031.3753	Complete fuseholder with fuse carrier, IP 54, vertical

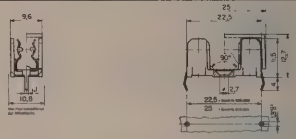


OGN

UL, CSA, VDE, SEMKO, SEV approved 10A/250V. Fuseblock for 5x20mm fuses. Kicked terminals for optimum wave soldering, with 2 different pin spacings available. UL 94V-O plastic.

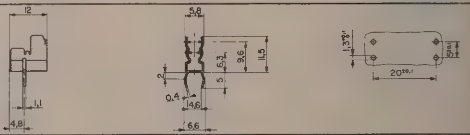
031.8201	22.5 mm pin spacing
031.8211	25.0 mm pin spacing
853.0551	transparent insulation cover

SMT version in development



OG

751.0099	Fuse clips for 1/4 x 1 1/4" or 5 x 20 mm fuses. Bronze, tin-plated. UL rec. 16A/500V (Fuses according to 250V standards only.)
751.0100	Fuse clips, brass, tin-plated



FEU

UL recognized 20A/250V, CSA certified 16A/250V, VDE approved 10A/250V.

Finger grip style

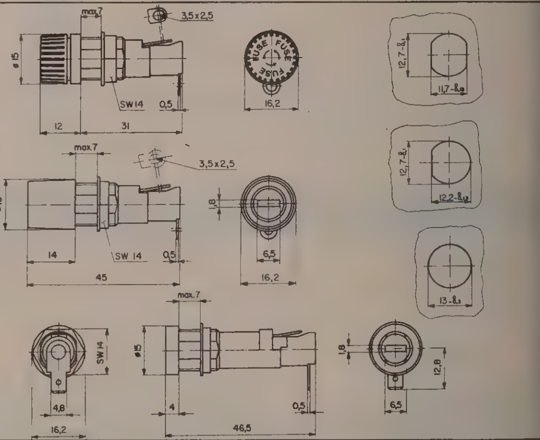
031.1803	Fuseholder complete with fuse carrier for 5 x 20 mm fuse
031.1804	Fuseholder complete with carrier for 1/4 x 1 1/4" fuse

Screwdriver slot style (part number for fuseholder and fuse carrier ordered separately)

031.1653	Fuseholder (high-profile) for 5 x 20mm or 1/4 x 1 1/4" fuse, solder terminals 3.5 x 2.5mm
031.1693	Fuseholder (low-profile) for 5 x 20mm or 1/4 x 1 1/4" fuse, quick-connect terminals 4.8 x 0.5mm
031.1666	Fuse carrier for 1/4 x 1 1/4" fuse
031.1663	Fuse carrier for 5 x 20mm fuse

Screwdriver slot style (part number for fuseholder and fuse carrier packaged together)

031.1659	Fuseholder 031.1653 / fuse carrier 031.1666
031.1751	Fuseholder 031.1653 / fuse carrier 031.1663
031.1699	Fuseholder 031.1693 / fuse carrier 031.1666
031.1706	Fuseholder 031.1693 / fuse carrier 031.1663



FAU

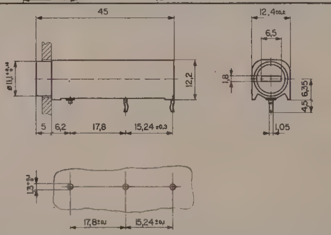
UL, CSA rated 16A/250V, VDE rated 10A/250V

Fuseholder and fuse carrier ordered separately:

031.3577	Fuseholder body
031.1666	Fuse carrier for 1/4 x 1 1/4" fuses (slotted)
031.1663	Fuse carrier for 5 x 20 mm fuses (slotted)

Fuseholder and fuse carrier packaged together:

031.3581	Fuseholder 031.3577 / fuse carrier 031.1666
031.3582	Fuseholder 031.3577 / fuse carrier 031.1663



FAC

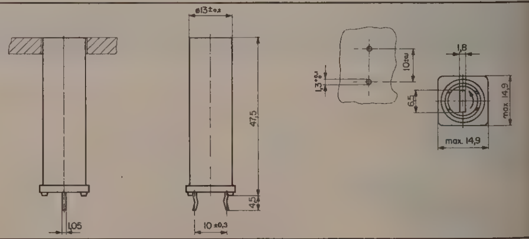
UL, CSA rated 16A/250V, VDE rated 10A/250V.

Fuseholder and fuse carrier ordered separately:

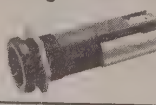
031.3804	Fuseholder body
031.1666	Fuse carrier for 1/4 x 1 1/4" fuses (slotted)
031.1663	Fuse carrier for 5 x 20 mm fuses (slotted)

Fuseholder and fuse carrier packaged together:

031.3822	Fuseholder 031.3804 / fuse carrier 031.1666
031.3821	Fuseholder 031.3804 / fuse carrier 031.1663

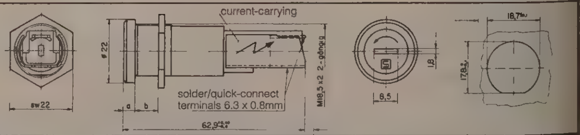


FUL-High Current



UL, CSA rated 30A/250V, VDE rated 16A/250V. For 1/4 x 1 1/4" or 5 x 20 mm fuses. 1/4" quick-connect terminals.

031.2308	Body only
031.2321	Fuse carrier for 1/4 x 1-1/4" fuses
031.2323	Fuse carrier for 5 x 20 mm fuses
859.0046	Insulator boot (optional)



MICROTEMP® Thermal Cutoffs

MICROTEMP® thermal cutoffs from Therm-O-Disc offer an accurate, reliable solution to upper limit temperature protection. Known as a "fuse" or TCO, the MICROTEMP® thermal cutoff provides low-cost protection against potentially hazardous over-heating by interrupting an electrical circuit when operating temperatures exceed the rated temperature of the cutoff.

Features and Benefits of the MICROTEMP®

MICROTEMP® TCO features include:

- One shot operation cuts off electrical current
- High current interrupt capacity for applications requiring up to 20 amps @ 250 VAC (25 amps @120 VAC)
- Low resistance
- Compact size facilitates mounting in confined spaces
- Special configurations and mounting packages are available

The Operating Principle of the MICROTEMP®

The active trigger mechanism of the thermal cutoff is an exclusively formulated, electrically non- conductive pellet. Under normal operating temperatures, the solid pellet holds spring loaded contacts closed.

When a predetermined temperature is reached, the pellet melts, allowing the barrel spring to relax. The trip spring then slides the contact away from the lead and the circuit is opened.

Once a MICROTEMP® thermal cutoff opens a circuit, the circuit will remain open until the TCO is replaced. This replacement procedure must include correction of the fault condition before the product can be operated again.

The MICROTEMP® Thermal Cutoff Series

There are three primary types of MICROTEMP® thermal cutoffs recognized by all of the major approval agencies around the world. As shown in the chart at the right, MICROTEMP® TCOs are available in a range of temperatures from 72° C to 240° C with electrical ratings up to 20 Amps at 250 VAC (25 Amps at 120 VAC.)

Dimensions for the G4 and G5 Series thermal cutoffs are shown below. The G7 Series TCO is approximately 30% smaller than the G4 and G5 Series.

Please contact a Therm-O-Disc sales engineer at (419) 525-8500 for a free MICROTEMP® thermal cutoff sample and Technical Bulletin TCO-A which describes testing and installation procedures for thermal cutoffs.

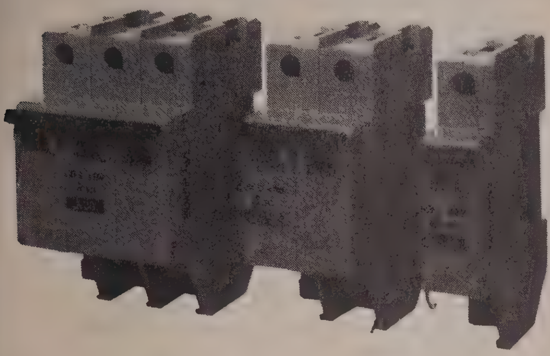
WEBER PROTECTION

Circuit protection at its best

AS168 Thermal Magnetic Circuit Breaker



Description

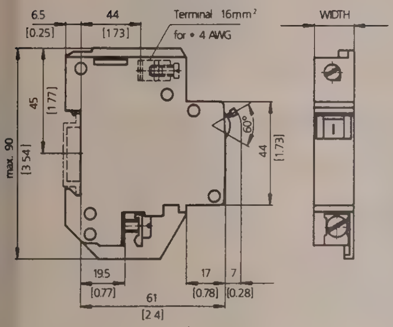
The AS168 is an energy limiting thermal magnetic circuit breaker. Bimetals are used to provide overload protection and initiate the thermal trip. A strong solenoid magnet provides instantaneous magnetic trip to achieve fast separation of contacts. The AS168 provides short-circuit interruption within less than a quarter of a full cycle, providing true current-limiting protection. Such performance limits the let through energy to less than 10% of that of a conventional breaker.

Comparison of AS168 versus conventional breakers

The AS168 features a unique ability to achieve short circuit interruptions far more effectively than conventional breakers. In conventional circuit breakers, short circuit interruption requires time of approximately one to two half cycles, because, when the contacts open, the resulting arc will continue to burn until the ac-current sine-wave passes through zero. It may reignite, due to the insufficient width of the contact gap. The current which flows until the arc is extinguished produces a heating effect, proportional to the I²t value (called the let through energy) of this current pulse.

The AS168 energy limiting breaker is designed to overcome the shortcomings of ordinary circuit breakers by limiting the let through current and the resulting "let through energy" drastically.

Dimensions



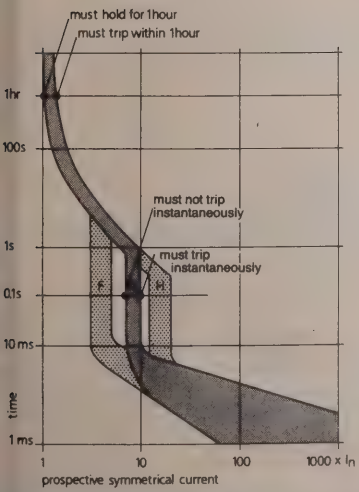
Superior short circuit protection

- less damage where the short occurs
- less wear of the breaker itself
- lower heating of all components downstream from the breaker

Selective disconnection

- wider range of selective action with upstream breakers or fuses than with a conventional breaker
- no nuisance shut-down of unfaulty lines in systems connected in parallel

Trip Curves



Technical Information

- Voltage Ratings: 480Vac
  DC-version = 360Vdc
- Current Ratings: 0.5-50A
- Short Circuit Capacity: 10,000A
- Contact life: For ratings up to 6 amps, the contact life in a circuit of 240Vac will be 50,000 operations.
  For ratings greater than 6 amps the contact life will exceed 10,000 operations.

(Note: IEC 898 requires 8,000 operations.)

Options

- Terminals: AS168B, Screw terminals
  AS168D, .25" Quick Connect ($I_n \leq 20A$)
- Module Options: Switched Neutral, Auxiliary contact, Signal Contact and Relay trip modules available
- Magnetic Trip Curves:
  F curve, 3 to 5 x I_n (optional)
  G curve, 6 to 10 x I_n (standard)
  H curve 12 to 20 x I_n (optional)

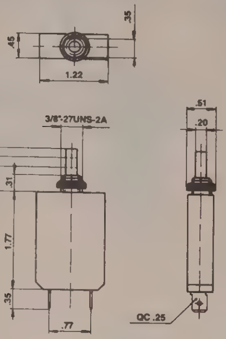
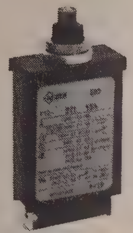
T13-211

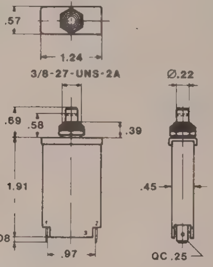


T13 Thermal Circuit Breaker

- Completely trip free
- Current ratings: .05-30A
- Voltage ratings: 277Vac, 28Vdc
- Interrupting capacity: UL 1077-5000A
- Breaking capacity: I_n<7A = 10 times rated current
  I_n ≥7A = 400 Amps max
- Trip indication by extended button

T12-221



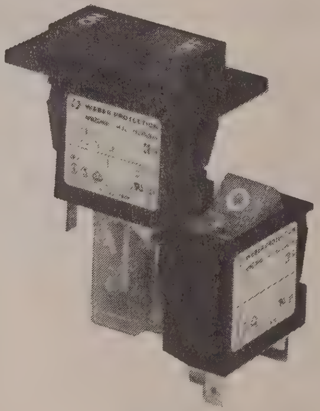


T12 Thermal or Thermal Magnetic Circuit Breaker, Push On/Off, Push To Reset

- Completely trip free
- Current ratings: .05-16A
- Voltage ratings: 240Vac, 28Vdc
- Mounting styles: central and flange
- Trip indication by extended button
- Auxiliary contacts, shunt terminal
- Different magnetic trip curves, fast ($4xI_n$) or slow ($8xI_n$)

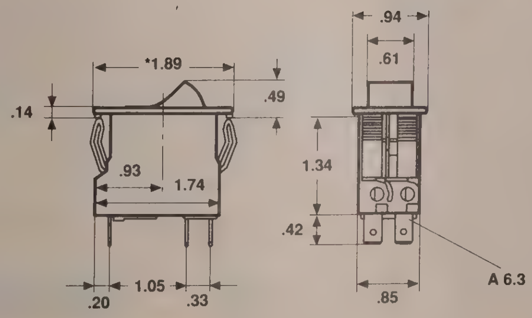
AMAZONAS

NEW IN 1993!



Amazonas Multi-Pole Circuit Breaker with Push-Button or Rocker Actuation

The AMAZONAS series combines power on/off switching with thermal overload protection in one compact unit. Push-button or rocker actuation with identical mounting dimensions offers design flexibility. This line of positively trip-free breakers carries all worldwide approvals and a variety of unique options.



- 2-pole or 3-pole versions with 1 or 2 thermally-protected poles
- Positively trip-free mechanism
- Snap-in or screw mounting
- Low-voltage release
- Remote trip release
- Mechanical safety release
- Auxiliary contacts
- Shunt connections
- Protective covers
- Rocker illumination
- Current ratings: 0.1-20A
- Voltage ratings: up to 240 Vac, 60 Vdc

Subminiature Fuses

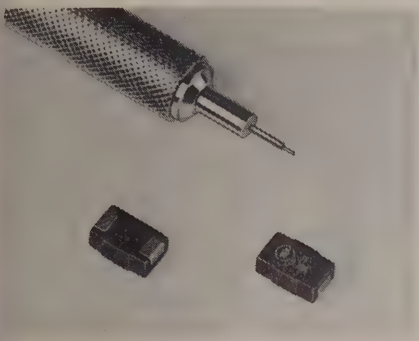
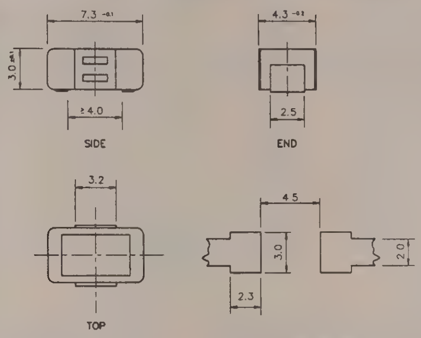
SM-3 SURFACE MOUNT FUSE



UL
E 67006



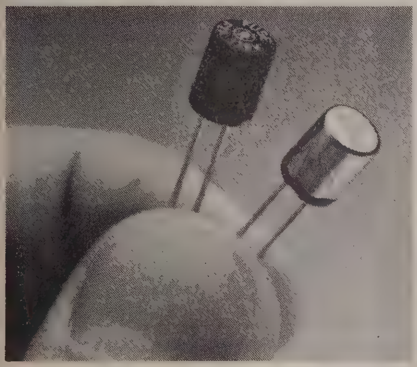
RECOMMENDED SOLDER PADS

THE NOMINAL THICKNESS OF THE COPPER LAYER SHALL BE ≥ 0.035mm

- **Rated Voltage:** 125 Volts
- **Rated Current Range:** 500mA - 4.0 Amps, Fast Acting
- **Suitable for all Surface Mount soldering processes**
- **Breaking Capacity:** 50 Amps at 125 VAC
- **Packaging:** Bulk and Blister Tape
- **Approvals:** UL Listed - File No. E67006

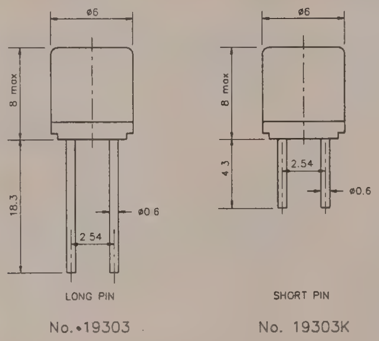
Catalog #	Description	Range
19413	SM3-F (Fast Acting)	500mA-4A

TR3 MICROFUSE - 125 VOLT



UL
E 67006

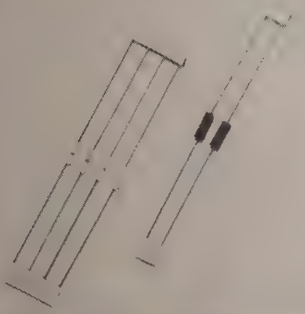
CSA
51378



- **Rated Voltage:** 125 Volts
- **Rated Current Range:** 50mA - 5.0 Amps, Fast Acting
- **Breaking Capacity:** 50 Amps at 125 VAC
- **Diameter:** 0.236" (6.0mm)
- **Height:** 0.315" (8.0mm) max.
- **Board solderable or Plug-in leads:** 0.1" (2.54mm) pin spacing
- **Board washable, shock and vibration resistant**
- **Metal or Thermoplastic cap**
- **Packaging:** Bulk (long or short pins) and Tape & Reel
- **Approvals:** UL Listed/CSA Certified (Metal cap only)

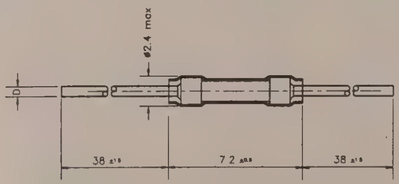
Catalog #	Description	Range	Approvals
19303	TR3-F (Fast Acting)	50mA-5.0A	UL/CSA (metal cap)
19300	TR3-F (Fast Acting)	50mA-5.0A	- (plastic cap)

PICOFUSE/NANOFUSE



UL-recognized
E 67006

CSA
51378



- **Rated Voltage:** 125 Volts
- **Rated Current Range:** 63mA - 10 Amps, Fast Acting (Also 15 Amps at 32 Volts)
- **Material:** Picofuse—Ceramic tube with clear shrink tube cover
  Nanofuse—Ceramic tube with black Thermoplastic molding
- **Board washable, shock and vibration resistant**
- **Packaging:** Taped
- **Approvals:**

	Picofuse	Nanofuse

CP Clare

A Commitment to Quality

At Clare, quality is integral to our approach of maximizing total value for our customers. We have earned the position of being the world's largest supplier of relays, reed switches and surge arrestor products. The Clare Relay Family covers the spectrum of relay technologies for low-power switching: solid-state relays; dry reed relays; mercury-wetted reed relays; and electro-mechanical relays.

Couple this with high-volume manufacturing capabilities, and you get superior quality products at competitive prices with fast off-the-shelf delivery and full product support.

Call your local Clare representative or authorized Clare distributor for more information about our full family of: ■ Relays ■ Reed Switches ■ Surge Arrestors

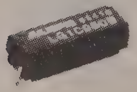
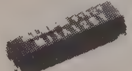
REED RELAYS

SURFACE MOUNT REED RELAYS

L series • M series
.71 x .24 x .23 in. .71 x 20 x .17 in.
18 x 6 x 6 mm 18 x 5 x 4 mm





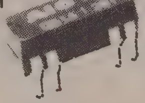
L J 1 A $\boxed{0}$ $\boxed{5}$ B W

- SMT process compatibility
- Ultra miniature size

Power–B: 10W C: 3W (1C)
Nominal coil voltage–5V, 12V
Contact form–1A, 1B, 1C
Termination –J: J-lead G: Gull wing
L: Sensitive coil M: Electrostatic shield

DIP REED RELAYS

8PIN DIP / DA • DB series
.75 x .28 x .26 in.
19 x 7 x 6 mm



4PIN DIP / DF series
.75 x .28 x .26 in.
19 x 7 x 6 mm

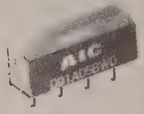
D B 1 A $\boxed{0}$ $\boxed{5}$ B W (D)

- DIP transfer molded package
- Miniature size
- Standard DIP footprint
- Various contact configurations
- UL Models Available

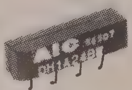
D: Diode (optional)
X: Magnetic shield (optional on DA1A, DB1A, DB1C, DF1A) W: Standard
Y: Electrostatic shield (optional on DB1A, DB1C)
Z: Magnetic & Electrostatic shield (optional on DB1A, DB1C)
Power–B: 10W C: 3W (1C) D: 50W (Mercury)
N: 50W (Mercury high speed)
Nominal Coil voltage–5V, 12V, 24V
Contact form–1A, 2A, 1B, 1C
A: 8-pin DIP with pin #13 not connected
B: 8-pin DIP F: 4-pin DIP

SIP REED RELAYS

SIP / DG series
.76 x .28 x .28 in.
19 x 7 x 7 mm



SIP / DH series
.75 x .20 x .21 in.
19 x 5 x 5 mm



D G 1 A $\boxed{0}$ $\boxed{5}$ B W (D)

- Ultra miniature size
- UL Models Available
- Industry standard footprint

D: Diode (optional)
W: Standard
X: Magnetic shield (optional on DG1A,DE1A)
Power–B: 10W D: 50W (Mercury)
N: 50W (Mercury high speed)
Nominal coil voltage–5V, 12V, 24V
Contact form–1A, 1B
H: Ultra miniature G & E: Standard size

SIP / SG series
.91 x .28 x .30 in.
23 x 7 x 7 mm

S G 1 A $\boxed{0}$ $\boxed{5}$ A W J (D)

- Various contact configurations
- UL Models Available
- Up to 4000VAC isolation

D: Diode (optional)
W: Standard X: Magnetic shield (optional on SG series, standard on SE series)
Power–A: 10W F: 3W (1C) E: 50W (Mercury)
Nominal coil voltage–5V, 12V, 24V
Contact form–1A, 1B, 1C

SIP / SD series
1.00 x .35 x .37 / 1.20 x .40 x .42 in.
25 x 9 x 9 / 30 x 10 x 10 mm

S D 1 A $\boxed{0}$ $\boxed{5}$ A W J

- Industry standard footprint
- High power contacts
- UL Models Available

W: Standard X: Magnetic shield (optional)
Y: Electrostatic shield (optional on SD1A)
Z: Magnetic & Electrostatic shield (optional on SD1A)
Power–A: 10W C: 50W D: 25W (high voltage)
C: 3W (1C)
Nominal coil voltage–5V, 12V, 24V
Contact form–1A, 1C

CURRENT SENSING RELAYS

Current Sensing / PCS series
1.1 x .59 x .60 in.
29 x 15 x 15 mm

P C S $\boxed{2}$ $\boxed{0}$ 7 2-1

-1:6 Ω coil
-2:8 Ω coil
-3:10 Ω coil

- For telephone line sensing
- High Coil-to-Contact insulation 4000 VAC
- Choice of coil resistances
- Dual coil models available
- Optional magnetic shielding
- 300 mA max coil current
- 14 mA nominal current

Free evaluation samples and design assistance to qualified OEM Designers

REED RELAYS

ULTRA COMPACT REED RELAYS

ZA, ZC, ZH series
.78 x.20 x.23 in. /.20 x 5 x 6 mm
ZM series
.78 x .24 x .26 in. /.20 x 6 x 7 mm

ZF series
.98 x .30 x .30 in./25 x 7 x 7 mm

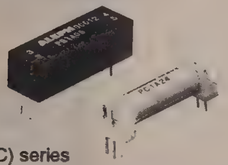
ZA1A05NZ

- Ultra compact package
- G H z Models Available
- Metal can for interference immunity
- Coaxial shields

X: Magnetic shield (standard on ZF series)
Z: Magnetic & Electrostatic shield (standard on ZA,ZC, ZH, ZM series)
Power–A: 10W C: 3W (1C) N: 50W (Mercury)
Nominal coil voltage–5V, 12V
Contact form–1A, 1C
ZA: General applications ZC: Contact form–1C
ZF: Magnetic shield only ZH: RF applications
ZM: Stable high speed operation between 0 to 200Hz

ECONO-OPEN REED RELAYS

PB (PC) 1A,1C series
1.18 x .37 x .39 in./30 x 9 x 10 mm



PB(PC) series
1.18 x .47 x .39 in./30 x 12 x 10 mm

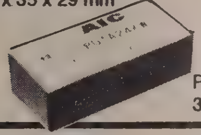
PB1A05AWE

- Industry standard package
- Various contact configurations
- .10" & .15" Grids Available
- Open frame and encased package
- UL Models Available

E: Side coil termination G: End coil termination
W: Standard X: Magnetic shield (optional)
Y: Electrostatic shield (optional)
Z: Magnetic & Electrostatic shield (optional)
Power–A: 10W C: 50W D: 25W (high voltage)
F: 3W (1C) E: 50W (Mercury)
Nominal coil voltage–5V, 12V, 24V
Contact form–1A 2A,1B,1C, 2B, 2C, 3A Types are available
PB: ECONO type (with plastic case) PC: OPEN frame

HIGH VOLTAGE REED RELAYS

PG 1A, 1B series
3.0 x 1.37 x 1.14 in.
76 x 35 x 29 mm



PG 2A, 2B, 1D series
3.0 x 2.36 x 1.14 in./76 x 60 x 29 mm

PG1A05HW

- High voltage contacts (2K~6KVDC)
- High Coil-to-Contact breakdown (10K~15KVDC)

Breakdown voltage (open contact)–H: 5KV J: 10KV K: 15KV M: 10KV (high power–300W)
Nominal coil voltage–5V, 12V, 24V
Contact form–1A, 1B, 2A, 2B, 1D (1A & 1B type)

PM series
2.5 x .79 x .90 in.
65 x 20 x 23 mm

PM1A05HW

Breakdown voltage (open contact)–
H: 5KV J: 10KV K: 15KV
Nominal coil voltage–5V, 12V, 24V
Contact form–1A

REED SWITCHES

HYR 9004-9-3540

Model #
Minimum pull-in [AT]
Max pull-in [AT]
9: high I.R. / 7: high speed
90: Mercury switch / 50: 50 mm glass length
40: 40 mm glass length
20: 20 mm glass length / 10: 10 mm glass length

General application switches
Switching power rating of 10-15 watt.

REED RELAYS

From American Relays, Inc.

Whether you're looking for a **REED RELAY** that will meet FCC surge requirements, or a sensitive Low-Level **REED RELAY** to switch ATE signal...

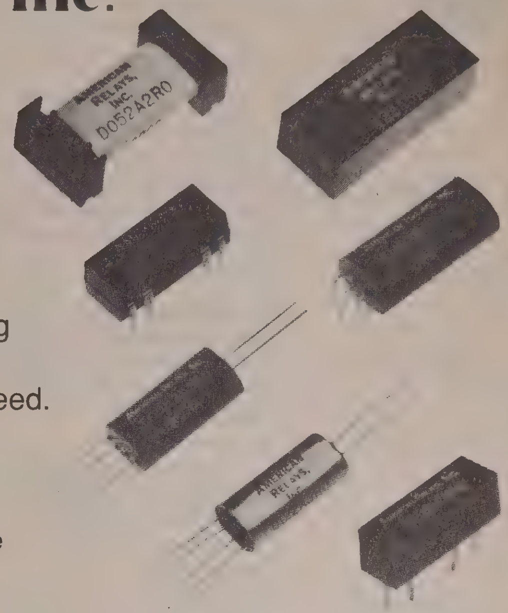
AMERICAN RELAYS HAS IT ALL

High Quality — Low Price — On time Delivery

Dry and Mercury Wet contacts

With High Voltage, High Power or Low Level switching

Standard or Specified to YOUR Application, AMERICAN RELAYS can build the **REED RELAY** you need.



AMERICAN RELAYS, INC. D052A2R0
AMERICAN RELAYS, INC.

PACKAGE STYLES

- **Encapsulated**
- **Open Frame**
- **Axial Leads**
- **DIP** • **SIP**

SWITCHING TYPE

- **General Purpose Dry Reed**
- **Low Level Switching**
- **High Power** • **High Voltage**
- **Mercury Wetted Contacts**

- **UL Recognized Relays Available**

REED RELAY INDEX

RELAY TYPE	DESCRIPTION	TERMINAL GRID	CONTACT FORMS AVAILABLE POLES	PACKAGE
ENCAPSULATED	Epoxy encapsulated. Total Environmental protection. Wide range of contact forms and coil voltages are available.	1.000 × .100 1.000 × .150	Form A (1 to 6) Form B (1 & 2) Form A/B (1 & 2) Form C (1 to 4) Form A Latching (1 & 2)	OPEN FRAME	Durable glass filled polyester bobbin construction. Switch and coil leads are securely held with epoxy potting. Cost efficient plug-in type reed relay.	1.000 × .100 1.000 × .150	Form A (1 to 4) Form B (1 & 2) Form C (1, 2, 3) Form A Latching (1)	AXIAL	Rugged axial lead tubular relay. Nickel plated metal jacket provides magnetic shield. 1.000″ center formed leads are available.	Axial 1.000 × .100	Form A (1 & 2) Form B (1) Form C (1 & 2) Form A Latching (1)	T SERIES	Most economical, high performance tubular relay. Completely sealed in a flame retardant plastic tube. 1.000″ center formed leads are available.	Axial 1.000 × .100	Form A (1 & 2) Form B (1) Form C (1)	HIGH POWER	50W contact rating. Available with encapsulated, open frame and axial lead packages.	Axial 1.000 × .100 1.000 × .150	Form A (1 & 2)	HIGH VOLTAGE	25W, 1000 VDC switching. 2500 VDC breakdown voltage. Miniature size. Available with encapsulated, open frame and axial lead package.	Axial 1.000 × .100 1.000 × .150	Form A (1 & 2)	
MERCURY WETTED	Mercury wetted contact relay. 50W contact rating. Extremely long life expectancy. No contact bounce. Stable low contact resistance.	Axial 1.000 × .100 1.000 × .150	Form A (1 & 2) Form C (1 & 2)	
DIP RELAYS	Epoxy molded DIP reed relay. Logic compatible. Stable contact resistance. Fits all standard DIP sockets and is automatic insertion compatible.	DIP .300 × .100	Form A (1 & 2) Form B (1) Form C (1)	SIP RELAYS	High quality economical Single-In-Line package reed relays. Epoxy encapsulated package. Various contact ratings are available. UL recognized series available.	SIP .2 × .4 × .2 .2 × .2 × .2	Form A (1) Form B (1) Form C (1)	
SPECIAL RELAYS	Let us design reed relays for your specific application. Special relays are cost competitive with standard relays in most cases. Consult the factory or your local representative with your specific requirements.

REED RELAYS

HIGH POWER SERIES

- Miniature High Power Reed Relays. 50W Contact Rating.
- Capable of Handling High Inrush, Inductive and Capacitive Loads
- Open Frame, Encapsulated and Axial Lead Packages are Available

HIGH VOLTAGE SERIES

- Miniature High Voltage Reed Relays
- Meets FCC Part 68 Voltage Breakdown Requirement
- Open Frame, Encapsulated and Axial Lead Packages are Available

MERCURY WETTED SERIES

- Miniature Reed Relay with Mercury Wetted Contacts
- No Contact Bounce
- 50 Watts Contact Rating
- Open Frame, Encapsulated and Axial Lead Packages are Available

Specifications	High Power	High Voltage	Mercury Wetted	
			Form A	Form C

* Mercury wetted relays should be mounted within ±30° from vertical position.

AXIAL LEAD SERIES

- Encapsulated Axial Lead Reed Relays
- Axial Leads Allows Various Mounting Configurations.
- Total Environmental Protection
- Nickel Plated Metal Tube Provides Magnetic Shielding
- Formed Leads are Also Available
- 1 Form A, 2 Form A, 1 Form B, 1 Form C and 2 Form C Types are Available
- Various Contact Ratings Available
- Contact American Relays, Inc. for Specific Part Numbers and Additional Options

SPECIAL RELAY DESIGN

American Relays, Inc. is a custom relay specialist. Our major objective is to design and build parts that fulfill special requirements for the reed relay user.

Our facility is designed and equipped for prompt, systematic processing of samples, prototype and production orders.

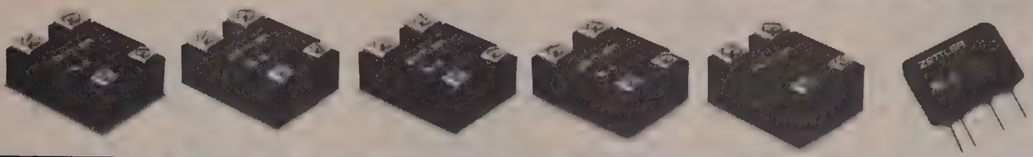
AZ...THE BEST IN SOLID STATE



Solid State Relays

	SERIES	SA/SD	SH	ST	SDC	SM	PD
	FEATURES	• Solid State Relays for AC (SA) or DC (SD) Activation • Inverse-Parallel Output Thyristors • Suitable for Inductive Loads Due to Integrated RC Component • Available with or without Zero Voltage Switching	• High-Blocking Solid State Relay with Integrated Control Circuit for AC or DC Activation • Suitable for Three Phase Current Loads • Inverse-Parallel Output Thyristors • Optimum Heat Dissipation	• Low Cost SST Relay with Triac Output for AC or DC Activation • Particularly Suited for Inductive Loads • Suitable for Inductive Loads Due to Integrated RC Components	• Low Cost SST Relay with Integrated RC Components • High Immunity to Interference Due to Active Filters • High Blocking Output with Inverse Parallel Output Thyristors	• Solid State DC Relay with Power MOSFET Output • DC Loads Up to 4 kW • Low Power Dissipation • Logic-Compatible Input	• Solid State AC Relay • Used for Installation in PCB's • TTL-Compatible • Suitable for Inductive Loads Due to Integrated RC Components • Low Cost and Good Heat Dissipation
OUTPUT	Operating Voltage Range	With Zero Voltage Switching 48-530 VAC Without Zero Voltage Switching 90-530 VAC	48-530 VAC	48-280 VAC	48-530 VAC	0-500 VDC	60-280 VAC
	Max. Load Current	10-90 A	50-90 A	10-25 A	25-90 A	7-40 A	2-3.5 A
	Leakage Current at Rated Voltage	10 mA	< 1 - < 12 mA	10 mA	10 mA	Max. 0.3 mA	Max. 8 mA
INPUT	Control Voltage Range						
	AC Input (SA)	90-280 VAC	90-140 VAC	90-280 VAC			
	DC Input (SD)	3-32 VDC	4-32 VDC	3-32 VDC	4-32 VDC	3.5 - 32 VDC	3-28VDC
	Input Impedence						
	AC Input (SA)	60,000 Ohms	> 10,000 Ohms	60,000 Ohms			
	DC Input (SD)	1,000-1,500 Ohms	> 1,000 Ohms	1,500 Ohms	1,000 Ohms @ 32 VDC	1,000 Ohms	1,500 Ohms
Insulation Test Voltage		4,000 Vrms	4,000 Vrms	4,000 Vrms	4,000 Vrms	2,500 Vrms	5,000 Vrms
Coupling Capacitance Input/Output		8 pF	< 16 pF	8 pF	16 pF	50 pF	10 pF
Ambient Temperature (Operating)		–30°C to 80°C (–22°F to 176°F)	–30°C to 80°C (–22°F to 176°F)	–30°C to 80°C (–22°F to 176°F)	–30°C to 80°C (–22°F to 176°F)	0°C to 80°C (32°F to 176°F)	–20°C to 80°C (4°F to 176°F)
Maximum Size Inches L" x W" x H"		Up to 50 A 2.25 x 1.75 x .87 Up to 75A 2.25 x 1.75 x 1.10	Up to 50A 2.25 x 1.75 x .87 Up to 90A 2.25 x 1.75 x 1.10	2.25 x 1.75 x .87	2.25 x 1.75 x .87	2.25 x 1.75 x 1.10	1.69 x .47 x 1.10

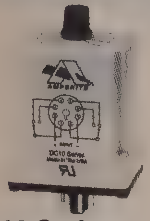
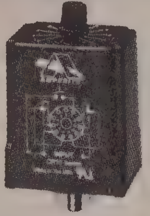
Time Delay Relays from AMPERITE

The ultimate in solving your Timing problems with trouble-free performance...

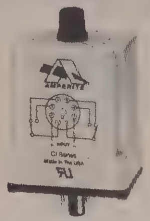


DC10 Series
- Solid state CMOS digital circuitry
- Delay on Operate timing mode
- 10A relay output with DPDT contacts

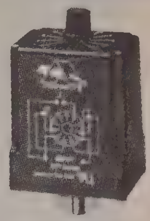
C10 Series
- Solid state analog circuitry
- Delay on Operate timing mode
- 10A relay output with DPDT contacts



CR10 Series
- Solid state analog circuitry
- Triggered Delay on Release timing mode
- 10A relay output with DPDT contacts

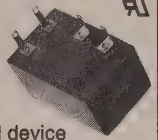


CI Series
- Solid state analog circuitry
- One-shot timing mode (interval on)
- 10A relay output with DPDT contacts

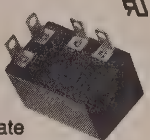


CIR Series
- Solid state analog circuitry
- Triggered 1-shot timing mode (triggered interval on)
- 10A relay output with DPDT contacts

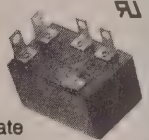
B Series
- Thermal device
- Delay on Make or Break timing modes
- 3 AMP rating



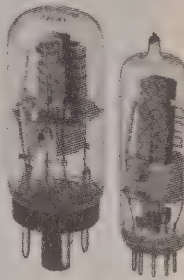
BR Series
- Thermal device
- Delay on Release timing modes
- 3 AMP rating



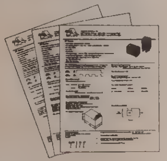
C Series
- Solid state analog circuitry
- Delay on Operate timing mode
- Low current relay output with SPDT contacts



CR Series
- Solid state analog circuitry
- Triggered Delay on Release timing mode
- Low current relay output with SPDT contacts



G Series
- Hermetically sealed
- Thermal device
- 3A rating



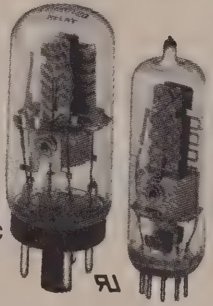
Call today for a quick quote and free literature.

"Solving Your Timing Requirements Since 1922"

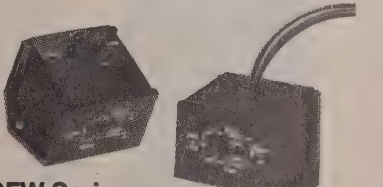
Solid State and Thermal Flashers

Problem solving and Trouble-free performance from AMPERITE...

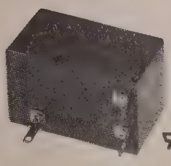
DF10 Series
- 10A relay with DPDT contacts
- 12V – 120V input voltage available
- Flash rates available from 10-240 FPM



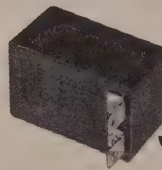
GF Series
- Hermetically sealed
- Thermal flasher circuitry
- Octal & 9-pin glass tube configuration
- All units work on AC & DC input voltage



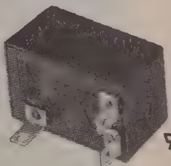
DFW Series
- Ideal for emergency or police vehicular use
- Small, compact, reliable & easy to install with 1/4" Q.C. or #14 gauge wire termination
- 20A relay contacts
- Flash rate fixed at 110 FPM



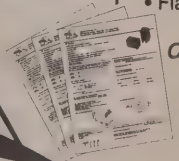
D Series
- No moving parts to wear out
- 2A load rating
- AC or DC units available
- Flash rates available from 10-1000 FPM
- No current leakage to load



DF Series
- Universal input – 24V-120V AC or DC
- 2A load rating
- 2 terminal configuration – easy connection to load
- Flash rates available from 10-1000 FPM



BF Series
- Thermal flasher circuitry
- 2A load rating @ 115V AC
- All units work on AC & DC input voltage
- 3 terminal configuration



Call today for a quick quote and free literature.

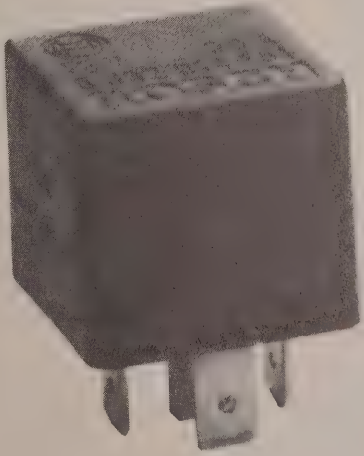
Bosch, The Right Relay 99.999% Of The Time



With the lowest failure rate in the industry, less than 1/100th of one percent, a Bosch relay can make any product a more reliable product. Bosch relays are assembled, tested and inspected by a totally automated system assuring you of exceptional reliability. To receive more information about the Bosch relays call us at (312) 865-5301 and ask why a Bosch Relay's the right relay all of the time.

Military Grade/Half Size Relays

RELAY		CONTACT RATING/ CONFIGURATION	COIL VOLTAGES	FEATURES
	**HFW** (Standard Sensitivity)	• Low Level to 3.0 Amps • 1 Form C, 2 Form C 2 Form B, 2 Form A	5 to 48.0 VDC	• Low contact resistance • Sensitive version available • Excellent RF switching • Ambient temp rating -65°C to +125°C • Qualified to MIL-R-39016/6 level L, M & P (Request Brochure Half Size 1-91)
	**HFW4A** (4 Amp Rating)	• Low Level to 4.0 Amps • 1 Form C, 2 Form C 2 Form B, 2 Form A	5 to 48.0 VDC	• Low contact resistance • Excellent RF switching • Ambient temp rating -65°C to +125°C • Designed to MIL-R-39016 (Request Brochure Half Size 1-91)
	**HFW5A** (5 Amp Rating)	• Low Level to 5.0 Amps • 1 Form C, 2 Form C 2 Form B, 2 Form A	5 to 48.0 VDC	• Low contact resistance • Sensitive version available • Excellent RF switching • Ambient temp rating -65°C to +125°C • Qualified to MIL-R-39016/6 level L, M & P (Request Brochure Half Size 1-91)
	**HMS** (Sensitive Series)	• Low Level to 2.0 Amps • 1 Form C, 2 Form C 2 Form B, 2 Form A	5 to 36.0 VDC	• Low contact resistance • Energy saving 100/125 milliwatt sensitivity • Excellent RF switching • Ambient temp rating -65°C to +125°C • Qualified to MIL-R-39016/44 level L, M & P (Request Brochure Half Size 1-91)
	**HMB** (Bifilar Coil)	• Low Level to 3.0 Amps • 1 Form C, 2 Form C 2 Form B, 2 Form A	6 to 26.5 VDC	• Low contact resistance • Bifilar transient suppression • Excellent RF switching • Ambient temp rating -65°C to +125°C • Qualified to MIL-R-39016/22 level L, M & P (Request Brochure Half Size 1-91)
	**LS** (2 Pole Latching)	• Low Level to 2.0 Amps • 2 Form C, (DPDT)	5 to 48.0 VDC	• Low contact resistance • Single or dual latch version • Excellent RF switching • Qualified to MIL-R-39016/45 level L, M (Request Brochure Half Size 1-91)
	**LR** (4 Pole Latching)	• Low Level to 2.0 Amps • 4 Form C, (4PDT)	5 to 48.0 VDC	• Low contact resistance • Four pole design • Ambient temp rating -65°C to +125°C • Designed to MIL-R-39016 (Request Brochure Half Size 1-91)
	SR (4 Pole Version)	• Low Level to 2.0 Amps • 4 Form C, (4PDT)	6 to 26.5 VDC	• Low contact resistance • Four pole design • Ambient temp rating -65°C to +125°C • Qualified to MIL-R-39016/40 level L, M (Request Brochure Half Size 1-91)
	**SS** (6 Pole Version)	• Low Level to 2.0 Amps • 6 Form C, (6PDT)	6 to 26.5 VDC	• Low contact resistance • Six pole hi-density design • Ambient temp rating -65°C to +125°C • Designed to MIL-R-39016 (Request Brochure Half Size 1-91)
	**C-10 AMP** (10 Amp Series)	• Low Level to 10 Amps • 1 Form C, (SPDT)	6 to 26.5 VDC	• Low contact resistance • Unique hi-current design package • Ambient temp rating -65°C to +125°C • Designed to MIL-R-39016 (Request Brochure Half Size 1-91)

SIZE (Case Size): in./(mm) H-.410 (10.41), D-.410 (10.41) & W-.810 (20.57) All relays have welded, hermetically sealed enclosures.

Military Grade/Full Size Relays

RELAY	SIZE in./(mm) (Case Size)	CONTACT RATING/ CONFIGURATION	COIL VOLTAGES	FEATURES
FW (3 Amp Series)  **FW5A** (5 Amp Version)  **LFW** (Latching Series)	H- .875 (22.23) * D- .400 (10.16) W- .800 (20.32)	FW & LFW • Low Level to 3.0 Amps • 1 Form C, 2 Form C 2 Form B, 2 Form A FW5A • Low Level to 5.0 Amps • 1 Form C, 2 Form C 2 Form B, 2 Form A	6.3 to 110.0 VDC	• Welded, hermetically sealed enclosures • Low contact resistance • Sensitive version available (FW only) • Excellent RF switching • Ambient temp rating -65° to +125°C • One and two coil operation (LFW only) • Qualified to 5757/10 (FW only) (Request Data Sheet FW6-89)

Military Grade/Other Relays

PF 10 Amp Power Relay	H- 1.300 (33.02) D- .515 (13.08) W- 1.075 (27.31)	• Low Level to 10.0 Amps • 1 Form C, 2 Form C 2 Form B, 2 Form A	6.0 to 115.0 VDC	• Welded, hermetically sealed enclosures • Very low contact resistance • Package volume .72 cubic inch • Excellent RF switching • Ambient temp rating -65° to +125°C • Designed to MIL-R-5757/23 & 28 (Request Data Sheet PF-85)
 **07**	H- 1.000 (25.40) D- .515 (13.08) W- 1.015 (25.78)	• Low Level to 10.0 Amps • 2 Form C	6.0 to 120.0 VDC or 115.0 VAC 60/400 Hz	• Qualified to MIL-R-5757/23 & MIL-R-6106 (MS27245 & MS27247) • 10 Amp contact rating • DC & AC coils
RD 4&6 Pole Relays	H- 1.34 (34.04) D- 1.14 (28.96) W- 1.06 (26.92)	• Low Level to 2.0 Amps • 4 Form C, 6 Form C	26.5 VDC	• Welded, hermetically sealed enclosures • Low contact resistance • Welded construction • 100G Shock • Ambient temp rating -65° to +125°C • Qualified to MIL-R-5757/1 & 7 (Request Data Sheet RD-83)
02	H- 1.575 (40.01) D- .718 (18.24) W- 1.062 (26.97)	• Low Level to 2.0 Amps • 2 Form C	6.0 to 50.0 VDC	• Compact 2 pole design • Military construction • Hermetically sealed • Qualified to M5757/8
03 	H- 1.407 (35.74) D- 1.320 (33.53) W- 1.843 (46.81)	• Low Level to 2.0 Amps • 6 Form C	6.0 to 48.0 VDC	• Efficient 6 pole design • Military construction • Hermetically sealed
82 	H- 3.093 (78.56) D- 4.375 (111.13) W- 4.250 (107.95)	• 150.0 Amps • 1 Form X to 4 Form X	6.0 to 120.0 VDC	• 150 Amp contact rating • High power switching • Up to 4 pole contacts • Optional hermetic sealing
SF 40 MW Sensitive Relay **SF5A** 80 MW (5 Amp Version)	H- 1.281 (32.54) D- .400 (10.16) W- .800 (20.32)	**SF & SF5A** • Low Level to 2.0 Amps • 1 Form C, 2 Form C 2 Form B, 2 Form A	1.8 to 40.0 VDC	• Welded, hermetically sealed enclosures • Low contact resistance • 40 milliwatt sensitivity (SF 5A 80 milliwatts) • Excellent RF switching • Ambient temp rating -65° to +125°C • Designed to MIL-R-5757/13 (Request Data Sheet SF-85)
MFW ⅙th Size Relay	H- .410 (10.41) D- .230 (5.84) W- .500 (12.70)	• Low Level to 1.0 Amps • 1 Form C, 2 Form C 2 Form B, 2 Form A	3.5 to 53.0 VDC	• Hermetically sealed enclosures • Low contact resistance • Total volume only .046 cubic inch • Excellent RF switching • Ambient temp rating -65° to +125°C • Qualified to MIL-R-39016/34, L & M level (Request Data Sheet MFW6-88)

TO-5 Military Relays

TM/TMD

SIZE in./(mm)

- Diameter:
  - Enclosure (max): .335 (8.51)
  - Base (max): .370 (9.40)
- Height (max): .270 (6.86)
- All welded construction, hermetically sealed

CONTACTS

- DC Rating:
  - Resistive — low level to 1 amp/ 28 VDC
- Contact Resistance:
  - 0.1 ohm max before life
  - 0.2 ohm max after life
- Contact Arrangement:
  - 2 Form C (DPDT)
- State-of-the-art cleaning techniques and precious metal contact material with gold plating

COILS

Nominal Voltage	Coil Resistance
5.0 VDC	50 Ω
6.0 VDC	98 Ω
9.0 VDC	220 Ω
12.0 VDC	390 Ω
18.0 VDC	880 Ω
26.5 VDC	1560 Ω
30.0 VDC	2500 Ω

FEATURES

TM Military Relay

- Qualified to MIL-R-39016/9
- 130mW Sensitivity
- -65°C to +125°C
- 30G Vibration
- 75G Shock

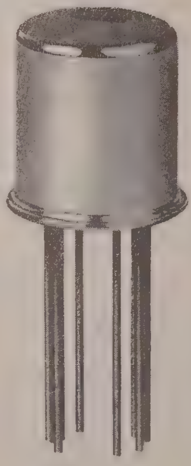
TMD Military Relay

- Qualified to MIL-R-39016/15
- Diode Coil Supression
- 130mW Sensitivity
- -65°C to +125°C
- 30G Vibration
- 75G Shock

Options for all TO-5 Military Relays

- Terminal Lengths
- Special Coils
- Ground Pins
- Spreader Pads

Available with and without diodes.



TS/TSD

SIZE in./(mm)

- Diameter:
  - Enclosure (max): .335 (8.51)
  - Base (max): .370 (9.40)
- Height (max): .375 (9.53)
- All welded construction, hermetically sealed

CONTACTS

- DC Rating:
  - Resistive — low level to 1 amp/ 28 VDC
- Contact Resistance:
  - 0.1 ohm max before life
  - 0.2 ohm max after life
- Contact Arrangement:
  - 2 Form C (DPDT)
- State-of-the-art cleaning techniques and precious metal contact material with gold plating

COILS

Nominal Voltage	Coil Resistance
5.0 VDC	100 Ω
6.0 VDC	200 Ω
9.0 VDC	400 Ω
12.0 VDC	850 Ω
18.0 VDC	1600 Ω
26.5 VDC	3300 Ω
36.0 VDC	6500 Ω
48.0 VDC	11000 Ω

FEATURES

TS Military Relay

- Qualified to MIL-R-39016/11
- -65°C to +125°C
- 60mW Sensitivity
- 30G Vibration
- 75G Shock

TSD Military Relay

- Qualified to MIL-R-39016/16
- Diode Coil Supression
- -65°C to +125°C
- 60mW Sensitivity
- 30G Vibration
- 75G Shock

- 10G Vibration
- 30G Shock

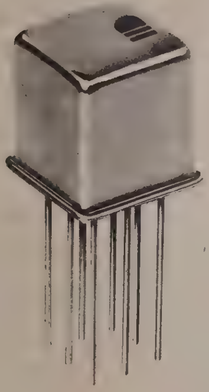
Options for all .100 Grid Commercial Relays

- Terminal Lengths
- Special Coils
- Ground Pins
- Mounting Pads

Available with and without diodes.



HCS/HCSD

SIZE in./(mm)

- Width & Depth:
  - Enclosure (sq. max): .335 (8.51)
  - Base (max): .370 (9.40)
- Height (max): .375 (9.53)
- All welded construction, hermetically sealed

CONTACTS

- DC Rating:
  - Resistive — low level to 1 amp/28 VDC
- Contact Resistance:
  - 0.1 ohm max before life
  - 0.2 ohm max after life
- Contact Arrangement:
  - 2 Form C (DPDT)
- State-of-the-art cleaning techniques and precious metal contact material with gold plating

COILS

Nominal Voltage	Coil Resistance
5.0 VDC	100 Ω
6.0 VDC	200 Ω
9.0 VDC	400 Ω
12.0 VDC	800 Ω
18.0 VDC	1600 Ω
26.5 VDC	3200 Ω
36.0 VDC	6500 Ω
48.0 VDC	11000 Ω

FEATURES

HCS Commercial Relay

- -65°C to +85°C
- 90mW Sensitivity
- 10G Vibration
- 30G Shock

HCSD Commercial Relay

- Diode Coil Supression
- -65°C to +85°C
- 90mW Sensitivity
- 10G Vibration
- 30G Shock

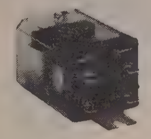
General Purpose Relays/ Industrial/Power Relays

SERIES	**188**	**136**
FEATURES	30 Ampere relay is an expanded version of the Type 187 20 amp 2PDT relay, utilizing a common coil/mates structure. The 188 is limited to single-pole switching, in order to provide for the 30 amp contact ratings.	A small power relay that will switch 20 amps for industrial use in multipole configuration and 30 amps in multipole configuration at 120 VAC or 240 VAC for applicance use under UL #508.

MERCURY RELAYS

Mercury-wetted contacts represent the nearest thing to the perfect contact yet developed, being characterized by such parameters as: Bounce-free operation; very low and stable contact resistance; hermetic protection; fast operating speeds; Form C or Form D contact action; contact life measured in billions of operations.

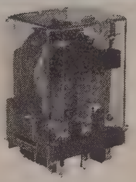
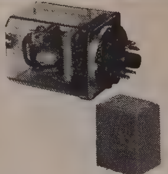
Miniature/General Purpose Relays



SERIES	**156**	**156** HERMETICALLY SEALED	**157**	**157** MAGNETIC LATCHING SERIES	**158**	**187**
FEATURES	Compact & versatile 2&4-pole industrial relay. Low level switching. Available with many options.	***New MIDTEX 156 Hermetically Sealed Relays*** ***Socket Mountable*** ***3 and 5 amp Relays***	The 157 is a General Purpose/ Industrial control relay, available in 1, 2, or 3-pole versions with multiple contact load capabilities up to 15 amps. All ratings are specified to UL Recognition and CSA Approvals for Industrial Control Equipment. They are approved as motor controllers up to 1/2HP at 240/480/600 VAC (1/3HP at 120 VAC).	The magnetic latching relay is ideal for use on applications where there is a need to conserve power, retain logic function during power outages or improve reliability over mechanical latching designs. All electrical specifications of the standard type 157 are retained. No mechanical latches or permanent magnets are used which could result in advertent operations. Units are available in single, or dual coils. **TIMING** Latching time: 13 MS nominal with a one second pulse of nominal voltage. Unlatch time: 13 MS nominal with a one second pulse of nominal unlatch voltage after latching with a one second pulse of nominal latch voltage. A latch pulse of 50 MS min. at nominal voltage is recommended to insure positive latching. **DESIGN & CONSTRUCTION** Insulation material, weight, marking, shock, vibration, dielectric breakdown, insulation resistance and temperature range are identical to the Type 157 relay. UL/CSA	Designed for UL Component Recognition for Motor Controllers through 240 VAC in accordance with UL Std 508, Industrial Control Equipment. Available in Octal Plug-in version.	DPDT power relay is rated at 20 amps; DPST-NO and NC contact arrangements are rated at 25 amps. Open stud mounted or dust covered versions with 1/4" quick-connect terminals.

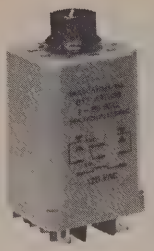
Time Delay Relays/ Line Monitoring Devices

REED RELAYS

The Midtex dry reed relay series offers hermetically sealed, non-position sensitive switching in a small size with rapid response and low actuate power requirements. Available contact forms include A, B, C and D with dry reeds and forms A and B with mercury wetted. Contact arrangements include 1 to 5 Form A, 1 to 4 Form C, and 1 to 3 Form B, or any combination within the 5 pole bobbin. Consult the factory for details.



612 SERIES

Delay-on release timer which utilizes an R-C solid state trigger circuit to drive a secondary solid state switch, which in turn controls the integral 10 amp output relay.

Electrical/Mechanical Characteristics
All ratings at 25°C ambient.
Repeatability ±3%
Total timing variation ±10%
Operate time (max.) 100ms
Recycle time (max.) 100ms
Dial scale Ref. only
Input voltage limits –
AC ±10%
DC ±25%
Power requirements –
AC (approx.) 1.5 VA
DC (approx.) 1.2 watts
Switching action 2PDT
Switching rating (max.)
–Fine Silver contact (Gold flash)
5 amp, 28 VDC/120, 240 VAC: 80% pf 1/8 hp, 120 VAC
–Silver Cadmium Oxide
10 amp, 28 VDC/120, 240 VAC; 80% pf, 1/3 hp, 120 VAC 1/2 hp, 240 VAC
Delay types
Delay-on-release
Momentary transfer upon timing cycle interruption. . . . . .NO

Temperature Range
–operating: –10°C to +55°C
–storage: 40°C to +85°C

Shock
15 g's, 11 ± 1ms, 1/2 sinewave (non-operating test)

Vibration
0.06" DA or 10 g's, 10 to 55 Hz (non-operating test)

Timing Set
Fixed
External Resistor
Knob Adjust

614 SERIES

Identical to the 612 series, except it functions as a **delay-on-operate**. Available with "fixed," "external resistor" adjust time setting, or "knob adjust," through an overall range of 1 to 300 seconds delay.

Electrical Characteristics
All ratings at 25°C ambient.
Repeatability ±3%
Total timing variation ±10%
Reset (release) time (max.) 50ms
Recycle time (max.) 100ms
Dial scale Ref. only
Input voltage limits –
AC ±10%
DC ±25%
Power requirements –
AC (approx.) 3.0 VA
DC (approx.) 1.2 watts
Switching action 2PDT
Switching rating (max.)
–Fine Silver contact (Gold flash)
5 amp, 28 VDC/120 VAC; 3 amp, 240 VAC 80% pf 1/8 hp, 120 VAC
–Silver Cadmium Oxide (Gold flash)
10 amp, 28 VDC/120, 1/3 hp, 120 VAC 6 amp, 240 VAC, 80% pf 1/2 hp, 240 VAC
Delay types
Delay-on-operate
Momentary transfer upon timing cycle interruption. . . . . .NO

Temperature Range
–operating: –10°C to +55°C
–storage: 40°C to +85°C

Shock
15 g's, 11 ± 1ms, 1/2 sinewave (non-operating test)

Vibration
0.06" DA or 10 g's, 10 to 55 Hz (non-operating test)

Timing Set
Fixed
External Resistor
Knob Adjust

655 SERIES

Delay-on-operate timers which use solid state timing circuits to control an integral relay.

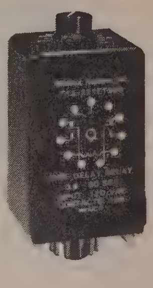
Electrical Characteristics
All ratings at 25°C ambient.
Repeatability ±3%
Total timing variation ±10%
Reset time 50ms
Recycle time (max.) 100ms
Input voltage limits –
AC ±10%
DC ±25%
Power requirements –
AC (approx.) 3 VA at 120 VAC
DC (approx.) 1.2 watts
Switching action 1, 2, 4PDT
Switching rating
5 amp, 28 VDC
120 VAC
10 amp, 28 VDC
120 VAC
Delay types
Delay-on-operate
Momentary transfer upon timing cycle interruption. . . . . .NO

Temperature Range
–operating: –10°C to +55°C
–storage: 40°C to +85°C

Shock
15 g's, 11 ± 1ms, 1/2 sinewave

Vibration
10 g's, 10 to 55 Hz

Terminals
Solder, PC, Plug-In.



715 SERIES

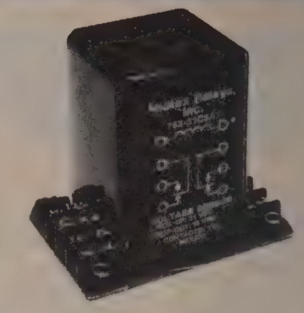
Multi-function time delay relay industry standard 8 and 11 pin octal, side terminal strip for flush mounting, and the 11 pin square base to fit the Midtex Type 157 relay sockets.

Electrical Characteristics
All ratings at 25°C ambient.
Repeatability ±2%
Total timing variation ±10%
Reset time – 24 ms typical, 50 ms max. (release of delay-on-operate)
Recycle time – 50 ms typical, 100 ms max. (minimum off time between timing intervals)
Input voltage limits –
AC ±10%
DC ±25%
Power requirements –
AC (approx.) 2.5 VA
DC (approx.) 1.5 watts
Switching action 2PDT
Switching rating (max.)
–Silver Cadmium Oxide
10 amp, 28 VDC/120, VAC; 1/3 hp, 120/240 VAC
Delay types
Delay-on-operate,
Delay-on-release,
Interval-momentary start timing.
Momentary transfer upon timing cycle interruption. . . . . .NO

Temperature Range
–operating: –10°C to +55°C
–storage: 40°C to +85°C

Shock
15 g's, 11 ± 1ms, 1/2 sinewave (non-operating test)

Vibration
0.06" DA or 10 g's, 10 to 55 Hz (non-operating test)



753/754 SERIES

Line Monitoring Relays. The 753 Series are Voltage Sensors, designed to sense fluctuations in Line Voltages, they are available in Preset, Adjustable, and also in a High/Low Voltage Sense Model.

The 754 Series are 3 Phase Sequence Sensors designed to detect Phase Loss or Reverse Sequence in conventional 3 Phase Delta, or 4 Wire Wye 60 HZ systems. They will also detect loss of Neutral where applicable.

Electrical Characteristics
All ratings at 25°C ambient.

CONTACTS	**DPDT (753 only) SPDT (1 Form C)**
Material	**Rating**
–100 Silver/ Gold Flashed	3 amps at 24 VDC or 125 VAC resistive 1 amp at 24 VDC or 125 VAC inductive 1.5 amps at 250 VAC resistive 0.5 amps at 250 VAC inductive
–200 Silver Cadmium Oxide	5 amps at 24 VDC or 125 VAC resistive 2 amps at 24 VDC or 125 VAC inductive 2.5 amps at 250 VAC resistive 1 amp at 250 VAC inductive
–300 Silver Cadmium Oxide	10 amps at 24 VDC or 125 VAC resistive 4 amps at 24 VDC or 125 VAC inductive 5 amps at 250 VAC resistive 2 amps at 250 VAC inductive

ENVIRONMENTAL CHARACTERISTICS

Temperature Range
–operating: –10°C to +55°C
–storage: –40°C to +85°C

Shock
15 g's, 11 ± 1ms, 1/2 sinewave (non-operating test)

Vibration
0.06" DA or 10 g's, 10 to 55 Hz (non-operating test)

CUSTOM CHARACTERISTICS

Both series are available with delay-on-operate or reset functions as an option.

All Midtex Time Delay Relays and Line Monitors can be custom designed to your requirements. For further information consult Midtex Technical Assistance.

See Volume B Section 4550 for CII Solenoids

SEALED RELAYS

Made in the USA by:
Comus International
263 Hillside Avenue
Nutley, N.J. 07110
PHN: 1-800-35-COMUS
FAX: 1-800-78-COMUS

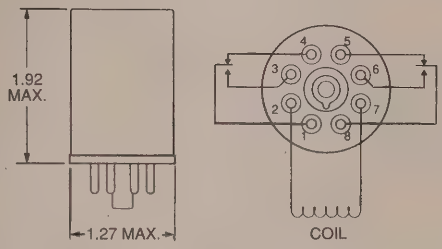
Hermetically Sealed 10 Amp Relay

Specifications **Part No. SEM100-120A**

Contact Rating: 10 Amp, 240 VAC or 28 VDC.
Operating Temperatures: -45°C to +70°C
Coil Voltage: 120 VAC, 50-60 Hz.
Mountng: Standard octal plug.

Features

- True Hermetic Sealing
- Filled with Dry Inert Gas
- Rugged Plated Steel Housing
- Fast Plug-In Installation
- Moderate cost
- 2 Form C Contacts (DPDT)



Designed for reliable service in servere environments that subject the relay to dirt, high humidity, or wide changes in ambient temperatures.

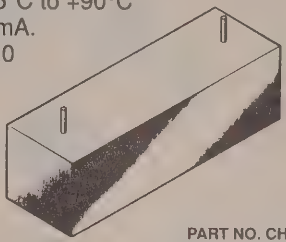
High Voltage Relay

Specifications

Contact Rating:
CHV-750, switches up to 5000 VDC;
CHV-1000, switches up to 7500 VDC.
50 Watts max.; 3 Amps max.
Coil to Contact Resistance: 10,000 Megohms min.
Coil to Contact Dielectric: 25,000 VDC min.
Coil Voltage: 24 VDC.
Coil Resistance: 1400 ohms.
Operating Temperature: -35°C to +90°C
Maximum Coil Current: 22 mA.
Dimensions: 3.25 x 1.0 x 1.0 (inches)

Features

- Epoxy Sealed Housing
- Hermetically Sealed Contact
- PCB Mounting



PART NO. CHV-750
PART NO. CHV-1000

A convenient and inexpensive solution to the problem of switching high voltages in power supplies, test sets, medical equipment and communications systems.

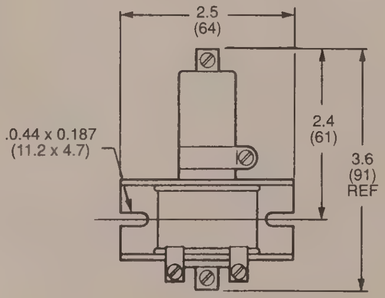
Mercury Displacement Relays
35 AMPS and 60 AMPS / 1 – 2 – 3 Poles

Typical Applications

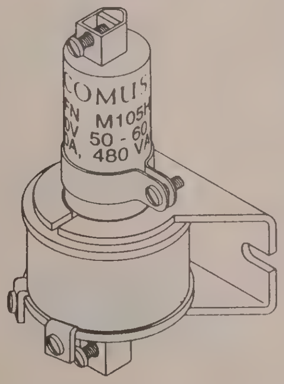
- **Heating Systems**
- **Lighting Controls**
- **Traffic Controls**

Specifications

Pull In Voltage: 65% of rated voltage.
Operate and Release Time: 47 ms. typ.
Contact Bounce: None.
Contact Resistance: 4 milliohm typical.
Rate of Operation: 60 per minute max.
Mounting: Within 10° of vertical.



1 POLE (FN)



Using the time proven principle of mercury displacement, these relays are recognized for long life and consistent performance when switching heavy electrical loads.

ULTRA-LOW THERMAL EMF MICROMINIATURE REED RELAYS

ULTRA-LOW THERMAL EMF REED RELAYS

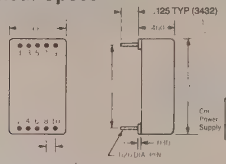
For low-level data acquisition systems

Ratings. Thermal EMF is specified differentially between the two thermal EMF switches (pins 5-6 and 7-8). It is directly proportional to coil power or the square of the applied voltage. When the relays are operated in a scanning mode, the thermal EMF is also proportional to the coil duty cycle.

Coto Series 3600 relays are available with maximum differential thermal EMF ratings of <5μV, <3μV, <1μV, or <0.5μV.

Note: The must operate and must release voltages and the coil resistance are specified at 25°C. These values vary by approximately 0.4%/°C as the ambient temperature varies. Vibration: 20G's to 2000Hz. Shock: 50 G's.

Mechanical Specs



All dimensions are nominal.
Pin 9 is the electrostatic shield pin.

To order - assemble a part number from the parameters.

36XX-XX-X X

Model Number (02, 50, 60)
Coil Voltage (05 or 12)
Thermal
Suffix: 9 (<5μV); 8(<3μV); 7(<1μV); or 5(<0.5μV).
Pin Length
Standard (0.135 ± 0.020") "2" - Suffix 2 VME (0.110"± 0.010) "3" - Suffix 3

Note:
1. Consists of 20V Zener-diode and 1N4002 diode in series connected in parallel to coil.
2. For Series 3660, the third non-low thermal switch (9-10) is connected in common with the electrostatic shield at pin 9.

ORDERING INFORMATION

To order a Coto relay, assemble a part number from the data to describe the desired parameters.

7XXX – XX – XXXX

Contact Type:
Dry Standard = 1
Mercury Wet = 2
High Voltage = 3

Contact Form

Coil Voltage

Options:

Insulation Resistance
0 = 10^{10} Ohms (Form A's)
10^9 Ohms (Form C's)
1 = 10^{12} Ohms (Form A's)
10^{11} Ohms (Form C's)

Coil Termination
0 = End to End
1 = Same End

Electrostatic Shield*
0 = Omit
1 = Include

Diode
0 = Omit
1 = Include

*E-pin indicates electrostatic shield pin.

---

* Life expectancy at full rated load is dependent upon the combination current/voltage switched. While typical life expectancy is $>5 \times 10^6$. Consult factory for life data at your load levels.

‡ Consists of 20V Zener-Diode and IN4002 Diode in series, connected in parallel to coil.

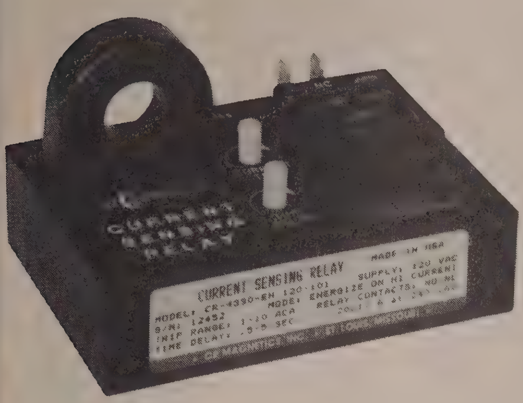
CURRENT SENSING RELAY



CURRENT SENSING RELAY
MADE IN USA
MODEL: CR-4390-EH 120-101
SUPPLY: 120 VAC
S/N: 12452
MODE: ENERGIZE ON HI CURRENT
TRIP RANGE: 1-10 ACA
RELAY CONTACTS: NO NC
TIME DELAY: .5-5 SEC

- ***Monitor Electrical Heater Elements***
- ***Sense Motor Over/Under loads***
- ***Detect Lamp Burn-Out***
- ***Indicate Phase Loss***

FEATURES

- Variable trip point and time delay
- Monitors currents from 10 ma. to 60 AC Amps
- Electrical isolation between circuits
- Output relay rated up to 20 Amps
- LED relay status indicator
- Dead band prevents relay chatter
- Calibrated dial option available

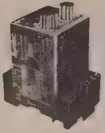
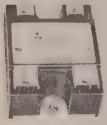
CONTROL RELAYS

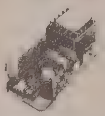
Syrelec

Crouzet Corporation
3237 Commander Drive
Carrollton, TX 75006-2506
Tel: 214-250-1647
1-800-677-5311 • Fax: 214-250-3865

Crouzet offers several variations of Syrelec control relays. Five models for liquid level controls, 3 phase 220V, 380V and 440V for phase loss or reversal protection, current and voltage detection and control, motion detection, solid state relays, and alternating relays are also available. If a standard control requires modification or a special product is needed to meet your exact needs, please call us or the Crouzet Sales Representative nearest you. *Most Controls are UL recognized and CSA approved.*







SERIES	FUNCTION	FEATURES	OUTPUT
WRU Phase Control Relay	Motor phase control 3 phase 220V 60 Hz. 3 Phase 380V 60 Hz. 3 Phase 440V 60 Hz. 3 Phase 575V 60 Hz. Consult factory for 50 Hz.	Motor phase control relay monitors: phase sequence, loss of any phase (even if induced voltage reaches 95% of normal voltage), under and over voltage.	10 Amp SPDT
IART + TIXP3 Current Control Relay	Output when current overshoots selected level 5 to 100 Amps AC using a current transformer (TIXP3).	Control of AC current level. Selection of threshold and hysteresis separate. LED Status indicator. Hysteresis adjustment 5 to 50% of current point.	10 Amp SPDT
DUR Voltage Control Relay	Output when voltage exceeds selected threshold. 0.1 to 10V, 0.4 to 40V, 4.0 to 400V.	AC or DC control. From 0.1V to 400V. Threshold and hysteresis selection separately. LED state of relay indicator. Latching in "ON" state possible.	10 Amp SPDT
FMR Analog Control Relay	Output relay is energized when voltage or current exceeds threshold. Din-rail mounting.	Settable threshold selection from 0 to 30VDC or from 0 to 30 mA DC. Pushbutton Presetting. Low alarm output at 4 mA. Din-rail mounting.	10 Amp SPDT
ARS Solid State Relay	Operates as an open or closed switch. Control input: 90 to 280VAC (AC Version) or 3 to 32VDC (DC Version).	10, 25 or 40 Amp output. Zero voltage switching. Opto-isolated to 4000V.	10, 25 or 40 Amp Triac Solid State
RKT, RIT RPT General Purpose Relay	Blade Plug-in, Ice Cube or 8 and 11 Plug-in Versions.	Surface mount, Indicating light also available.	DPDT or 3PDT 10 Amp
FJR 3 Triplexor	Control of multi-pump systems. Replaces mechanical duplexor and triplexor controls.	Triplex or duplex mode selectable by jumper. LED status indicators.	3 x SPDT 5 Amp
JR Alternating Relay	Duplex or alternating action output relay.	LED status indicators. Transient protected, low cost 12, 24, 110, 220VAC 50/60HZ.	10 Amp SPDT 10 Amp SPDT DPDT Crosswired
NNR Liquid Level Control	Pump-up or Pump-down, slide switch selectable. May be used in fresh water, sea water, sewage or chemical solutions.	Adjustable sensitivity from 4.7K to 47K ohms. Senses changes in resistance across probes. Open PC board design or enclosed with three mounting styles. Several accessories available.	1 Amp AC 1 Amp DC SPDT Relay
NR NRU Liquid Level Control	Control of two liquid levels. Relay will energize when liquid reaches the high or low probe.	Automatic regulation and control of liquid levels, completely solid state detection, sensitivity adjustment on front panel, conventional relay mounting.	10 Amp AC 1 Amp DC SPDT
DVLR LVLR Under Speed Monitor	Output when speed drops below preset threshold. Inhibit time adjustable at factory of .1 to 20 sec.	Detection and control of underspeed, stopping or jamming condition. Operates from 3 wire proximity switch, contact closure or voltage input. Timimg range .06 sec. to 10 hrs. with four subranges.	10 Amp AC 1 Amp DC SPDT

Crouzet Corporation 3237 Commander Dr., Carrollton, TX 75006-2506 • Tel: 214-250-1647 • 1-800-677-5311 • Fax: 214-250-3865

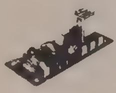
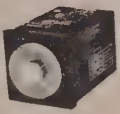
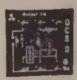
Crouzet Corporation offers a broad line of Syrelec Timers to meet the requirements of most industrial and instrument applications. Numerous accessories and options are available for convenient and compatible installation. If a standard Syrelec Timer does not meet your exact requirements, a custom designed or modified standard device could be the solution to fit your need Contact your nearest Crouzet Sales Office or our Customer Service Department at 1-800-677-5311, for information regarding custom Timers and Controls. *Most Timers are UL recognized and CSA approved.*

SERIES	FUNCTION	FEATURES
LR2 Multi-Function Relay	1. Delay on Make 2. Single Shot 3. Delay on Break 4. Interval Timer *Single Function Relay	Four functions in one unit. 0.06 sec.-640 min. in 2 time ranges, each with four subranges. 12VDC to 220VAC, 50/60 Hz. Din-rail; plug-in; panel mount. **OUTPUT:** 10 Amp DPDT relay
LRU/LRZU Multi-function Relay **CRU/CRZU** Series	1. Delay on Make 2. Single Shot 3. Delay on break 4. Interval Delay on Break	4 delay functions in one unit. Timing Range from .1 sec to 10 hrs in one unit **OUTPUT:** 10 Amp SPDT or 10 Amp DPDT
813 Multi-function LCD or LED Timer	1. Delay on Make 2. Single Shot 3. Delay on Break 4. Interval 5. Repeat Cycle	3 Digit LCD or LED. Timing Range from .1 sec. to 999 hours. Push-button presetting. Multi-voltage **OUTPUT:** 5 Amp SPDT
LR2 U Multi-function Relay	1. Delay on Make 2. Single Shot 3. Delay on Break 4. Interval	Timing Range from .1 sec. to 10 hours in one unit. Direct reading. Big setting Dial. **OUTPUT:** 10 Amp DPDT
88220 Multi-function Motor timer	Multi-function motor driven timer. Din-rail, 8 pin plug-in and panel mounting.	Five functions in one unit. Timing range from .3 sec to 12 hours. Direct reading. Memory. **OUTPUT:** 8 Amp 2X SPDT
AXR 2 Timing Relay	Delay on Make DPDT or Delay on Make + one Instantaneous Output Relay.	Timing range from .1 sec. to 10 hours in one unit. Direct Reading. Big Setting Dial. **OUTPUT:** 10 Amp 2X SPDT
AR2 Timing Relay	Delay on Make electronic timing relay. Din-rail, 8 and 11 pin plug-in, 11 pin spade, and panel mounting.	2 time range models available: 0.06 sec. to 160 sec. or 15 sec. to 640 min. LED relay status indicator. Five input power voltages. **OUTPUT:** 10 Amp DPDT
AR U/ARZU Timing Relay	Delay on Make Din-rail and 8 pin plug-in mounting.	Timing range from .1 sec to 10 hours in one unit. Direct reading. Dual voltage. **OUTPUT:** 10 Amp SPDT or 10 Amp DPDT
813 AX2 Timing Relay	Delay on Make DPDT or Delay on Make + one Instantaneous Output Relay	3 Digit LCD Timing Range from .1 sec. to 999 hours. Push-button Presetting. **OUTPUT:** 5 Amp 2X SPDT







SERIES	FUNCTION	FEATURES
NAR 2 **NBR 2** **NCR 2**	Delay on Make Single Shot Delay on Break	Timing range potentiometer fine tuned. Models in two ranges: 0.06 sec. - 160 sec. or 15 sec. - 640 min. Open PC board. Time range slide switch selected. **OUTPUT:** 10 Amp DPDT
AR2C Preset Timer Preset Counter	Delay on Make timer or Preset Counter. Count to 999 at 10 Hz. speed in count mode. Din-rail, 11 or 8 pin plug-in.	Count or time preset selectable with thumbwheel switches on top of enclosure. 24 VAC to 220 VAC, 50/60 Hz. **OUTPUT:** 10 Amp DPDT
DR2 U Repeat Cycle Timer	Repeat cycle. Both OFF and ON time independently set. Din-rail, 8 and 11 pin plug-in mounting.	Timing Range from .1 sec. to 10 hours for ON and OFF time selectable in one unit. Direct reading. **OUTPUT:** 10 Amp DPDT
DR2 Repeat Cycle Timer	Repeat cycle. Both OFF and ON time selectable. Din-rail, 8 and11 pin plug-in or panel mounting: T1 is OFF and T2 is ON time	2 time ranges available for OFF and ON time functions. Separate controls for ON and OFF setting. Each time range with four subranges. Five input power voltages. **OUTPUT:**10 AMP SPDT
DR U/DRZU Repeat Cycle Timer	Repeat cycle. Both OFF and ON time independently set. Din-rail and 8 pin plug-in mounting.	Timing range from .1 sec to 10 hours in one unit. Direct reading. Dual Voltage. **OUTPUT:** 10 Amp SPDT or 10 Amp DPDT
SAS **SHS** Solid State Timer	Delay on Make Interval Fast-on Terminals Small Size 1.77" x 1.96"	Available in fixed timing, external potentiometer and internal potentiometer models. Economical, epoxy encapsulated, 10 to 260VAC. 50/60 Hz. **OUTPUT:** Solid State .7 Amp SCR
QAS **QHS** Solid State Timer	Delay on Make Interval 2" x 2" Package Fast on Terminals	Available in fixed timing, external potentiometer and internal potentiometer models. Economical, epoxy encapsulated, 10 to 260VAC. 50/60 Hz. **OUTPUT:** Solid State 1 Amp SCR
QBS **QCS** Solid State Timer	Single Shot Delay on Break 2" x 2" Package Fast on Terminals	Available in fixed timing, external potentiometer and internal potentiometer models. Economical, epoxy encapsulated, 10 to 260VAC. 50/60 Hz. **OUTPUT:** Solid State 1 Amp SCR
QDS 1 & 2 Solid State Timer	Repeat Cycle Off/On or On/Off 2" x 2" Package Fast on Terminals	Independent Off and On timing. Available in fixed timing, external potentiometer and internal potentiometer models 10 to 260VAC. 50/60 Hz. **OUTPUT:** Solid State 1 Amp SCR

SOLID STATE RELAYS

GORDOS

PANEL MOUNT AC OUTPUT SOLID STATE RELAYS

G, GA Series Power Relays
- Current Ratings to 90A
- Output Voltage Ratings to 660 VAC with 24VAC Minimum
- AC or DC Inputs
- 4KV Optical Isolation
- Zero Voltage Turn-on (Random Available)
- RC Snubber Network for Inductive Loads
- UL Recognized, CSA Certified
- VDE Approval on Many Models

G Series Power Relays
- Back-to-back (dual) SCR Output for Severe Inductive Loads
- Superior False Turn-on Immunity and Positive Turn-off at High dv/dt

GA Series Power Relays
- Economical Triac Output for General Purpose Applications

I/O MODULES & MOUNTING BOARDS

GORDOS

MODULE BOARDS

Gordos I/O Mounting Boards are available for Standard, SM, Quad and Miniature I/O module sizes and everything you need to interface with any 5, 15, or 24 volt logic unit is included. Since the function is self-contained in each module, you determine the layout of your own system boards. The plug-in modules with single hold-down screw make later revisions easy; modules are replaceable without disconnecting the wires.

- Plug-compatible logic contacts on 8, 16, 24, and 32 position boards. Screw terminal logic connections on 4 position boards.
- Barrier strip with screw terminals for load connections
- Circuitry for pull-up resistors
- 5 amp field replaceable fuses
- LED status indicators
- All even pins logic GND

MODULE BOARDS FOR STANDARD MODULES

PB-16SM	16
PB-24SM	24
PB-32SM	32

FOR MINI-8 MODULES

PB-16M8	16

MINIATURE I/O MODULES (M AND SM)

Gordos I/O Modules get a minimum of 300% testing-multiple component and functional tests that made Gordos the reliability standard in SSRs. Across the line, Gordos' average field return rate is well below the industry average.

- High Current Thyristor for 100A Surge Capability
- 4KV Optical Isolation
- 33% Thinner than Standard I/O Modules
- UL Recognized/CSA Certified

M and SM SERIES

- Zero or Random Turn-on available in AC output
- SM plug into standard I/O Mounting Boards or SM Series Mounting Borads
- M plug into M Series Mounting Boards Only

**Maximum Output for any channel, at 40° C, derate by 50 mA/°C to 80° C. For multiple channel conduction, total package dissipation can not exceed rated dissipation, at 40° C. Total package dissipation is the sum of each channel's dissipation, which is calculated by multipling the maximum forward voltage drop by the output current carried by each channel. See data sheet for additional information.*

REED RELAYS

GORDOS

MOLDED REED RELAYS

All Gordos Reed Relays feature
- Molded in Semiconductor Grade Molding Compounds that meet UL 94-0 Flammability ratings
- Compatable with Automatic Insertion
- Logic Compatable
- 100% Computer Tested

Release Time (typical mSec) Diode Suppressed		0.3	2.0	0.3	0.3	2.0

Nominal Coil Volt DC	5	12	24
Most Operate Voltage DC	3.8	9.0	18
Maximum Voltage DC	0.5	1.2	2.4
Maximum Voltage DC (3)	10	20	35

Notes: All specifications are based on a 25° C ambient emperature.

1. *Measured with nominal coil voltage applied (except Form B).*
2. *Higher voltage and/or current may be switched with life expectancy reduced.*
3. *Excessive voltage (maximum of 6.5 VDC for 5VDC model, 15 VDC for 12 VDC model, and 28VDC for 24 model), may cause contact reclosure on Form B models.*

CRYDOM
COMPANY

SOLID-STATE RELAYS AND INPUT/OUTPUT SWITCHES

SERIES AO241

1-1.5 AMP AC MINI-SIP
DC CONTROL, AC OUTPUT
TRIAC OR SCR OUTPUT

Models AO241/R and the new ASO241/R are 1.0A/1.5A rated SPST-NO miniature SIP solid state relays. All models are available in zero-cross and random turn-on ("R") versions. With an SCR AC switch on the output, the ASO241/R although designed for switching highly inductive, low current loads such as solenoids is also suitable for all loads up to 1.5A.

Crydom Model Number	Line Voltage Range (Vac)	Load Current Range (Arms)	Control Voltage Range (Vdc)	Must Operate Voltage (Vdc)	Must Release Voltage (Vdc)	Surge Current 1-Cycle (Apk)
AO241	24-280	.02-1.0	4-10	4.0	1.0	40
AO241R	24-280	.02-1.0	4-10	4.0	1.0	40

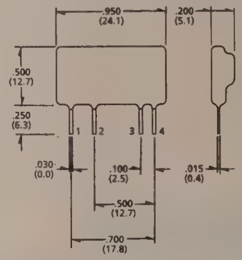
ASO241R	12-280	.01-1.5	4-10	4.0	1.0	10

General Specifications
Operating Temperature range: -30°C to 80°C
Isolation Voltage: 2500 Vrms

Approvals
UL: E116950(AO Only) CSA: LR81689 (AO Only)

Mechanical
All Dimensions are in inches (millimeters)



Pin 1: AC Load
Pin 2: AC Load
Pin 3: +DC Control
Pin 4: -DC Control

SERIES DO061

1-5 AMP DC MINI-SIP
DC CONTROL
BIPOLAR OR MOSFET OUTPUT

SPST-NO DC output relays in epoxy-coated packages utilize the popular .10" grid lead spacing. They are available with either bipolar transistor output(DO), or the new DMO Series with MOSFET output rated at 3A/100VDC, or 5A/60 VDC.

Crydom Model Number	Line Voltage Range (Vdc)	Load Current Range (Adc)	Control Voltage Range (Vdc)	Must Operate Voltage (Vdc)	Must Release Voltage (Vdc)	Surge Current 1-Cycle (Apk)

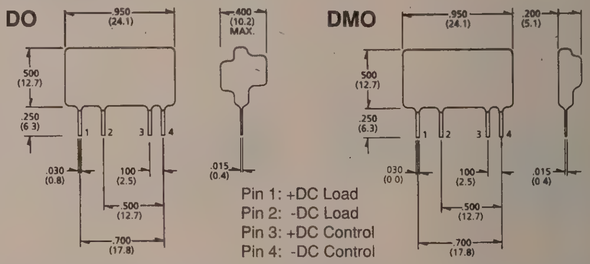
General Specifications
Operating Temperature range: -30°C to 80°C
Isolation Voltage:4000Vrms(DO Models) 2500Vrms(DMO Models)

Mechanical
All Dimensions are in inches (millimeters)



Pin 1: +DC Load
Pin 2: -DC Load
Pin 3: +DC Control
Pin 4: -DC Control

SERIES CX

5 AMP AC SIP
SCR OUTPUT/ ULTRA HIGH SURGE RATING
NORMALLY CLOSED OPTION (-B) AVAILABLE

Crydom's family of SPST-NO relays achieves the highest power switching capability in a PC-mounted aircooled package. Advanced features include exceptional steady state current, plus ultra-high surge ratings. Models are available to switch up to 660 Vrms with AC or DC control, and either zero-cross or random turn-on("R") switching versions. Pinout is compatible with Series 6 and OAC type I/O modules.

COMPANY

SOLID-STATE RELAYS AND INPUT/OUTPUT SWITCHES

SERIES CMX

6-10 AMP DC SIP MOSFET OUTPUT/ EXTRA LOW ON-STATE RESISTANCE/ PRINTED CIRCUIT BOARD MOUNTING

New DC output SPST-NO solid state relays use MOSFET output for high switching capabilities in a PC-mount air-cooled package. Pinouts are compatible with Series 6 and ODC type I/O modules.

General Specifications
Operating Temperature range: -30°C to 80°C
Isolation Voltage: 2500 Vrms

Approvals
UL: E116950

SERIES 3

3 AMP 120/240 VOLT AC OUTPUT SMALL FOOTPRINT/PRINTED CIRCUIT BOARD MOUNTING/ HIGH PACKAGING DENSITY

These solid state relays combine small size and high ratings in a PC-board-mounted SPST-NO design.Available with (S30 types) or without snubber network (S3 types), Series 3 is an ideal replacement for power reed relays in microprocessor or computer-based logic level system. Designed for long, reliable service in demanding industrial environments.

SERIES 1

2.5-90 AMP 120/240 VOLT AC OUTPUT ZERO VOLTAGE AND RANDOM TURN-ON SWITCHING/ PANEL MOUNT

Featuring state-of-the-art Surface Mount Technology, these SPST-NO relays deliver proven reliability in the most demanding applications. Output consists of an SCR-AC switch and is available in zero-cross, random turn-on(phase controllable) and normally closed (Form B) versions with either AC or DC input (coil) control.

SOLID-STATE RELAYS AND INPUT/OUTPUT SWITCHES

SERIES 2

8 AMP 120/240 VOLT AC OUTPUT ZERO VOLTAGE /2500 VOLT ISOLATION PANEL MOUNT

Relays combine small size and high ratings in a package designed for easy heat sink or panel mounting. Standard .187 push-on terminals assure quick connection and are arranged to provide maximum isolation between signal and power circuits. Model S228C is a snubberless design for applications that require low off-state leakage.

SOLID-STATE RELAYS AND INPUT/OUTPUT SWITCHES

SERIES CS/CT

10-90 AMP 120/240 VOLT AC OUTPUT LOW LEAKAGE/ SCR OR TRIAC OUTPUT PANEL MOUNT

Available with an SCR AC switch output(Series CS) or triac output (CT), all models feature low off-state leakage (snubberless), zero-voltage switching and have a broadened operating range (24-280 Vac). This wide range permits optimum performance at both 120Vac and 240Vac line voltages.

SERIES EZ

12-18 AMP AC OUTPUT LOW LEAKAGE/ QUICK CONNECT TERMINALS SCR OUTPUT

The Series EZ SPST-NO AC output relays offer a low profile package with the convenience of quick connect terminals. 4000 Vrms opto-isolation and low off-state leakage are standard. The Series EZ is the preferred choice for replacement of 120V and 240V Electro-mechanical relays.Series EZ is also available in AC control models.

SERIES T

10-25 AMP AC OUTPUT TRIAC OUTPUT/ INDUSTRY STANDARD PACKAGE

The high reliability of surface mount assembled circuitry combines with cost-effective triac output. Snubbers are included for high DV/DT applications and inductive loads, together with zero-voltage switching to reduce inrush currents and electrical noise.

DUAL RELAYS / QUAD RELAYS

120/240 VOLT AC OUTPUT INDUSTRY STANDARD PACKAGE/ ZERO VOLTAGE AND RANDOM TURN-ON SWITCHING

Two (dual) or four (Quad) totally independent AC output relays come in a single standard panel-mount package. Utilizing an AC switch output with internal snubber, relays provide greater protection against false triggering. Model choices include zero-voltage or random turn-on (phase controllable) switching.

DUAL-SCR OUTPUT

SERIES 53 TP

25-50 AMP 3 PHASE SCR OUTPUT/ AC OR DC CONTROL/ LED STATUS INDICATOR

Three-phase solid state relays switch up to 530 Vrms directly to loads such as motors, transformers, heating elements, etc. Models are available with either AC or DC input (coil) control in zero-voltage or random turn-on switching versions.

DC INPUT

Crydom Model Number	Line Voltage Range (Vac)	Load Current Range (Arms)	Control Voltage Range (Vdc)	Must Operate Voltage (Vdc)	Must Release Voltage (Vdc)	Surge Current 1-Cycle (Apk)

SOLID-STATE RELAYS AND INPUT/OUTPUT SWITCHES

SERIES DC60

3-7 AMP DC OUTPUT 60 VDC
INDUSTRY STANDARD PACKAGE
COST EFFECTIVE

Bipolar transistor outputs are available in 3,5 and 7 amp ratings. Cost-effective relays offer 4000 Volt isolation and come in crydom's standard panel-mount package.

Crydom Model Number	Line Voltage Range (Vac)	Load Current Range (Arms)	Control Voltage Range (Vdc)	Must Operate Voltage (Vdc)	Must Release Voltage (Vdc)	Surge Current 1-Cycle (Apk)

SERIES 1-DC

7-40 AMP DC OUTPUT / 100-500 VDC / MOSFET OUTPUT / LOW ON-STATE RESISTANCE / PARALLELING CAPABILITY FOR HIGHER CURRENTS

DC output relays feature MOSFET technology for low on-state resistance, assuring easy paralleling and switching capabilities to 40 amps at 100 Vdc. Lower current models are also available to 500 Vdc. All models come in Crydom's standard panel-mount package.

SERIES MP

3-4 AMP AC OUTPUT, SIP HIGH PACKAGING DENSITY/ COMPATIBLE WITH 5 & 15 VOLT LOGIC SYSTEMS

Available in 3Arms and 4Arms ratings, all are SPST-NO, PCB mount relays that provide greater packaging density and compatibility with pinout of Series 6 and OAC output modules. Models include internal snubber for high dv/dt applications, together with zero-voltage switching to reduce high inrush currents and electrical noise.

SOLID-STATE RELAYS AND INPUT/OUTPUT SWITCHES

SERIES IAC/IDC/OAC/ODC

SOLID STATE OPTO-ISOLATED I/O MODULES

Solid state I/O switching modules deliver an electrically clean, photo-isolated, noise-free "output" interface from logic level control systems to external loads such as motors, valves, solenoids, etc. - or an "input" interface from the load or sensors to microprocessor or computer-based logic level systems. Designed for long, reliable service demanding industrial environments.

Features & General Specifications

- Two Independent 25 or 40 Amp Solid State Relays in one standard case.
- UL Approved.
- Non-Zero Crossing for Lamp Dimming or Heater Control Applications.
- Zero Crossing for Motor Control Applications. ZC Units switch on in 1/2 cycle.
- Advanced MOS Technology offers a significant increase in both static and commutating dv/dt, improving immunity to false triggering.
- Ambient Temperature for all models:
  - -30°C to +80°C operating
  - -40°C to +120°C storage
- 2500 VRMS Isolation
  - Input to Output
  - Input to Base
  - Output to Base
  - Output Switch "A" to Output Switch "B"
- Aluminium Base Plates. High Temperature Black Plastic Case.
- Base Plate slotted on bottom for easy installation.
- Input reverse polarity protected.
- Inverse Parallel (back to back) SCR Output Device.

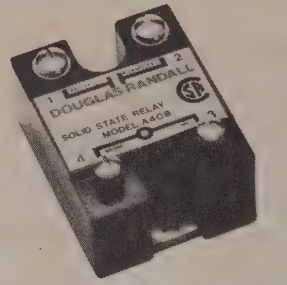
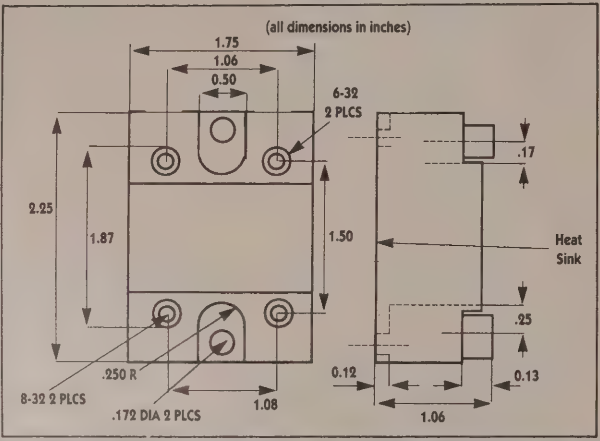
DOUGLAS RANDALL, INC

Solid State Relays - AC Output (up to 40 Amps/240 volts)

A & D SERIES





Features & General Specifications

- Output configuration (Back to Back) SCR's)
  Normally Open, Form A (SPST-NO)
  Normally Closed, Form B (SPST--NC)
- Most models UL and CSA approved.
- Zero Crossover switching standard.
- Non-Zero Crossover switching optional.
- 10 to 25 VAC outputs available.
- Internal Snubber standard.
- Wide range outputs available.
- 2500 & 3750 Vrms Input to Output isolation can be supplied on request.
- Rapid switching under load.
- Arc-free switching for use in hazardous atmospheres.
- Opto-isolated Input circuits.
- DC input: 3 to 32 Volts.
  Compatible with DTL and TTL logic.
  Reverse polarity protected.
- AC input: 90 to 260 Volts.
- Optional NOISE IMMUNE INPUTS available to prevent false triggering on sinusodial tone bursts up to 5Vp-p 20HZ.

NOTES:
(1) Add suffix (-NC) to designate Form B configuration.
(2) Add suffix (-NZ) to Designate Non-Zero crossing

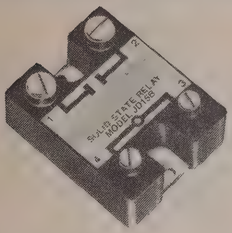
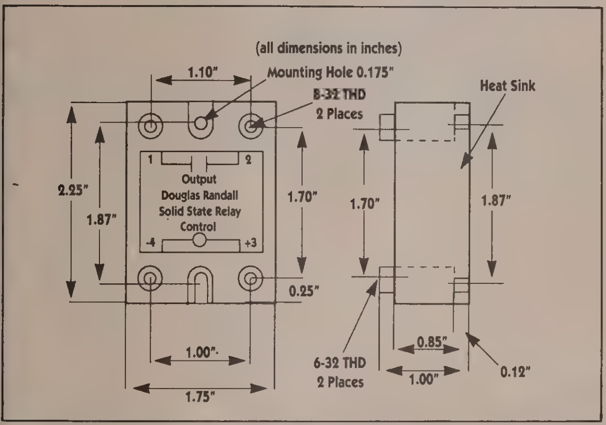
DOUGLAS RANDALL, INC

Solid State Relays - AC Output (to 150 Amps/260 volts)

J SERIES





Features & General Specifications

- Output configuration, ack-Back SCR.
  Normally Open, Form A (SPST-NO)
- Zero Crossover switching standard, switch on in 1/2 cycle max.
- Non-Zero Crossover switching optional.
  Internal snubbers standard.
- Wide range outputs available.
- Rapid switching under load.
- Arc-free switching for use in hazardous atmospheres.
- Opto-isolated Input circuits.
- DC input: 3 to 32 Volts.
  Compatible with DTL and TTL logic.
  Reverse polarity protected.
- AC input: 90 to 260 Volts.
- Low profile hockey puck design.
- Epoxy molded case with aluminium baseplate for easy mounting on industry standard panel.
- Appropriate heat sink and thermal compound required.
- Screw terminals standard.

NOTES:

(1) Substitute 25 for 40 for (**) to designate applicable load current rating of 25 or 40 amps.

(2) Substitute the letter 'A' or 'D' for (x) to designate AC or DC input.

(3) Add the suffix (-NZ) to designate Non-Zero crossing devices

DOUGLAS RANDALL, INC

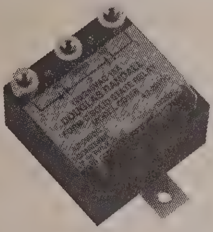
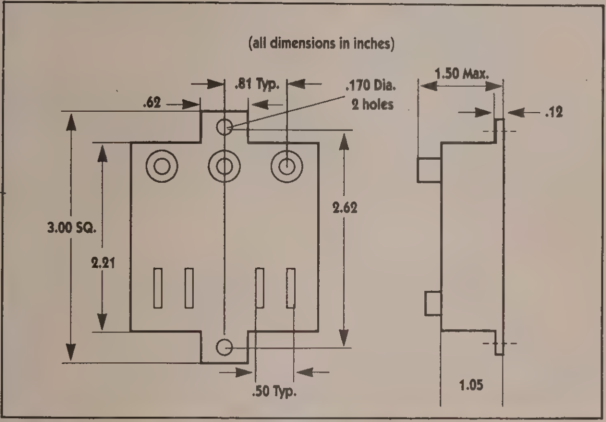
Form 'C' Solid State Relays - AC Output (up to 40 Amps/300 Volts)

CA CD SERIES





Features & General Specifications

- Output configuration,
  Triac or Back-Back SCR's.
  Form C (SPDT), Break -Before-Make
- LED indicators provide visual indication of active output.
- Internal snubber network standard.
- Wide range outputs.
- Rapid switching under load.
- Arc-free switching for use in hazardous atmospheres.
- Opto-isolated Input circuits.
- DC voltage or Dry Switch inputs.
- Additional power requirements;
  An independent DC or AC constant power supply must be provided.
- Epoxy molded case with aluminium baseplate for easy mounting on industry standard panel.
- Appropriate heat sink and thermal compound required.

		DC Input		Dry Switch Input

SWITCHES ◆◆◆ MATRICES ◆◆◆ SYSTEMS

Signal Switch Company has been an integral part of this ever-changing field of electronics since 1978. It has been a major goal of **Signal Switch Company** to assist every customer on an individual basis, with the focus placed on satisfying their unique switching requirements. This service is extended to all of our customers, whether they are interested in one or one thousand switches, matrices or systems.

Switches, Matrices and Systems are a key element in directing computer data and video signals which are generated daily in the vast network of electronic communications.

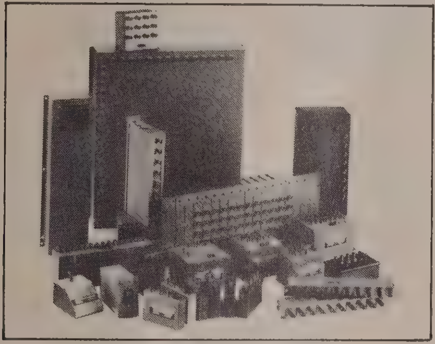
Signal Switch Company manufacturers complete turnkey systems, which include interconnect cabling and control interfaces. Switches and matrices are adaptable for rack mounting within a system and can be manufactured in an unlimitedd variety of configurations.

TYPES:

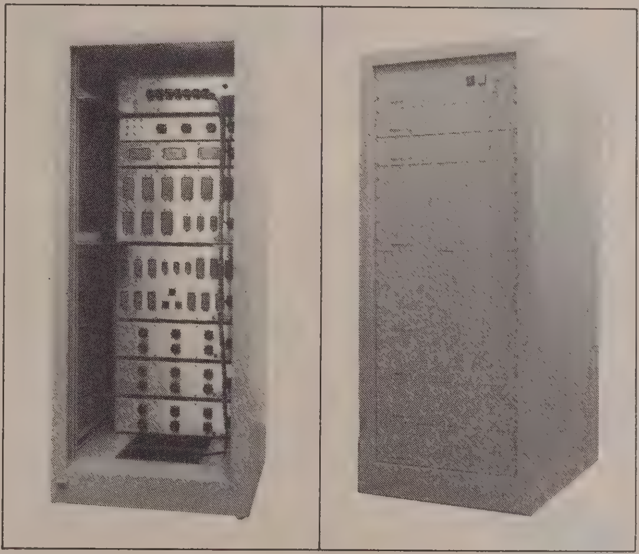
- AUDIO
- DATA
- VIDEO
- R.F.
- MULTI-WIRE
- BALANCED LINE
- COAX
- TWINAX

OPTIONS:

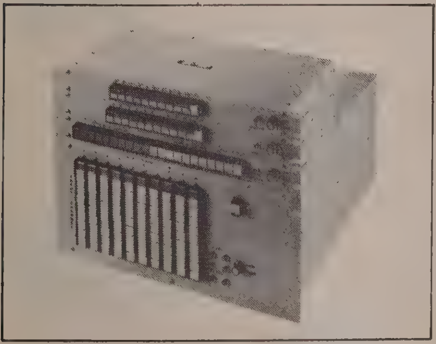
- PROGRAMMABLE
- COMPUTER INTERFACE
- ELECTRO-MECHANICAL
- SOLID STATE
- DESK TOP
- RACK MOUNT
- MODULAR
- COMPLETE SYSTEMS



MODULAR SWITCHES AND MATRICES



1000 WIRE A-B SWITCHING SYSTEM



MULTI SWITCH MATRIX SYSTEMS

TYPICAL SPECIFICATIONS:

Switches:	1 to N poles, 1 to N throws
Matrices:	2 to N inputs, 2 to N outputs
Frequency Range:	DC to 1.2 GHz
Switching Speed:	100 ms. down to 1 ns.
Swtiching Types:	Solid State, Reed, Relay
Switch Life:	Greater than 100 million operations
Isolation (open contact):	To −110 db
Insertion Loss (RF):	Less than 0.5 db, typically 0.2 db
Xtalk Between Channels:	To −180 db
VSWR:	1.5 to 1
Shock:	200 G max., 11±1 msec.
Vibration:	20 G max. @ 0 to 600 Hz
Temperature Range:	−50° to +150°F

Let us show you how WE can satisfy your switching requirements.
Call or write for complete specifications and our new catalog.

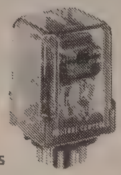
DELTROL RELAYS

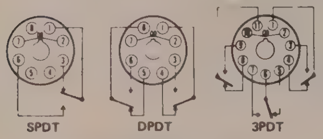
SEE SECTION 4550 FOR SOLENOIDS



105 Series

L = 1-3/8
W = 1-3/8
H = 2

General purpose plug-in relay for continuous duty operation. Plastic cover. Recognized under the Components Program of Underwriters Laboratories, Inc. (File No. E37066).



BASE DIAGRAMS FOR 105 SERIES

B-3 HOLD DOWN SPRING
S/N 20171-00

L = 1-13/32
W = 1-1/2
H = 2-3/16

165/166 Series

Plastic covered general purpose plug-in relay. Molded nylon coil. Continuous duty operation. Recognized under the Components Program of Underwriters Laboratories, Inc. (File No. E37066). Also CSA Recognized.

L = 1-13/32
W = 1-1/2
H = 2-3/16

Latching relays especially suited for AC power supplies. Units have moisture and fungus-resistant nylon encapsulated coil. Recognized under the Components Program of Underwriters Laboratories, Inc. (File No. E37066).

L = 1-7/8
W = 1-5/8
H = 1-1/4

177 Series

High current relays for industrial control applications. Molded nylon encapsulated coil is resistant to fungus and moisture. Recognized under the Components Program of Underwriters Laboratories, Inc. (File No. E37066).

L = 1-13/32
W = 1-1/2
H = 2-29/32
Mounting Center = 2-1/2

267F Series

General purpose relay with plastic cover. Molded nylon coil insures reliable continuous-duty performance. .250 quick connect terminals. Recognized under the Components Program of Underwriters Laboratories, Inc. (File No. E37066).

DELTROL RELAYS MADE IN U.S.A. SEE SECTION 4550 FOR SOLENOIDS

General purpose relays with plastic dust cover with flange mounting, barrier-type .250" quick-connect terminals and molded-nylon coil. Recognized under the Components Program of Underwriters Laboratories, Inc. (File No. E37066). CSA Recognized.

W = 2-1/2
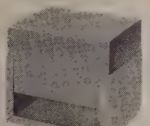
H = 2-3/8

Heavy duty power relay for industrial control applications. Particularly suited for motor controls, heater loads, welder loads, and other power switching applications. Molded nylon coil resists fungus and moisture. Long life, rugged construction. Rating: 30 amps, 1-1/2 hp, 120/240 VAC. Heavy duty screw-type terminals. Mounting: two 3/16" holes on 1-7/8" centers. Listed under the Components Program of Underwriters Laboratories, Inc. (File No. E37066). CSA listed (File No. 20690).

B-5 DUST COVER



L = 5
W = 4
H = 3

S/N 20257-80

Sealed knock-out holes for standard conduit fittings. Relay mounts on pre-drilled base. Constructed of Aluminum. Snap action cover release. Accommodates relay series 900.

EI&S
ELECTRONIC INSTRUMENTS & SPECIALTY DIVISION

Reed Relays and Solid State Relays

A PRIME TECHNOLOGY COMPANY

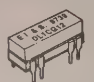
EI&S produces a range of catalog and custom reed relays for switching applications that are not market dependent.

Today's reed relays offer many technical advantages over mechanical relay types, including speed, long life, dry switching and low power input.

Vibration: Reed switch contacts, with only two or three moving parts, offer better response to vibration than mechanical types (e.g. MIL STD 202, Method 204: 20g's @ 10 to 2000 Hz).

Shock: Dry reed relays withstand relatively high levels of shock (e.g. MIL STD 202, Method 213B, Condition A: 50g's for 11mSec @ 1/2 sine wave).

DL/DH **14 Pin Molded DIP (.275 in. high)**



Popular industry standard low cost designs.
Epoxy-molded for minimum package size.
DH Series mercury-wet designs for 50W/2Amp switching.

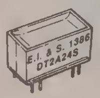
D/DM **14 Pin Encapsulated DIP (.250 in. high)**

Similar to DL Series with added capability.
Epoxy-coated metal case for magnetic shielding.

DA **14 Pin Encapsulated DIP (.420 in. high)**

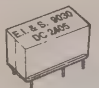
Redesigned low power replacements for D Series.
Optimum coil designs (33mW/5V coil).

DT **Encapsulated DIP (.250 or .430 in. high)**



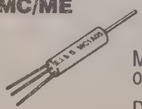
Meets MIL-R-83516A environmental requirements.
Ruthenium-plated contacts for low stable contact resistance.

DC **16 Pin Encapsulated DIP (.420 in. high)**



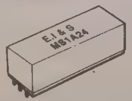
New! Low power coil designs (33mW/5V).
Form-fit sub for DS type EMR relays.
10W/0.5A DPST switching.

MC/ME **Micro-miniature Axial (replacement for 2000 Series)**



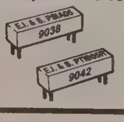
Magnetic shielding standard, electrostatic optional.
Designed for high density applications.

MS/MH **Encapsulated In-line Pinouts**



New! Low-power coil designs (<25mW/5V).
MS Series—to 10W/0.5A dry switching.
MH Series—50W/2A mercury switching.

PS/PT **Pico-Molded/Pico-Encapsulated Pinouts**



PS: Low profile in a standard molded package.
PT: Epoxy-coated metal case for magnetic shielding. Electrostatic shielding optional.

FHT 	Full or Half size crystal can coaxial relays with 8″ min. RG 178 B/U cables attached. T Series sensitive. Welded sealing.	1PDT with Auxiliary Contacts or 2 PDT Coax	RF to 1.5 Amps 50 Watt Max.	Frequency Range to 500 MHz VSWR-1:1.1 Typical. Characteristic Impedance–50 Ohm Typical. Cross Talk–50 dB Typical.		6 to 32 VDC
300	The ultimate in high current DC load switching. The load is switched with power semiconductors short term, and carried by the relay hard contacts long term, preventing the semiconductors from overheating. The Arcless™ uses a SPST heavy duty mechanical relay. In addition to switching 70 AMP loads, the Arcless will withstand a 180 AMP inrush current from motor or lamp load. Applications for arcless relays should include all high current DC switching where reliability and long life are important design criteria. No arc between contact points–No electro-magnetic interference. This non-arcing feature is useful for switching where EMI or RFI might cause damage to equipment, software, or quality of radio signals.

NOTES

PHYSICAL CHARACTERISTICS:

1. **Case Finish:** Shell – None
   Header – Gold per MIL-G-45204, Type 1, Class 1.
2. **Terminal Finish:** Gold plate per MIL-G-45204 Type 1, Class 1 over Nickel underplate.
3. **Weight:** 2.84 Grams (0.10 oz.) maximum.
4. **Seal:** Hermetic, 10^{-8} ATM cc/sec.
5. Terminals shall be solderable per MIL-R-39016.
6. **Terminal Strength** (Method 211, MIL-STD-202):
   Pull Test: Test Condition A. 1 pound pull.
   Bend Test: Test Condition C. 1/2 pound load.
   Twist Test: Test Condition D.
7. **Electrical Characteristics** (Test methods per MIL-R-39016, where applicable): Contact Configuration: 2 form C (DPDT).
8. **Contact Material:** Noble Metal Alloy with Gold plating, intended for low-level to 1.0 AMP switching.
9. **Load Ratings:**
   A. High Level (Case grounded, except as noted):
      1.0 AMP at 28 VDC.
      500 Milliamp at 115 VAC 400 Hz (Case ungrounded).
      250 Milliamp at 115 VAC 60 Hz (Case ungrounded).
      100 Milliamp at 115 VAC 60 and 400 Hz.
      Inductive Load: 0.2 AMP at 28 VDC with 0.32 Henry inductance.
      Lamp Load: 0.10 AMP at 28 VDC.
   B. Low Level: 10 to 50μ AMP at 10 to 50 mV DC or Peak AC.
   C. Intermediate Current: 0.10 AMP at 28 VDC.
   D. Overload: 100 cycles at 2.0 AMPs 28 VDC.
10. **Contact Life:** 100,000 cycles at rated high level load, and intermediate current. 1,000,000 cycles at low level and mechanical.
11. **Contact Resistance or Voltage Drop:**
   A. Intitial: 0.100 Ω max. at low level.
   B. High Level: During life: 5% of open circuit voltage
      After life: 0.200 Ω max.
   C. Low Level: During life: 33 Ω max.
      After life: 0.15 Ω max.
   D. Intermediate Current:
      During Life: 1 Ω max.
      After Life: 0.20 Ω max.
12. **Inter-contact Capacitance:** 0.2 pF, typical.

OPERATING CHARACTERISTICS:

14. **Sensitivity:** Standard latch/reset power is 102 milliwatts maximum at 25°C.
15. **Operate Time:** 2.0 milliseconds maximum over the temperature range, with rated coil voltage. Recommended minimium coil operate voltage pulse: 3.0 milliseconds at rated voltage.
16. **Contact Bounce Time:** 2.0 milliseconds maximum.
17. **Contact Stabilization Time:** 2.5 milliseconds maximum.
18. **Dielectric Withstanding Voltage:**
    Sea Level: 500 VRMS, 60 Hz, all isolated combinations. Altitude (1.3 inches Hg): 125 VRMS 60 Hz, all terminals to case.
19. **Insulation Resistance:** 10,000 megohms minimum at 500 VDC, except the insulation resistance between coil and case at 125°C shall be 1,000 megohms minimum.
20. **Duty:** Continuous.

ENVIRONMENTAL CHARACTERISTICS:

21. **Operating Ambient Temperature Range:** -65°C to 125°C.
22. **Vibration (Operational):** Per MIL-STD-202, method 204 condition D and the following:
    Minimum of 50 G's and 0.1 inch double amplitude from 10 to 3,000 to 10 Hz in each of 3 orthogonal axes, one of which is parallel to tab. 15 minutes per axis. No chatter exceeding 10 μ seconds: No transfer exceeding 1 μ second.
    Non-Operational: Same as operational with the following exceptions: Minimum of 100 G's and 0.2 inch double amplitude from 10 to 2,000 Hz. Monitoring not required.
23. **Shock (Operational):** Per method 213, MIL-STD-202, except 750 G's, 0.5 millisecond pulse. No chatter exceeding 10 μ seconds; No transfer exceeding 1 μ second.
    Non-Operational: Same as operational except 2,100 G's, 0.5 millisecond pulse. Contact chatter and transfer may occur.
24. **Acceleration:** 75 G's with axes and contact criteria same as for shock and vibration.
25. Single diode coil transient suppression.
26. Double diode suppression/polarity protection.

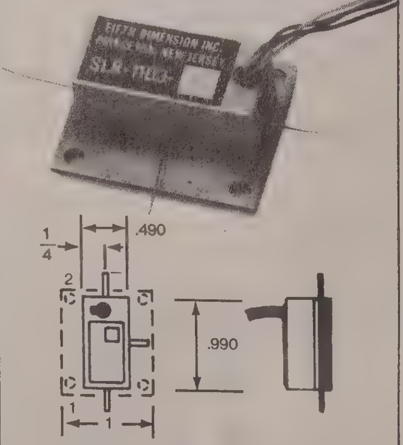
Stripline RF Relay • SPDT Bistable
Part No. SLR 1103-(V)*



- Position-insensitive, bounce-free LCI sealed capsule
- Bistable operation
- 5, 12 and 24 VDC-700 Mw coil drives
- Operate Time (max.) — 4.0 ms
- Cycling rate — to 40 Hz
- Frequency Range — DC to 1 GHz
- Dielectric strength — 300 VDC
- Rated Load — 10 watts CW

	100 MHz	1.0 GHz
Typ. Insertion Loss (dB)	.07	.30
Typ. Isolation (dB)	56	36
Typ. VSWR	1.03	1.20

Operate in any Position

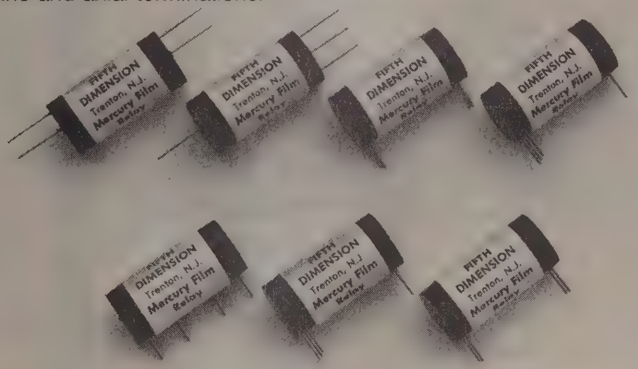
- **No Contact Bounce** — Produce clean square-wave pulses
- **Position Insensitive** — No pool of mercury
- **Self-Healing Contacts** — Always wetted with fresh mercury
- **Rugged Construction** — Welded steel switching capsule
- **Sealed Package** — High density polyethylene (WK Series)

Specifications

Meet Lightning Surge Standards — 2500 volts coil-to-contact breakdown meets FCC standards (WK Series only)
Contact Type: Form A (SPST) mercury film
Contact Bounce: None at 80% of rated voltage or higher
Load Current to 52 VDC: 0.24 amps
Load Current to 200 VDC: 0.10 amps
Contact Resistance: 150 milliohms (max.)
Contact Resistance Stability: ±15 milliohms
Contact Breakdown Voltage: 800 volts DC or AC (rms)
Coil-to-Contact Breakdown: 2500 VAC
Operate Time: 4.0 milliseconds (max.)
Release Time: 4.0 milliseconds (max.)

Molded-Case Magnetically Shielded Series WKS. Relays can be submerged in appropriate cleaning solvents during board assembly.

Series WKS Mercury Relays are available in a wide variety of footprints including 0.1, 0.15 and 0.2-inch PCB spacing as well as with in-line and axial terminations.



FIFTH DIMENSION Trenton, N.J. Mercury Film Relay

Flame Resistant Relays
Series FR relays meet the requirements of UL Standard 94VO. Available with 250, 375 and 500 mW coils.
Ask for details on these and special models.

FUJITSU RELAYS

Fujitsu Microelectronics, Inc.
Electronic Components Division

Our broad relay line is perfect for a wide range of applications — everything from automotive and industrial to test/measurement and telecom. Fully immersion-cleanable, our printed circuit mount relays are leak-proof and impervious to electronic solvents.

The complete line is in stock right now with your local Fujitsu Component distributor.

Call 1-(800)-642-7616 for more information.

FEATURES

- Design based on worldwide telecommunications standards
- Other applications include instrumentation, data switching, security alarm
- 2.5 kV surge (per Bellcore TA-NWT-001089)
- 1.5 kV surge (per FCC part 68)
- Small size (0.2 in. x 0.1 in., 12 pin DIP)
- 140 mW coil power
- Stable contact resistance for signal switching
- 200 x 10^3 operations, 30 VDC, 1 A resistive
- 100 x 10^3 operations, 125 VAC, 0.5 A resistive

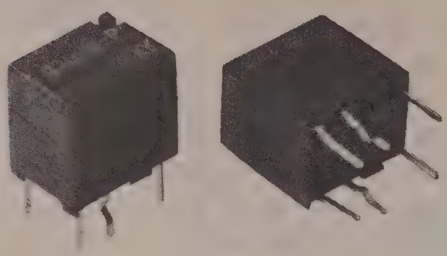
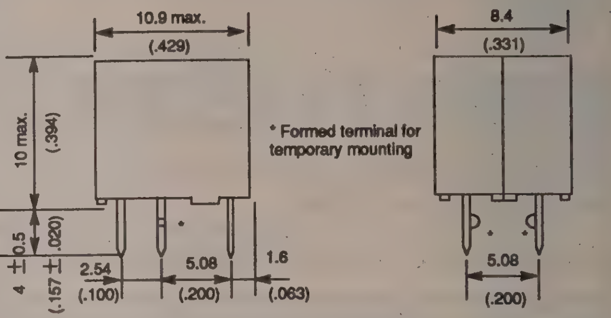
MICROMINIATURE RELAYS FOR P.C. BOARDS
FBR20 Series

FUJITSU



DIMENSIONS



Fujitsu FBR20 series relays are designed for PC board mounting with 1A contact ratings – perfect for microminiature applications.

FEATURES

- **Microminiature size.** Two FBR20 series relays can be mounted in the space now required for a single FBR210 series relay.
- **1A contact rating.** Despite their microminiature size, FBR20 series relays have a contact rating of 1A at 24 VDC for convenient installation.
- **Gold overlay on silver-palladium contact.** Contact reliability is assured in low-level applications by contact shapes and materials especially designed for signal switching applications.
- **Low power consumption.** With a rated power consumption of only 0.3 W, today's expensive energy costs can be reduced significantly.
- **Wide range of drive voltages.** Drive voltages from 1.5 VDC to 24 VDC are available for a wide range of applications.
- **Strong shock resistance.** Even with a 50 G shock, FBR20 series relays never miss a switch.
- **Easy-to-pattern design.** Separate terminal connections with drive and output sections allow easy pattern design.
- **Formed terminal available for temporary lock.** The unique design of the forming terminal allows FBR20 series relays to be temporarily mounted for greater design flexibility.
- **Automatic soldering provision.** The terminal is sealed to prevent flux from entering during automatic soldering.
- **Immersion cleaning.** Sealed for immersion cleaning.

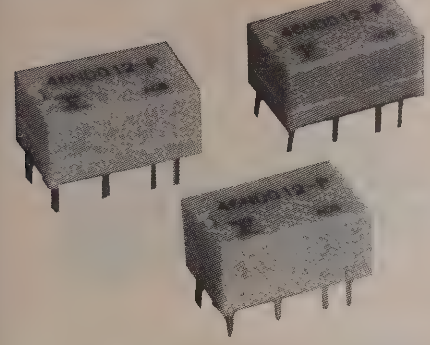
ULTRA-MINIATURE RELAYS FOR P.C. BOARDS
FBR40 Series

FUJITSU



The Fujitsu FBR40 series relay with a pick-up power consumption reduced to 85 mW is an extremely small DPDT CONTACT relay designed for PC board mounting.

FEATURES

- **Ultra-miniature low-profile design.** At half the size of the conventional FBR240 relay and requiring only three quarters of the board area, a drastic reduction in size has been achieved in the design of the FBR40. 15.8 (L) x 9.7 (W) x 7.8 (H) mm.
- **High dielectric strength.** Dielectric withstanding voltage between contacts and coil is over 1,000 VAC and with the ability to withstand a surge voltage of over 1,500 V, it conforms to FCC 68.302 standard.
- **High-shock resistance**. Even a shock force of 30 G will not result in a malfunction.
- **Low power consumption**. With a high efficiency built-in permanent magnet, operating power consumption is only 85 mW. (Rated power consumption is 150 mW.)
- **Formed terminal for temporary lock.** The terminals of the FBR40 are specially formed so that they can be temporarily attached to the PC board.
- **Pattern design is easy.** The terminal connections are designed so that the drive portion (coil) and the output portion (contacts) are isolated, which simplifies pattern design.
- **Immersion cleaning.** Sealed for immersion cleaning.
- **UL and CSA approved.** UL File No. (E63615), CSA File No. (LR64026-17).
- Contact sales representative for availability of models meeting BELCOR 2500 V surge test.

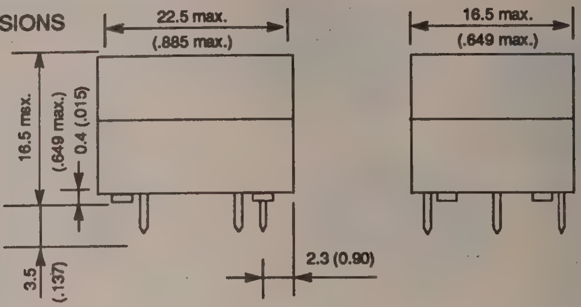
SMALL CONTROL RELAYS FOR P.C. BOARDS
FBR160 Series

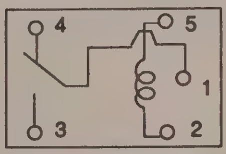
FUJITSU

DIMENSIONS



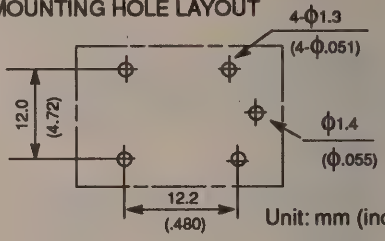
Fujitsu FBR160 series small control relays are PC board mounted and have contact ratings up to 10 A.

SCHEMATIC



(view from terminal side)

MOUNTING HOLE LAYOUT



Unit: mm (inches)

FEATURES

- **Same terminal array as FBR100.** These relays have the same foot print as Fujitsu's conventional FBR100 series.
- **Lower profile.** Since their profile is 7 mm lower than that of the FBR100 series relays, they can be used in smaller equipment.
- **Flux-prevention structure.** The contacts are located on the top of the relay to protect them from solder flux from the terminals.
- **Choices of contact materials.** Two different kinds of contact materials can be specified according to the load.
- **Immersion cleaning.** Sealed for immersion cleaning.
- **Meets major safety standards.** The relays are CSA certified (LR41893-56, LR50924-5, and LR64026-7). The relay structure is designed to meet the Japan Electric Appliance control law (150 V max.) and UL standards (File No. E63614 and E63615).

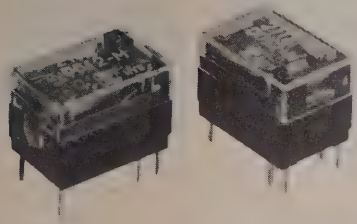
ULTRA-MINIATURE RELAYS FOR P.C. BOARDS
FBR210 Series

FUJITSU



Fujitsu FBR210 series of ultra-miniature relays allow high component densities for savings in both equipment size and cost for the printed circuit board. The FBR211N series are suitable for immersion cleaning in freon and aqueous systems.

These highly sensitive relays with gold-clad SPDT contact arrangements are designed to offer load handling capabilities of 1 A at 28 VDC or 0.5 A at 120 VAC under a resistive load. The 0.1 inch grid spacing of terminals makes these relays ideally suited for printed circuit board applications requiring high-density mounting and for use in audio and wireless communications, office vending machines, automobiles and various control applications. Contact sales representative for availability of new 2 A models.

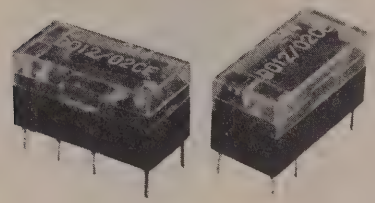
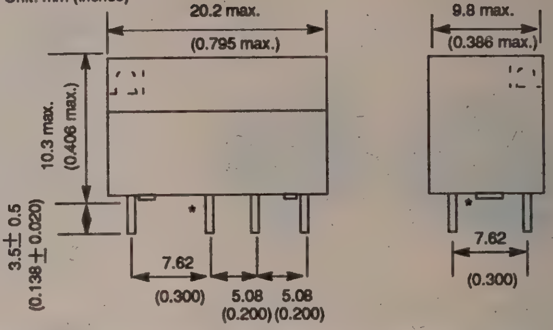
FBR240 Series

FUJITSU



FBR244 and FBR244N series relays are low profile, P.C. board relays with 2 Form C (DPDT) contact arrangements in D.I.P.-compatible plastic housing and have a 2.54 mm pinout grid spacing to provide 16-pin-DIP socket compatibility. Sealed construction allows automatic wave soldering and board washing without relay damage. Single or bifurcated contacts switch 1 A at 28 VDC or 0.5 A at 120 VAC and have a rated-load life-time of 5 x 10^5 operations. These relays are suitable for telecommunication equipment, audio equipment and business machines. The relays are CSA certified (LR41893-35) and UL recognized (file #E63615).

DIMENSIONS Unit: mm (inches)



* The terminals marked with an asterisk are formed for temporary mounting on PC board.

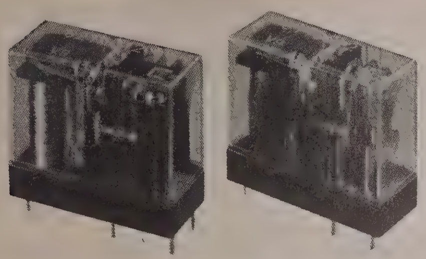
MINIATURE HIGH-POWER RELAYS
FBR600 Series

FUJITSU



The FBR600 series are miniature high-power relays with a switching capability of 16 A, 30 VDC or 240 VAC for 1 Form C contact and 5 A, 30 VDC or 240 VAC for 2 Form C contacts. These relays are designed for mounting on printed circuit boards.

FEATURES

- **Applications.**
  Ideal for use in audio equipment, TV, vending machines, control machines, etc.
- **Conforms to various standards.**
  UL recognized (E63615) for industrial control equipment per UL508. CSA certified (LR41893-50, LR61319-4, and LR64026-10).
- **Immersion cleaning.**
  Sealed for immersion cleaning.

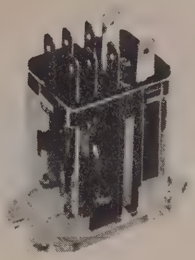
GENERAL PURPOSE RELAYS
FRL260 Series

FUJITSU



FLANGE MOUNT

The FRL260 series relays have been designed with emphasis on reliability, safety, cost performance, and applicability to a wide range of uses. These relays are top quality with proven performance.

These relays provide SPDT to 4PDT contacts, which are offered for contact ratings from 1 A to 15 A at 30 VDC or 240 VAC, resistive. Moreover, they are also available with four transfer bifurcated contacts that enable them to meet signal level or other light loads.

The FRL260 series relays are available in both DC- and AC-rated coils, and with a selection of mountings, such as solder, plug-in, P.C. boards and quick connect terminals.

The FRL260 series are UL recognized (File No. E163614/E63615) and CSA certified (File No. LR41893).

P.C. BOARD RELAYS FOR AUTOMOTIVE APPLICATIONS
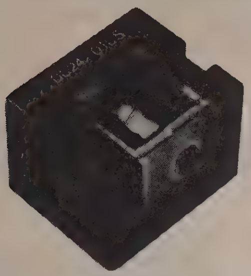
FRL270 Series

FUJITSU



Fujitsu FRL270 series power relays are for PC board mounting and are designed especially for automotive applications.

FEATURES

- **Maximum current: 30 A.** The relays are designed for high ambient and storage temperatures to ensure the contacts will endure continuous current of up to 30 A.
- **Rigid, shock-resistant construction.** (1-meter drop test.)
- **Welding resistant contact materials.** Three types of welding resistant contact materials are available as standard.
- Choice of wide terminal model (-01 suffix) for maximum heat/power transfer or standard terminal model (no suffix) for conventional hole/conductor sizes at no extra charge.
- **Immersion cleaning.** A sealed type is available for immersion cleaning.
- Alternate coil voltages 6 VDC and 9 VDC coils are available at no extra charge.

Typical Uses

- **Engine Control.** Electronic fuel injection units.
- **Lamp control.** Flasher control units, headlight control units.
- **Motor, solenoid, and heater controls.** Windshield wiper control units for trucks, automatic door-lock control units, defogger control units, other various control units.

All Contact Types:	12 VDC, 10 A or 24 VDC, 7A
Maximum Carry Current	30 A
Coil Power	Standard coil: 1.7 W approx. Low power coil: 0.6 W approx. (with rated voltage applied at 20 degree C)
Coil Temperature Rise	Standard coil: 75 deg. approx. Low-power coil: 35 deg approx. (with rated voltage applied at 20 degree C)
Insulation Resistance	100 megohm min. (at 500 VDC)
Withstanding Voltage	500 VAC for 1 minute
Vibration	Operation error: With 1.5 mm vibration applied at full amplitude at 10 to 55 Hz, contact chatter lasts less than 1 ms.
Shock	Operation error: 10 G (11 ms sine half-wave) Durability: 100 G (11 ms sine half-wave)
Operate Time	10 ms max. (Standard coil with 01-type contact gap)
Release Time	5 ms max. (01-type contact gap) 8 ms max. (51-type contact gap)
Life Expectancy	Mechanical: 100 x 10^4 operations or more Electrical: 250 x 10^3 operations or more (Silver-copper alloy under the rated contact load)

SELECTION TABLE

Type of Coil (Spec. Code)	Rated Voltage (Spec. Code)	Contact Gap (Spec. Code)	Coil Resistance (±10%)	Rated Power Consumption	Pick-up Voltage	Drop-out Voltage	Part No.
Standard (D)	12 VDC (012)	Standard (01)	85	1.7 W approx.	Less than 6.5 VDC	More than 1.0 VDC	FRL274ND012/01C^{1,2}-A
		1 mm (51)	85	1.7 W approx.	Less than 6.5 VDC	More than 1.0 VDC	FRL274ND012/51C^{1,2}-A
Low Power (H)		Standard (01)	240	0.6 W approx	Less than 8.4 VDC	More than 0.8 VDC	FRL274NH012/01C^{1,2}-A
Standard (D)	24 VDC (024)	Standard (01)	340	1.7 W approx.	Less than 13.0 VDC	More than 2.0 VDC	FRL274ND024/51C^{1,2}-A
		1 mm (51)	340	1.7 W approx.	Less than 13.0 VDC	More than 2.0 VDC	FRL274ND024/01C^{1,2}-A
Low Power (H)		Standard (01)	960	0.6 W approx.	Less than 16.8 VDC	More than 1.6 VDC	FRL274NH024/01C^{1,2}-A

Notes: [1] Insert contact material code [2] Insert 01 for wide terminals.

Example Part No.: FRL274ND012/01CD-01A

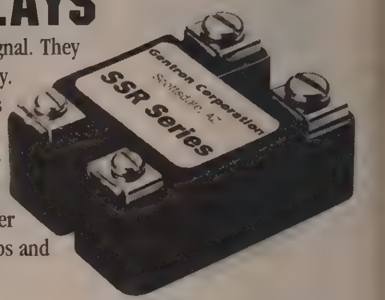
Relays You Can Rely On.

GENTRON CORPORATION

GENTRON CORPORATION SOLID STATE RELAYS



Gentron's Solid State Relay's are designed for controling large amounts of power with a low level input signal. They incorporate a dual SCR design to provide full wave control and high current capability with high dV/dt capability. Zero Crossing Drive Circuitry switches on at zero voltage, and off at zero current, thereby minimizing the effects of inductive loads. Non-Zero Crossing Drive Circuitry allows for phase control capability as well as on-off control. The opto-coupler provides the interface to the input signal and electrical input / output isolation. Superior performance, quality and reliability are insured by Gentron and the patented use of Gentron's Fused Copper™ Process. The nature of these devices, along with years of leadership and expertise in the production of power semiconductor modules allows Gentron to offer Solid State Relays to handle loads from 25 amps to 250 amps and voltage as high as 1200 volts in standard industry packages.

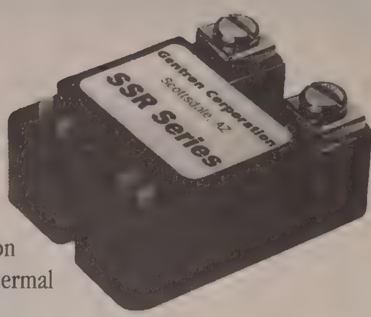
GENTRON CORPORATION

GENTRON CORPORATION SOLID STATE IGBT AND MOSFET RELAYS



Many of the recent developments in semiconductor technology such as MOSFETS, IGBTs, and other types of newer devices, offer some interesting choices and performance advantages. Some of the vast advantages are: Selective On and Off control, Reduced RFI, Alterable Switching Slopes, Reduced Off State Leakage, Higher Immunity to False Triggering, Latch Free Operation, Absolute Zero Cross Firing (with options to switch on voltage or current for either on or off switching) and PWM availability. Available intelligence options are: Current Sense™, Thermal Shutdown, Load Fault and Current Limit.

From an overall perspective, these MOSFET and IGBT Relays offer significant advantages over the older technology SCR and TRIAC output Solid State Relays for many applications. Gentron other product lines: Power Supply Power Elements, Solid State Contactors, Motor Control Power Elements and Advanced Semiconductor Hermetic Products. Please call for more information.

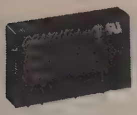
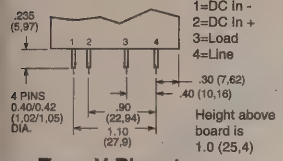
70S2 SERIES PC MOUNT SOLID-STATE RELAYS



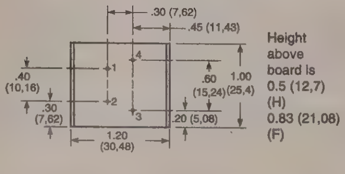
Type V

Type H

Type F



Type V Pinout

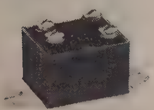


Types F, H Pinout

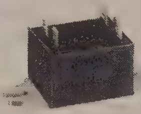
PC Mount Types V, F, and H are UL Recognized, CSA certified relays which are optically isolated, logic compatible, and have zero voltage turn-on. Also feature built-in EMI-RFI immunity as well as voltage spike protection of 3000V per microsecond. Relays withstand surge of 60A for one cycle or 18A for 60 cycles.

Type	AC Load	DC Control
70S2-04-D-03-V	3A, 24V	3-32V
70S2-04-B-03-V	3A, 120V	3-32V
70S2-05-B-03-V	3A, 120V	6-32V
70S2-04-C-03-V	3A, 240V	3-32V
70S2-05-C-03-V	3A, 240V	6-32V
70S2-04-D-04-F	4A, 24V	3-30V
70S2-04-B-04-F	4A, 120V	3-30V
70S2-05-B-04-F	4A, 120V	6-30V
70S2-04-C-04-F	4A, 240V	3-30V
70S2-05-C-04-F	4A, 240V	6-30V
70S2-04-D-02-H	2.5A, 24V	3-30V
70S2-04-B-02-H	2.5A, 120V	3-30V
70S2-05-B-02-H	2.5A, 120V	6-30V
70S2-04-C-02-H	2.5A, 240V	3-30V
70S2-05-C-02-H	2.5A, 240V	6-30V

70S2 SERIES PANEL MOUNT SOLID-STATE RELAYS



Type S

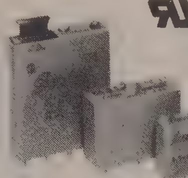


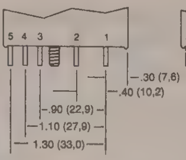
Type N

Types S and N are UL recognized, CSA certified Mini Puck relays. They mount on the same 0.187" (4.75) centers as the bulkier hockey puck packages and switch up to 25A loads. Optically isolated with zero voltage turn-on circuit. Compatible with CMOS and TTL logic. Also feature built-in snubber network, high surge rating, and low offset voltage to minimize RFI and EMI. Ratings are for relays mounted with silicon grease on a 12" x 12" x 0.125" (304.8 x 304.8 x 3.18) aluminum panel or equivalent. Load and logic connections are marked on each relay. **Suffix S** have screw terminals, terminal screws are included. **Suffix N** have quick connect terminals for push-on connectors which fit blade sizes 0.187" (4.75) for the logic/control side and 0.250" (0.635) for the load side. Relay body is 1.2"x1.0"x0.85" (30.48x25.4x21.59) high. Push tabs (Style N) add 0.3" (7.62) to height. Screws (Style S) add 0.1" (2,54).

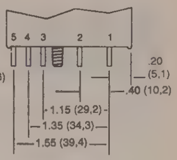
Type	AC Load	DC Control
70S2-04-B-06-S	6A, 120V	3-30V
70S2-04-B-12-S	12A, 120V	3-30V
70S2-03-B-25-S	25A, 120V	3-30V
70S2-04-C-06-S	6A, 240V	3-30V
70S2-04-C-12-S	12A, 240V	3-30V
70S2-03-C-25-S	25A, 240V	3-30V
70S2-04-B-06-N	6A, 120V	3-30V
70S2-04-C-06-N	6A, 240V	3-30V
70S2-04-B-12-N	12A, 120V	3-30V
70S2-04-C-12-N	12A, 240V	3-30V

70 SERIES DIGITAL INPUT/OUTPUT MODULES





Standard and Mini Pin Out



G5 Pin Out

TERMINAL NUMBER AND CONNECTION

TYPE	#5	#4	#3	#2	#1
OAC	N/A	DC– In	DC+ In	AC Out	AC Out
ODC	N/A	DC– In	DC+ In	DC- Out	DC+ Out
IAC	Ground	Output	+Vcc	AC In	AC In
IDC	Ground	Output	+Vcc	DC- In	DC+ In

Only input modules have terminal #5.

I/O Modules provide an optically isolated interface between logic systems and external AC and DC power devices. UL recognized, CSA certified and logic compatible. SPST N.O. with industry standard pinouts, superior noise immunity, transient protection of 4000 V/ microsecond, 4000 volts of isolation, and high blocking voltages of 400 volts (120VAC) and 600 volts (240VAC). G5 modules have built-in status LEDs and 5 x 20 mm glass fuses. Immune to mechanical shock and vibration. Operating temperature range of –40° to +100°C. AC types have zero crossing switching. Meet IEEE 472–1974 and ANSI C37.90 transient withstanding tests, and Electrical Noise Immunity Test per NEMA ICS 2–230.

Standard I/O Modules are form, fit function replacements for competitive product; output modules switch up to 3.5 Amps. Standard modules measure 1.7"L, .6"W, and 1.25" H.
Miniature I/O Modules require only .68 sq inches board area, and switch up to 3.0 Amps. Mini modules measure 1.7"L, .4"W, and 1.0"H.
G5 I/O Modules include a replaceable glass cartridge fuse in the output modules and a status LED indicator. These modules switch up to 3.5 Amps. G-5 modules are 1.9"L, .46"W, and 2.5"H.

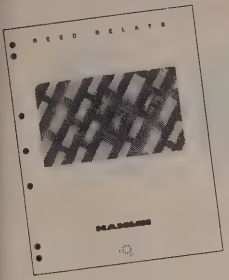
REED RELAYS

HAMLIN INC

ELEC-TROL



The extensive Hamlin line of standard reed relays represents the merging of the wide range of reed products manufactured by Hamlin, Inc. and Elec-Trol. The merger provides powerful technical capability and manufacturing capacity that assures customers a reed relay supplier that is totally committed and focused. For your convenience both Hamlin and Elec-Trol model numbers are listed. When ordering, refer to the Hamlin model number.

DIP SERIES

SIP SERIES

FEATURES

- De-activated rhodium contacts. for stable contact resistance.
- Standard TO-116 Terminal Grid fits all standard DIP sockets.
- Interface directly with RTL, DTL, TTL, HTL logic.
- Molded epoxy package for environmental immunity.
- Automatic insertion compatible.
- Relay testing services test report available.

DIP AND MINI SIP SERIES

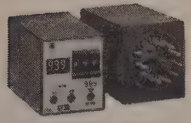
GT3D - *New*



Contacts

Form: Delayed SPDT
Delayed SPDT +
Instantaneous SPDT
Delayed DPDT

Output: 250V AC, 5A
30V DC, 5A

Operating Voltages:
100-240V AC
12V AC/DC
24V AC/DC

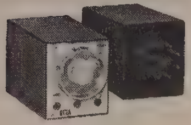
Operation Modes
- ON-Delay, Interval, Cycle, Cycle-ON
- ON-Delay (2 types), Cycle (2 types), Signal ON/OFF Delay (3 types), Interval (2 types), One-Shot (2 types), Signal OFF Delay (2 types), Cycle-ON, One-Shot ON-Delay, One-Shot Cycle (w/input)
- ON-Delay 1, ON-Delay 2, Cycle (One-shot output) (w/input)

Timing

Time Range: 0.01 sec to 99.9 hrs
Repeat Accuracy: 0.3%
Reset Time: 60 msec, max.
Terminals: 8-/11-Pin, Plug-In

Compatible IDEC Socket
SR Series
(Optional panel mount adaptor available.)

GT3A Series



Contacts

Form: Delayed SPDT
Delayed SPDT +
Instantaneous SPDT
Delayed DPDT

Output: 250V AC, 5A
30V DC, 5A

Operating Voltages:
100-240V AC
12V AC/DC
24V AC/DC

Operation Modes

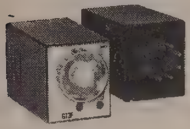
Multi-Mode
- ON-Delay, Interval, Cycle, Cycle ON
- ON-Delay, Cycle, Signal ON/OFF, OFFDelay (w/Input)
- Interval ON, Single-Shot Cycle, Signal ON/OFF Delay, Signal OFF Delay (w/Input)
- Single-Shot, Single-Shot ON Delay, Single-Shot, Signal ON/OFF Delay (w/Input)

Timing

Time Range: 0.05 sec to 180 hrs
Repeat Accuracy: 0.2%
Reset Time: 60 msec, max.
Terminals: 8-/11-Pin, Plug-In

Compatible IDEC Socket
SR Series
(Optional panel mount adaptor available.)

GT3F Series



Contacts

Forms: Delayed SPDT
Delayed DPDT

Output: 250V AC, 5A
30V DC, 5A

Operating Voltages:
100-120V AC
200-240V AC
24V DC

Operation Modes
- Power OFF Delay
- Power OFF Delay (w/Reset Input)

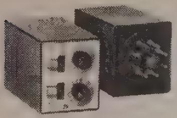
Timing

Time Range: 0.05 sec to 180 sec.
6 sec to 10 min
Repeat Accuracy: 0.2%

Terminals: 8-/11-Pin, Plug-In

Compatible IDEC Socket
SR Series
(Optional panel mount adaptor available.)

GT3W Series



Contacts

Form: Delayed SPDT +
Delayed SPDT

Output: 250V AC, 3A
30V DC, 1A

Operating Voltages:
100-120V AC
200-240 V AC
24V AC/DC

Operation Mode
- Recycle
(Dual Timing Adjustment)

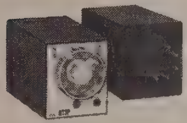
Timing

Time Range: 0.1 sec to 1 hr
0.6 sec to 6 hrs
Repeat Accuracy: 0.2%
Repeat Time: 0.1 sec, max.

Terminals: 8-/11-Pin, Plug-In

Compatible IDEC Socket
SR Series
(Optional panel mount adaptor available.)

GT3P Series



Contacts

Form: Triac One Circuit (AC)
Transistor
One Circuit (DC)

Output: 250V AC, 0.6A
28V DC, 100mA

Operating Voltages:
100-240V AC
24 V AC/DC

Operation Modes
- Sequence
(Variable Ratio Duty)

Timing

Time Range: 0.01 sec to 10 min
Duty Ratio: 0 to 100% variable
Repeat Accuracy: 0.2%
Reset Time: 60 msec, max.

Terminals: 8-/11-Pin; Plug-In

Compatible IDEC Socket
SR Series
(Optional panel mount adaptor available.)

RTE Series

Contacts

Form: DPDT

Output: 240V AC, 10A
30V DC, 10A

Operating Voltages:
120V AC
12V AC/DC
24V AC/DC

Operation Modes
- ON Delay, Interval
- OFF Delay, Single Shot**Timing**

Time Range: 1 sec to 10 hrs
Repeat Accuracy: 0.2%
Reset Time: 0.1 sec, max.

Terminals: 8-Pin/Blade, Plug-In
11-Pin/Blade, Plug-In

Compatible IDEC Socket
SR Series
(Optional panel mount adaptor available.)

DIN Rail Mount Sockets (IDEC offers a complete line of "Finger-Safe" DIN rail mount sockets, panel and PC mount sockets)

SR Series

Type: 2-Pole, 8-Pin Plug-In
3-Pole, 11-Pin Plug-In
Ratings: 10A/300V, 15A/300V

SH Series

Type: 1-4 Pole, Blade, Plug-In
Ratings: 10A/300V

SY Series

Type: 2 & 4-Pole, Solder, Plug-In
Ratings: 7A/300V

Custom Engineered Electronic Controls and Sensors

INFRARED SENSOR

Our Infrared Proximity Sensor is one of the latest developments where hygiene is a vital issue, such as in restaurants, hospitals, and public washrooms. When the IR beam detects an object it turns on a device. A preset timer turns off the device. This design provides the engineer with a myriad range of new product development possibilities. The touchless concept is currently being extended to include hand dryers, soap dispensers, automatic water-flow control, and closet flushers.

MODULAR TIMER ASSEMBLY

A PC Board using the standard ICS, Inc. timing modules may be designed to fit a customer's logic controls criteria.

SOLID STATE SEQUENCE CONTROL

A custom designed sequence control is used to overcome the critical problem of occluded surfaces in industrial dust collection cyclones. Another type of sequencer designed and manufactured by ICS, Inc. controls the crucial directional strobe lights used at airports.

SOLID STATE SENSORS AND TIMING CONTROLS

Current Sensing Relays & Monitors, Voltage Sensors, Motor Speed Controls, Machine Controls, Timing Controls, True Off Delay TDR, Flashers, Vending Controls, Garbage Compactor, Incinerator, and Dispensing Controls.

MICROPROCESSOR CONTROLS

TIME DELAY RELAYS

KG 1

KG 2
KG 3

KG Series **Time Delay Relay**/Chassis Mount

Thick Film Hybrid Timing Element, Heavy Duty Long Life Relay, Stand off for Chassis Mounting, 1/4" Quick Connect Terminals, Time Ranges from .1 to 300 sec*, On Board Time Adjustment Pot.

OUTPUT RELAY RATING: 10 Amps resistive or 1/3 HP @ 120 VAC.
REPEAT ACCURACY: Fixed conditions = ± 3 %, OVERALL ±10%. over -10° to 70° C.
SIZE: 2.1" sq. x 1.8" high, 1/4" Q.C. terminals.

Ordering Code: KG ___ ___ ___

Timing Actions:

ON Delay	(1).
OFF Delay	(2).
INTERVAL Delay	(3)

N/A in all voltages.

Timing Ranges:

Standard:		Non-standard:	
.1 to 1 sec.	(1).	1 to 10 sec.	(5).
.5 to 5 sec.	(2).	5 to 50 sec.	(3).
3 to 30 sec.	(7).	6 to 60 sec.	(8).
30 to 300 sec.	(4).	12 to 120 sec.	(6).
		*Special time.	(0).

Input Voltages:

Standard:		Non-standard:	
24 VAC	(2).	12 VAC	(7).
120 VAC	(1).	240 VAC	(5).
12 VDC	(8).	48 VDC	(6).
24 VDC	(4).	110 VDC	(3).

OP41
OP43

OP42

OP4 Series **Time Delay Relay**/ Plug In

Thick Film Hybrid Timing Element, Heavy Duty Long Life Relay, Enclosed Octal Plug In Base, LED Operation Indicator, Time Ranges from .1 to 300 sec*, Built in Time Adjustment Pot with Knob.

OUTPUT RELAY RATING: 10 Amps resistive or 1/3 HP @ 120 VAC.
REPEAT ACCURACY: Fixed conditions = ± 3 %, OVERALL ±10 %. over -10° to 70° C.
SIZE: 2.0 " sq. x 4.0" high, Action 1 & 3= 8 pin octal base. Action 2 = 11 pin round base.

Ordering Code: OP4 ___ ___ N ___

Timing Actions:

ON Delay	(1).
OFF Delay	(2).
INTERVAL Delay	(3)

N/A in all voltages.

Timing Ranges:

Standard:		Non-standard:	
.1 to 1 sec.	(1).	1 to 10 sec.	(5).
.5 to 5 sec.	(2).	5 to 50 sec.	(3).
3 to 30 sec.	(7).	6 to 60 sec.	(8).
30 to 300 sec.	(4).	12 to 120 sec.	(6).
		*Special time.	(0).

Input Voltages:

Standard:		Non-standard:	
24 VAC	(2).	12 VAC	(7).
120 VAC	(1).	240 VAC	(5).
12 VDC	(8).	48 VDC	(6).
24 VDC	(4).	110 VDC	(3).

OP45

OP46

OP4 Series **Recycle Timer**/ Plug In

Digital Countdown Timing Module, Heavy Duty Long Life Relay, Enclosed Octal Plug In Base, LED Operation Indicator, Time Ranges from .1 to 10 hrs*, Built in Time Adjustment Pot with Knob.

OUTPUT RELAY RATING: 10 Amps resistive or 1/3 HP @ 120 VAC.
REPEAT ACCURACY: Fixed conditions = ± .5 %, OVERALL ± 3 %. over -10° to 70° C.
SIZE : Action 5 = 2.0" sq. x 4.0" high, Action 6 = 1.8" W x 2.4" L x 3.6" H, 8 pin octal base.

Ordering Code: OP4 ___ ___ ___ ___

For action 5, insert "N" here.
For action 6, insert time range here.

Timing Actions:

RECYCLE Timer (OFF & ON times are equal, single adjustment).	(5)
RECYCLE Timer (OFF & ON times independently adjustable).	(6)

Timing Ranges:

Standard:		Non-standard:	
.1 to 10 sec.	(A).	10 - 600 min.	(C).
1 to 60 sec.	(D).	*Special time	(0).
10 to 600 sec.	(B).		
1 to 60 min.	(E).		

Input Voltages:

Standard:		Non standard:	
24 VAC	(2).	12 VAC	(7).
120 VAC	(1).	240 VAC	(5).
12 VDC	(8).	48 VDC	(6).
24 VDC	(4).	110 VDC	(3).

International IOR Rectifier

MICROELECTRONIC POWER IC RELAYS

ChipSwitch® Solid State Relay

UL, CSA, VDE Rated

The ChipSwitch relays utilize power integrated circuits for AC power line switching while maintaining turn-on at zero voltage crossing and turn-off at zero current crossing. They are a compact, low cost, and highly reliable interface for isolating and switching AC loads such as solenoids, valves, lamps, contactors, small motors, and heaters from low level DC signals.

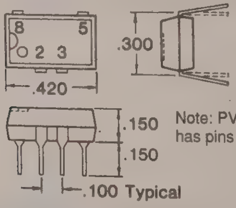
BOSFET® PhotoVoltaic Relay

International Rectifier Photo-Voltaic Relays utilize a unique power integrated circuit termed a BOSFET to form a solid state replacement for signal level electromechanical relays. They feature high speed, zero offset voltage, low pick-up power, miniaturization, and are widely applied in instrumentation, multiplexing, automatic test equipment, thermocouple switching and telecommunications for general purpose switching of AC/DC analog and digital signals. The PVI isolators provide a DC output with a 2500VAC isolation level for driving MOSFETs, IGBTs and serving as an isolated DC bias.



Note: PVI1050 has pins 6, 7.

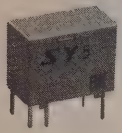
Sub Miniature Printed Circuit Board Relays

SY RELAYS

1 Amp SPDT
L — 0.492″,
W — 0.291″,
H — 0.374″



CONTACT DATA

Arrangement — 1 Form C

Material — Gold overlay silver-palladium

Resistance — Max. 100 mΩ (initial value)

Ratings — 0.5A, 120V AC or 1A, 24V DC (resistive) switched
2.0A carrying curent

Life Expectancy — Mechanical: Min. 5 million operations
Electrical: SY Min. 150,000 operations at rated load

COIL DATA

Voltages — 1.5 to 24V DC

Power (at 20°C) —
Operate — 0.075 watt
Nominal — 0.15 watt

Operate (at 20°C) — 70% of nominal voltage

Duty — Continuous

GENERAL DATA

Insulation Resistance — 100 MΩ minimum at 500V DC

Dielectric Strength — 500V AC (50, 60 Hz), between open contacts
1000V AC between contacts and coil

Temperature Range — −40°C to +90°C

Time Values (approx.) — Operate 1.5 mS, Release 1 mS (at nominal voltage)

Vibration Resistance — 20G (10 ~ 300 Hz) amplitude 3 mm

Shock Resistance — 50G

Mounting — For direct printed circuit mounting on grid spacing of 2.54 mm (0.1 in.)

Approximate Weight — 1.7 gr (0.06 oz.)

Enclosure — Polybutylene terephthalate (PBT)

Nominal Coil Voltage	Coil Resistance	Operate Voltage	Type No.	List Price
1.5	15	1.05	SY-15-K	$2.89
3	60	2.1	SY-3-K	$2.89

CONTACT DATA

Arrangement — 2 Form C, 2 Form D

Material — Gold overlay silver-palladium

Resistance — Max. 100 mΩ (initial)

Ratings — 0.5A 120V AC or 1A 24V DC (resistive)

Life Expectancy — Mechanical: Min. 20 million operations
Electrical: Min. 500,000 operations at 1A 24V DC
Min. 200,000 operations at 0.5A 120V AC

COIL DATA

Voltages — 4.5 to 48V DC

Power (at 20°C) —
Operate — 0.075 watt (0.098 watt for 18V, 24V coil, 0.138 watt for 48V coil)
Nominal — 0.15 watt (0.2 watt for 18V, 24V coil, 0.3 watt for 48V coil)

Operate (at 20°C) — 68 ~ 71% of nominal voltage

Duty — Continuous

GENERAL DATA

Insulation Resistance — 1000 MΩ min. at 500V DC

Dielectric Strength — 500V AC between open contact
1000V AC between all other conductors

Temperature Range — −40°C ~ +85° at nominal voltage

Surge Strength — 1500V between all conductors

Time Values (max.) — Operate 6 ms, Release 3 ms at nominal voltage

Vibration Resistance — 10G (10 ~ 55 Hz)

Shock Resistance — 10G 11 ±1 ms) — Unerror, 100G (6 ±1 ms) — Destruction

Enclosure — Polybutylene terephthalate (PBT)

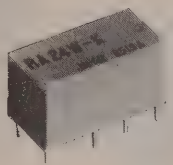
TAKAMISAWA ELECTRIC CO., LTD.

Sub Miniature Printed Circuit Board Relays

RA RELAY



1 Amp DPDT Relay
L — 0.795″
W — 0.394″
H — 0.394″

CONTACT DATA

Arrangement — 2 Form C (DPDT)
Material — Gold overlaid silver palladium alloy vs silver palladium alloy
Resistance — Max. 100 mΩ (Initial)
Rating — 24V DC 2A, or 120V AC 0.5A
Life Expectancy — Mechanical: Min. 20 million operations
Electrical: Min. 500,000 operations at 24V DC 1A
Min. 200,000 operations at 120V AC 0.5A
Max. Carrying Current — 2A

COIL DATA

Voltages — 1.5 to 48V DC

Power (at 20°C) — Operate:

Operate:	Standard	100–200 mW
	Single winding latching	35~100 mW
	Double winding latching	75~180 mW
Nominal:	Standard	200~400 mW
	Single winding latching	75~200 mW
	Double winding latching	150~360 mW

Operate (at 20°C) — Less than 70% of nominal voltage
Duty — Continuous

GENERAL DATA

Insulation Resistance — 1000 MΩ at 500V DC
(Expect between P & S coil)
Dielectric Strength — 1000V AC between open contact
1500V AC between all other conductors
(Expect between P & S coil)
Temperature Range — −40°C~+80°C (RA-W, RA-WN, RAL-W, RAL-DW, RAL-WP, RAL-DWP)
−40°C~+70°C (RA-WM, RAL-DWM), at nominal voltage, Non charring Contact
Surge Strength — 1500V between coil and contact, adjacent contacts
Time Value (Max.) — Operate: (RA-WM, RAL-DWM) 4 mS
(RA-W, RA-WN, RAL-W, RAL-DWN, RAL-WP, RAL-DWP) 6 mS
Release: (RA-WM) 3 mS
(RA-W, RA-WN, RAL-DWM) 4 mS
(RAL-W, RAL-DWN, RAL-WP, RAL-DWP) 6 mS, at nominal voltage
Vibration Resistance — 30G (10~55 Hz) Unerror
30G (10~55 Hz) Destruction
Shock Resistance — 50G (11 ±1 mS) Unerror
100G (11 ±1 mS) Destruction
Enclosure — Polybutylene terephthalate (PBT)

Notes:
- If correct polarity is not applied to the coil terminals, relay does not operate properly.
- To release latched contact, polarity to be applied to coil terminals should be reversed.

* P only. ** S only.

Notes

- As to the positive (+) symbol of each value, such as working voltage, positive working voltage, open voltage and reverse working voltage, positive (+) electrode of power source should be connected to the positive (+) terminal of pin arrangements.
- Reverse working voltage for wirewound latch type.
As to the negative (−) symbol, positive (+) electrode of power source should be connected to negative (−) terminal of pin arrangements.

JAPAN

CONTACT DATA

Arrangement — 1 form C (SPDT bifurcated)
Ratings — 24V DC 10 mA, 1W at 900 MHz
Resistance — 100 mΩ max. (initial value)
Max. Current — 100 mA DC
Max. Voltage — 30V DC
Max. Power — 1W DC, 10W at 900 MHz
Life Expectancy — Mechanical: 1,000,000 operations min.
Electrical: 300,000 operating min. at rated load

COIL DATA

Voltage — 1.5 to 48V DC
Power — (at 20°C)

Type	Operate	Nominal
Single Winding Non Latching	0.1W (0.11W for 48V coil)	0.2W (0.22W for 48V coil)
Single Winding Latching	0.1W	0.2W
Double Winding Latching	0.2W	0.4W

Operate wattage less than 70% of nominal voltage

GENERAL DATA

Insulation Resistance — 1000 MΩ min. at 500V DC (UMIL-D, except between P.S. Coil)
Dielectric Strength — 500V AC between open contacts, between contacts and earth
1000V AC between coil and other terminals
Temperature Range — −30°C ~ +80°C at nominal voltage
Time Value — 6 msec max. at nominal voltage (UMI Release Time 5 ms)
Vibration Resistance — 30G (10 ~ 55 Hz) Destructive
20G (10 ~ 55 Hz) Unerring
Shock Resistance — 100G (6 msec) Destructive
50G (11 msec) Unerring
} reference value

HIGH FREQUENCY CHARACTERISTICS

Isolation — 60 dB min. at 900 MHz
Insertion Loss — 1 dB max. at 900 MHz
V.S.W.R. — 1.2 max. at 900 MHZ
(Impedance of the measuring devices is 75Ω)

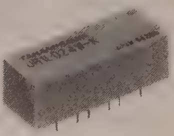
Notes

- As to the positive (+) symbol of each value, such as working voltage, positive working voltage, open voltage and reverse working voltage, positive (+) electrode of power source should be connected to the positive (+) terminal of pin arrangements.
- Reverse working voltage for wirewound latch type.
  As to the negative (−) symbol, positive (+) electrode of power source should be connected to negative (−) terminal of pin arrangements.

UR RELAY



CONTACT DATA

Arrangement—2 Form C (DPDT bifurcated contact)
Ratings—24VDC 10mA, 1W at 900 MHz
Resistance—100 mΩ max. (Initial value)
Max. Current—100 mA DC
Max. Voltage—30 VDC
Max. Power—1WDC, 10W at 900 MHz
Life Expectancy—Mechanical: 1,000,000 operations min.
Electrical: 300,000 operations min.

Notes • If correct polarity is not applied to the coil terminals, relay does not operate properly. • To release latched contact, polarity to be applied to coil terminals should be reversed. • Since this is the polarized relay, Confirm the relays performance in the actual circuit, prior to use. When relays are expected to be mounted very closely together or to be used under strong magnetic fields.

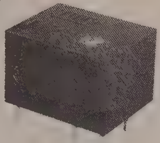
LZ RELAY



5 Amp SPDT
L — 0.843″
W — 0.646″
H — 0.583″

CONTACT DATA

Arrangement — 1 Form C

Material — 5A type: Gold overlay silver-nickel alloy (single)
3A type: Gold overlay silver (single)
1A type: Gold overlay silver-palladium alloy (bifurcated)

Load — 5A type: 5A @ 30V DC or 120V AC, 4A @ 240V AC resistive, ⅛ HP
3A type: 3A @ 30V DC or 120V AC, 2.5A @ 240V AC resistive, $^{1}/_{10}$ HP
1A type: 1A @ 30V DC or 120V AC, resistive

Life — Mechanical: 20 million operations minimum
Electrical: 0.1 x 10^6 operations minimum at rated load

Timing — Operate: $<$ 5 ms (standard type), $<$ 6 ms (high sensitive type)
Release: $<$ 2 ms

COIL DATA (@ 20°C)

Operate Power — 210 mW (standard type), 150 mW (high sensitive type)

Nominal Power — 450 mW (standard type), 330 mW (high sensitive type)

Maximum Power — 1.4W

GENERAL DATA

Insulation Resistance — 250 MΩ at 500V DC

Dielectric Strength — 750V AC between open contacts
2000V AC between all other points

Temperature Range — standard type −40°C to +70°C
sensitive type −40°C to +80°C

Vibration Resistance — 15G (10-55 Hz)

Shock Resistance — 15G (11 ms ±1 ms)

Approximate Weight — 8 gr (0.28 oz.)

Enclosure — Standard — polycarbonate
Washable or sealed — PBT

Surge Strength — 3000V

JS RELAY

L—1.142"
W—0.394"
H—0.492"

CONTACT DATA

Arrangement—1 form A or 1 form C
Material—Gold plate silver alloy
Resistance—Max. 30 mΩ (at 1A 6 VDC)
Rating—8A 250 VAC/24 VDC (Resistive)
Max. Switching Power—2,000 VA/192 W
Max. Switching Voltage—250 VAC/150 VDC
Max. Switching Current—8A
Max. Carrying Current—10A
Life Expectancy—Mechanical: 5 x 10^6
Electrical: 1 x 10^5 (Rated load)

COIL DATA

Nominal Voltage—5 ~ 60 VDC
Power (at 20°C)—Nominal: 220 ~ 280 mW
Operate: 110 ~ 140 mW
Operate & Release Voltage (at 20°C)—See back side
Max. Continuous Voltage (at 20°C)—Nominal Voltage x 225%

GENERAL DATA

Insulation Resistance—1.000 MΩ (at 500 VDC)
Dielectric Strength—1000 VAC (open contacts)
5000 VAC (coil and contacts)
Surge Strength—10kV (at 1.2 x 50μs Surge wave)
Temperature Range— −40°C ~ +85°C
Time Value (at Nominal Voltage)—Operate: Max. 10 ms
Release: Max. 5ms
Vibration Resistance—
Misoperation: 10 ~ 55 Hz at double amplitude 1.65 mm
Endurance: 10 ~ 55 Hz at double amplitude 3.3 mm
Shock Resistance—Misoperation: 100 m/s^2 (11=^{1}ms)
Endurance: 1000 m/s^2 (6=^{1}ms)
Weight—Approx. 5g
Enclosure—PBT

JENNINGS VACUUM CONTACTORS

Vacuum Contactors are used to control large amounts of DC power and RF currents with ratings up to 50 kv and currents up to 600 Amperes continuous. These contactors are recommended wherever high voltage capability, small size, and high speed operation with a long and low maintenance life are important. Applications include primary control of power supplies, industrial motors, and induction heating equipment, RF system tap changing, and fault protection of high power transmitters. The 18 page catalog provides complete specifications with a variety of specific applications for 3-pole, high voltage AC and DC, RF contactors and overcurrent relays actuated by solenoid, air or motor drives.

JENNINGS

VACUUM/GAS RELAYS

Relay Testing

Jennings operates test facilities to provide all environmental, high voltage, and radio frequency (RF) test parameters. All relays are individually tested prior to shipment for pull-in voltage, timing characteristics, contact resistance, and dielectric strength.

Vibration, shock, humidity, salt spray, temperature effects, current load and reliability tests are regularly performed on a sampling basis.

Mechanical life reliability tests are performed on a sample basis with equipment that only passes relays which cycle with proper sequences of contact operation. Some relay types have been checked to more than 10^8 operations.

JENNINGS VACUUM/COAXIAL RELAYS

Applications for these units include high speed switching from omnidirectional to directional antennas, transmit-receive switching, and switching between transmitters for standby control.

Other applications include crossbar matrices and switching trees, CCTV, CATV, and microwave telemetry and data acquisition links, as well as general coaxial instrumentation.

Jennings vacuum coaxial relays have a recorded history of dependable, maintenance free operation. Because of this, they were chosen for ground and airborne applications for the tracking network of the Apollo program and the Atlantic Missile Range Communications.

ATTENUATOR												
RC275576G24F	90 @ 30 MHz 2 MW Peak* Spec. Order	0-600	1.1:1 Max to 400 MHz	60 @ 30 MHz	26.5 VDC Latching	0.01 dB	19	SPST	3 1/8"	DPDT	50 ms	13.0

* Power rating applies when connecting line pressurized 45 PSIA Dry Air or 31 PSIA Dry Nitrogen.

** ± 15%

† All measurements with a characteristic impedance of 50 ohms.

†† faster operate times can be obtained on most units by coil pulse circuits. Information available from factory.

NOTE: This power ratings is for the frequency at which the relay is most commonly used. The power rating for any point in the frequency range of the unit other than that shown may be obtained by consulting factory.

Kilovac®

THE EXPERTS IN HIGH VOLTAGE RELAYS
AND DC POWER SWITCHING DEVICES.

DC Relays & Contactors

A NEW GENERATION OF DC CONTACTORS for the most demanding Industrial and Aerospace Applications:

- Electric Vehicles
- Industrial Control
- Power Distribution Systems
- Safety Disconnect
- Circuit Protection
- Transfer Switching

Kilovac's unique vacuum-sealed design provide significant advantages when switching tough DC loads:

- Lightest Weight and Smallest Size
- Bi-directional Switching
- Lowest Power Consumption
- High Overload Capability
- Sealed Contacts
- Rugged Design

VOLTAGE INDEPENDENT SWITCHES result in Kilovac's DC relays and contactors being able to switch a broad range of voltages from 24Vdc to 1000Vdc, with overload capabilities up to 1500A. Ratings shown are at 270Vdc, which is an industry standard for aerospace applications. Contact Kilovac sales representative for ratings at other voltages.

INDUSTRIAL AND AEROSPACE APPLICATIONS. Kilovac's DC relay and Contactors were originally proven in tough and demanding manned space applications like the Space Station Freedom, aerospace rated parts have an "AP" prefix part number.

By changing the environmental specifications, eliminating some of the aerospace testing and controls, and applying cost reduction measures, these aerospace products are now available at economical prices for industrial applications. Industrial rated parts have a "PD" prefix part number. These parts can be found in Kilovac's "DC Relay and Contactor" catalog.

REMOTE POWER CONTROLLERS AND "SMART" CONTACTORS. All of Kilovac's DC power switching relays and contactors are available as remote power controllers with electronic sensing and control to provide short circuit protection. This allows the relay or contactor to function as a circuit breaker as well as a relay.

Kilovac®

THE EXPERTS IN HIGH VOLTAGE RELAYS
AND DC POWER SWITCHING DEVICES.

High Voltage Relays

KILOVAC CAN PROVIDE THE SOLUTION TO YOUR HIGH VOLTAGE AND DC SWITCHING NEEDS

Test Equipment

Aerospace Power Distribution and Control

Medical Equipment

RF and Communications Equipment

Rapid Transit and Electric Vehicles

KILOVAC CAN QUICKLY MEET YOUR REQUIREMENTS

Kilovac's extensive manufacturing capability allows us to respond to your needs with a wide variety of special modifications and special relays, such as the following:

- Special high voltage connectors or wire
- Relays packaged with other components
- Multiple function relay packages
- Special coil voltages

YOU CAN RELY ON KILOVAC

High voltage circuits are often difficult to design and debug. Kilovac has 28 years of experience working with customers' like you to solve your switching problems. We can often supply engineering samples for test and evaluation in your circuit or conduct the tests in our well-equipped test lab.

Don't experiment with high voltage. . . rely on the proven experience of Kilovac.

Kilovac® High Voltage Relays

THE EXPERTS IN HIGH VOLTAGE RELAYS
AND DC POWER SWITCHING DEVICES.

FEATURES OF VACUUM AND GAS-FILLED RELAYS

- Smaller size, lighter weight for a given rating
- Extremely low and stable contact resistance in vacuum relays
- No contact oxidation due to arcing
- Fast operate times
- High resistance to thermal and mechanical shock
- Capable of switching large capacitive loads using gas-filled relays.
- Safe for use in corrosive or explosive atmospheres
- Can be mounted in any orientation
- No contact maintenance
- Usable at frequencies above 32 MHz
- Rapid arc extinction when power switching
- Lower coil power due to small contact gaps

Kilovac®

THE EXPERTS IN HIGH VOLTAGE RELAYS
AND DC POWER SWITCHING DEVICES.

High Voltage Relays

TYPICAL APPLICATIONS

TEST EQUIPMENT - Electrostatic discharge testing, dielectric testing, cable and harness testing.

AEROSPACE POWER SWITCHING - Aircraft, space systems, submarine, and ground equipment where 48 Vdc, 155 Vdc, 270 Vdc, and 20 KHz switching and control is required.

MEDICAL INSTRUMENTS - Heart defibrillators, surgical lasers, magnetic resonance imaging (MRI), electrophoresis.

GENERAL - Safety interlock applications, high voltage power supplies, polarity reversal, nuclear instrumentation, switching in explosive or corrosive atmospheres.

ELECTRIC VEHICLES - Battery disconnect, inverter precharge, and climate control relays.

TRANSIT - Lighting, heating, and air conditioning relays up to 1000 Vdc ratings.

RADAR - Pulse forming networks, modulators/transmitters, TWT and klystron switching.

COMMUNICATIONS - H.F. SSB radio, digital antenna couplers and tuners,transmit/receive switching.

LASERS - Pulse forming network discharge, safety interlock, simmer circuit isolation, Pockels cell isolation.

UTILITIES - Nuclear industry approved DC relays for 110 Vdc control circuits.

SEMICONDUCTOR PROCESSING - Multiple target switching.

High Voltage Relays

VACUUM OR GAS AS A DIELECTRIC?

Both vacuum and gas-filled relays are offered by Kilovac, but each has unique characteristics which should be considered.

VACUUM RELAYS OFFER:

- Low stable contact resistance for dry or low level switching
- Good performance in power switching that requires load interruption.
- Ideal performance for RF applications
- Contacts remain clean and oxide-free under all conditions.

GAS-FILLED RELAYS OFFER:

- The best choice for power switching that requires only "making" of load.
- Superb performance in capacitive discharge applications.
- Best performance for applications above 15kV
- Widely used for "bounce-free" characteristics
- Lowest leakage current

Kilovac® High Voltage Relays

THE EXPERTS IN HIGH VOLTAGE RELAYS
AND DC POWER SWITCHING DEVICES.

LOW LEAKAGE, HIGH VOLTAGE RELAYS

Kilovac has specialized relays for test equipment and instrument applications which require very low leakage currents and/or very high insulation resistance. We can provide you with standard relays or special relays built for your application with leakage currents in the picoamp range and insulation resistance of 10^{13} or 10^{14} ohms.

KILOVAC MEDICAL RELAYS

Kilovac has supplied high voltage relays for a number of medical applications ranging from portable heart defibrillators to magnetic resonance imaging equipment.

Kilovac relays are used as polarity reversal switches in electrophoresis equipment to analyze DNA and kidney stone lithotrypters to discharge energy stored in high voltage capacitors.

The small size and high reliability of Kilovac relays make them ideally suited for portable, battery operated equipment.

STRICT STANDARDS OF QUALITY CONTROL

Kilovac maintains an on-going reliability test program to ensure that all relays continue to perform reliably time after time. In addition, since medical relays are often considered a "Critical Component" by the FDA, Kilovac maintains the required quality control and configuration control systems necessary to meet these strict standards.

LEACH®

SUBMINIATURE RELAYS

Quick Reference Guide

Leach products have been setting the standards in both technology and reliability for more than 70 years. Our products are aboard virtually every major U.S. airborne and commercial program involving aircraft, missiles, satellites and space launch vehicles as well as submarines, ships, tanks, and ground vehicles. This guide describes our relay product line ranging from 5 amp dry circuit subminiatures to 400 amp power contactors, time delay relays and solid state relays.

6900 ORANGETHORPE AVE., P.O. BOX 5032, BUENA PARK, CA 90622-5032 • (714) 739-0770 • TWX 910-596-2867 • FAX (714) 739-1713

SPECIFYING A FIXED TIME DELAY PERIOD

LEACH and the Military identify the time delay period in the same manner. A four-digit dash number specifies the delay period in milliseconds. The first three numbers are significant figures while the fourth indicates the number of zeroes to follow the first three.

Examples:
–1001 = 1,000 milliseconds (1 second)
–2502 = 25,000 milliseconds (25 seconds)
–5000 = 500 milliseconds (0.5 seconds)

In the case of a repeat cycle timer (flasher), a similar method is used. The dash number indicates the length of each cycle. (Note: each cycle is 50% on, 50% off).

Examples:
–2500 = 250 milliseconds cycle or 4 cycles/sec.
–1001 = 1,000 milliseconds cycle or 1 cycle/sec.
–6002 = 60,000 milliseconds cycle or 1 cycle/min.

USE AND SELECTION OF ADJUSTABLE TIMERS

Adjustable timers are useful in system prototyping or breadboard circuits where the precise time delay period is unknown. By the use of an external resistor, these devices are adjustable over a specific DECADE RANGE. Although any decade range within the overall timing range can be supplied, the following ranges are offered as standards:

0.1 to 1 seconds	(Specify –1001)
1.0 to 10 seconds	(Specify –1002)
5 to 50 seconds	(Specify –5002)
50 to 500 seconds	(Specify –5003)

Note from the above that in specifying a decade range, the four-digit dash number indicates the high or upper limit of the desired decade range.

The formula below provides the proper resistance value to achieve the desired time delay:

$$R_{ext} = \left(\frac{T_1}{T_0} - 1\right) 100{,}000 \text{ Ohms}$$

Where: R_{ext} = External resistance value (Ohms)
T_1 = Desired time in seconds
T_0 = Minimum time (low end of the decade range) in seconds

As an example, if using a 5 to 50 second adjustable timer and a 30 second delay is desired, the calculation is:

$$R_{ext} = \left(\frac{30}{5} - 1\right) 100{,}000 \text{ or } R_{ext} = 500 \text{ K Ohms}$$

Recommended resistors IAW MIL-R-55182 ⅛ WATT, 1% (RNC6OHXXXXFS).

QPL CROSS REFERENCE — MILITARY P/N TO LEACH P/N

Military P/N	Leach P/N	Operation Mode	Output	Timing Range (seconds)

M83726/30	TDH-8060/8061	Delay On Operate – Adjustable	10A, 2PDT	0.1 to 600[5]
M83726/31	TDH-8080/8081	Delay On Release – Adjustable	10A, 2PDT	0.1 to 600[5]

[1] Slash sheets 1, 2, 3 & 4 to MIL-R-83726 have been officially cancelled. DLA specified replacements: /28 replaces /1 and /3 and /29 replaces /2 and /4. Replacement units are smaller and lighter but are electrically and physically compatible with inactivated units.

[2] All adjustable timers use external resistor (not supplied) to adjust timing range.

[3] Each cycle 50% on, 50% off.

[4] "True" time delay on release requires no external power during timing period.

[5] Timing ranges above 500 seconds not MIL qualified.

SOLID STATE RELAY DESCRIPTIONS

LEACH Solid State Relays utilizes state-of-the-art custom integration and power MOSFET technology to provide sophisticated features plus optimized power output switching.

In both the Solid State Relay (LS06051B) and Solid State, True Current Sensing Relay (LS06102C), an isolated status pin is provided which acts as a trip indicator. A low status indicates the output has tripped off due to an over-current condition.

In the Solid State, True Current Sensing Relay (LS06102C), unique and proprietary circuit is used to provide an isolated, analog load current signal. After proper scaling, this signal gives the true load current value.

Both the LS06051B and LS06102C feature integrated short circuit, current overload, and thermal overload protection to protect both the unit and the system wiring. Optical isolation between input and output, while reducing size and cost, helps eliminate EMI and RFI usually present in transformer type isolation circuits. Buffered inputs enable the relay to be driven directly by standard CMOS or open collector TTL Logic. The LS06051B and the LS06102C are housed in a hermetic metal package to maximize heat dissipation.

These are two products from a family of products utilizing LEACH's functional block design concept. Additional features and isolated input/output pins are available.

SOLID STATE POWER CONTROLLER DESCRIPTIONS

LEACH Solid State Power Controllers feature reliable, troublefree switching together with short circuit and overload protection. Load current is continuously monitored, and the devices will shutdown within microseconds reacting to an overload condition.

In both Solid State Power Controller Products (LR06014N family and LR06025Q family), the status signal is derived from the load current and is reported via an optically isolated status output.

The LR06014N family is designed for operation in 28 VDC power systems with ratings from 1 to 4 amperes.

The LR06025Q family is designed for operation in 28 VDC power systems with ratings from 2 through 10 amperes.

Both the LR06014N family and LR0625Q family are enclosed in a hermetically sealed metal package to maximize heat dissipation.

POWER PRODUCTS MIL-SPEC POWER MONITORS

Time Delay Relays, Flashers, Voltage, Frequency, Phase Monitors

POWER AND VOLTAGE MONITORS

EQUIPMENT TYPES – Individual units monitor AC or DC voltage and line frequency for both high and low limits, and phase rotation for reversal/loss. Power monitors are also available incorporating any combination of these functions into a single unit. This equipment is available with factory set limits or as field adjustable.

FREQUENCY AND PHASE MONITORS

Logitek Frequency Monitors are used in applications where electrical systems must be de-energized or alarm devices activated when the power line frequency departs from the predetermined normal range of operations.

Logitek Phase Monitors are used to protect three-phase loads, particularly rotating components, from damage resulting from phase reversals or the absence of phase. Contacts may be used to disconnect the load, to operate an alarm, or both.

TIME DELAY RELAYS, SOLID STATE FLASHERS

The design of complex electrical distribution systems often requires certain operations be delayed or sustained for a precise interval of time. Combinations of various timing devices can be used for sequential startup or shutdown, load transfer or shedding, or delayed transfer to avoid race conditions. In addition, pulsers, interval timers, and flashers are used in applications, such as operating instrument panel warning lights or other annunciator devices, landing gear, door open indicators and navigation lights.

QUALITY ASSURANCE

Logitek's products are designed and manufactured in accordance with MIL-Q-9858A and MIL-I-45208. Our standard production 100-hour factory burn-in contributes to reliable, long-term performance, as demonstrated by an incredibly low 0.1% field reject rate.

CUSTOM & SPECIAL APPLCATIONS

Logitek's engineering department is available to discuss your applications of our product or to design special equipment to satisfy your system requirements.

MIL-SPEC & RUGGED INDUSTRIAL APPLICATIONS

TYPICAL ELECTRICAL SPECIFICATIONS

• **Input Voltage:**	115 VAC/208 VAC/230 VAC
• **Voltage:**	MIL-STD-704, Limits
• **Transients:**	1, 2, 3
• **Input Frequency:**	50 / 60 / 400 Hz
• **Sense Voltage:**	As required
• **Sense:**	As required
• **Frequency Accuracy:**	±1%
• **Phase Sequence:**	ABC
• **Time Delay (Pick-Up & Drop Out):**	250 milliseconds to 10 seconds factory set or field adjustable
• **Relay Contacts:**	DPDT, 3PDT
• **Contact Rating:**	2 amp, 10 amp
• **Contact Life:**	50,000 operations minimum

TYPICAL ENVIRONMENTAL SPECIFICATIONS

• **Temperature:**	-55°C to +125°C, -40°C to +85°C, -10°C to +70°C
• **Vibration:**	Per MIL-STD-810C, Method 514.2, Procedure 1, 50g's 11±1 millisecond any axis
• **Acceleration:**	Per MIL-STD-810C, Method 513.2, Procedure 1 & II, 10g's
• **Humidity:**	Per MIL-STD-810C, Method 507.1, Procedure 1
• **Altitude:**	Per MIL-STD-810C, Method 504.1, Category 6 equipment, sea level to 70,000 ft.

WARRANTY

We are proud to offer an industry leading 3-year warranty and have over 30 years of successful experience.

SS SERIES
SSA — SCR's back to back with A.C. control.
SSD — SCR's back to back with D.C. control.

ST SERIES:
STA — TRIAC with A.C. control.
STD — TRIAC with D.C. control.

SPECIFICATIONS

1. Current Rating: 8 to 90 Amps.
2. Minimum load current: 50 ma.
3. Temperature Range:
   a. Operating: −30°C to +80°C
   b. Storage: −28°C to +100°C
4. Duty: Continuous
5. Contacts: 1 Form A (SPNO)
6. Input control: A.C. Models
   a. Control voltage range: 90 — 280 VAC
   b. Must operate voltage: 90 VAC Max.
   c. Must release voltage: 10 VAC Min.
   d. Input impedance: 40,000 OHMS Min.
   e. Input current: 2mA max @ 120 VAC
7. Input control: D.C. Models
   a. Control voltage range: 3-32 VDC
   b. Must operate voltage: 3 VDC Max.
   c. Must release voltage: 1 VDC Min.
   d. Input impedance: 1,500 OHMS Min.
   e. Input current: 4mA max @ 5 VDC
8. Standard: Zero voltage turn on.
9. UL listed and certified.

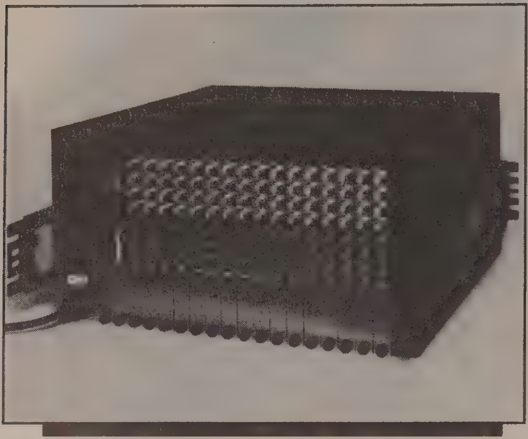
MATRIX SYSTEMS

MATRICES

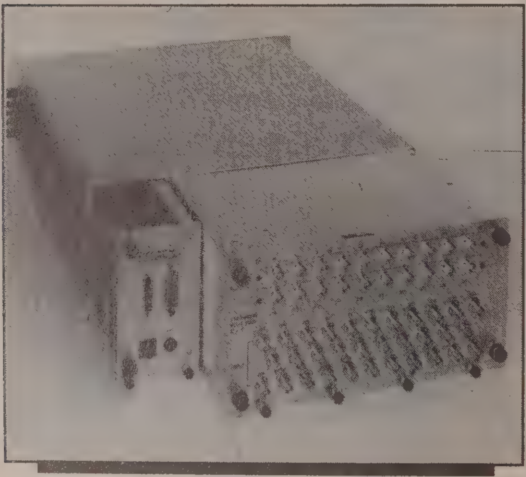


Model 10693
DC to 100MHz: Coaxial 32x32 Matrix

The 10693 is a programmable 32 in x 32 out blocking type coaxial matrix. Its special 3-Stage switching architecture allows full input to output crosspoint connections while reducing the number of actual crosspoints, increasing system performance, and lowering costs. Highly reliable reed switch contacts provide long life. The 10693 is also available in non-blocking versions for multiple output connections to a single input without loading.

- Wide bandwidth: DC to 100MHz
- Front panel LCD display and keypad
- Both RS-232C and IEEE-488 control ports included
- Simple input/output control commands
- Store/recall up to 99 matrix configurations (battery backed RAM)
- Standard BNC connectors (others available as options)
- Field replaceable plug-in modules

Price: $17,876

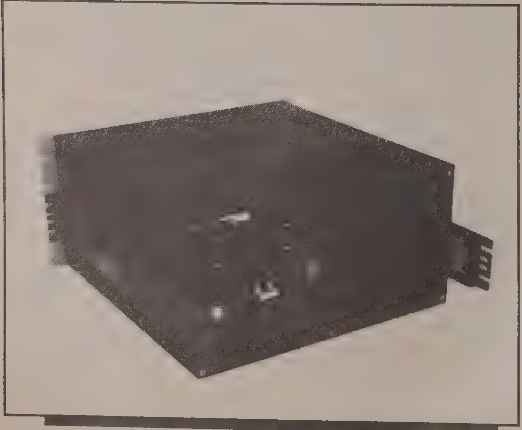


Model 10990 and 10991
DC to 250MHz: 16x16 and 32x20 Plug-in Matrix

These "fixed size" matrix plug-ins combine the latest advancements in switching technology into a compact, rugged, and high performance matrix configuration. Non-blocking and unity gain are built-in features providing the capability to connect one, or up to all outputs to a single input. The 16 x 16 matrix (Model 10991) is ideal for RF applications in the 5 to 250MHz range with a 50 ohm impedance. The 32 x 20 matrix (Model 10990) is designed for video or RF applications (75 ohm) up to 110Mhz. Additionally, the 10991 is DC coupled and can deliver +/-6 volts into a 75 ohm load. The plug-ins slide into the rear of the Model 11000 Mainframe which incorporates front panel keypad and LCD display, CPU, DC power supplies, and both RS-232C and IEEE-488 interfaces. Other sizes are available. Call the factory.

- Field replaceable plug-in design
- Front panel LCD display and keypad
- Both RS-232C and IEEE-488 control ports with simple control commands
- Store/recall up to 99 matrix configurations (battery backed RAM)
- Standard BNC connectors (others available as options)
- Lightweight and compact; cost effective

Price: Call factory



Model 10046
Digital/Analog: 12x24 (up to 25 wire) Bi-directional Matrix

Multi-wire switching is easily accomplished using the Model 10046 digital / analog switching system. Maximum switching capacity is 12 x 24 x 25-wire for switching twelve DB-25 type connectors to any of twenty-four DB-25 connectors. All twenty-five pins on the connectors switch together; or with a different dip switch setting on the boards, they may be switched as individual pairs. Maximum signal level is +/- 7volts. Other configurations are available too. Call the factory.

- Analog or digital signal routing (up to 5MHz)
- RS-232C, IEEE-488, or TTL control ports
- Simple input/output control commands
- Solid-State crosspoint elements
- Various connector types available
- Lightweight and compact

Price: $24,341 (for full configuration)

5177 North Douglas Fir Road, Calabasas, CA 91302
Phone: (818) 222-2301 Fax: (818) 222-2304

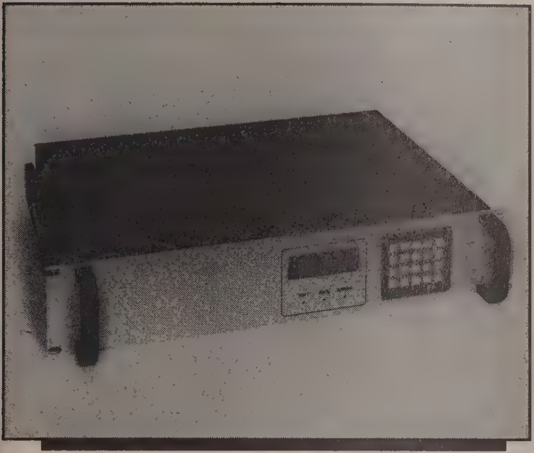
MATRIX SYSTEMS

MATRICES

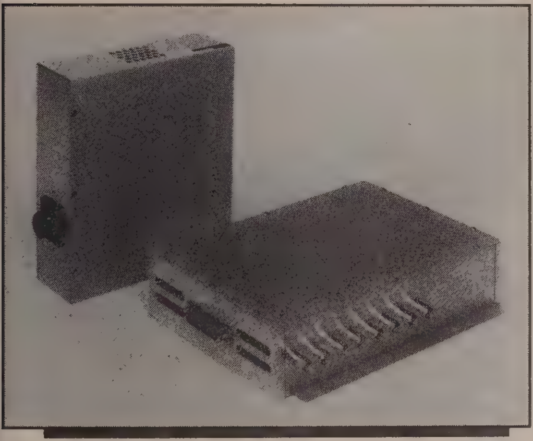


Model 10980
DC to 150KHz: 48x48 (2-wire) Matrix

The 10980 combines the latest advancements in switching technology into a compact, high density 48 in x 48 out two wire matrix configuration. Non-blocking and unity gain are built-in features providing the capability to connect one, or up to all outputs to a single input. True balanced 600 ohm inputs and outputs make it ideal for high performance audio applications, and the solid state matrix array yields ultra-high reliability and long life.

- Wide bandwidth: DC to 150KHz
- Front panel LCD display and keypad RS-232C or IEEE-488 control ports
- Simple input/output control commands
- Store/recall up to 99 matrix configurations (battery backed RAM)
- Standard "Telecon" connectors (others available as options)
- Lightweight and compact

Price: $9,950



Models B-4108 and 4108
DC to 600Mhz: 8x8 Coaxial Blocking Matrix Modules

Extremely wide bandwidth and compact size are the major features of the B-4108 and 4108 modules. With a frequency response of DC to 600MHz and DC to 500MHz (respectively), these modules lend themselves to a number of applications such as ATE, antenna switching, high resolution video, IF signals, or high speed ECL data. The B-4108 is a self-contained 8 x 8 blocking matrix requiring only DC power and a parallel TTL control input on the DB-25P connector. The unit is highly ruggedized for harsh environments. The Model 4108 is packaged in a lighter enclosure than the B4108 for plug-in integration into a larger matrix system. The maximum configuration using eight of the 4108 modules is a bi-directional 8 x 64 matrix, ideal for ATE applications.

- Compact and rugged construction
- Contains control logic and requires only TTL control input & DC power
- High reliability reed switch technology
- Industry standard BNC signal connectors (B-4108)

Price: $3,564 (B-4108-5V) or $2,700 (4108)

Models 10081A-50 and 10081A-75
DC to 900MHz: VXIbus 4x8 Coaxial Blocking Matrix

The 10081A module is a C-size message based VXIbus module with a very high performance 4 x 8 coaxial blocking matrix configuration. Ideal for automated test stations, it conforms to the VXIbus standard (version 1.3) to operate smoothly with other vendors' equipment. The 4 x 8 matrix configuration allows the user to connect up to four crosspoints at the same time with interlocking on the eight (8) axis to prevent accidental shorting. Seven segment displays indicate any closures within the matrix array.

- High performance SMA connectors (SMB's are optional)
- 50 & 75 Ohm versions
- User-friendly software commands
- Store / Recall up to 10 set-ups
- Message based control format
- Crosspoint status confirmation

Price: $2750

5177 North Douglas Fir Road, Calabasas, CA 91302
Phone: (818) 222-2301 Fax: (818) 222-2304

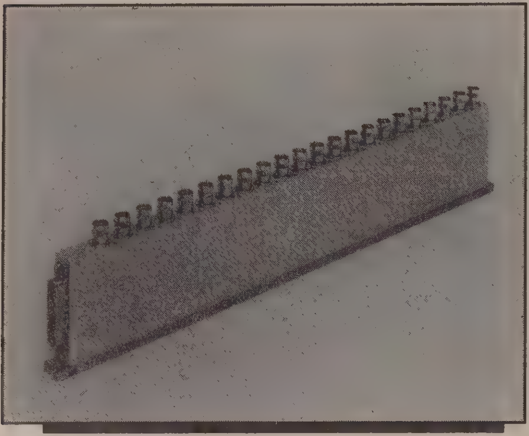
MATRIX SYSTEMS

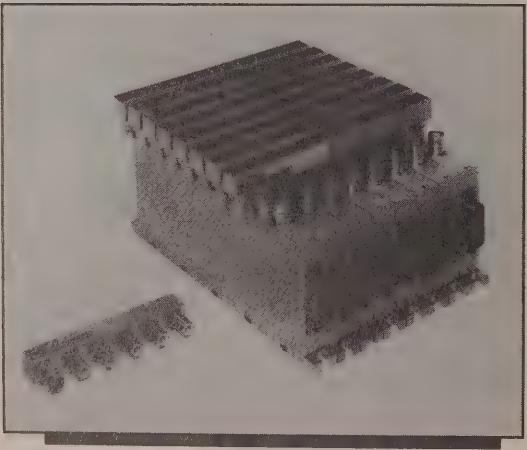
MODULES



7000 Series
DC to 800MHz: Coaxial Relay Modules (1xN)

Versatility and modularity are key features of the 7000 Series Coaxial Relay Modules. These 1xN type relays are available in sizes from 1x2 to 1x24. The 7000 Series is designed to maintain coaxial switching continuity over a wide range of environmental and electrical applications. Nine different types of contacts are available to choose from to tailor the module's configuration. The switching elements are constructed utilizing highly reliable reed switch technology.

- 7100 Standard Isolation (65dB @ 10MHz)
- 7200 Self-terminating (50, 75, or 93 ohm)
- 7300 High Isolation (65dB @ 100MHz)
- 7400 Highest Isolation (110dB @ 100MHz)
- 7500 High Power
- 7600 Self-terminating, High Isolation (50, 75, or 93 ohm)
- 7700 Mercury Wetted
- 7800 Twinaxial (shielded twisted pair - polarized)
- 7900 Triaxial (AKA: concentric twinaxial)



The frequency range of the 7000 Series is dependent on the size (number of throws) of the module. The smaller the number of throws, the larger the frequency range. The -1dB and -3dB points of a specific size may be approximated by the following formulas:

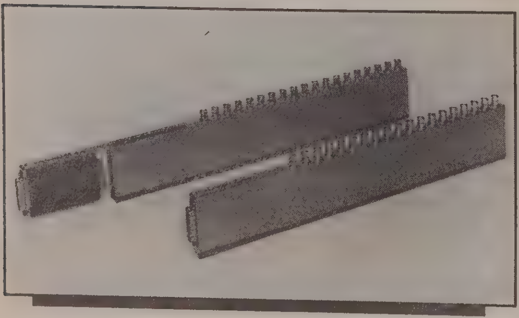
$$1320 \div (n - .13) = -1\text{dB point in MHz}$$
$$1760 \div (n + .20) = -3\text{dB point in MHz}$$

(where "n" is the number of throws)

Various switching systems are easily constructed by using the 9000 Series cross straps, or the 5100A Series power dividers. For example: to form a crosspoint matrix with 10 inputs and 5 outputs, five 7110 relay modules (1x10) and ten 9105 cross straps (5 position) are required. An example eight by eight matrix is shown in the photograph to the left, and a single 9105 cross strap.

Features:

- Rugged machined aluminum housing
- Low return loss (VSWR)
- Crosstalk is always better than Isolation
- Signal circuitry is isolated from control circuitry
- Specials (such as multiples in a single module) are easily accomplished
- Various signal connector types: BNC (std), SMA, TNC, F-Type
- Insulated shield (-I option), or insulated and switched shield (-IS option)
- Various coil voltages available from 5v to 48v (24v std)
- Coil suppression diodes are optional



L7000 Series
Same as above except with Built-in Control Logic

The 7000 Series is now available with built-in control logic to easily interface to system control equipment. The built-in control card provides a binary control input to twenty-four latches that control the relay coils. LED status indicators are visible from the top of the module to verify active positions. A unique status circuit provides a logical status feedback to the controlling device. The module requires both +5v (logic) and +24v (relay coils) which may be provided when installed into one of our systems.

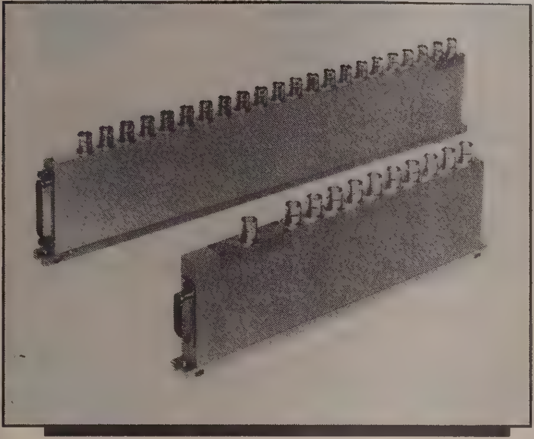
MATRIX SYSTEMS

MODULES

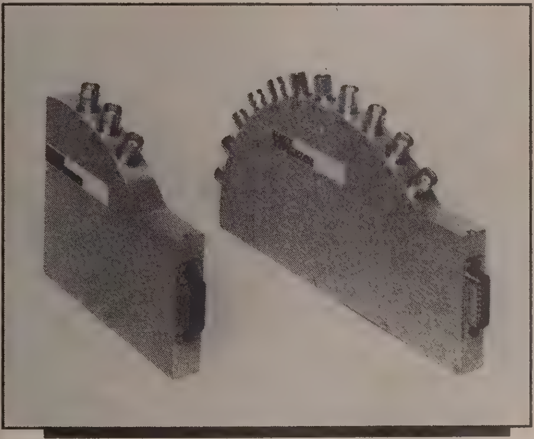


DC to 500MHz: Relay Modules with Built-in Amplifiers

Signal losses can be incurred in a switching system by power divider modules, attenuators, or even cabling. Non-blocking matrices incorporate power dividers and therefore have signal loss. Many applications require the switched signal to amplified to its original signal level (or even higher). To meet this need, amplifiers may be integrated within the 7000 Series relay modules. Gain of the amplifier is set at the factory, however a minor gain adjustment (±1dB) is available on most units. MSC engineers will help choose the proper amplifier for your specific application. The amplifier is connected to where the "common" signal output would normally be, allowing the relay to pick one of multiple inputs to connect to the built-in amplifier. The following amplifier types are available (50 or 75 ohm):

- DC to 65MHz amplifier (7000A)
- DC to 200MHz amplifier (7000B)
- DC to 200MHz driver amp (7000RFB)
- Various RF amplifiers 5 to 500MHz: Low noise figure types
  High intercept types

Consult Factory

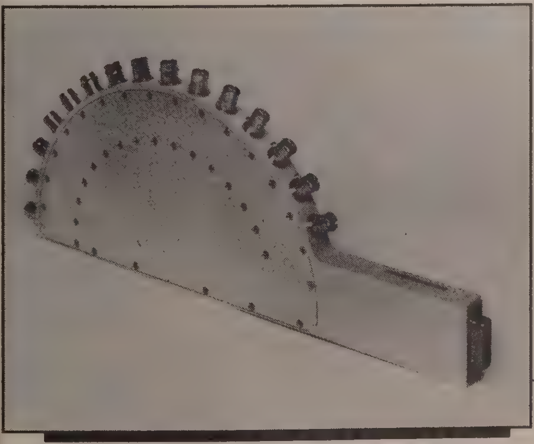


R7000 Series
DC to 1.5GHz: Radial Coaxial Relay Modules (1xN)

The unique construction of these high reliability reed switch technology relay modules gives them extra *wide* bandwidth which is required for some applications. The R7000 series is available in even sizes from 1x2, up to 1x12. Each of the six sizes have a different -3dB point, with the 1x2 having a -3dB point at 1.5GHz, and the 1x12 at 575MHz. Multiple modules may be configured together with either cross straps or power dividers (9000 Series or 5100A Series) to form a matrix. The series is available with many options to tailor the module to the specific needs such as connector types, coil voltages, non-terminating or self-terminating contacts, or coil suppression diodes.

- Rugged machined aluminum housing
- 50 and 75 ohm versions
- Standard signal connector types: BNC (std), SMA, F-Type, TNC
- IEEE-488 or RS-232C controllable (with additional modules)

Price: $380 Qty 1-9 Model R7402 (1x2)



RP7000 Series (PIN Diode)
5MHz to 1GHz: Solid-State Coaxial Relay Modules (1xN)

The new RP7000 Series combines the latest in PIN diode switch technology with built-in intelligence for maximum performance. A design approach similar to the R7000 has been utilized to maximize bandwidth of the RP7000 Series. The unique radial construction reduces *"un-used"* stubs of the signal path. Available in sizes up to 1x14, PIN diode elements are used to provide ultra-high reliability, however the upper bandwidth is dependent the number of throws. Multiple modules can be coupled with power dividers to form non-blocking matrices. Modules must be installed into a rack mountable chassis assembly to provide DC power and control. The chassis also provides IEEE-488 and RS-232C interfaces, plus front panel keypad (with LCD display).

- Various signal connector types (BNC standard)
- Solid-state PIN diode reliability
- Built-in status monitoring by RISC uProcessor

CHARACTERISTICS OF BATTERIES AND FUEL CELLS

System	Anode	Cathode	Theoretical battery		Practical battery		
			Voltage, V	Capacity, Ah/kg	Typical voltage, V	Capacity[a]	
						Wh/kg	Wh/dm^3
Primary:							
Leclanche	Zn	MnO_2	1.6	230	1.2	65	175
Magnesium	Mg	MnO_2	2.0	270	1.5	100	195
Organic cathode	Mg	*m*-DNB	1.8	1,400	1.15	130	180
Alkaline MnO_2	Zn	MnO_2	1.5	230	1.15	65	200
Mercury	Zn	HgO	1.34	185	1.2	80	370
Mercad	Cd	HgO	0.9	165	0.85	45	175
Silver oxide	Zn	AgO	1.85	285	1.5	130	310
Zinc-air	Zn	Air (O_2)	1.6	815	1.1	200	190
Li-organic electrolyte	Li	[b]	2.1-5.4	130-660	1.8-3.2	250	400
Secondary:							
Lead-acid	Pb	PbO_2	2.1	55	2.0	37	70
Edison	Fe	Ni oxides	1.5	195	1.2	29	65
Nickel-cadmium	Cd	Ni oxides	1.35	165	1.2	33	60
Silver-zinc	Zn	AgO	1.85	285	1.5	100	170
Silver-cadmium	Cd	AgO	1.4	230	1.05	55	120
Zinc-nickel oxide	Zn	Ni oxides	1.75	185	1.6	55	110
Zinc-air[c]	Zn	Air (O_2)	1.6	815	1.1	150	155
Cadmium-air[c]	Cd	Air (O_2)	1.2	475	0.8	90	90
Zinc-O_2	Zn	O_2	1.6	610	1.1	130	120
H_2-O_2	H_2	O_2	1.23	3,000	0.8	45	65
Reserve:							
Cuprous chloride	Mg	CuCl	1.5	240	1.4	45	65[d]
Silver-chloride	Mg	AgCl	1.6	170	1.5	60	95[d]
Zinc-silver oxide	Zn	AgO	1.85	285	1.5	30	75[e]
Thermal	Ca	[b]	2.8	240	2.6	10	20[f]
Ammonia-activated	Mg	*m*-DNB	2.2	1,400	1.7	22	60[g]
High-temperature	NA	S	2.1	685	1.8	200	[h]
	Li	S	2.2	1,150	1.8	200	[i]
Solid electrolyte	Ag	Polyiodide	0.66	. . .	0.6	180	75[j]
Fuel cell:							
Hydrogen[c]	H_2	Air	1.23	26,000	0.7		[k]
Hydrazine[c]	N_2H_4	Air	1.5	2,100	0.7	800[b]	[l]
Methanol[c]	CH_2OH	Air	1.3	1,400	0.9	175[b]	185[m]

[a] Delivered capacity when discharged at normal temperatures (20°C) at normal discharge rates.

[b] Based on fuel consumption only.

[c] Weight of air not considered in computation of watt hours.

[d] Water-activated

[e] Automatically activated; high rate discharge; 2- to 10-min rate.

[f] Fused salt; heat-activated; high rate discharge; 2- to 10-min rate.

[g] Four-minute discharge rate.

[h] β-alumina electrolyte, 300°C operation.

[i] Fused salt; 350°C operation.

[j] Solid $RbAg_4I_5$ electrolyte.

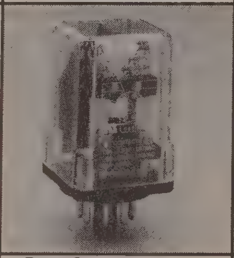
[k] Several different cathode materials used.

[l] Fuel consumption is based on source of H_2.

[m] Based on methanol battery-fuel supply in situ.

RELAYS

General Purpose Relays

Series	R02	R06	R10	R12	R14
					


Features	• Dust Cover • Octal–Type Plug	• Open Frame • Solder Terminals • Multi–pole Switching	• Dust Cover • .187" Quick Connect Terminals	• Dust Cover • Slightly larger than one cubic inch	• Dust Cover • .187" Quick Connect Terminals
Contact Arrangement	SPDT, DPDT, 3PDT	SPDT, DPDT, 3PDT	DPDT, 3PDT	4PDT	SPDT, DPDT
Contact Ratings	10A @ 28VDC/120VAC	10A @ 28VDC 12A @ 120VAC	10A, 11A, 12A @ 28VDC/120VAC	3A @ 28VDC/120VAC	10A, 15A @ 28VDC/120VAC

Programmable Time Delay Relays

Series	**R60**	**R61**	**R62**	**R63**
Features	• Knob/Flip Switches Adjustable • AC or DC Operation • 8–Pin Octal Base • 16 Timing Ranges • ±0.5% Repeatability	• Knob/Flip Switches Adjustable • AC or DC Operation • 11–Pin Octal Base • 16 Timing Ranges • ±0.5% Repeatability	• Knob/Flip Switches Adjustable • AC or DC Operation • 11–Pin Octal Base • 16 Timing Ranges • ±0.5% Repeatability	• Knob/Flip Switches Adjustable • AC or DC Operation • 8–Pin Octal Base • 16 Timing Ranges • ±0.5% Repeatability
Mode of Operation	Delay on Operate	Delay on Release	Single Shot	Interval On
Contact Arrangement	DPDT	DPDT	DPDT	DPDT
Contact Ratings	10A @ 28VDC/128VAC	10A @ 28VDC/128VAC	10A @ 28VDC/128VAC	10A @ 28VDC/128VAC
Input Voltage	12, 24, 120VAC/DC	12, 24, 120VAC/DC	12, 24, 120VAC/DC	12, 24, 120VAC/DC
Delay Time Range AC Types DC Types	0.1sec to 120min AC & DC Types	0.1sec to 120min AC & DC Types	0.1sec to 120min AC & DC Types	0.1sec to 120min AC & DC Types

Solid State Relays

Series	**RS1**	**RS2**	**RS3**
			Features	• Opto Isolated • Upright • Industry Standard Package	• Compatible with TTL Gates • Push–on Connector Terminals • Mounts on a TO3 Transistor Heat Sink	• AC and DC Models • Internal Snubber on AC Models
Contact Arrangement	SPST	SPST	SPST
Input Ratings	3 to 24VDC	5 to 12VDC	90 to 280VAC 3 to 32VDC
Output Voltage	280VAC	20 to 260VAC	24 to 530VAC 0 to 100VDC
Output Current	4A	7A	10 to 75A (AC Types) 12 to 40A (DC Types)
Options ( ) Suffix			TRIAC Output (T) Random Switching (R) MOSFET DC Version (M)

Automotive Relays

		NEW
Series	**VF7**	**VTF**
Features	• Plug-in or PC board mountable relay • 1 Form A contact arrangement • Optional mounting bracket	• Turn signal, hazard, or combination versions • Flash rate not sensitive to load current • Electronic timing with relay output • Meets applicable U.S. safety standards
Approximate Dimensions	1.04" x 1.04" x .992"h (26.5 x 26.5 x 25.2h)	1.12" x 1.12" x 1.6"h (28.5 x 28.5 x 40.5h)
Contact Arrangements	1 Form A	1 Form A
Contact Material	AgNi 0.15	PdCu AgCu
Contact Rating @ 85°C (Form A contacts with nominal coil voltage)	70A @ 14VDC	55W to 275W (Lamp)
Expected Mechanical Life	1 x 10^7 Ops.	5 x 10^6 Ops.
Expected Electrical Life at Rated Load	1 x 10^5	1 x 10^6 - 3 x 10^6 (Load dependent)
Nominal Coil Voltage	6, 12 & 24VDC	12VDC
Nominal Coil Power	2.0W	1.6W
Mounting Options	PC board, Plug-in, Bracket	Plug-in
Sockets / Connectors	Wiring harness style connector	PC terminal socket, wiring harness style connector with or without bracket

Solid State Relays

				Series	**EOMZ/TZ**	**SSRT**	**SSR**	**SSRD**
Features	• Economically priced • Low profile, plastic base package • Triac output • DC input • Ratings to 25A	• "Hockey Puck" package • Triac output • AC & DC input • Ratings to 25A	• "Hockey Puck" package • Inverse parallel SCR output • AC & DC input • Ratings to 110A	• Two independent solid state relays in one "Hockey Puck" package • Inverse parallel SCR output • Ratings to 40A per output
Approximate Dimensions	1.81" x 1.50" x .66"h (46.0 x 38.1 x16.8h)	1.75" x 2.25" x .8"h (44.4 x 57.2 x 21h)	1.75" x 2.25" x .8"h (44.4 x 57.2 x 21h)	1.75" x 2.25" x .8"h (44.4 x 57.2 x 21h)

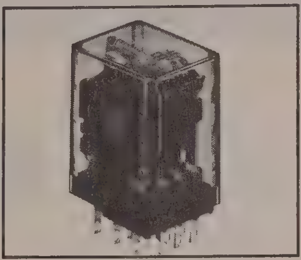
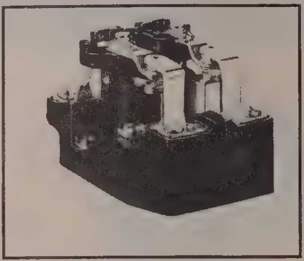
P.C. Board Relays

- Dry circuit to 30A ratings
- Up to 4PDT arrangements
- Open, dust cover and sealed units
- AC and DC coils
- Polarized types
- Latching models



General Purpose Relays

- Dry circuit to 30A ratings
- Up to 8PDT arrangements
- Open, dust cover and sealed units
- AC and DC coils
- P.C. board, socket and panel mount types

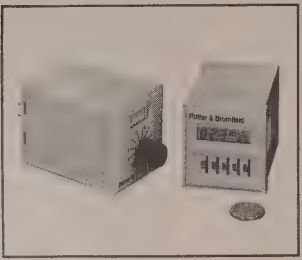


Power Relays

- Ratings to 60A
- Up to 4PDT arrangements
- Available as open relays or with dust covers
- AC and DC coils
- Socket and panel mount types

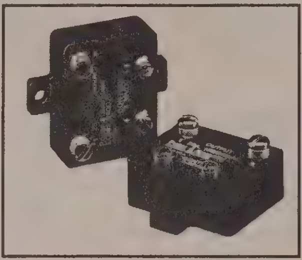
Contactors

- Ratings to 60A
- 1Ø and 3Ø switching
- Up to 4PST-NC-DM arrangements
- AC and DC coils
- Available with universal mounting plates



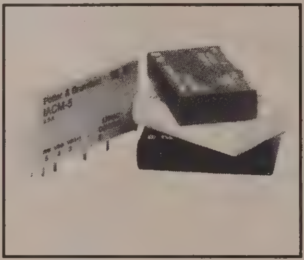
Time Delay Relays

- Ratings to 10A
- Time up to 9,990 hours
- Up to 10 timing modes
- Field programmable types
- AC and DC input
- Knob, resistor, switch and fixed adjustment types
- Socket and P.C. board mountings



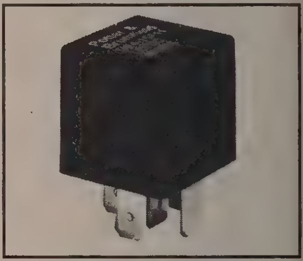
Solid State Relays

- Current ratings to 110A
- Switch voltage to 480VAC
- P.C. board and chassis mount types
- Single, dual and quad output
- AC and DC input
- Triac and inverse parallel SCR output types



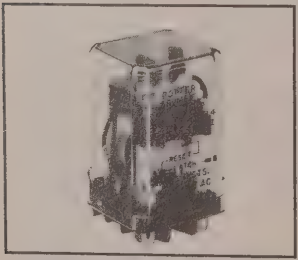
Input/Output Modules

- Standard and slim line package styles
- Output ratings to 6A
- Compatible for series operation
- Standard and slim line mounting boards available



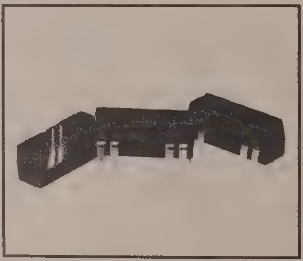
Automotive Relays

- Current ratings to 70A
- Standard and miniature varieties
- Choice of quick connect or PC terminals
- Various package styles and mounting options
- Coil suppression resistors available on some models



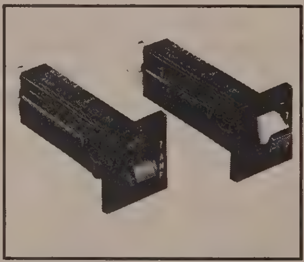
Impulse/Latching Relays

- Mechanical and magnetic latching types
- P.C. board, plug-in and chassis mount types
- Ratings to 20A
- Single and dual coil models
- Up to 16 poles



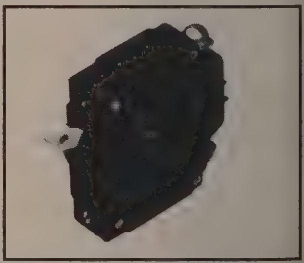
Reed Relays

- Dry and Hg-wetted types
- P.C. board, plug-in and chassis mount types
- Up to 5 poles
- Ratings to 250VA (with contact protection)
- Coil suppression diodes available on some models



Thermal Circuit Breakers

- Threaded bushing and snap-in mounting options
- Ratings to 50A
- Choice of quick connect or screw terminals
- Toggle, push/pull or push-to-reset actuators
- Series trip



Magnetic Circuit Breakers

- Choice of screw or snap-in mounting
- Ratings to 50A
- Up to 4 poles
- Actuator-per-unit and actuator-per-pole types
- Various circuit functions and time-trip curves

B-1001-G

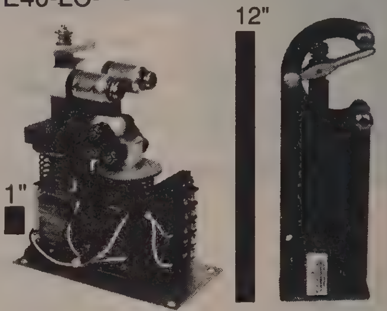
HIGH VOLTAGE RELAYS
1KV TO 300KV PK TEST

HV BASIC RELAYS

For transfer, safety grounding, tap selection, polarity selection. In the range of 1KV to 200KV DC or PK AC with PK test voltages up to 300KV PK. Most high voltage contacts have full insulation above ground. A higher insulation level to ground is optional. Some units are spring return and can mount in any position, or with gravity return by mounting in the proper position. Also usable in oil or insulating gas. Relays are available with replaceable tungsten alloy contacts for high current capacitor discharge use and with auxiliary contacts for holding, indicating or interlocking.

H.V. LATCHING RELAYS: Loss of control power will not cause an unwanted transfer. Power is not required to maintain position, reducing energy requirements and heat. Pulse actuation may be desirable in some applications.

E40-LC- -



40 KV PK TEST E40-DT-60- -

E60-NCP- -

60 KV PK TEST

HV AIR OPERATED RELAYS

Air operated relays can be actuated with compressed air or other gas pressures of 80 to 120 PSI. Some can be operated at pressures as low as 30 PSI. Some units have spring return with loss of air. Auxiliary air valve type indicators can be provided in place of auxiliary electrical type contacts to provide complete isolation from high voltage, and provide answerback to indicate full open or closed, or other control. Units designed to be submerged in insulating fluid are also available with air exhaust outlets to exterior to avoid contaminating the insulating fluids.

HV DELAYED OPENING AND CLOSING RELAYS

For some high voltage control and safety applications, a delayed action but positive automatic closing (normally closed) or opening (normally open) of high voltage relays upon accidental loss or normal shut down of control power is desirable if not mandatory. These relays are designed for safety shorting and for use with HV power supplies having stored energy which must not be discharged before other control relays operate, or current flow which must not be interrupted too soon. Delay can be initiated either when control voltage is turned on or turned off, or both.

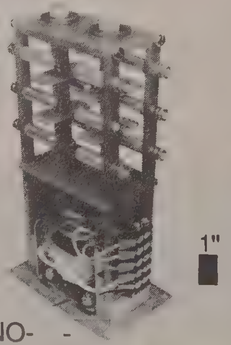
40 KV PK TEST



14 KV PK TEST

ET6-14-6PNO- -

HIGH VOLTAGE MULTI-POLE RELAYS

The Multi-pole E series relays are designed for high voltage applications where 2 or more poles are required. These air insulated relays are constructed using fire retardant, moisture sealed anti-tracking epoxy glass laminate of the highest quality. Environmental resistant materials are standard throughout to assure long life and ruggedness. Applications for these relays include: 3 phase tap or load selection, transfer, polarity reversing, safety grounding, and shorting. These units can be used in air, oil, or other insulating mediums and are designed to be mounted base down. Contacts are available in normally open, normally closed and double throw configurations. Latching units are also available.

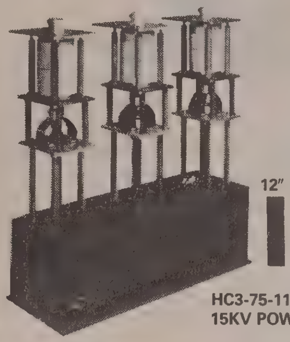
HIGH VOLTAGE DEVICES

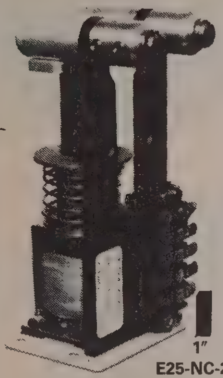
208V to 900KV and 0.01V to 1,000V Instrumentation



HV VACUUM CONTACTORS & 1 CYCLE CIRCUIT BREAKERS

Vacuum switches, single phase, three phase, upright or low profile, for high reliability sealed arc interrupting or crobar shorting. 208V to 200KV RMS operate. 50 to 4,000 amps continuous, 2,000 to 35,000 amps AC, 10 to 20,000 amps DC interrupt, 5,000 to 100,000 amps momentary and capicitor discharge.

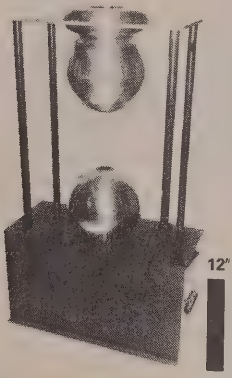
HC3-75-110-600-2-2
15KV POWER CLASS



E25-NC-25-1-0,
25KV PK TEST

HV RELAYS 1KV TO 300KV

HV relays of the air insulated type both for low and high current. This series has ratings from .1 to 200 amps continuous, 100 to 100,000 amps momentary and capacitor discharge. Peak test voltages from 5 to 300KV. Single or multipole. NO, NC and DT. Auxiliary contacts optional on all types. Latching extended life and tungsten contacts also available for high current closing. Also usable in oil or insulating gas.

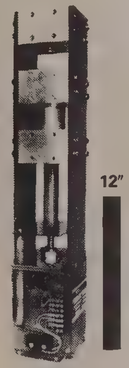


HV SPHERICAL RELAYS

Extra high voltage low corona, transfer, polarity reversing and grounding realys of the air insulated type. Ratings up to 600KV PK at 100 amps continuous. Solenoid, motor or air cylinder operated and spring or gravity return.

SPST, DT, 2PST, DT

DH-300-NC-40-2-0-1
300KV PK TEST



HIGH CURRENT SWITCHES

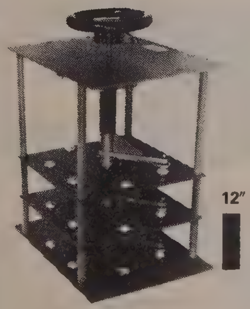
Models are available up to 20,000 amps continuous, and over 500,000 amps pulse, with voltage ratings of 6 volts to 300KV peak test. Many are air cylinder or motor operated for high contact force.

GD-27-DTP-40-1600-2-43,
27KV PK TEST

HIGH POWER HIGH SPEED HIGH VOLTAGE CONTROL AND STEP-START SYSTEMS

½ to 1 cycle sensing and interrupt vacuum circuit breakers. Metal enclosed for indoor or outdoor applications. 5KV-38KV.

200-1200A CONTINUOUS
2000-28000A INTERRUPT
5-15KV CLASS



HV ROTARY SWITCHES

Ratings from 5 to 150KV, 1 to 200 amps. Either manual or electrical operators, depending upon requirements. Position detents and interlocks to prevent opening under load.

R-60-3P7T-60-1-0-H,

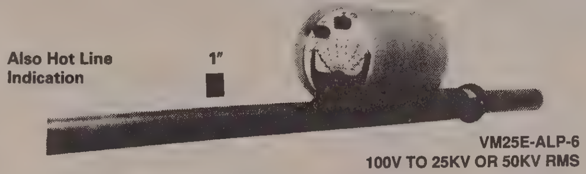
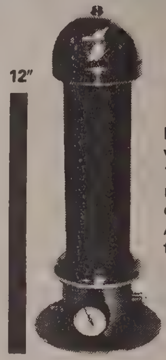
HIGH VOLTAGE DEVICES



VM25E-ALP-6
100V TO 25KV OR 50KV RMS

POWER CLASS
Hi-Z™ HV VOLTMETERS SAFE POWER LINE USE AC/DC FOR UTILITIES, CONTRACTORS & FIRE & SAFETY DEPARTMENTS

Fully safe, portable, all solid state, 2% to 5% accuracy. Taut band shielded high voltage measurement with minimum circuit loading. 0.001V to 50KV AC and DC. Ideal for use with Elbow capacitance tap voltage test points. For cable test point or direct line voltage and phasing, or differential measurement. Digital also available with 0.5%-1% accuracy.



WIDE BAND HV VOLTAGE DIVIDERS DC-10 MHz

Precision compensated resistance-capacitance voltage dividers for 1KV to 900KV, DC up to 10MHz or to 0.02μ Sec rise time pulse. 1,000/1 ratio matched to 1 megohm, 20 to 50 pf display or recorder. Other ratios and loads as required. Accuracy and stability: 0.01% to 0.1% DC. 0.2% to 1% AC 3% DC-1MHz. 3DB 10MHz.

VD60-6.2-B-LB-A
60KV PK OPERATE

WEATHER PROOF WIDEBAND HIGH VOLTAGE DIVIDERS For Power Line Use

High accuracy 5KV RMS to 345KV RMS power class. 30KV PK to 900KV PK operate. 60KV to 1350KV basic impulse level. DC to 1MHz frequency response. For DC, AC and transient measurement and recording.

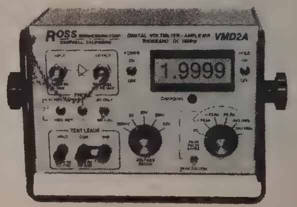
VD900-20-T-KB-E,
900KV PK OPERATE

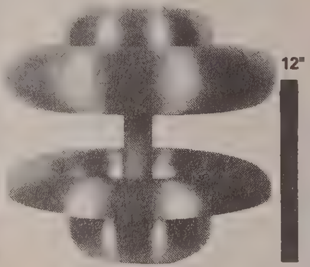
HV DIGITAL MULTIMETERS

Easy to read, 4½-digit display; 0.1% and 0.01% accuracy. 0.0001 volt to 900KV. Battery/AC with charger. Recorder and scope outputs. DC, AC RMS average, AC RMS true, AC PK Ripple & Wide Band DC – 1MHz.

VD30-8.3-A-LB-A,
30KV PK OPERATE

VMD2A





HIGH ACCURACY HV SHIELDED VOLTAGE DIVIDER 0.01% DC, 0.2%-3% AC

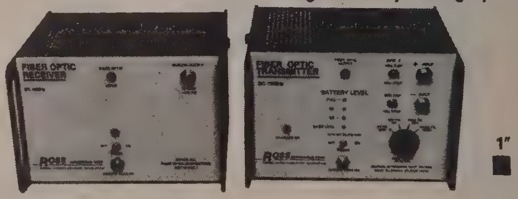
Special high accuracy, shielded, compensated resistance-capacitance voltage dividers up to 900KV wideband DC to 1MHz. Matched to 1 megohm, 50 PF or other load. Used for measurement of AC and DC, high frequency, line transients, and smalll differential pulse voltages.

VD150-10-CBD-KL-B,
150KV PK OPERATE

FIBER OPTICS FOR HV ISOLATION FIBER OPTIC TRANSMITTERS & RECEIVERS ANALOG
WIDE BAND FIBER OPTIC TRANSMISSION DC-1MHz

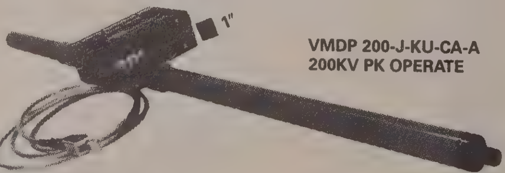
AC or rechargeable battery/AC operated. DC to 1MHz System has a maximum output of 10V PK (20V PK to PK) and maximum input of .1V to 1,000V PK direct from signal source. Useful from 0.01V and to over 900KV when used with Ross HV wide band dividers. Single or multiple ranges.

High Accuracy Analog Systems

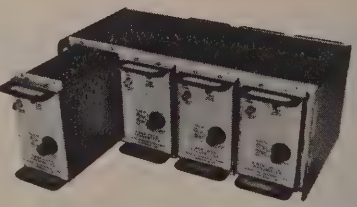


HV DIGITAL PROBES

HV DC, AC, & Wideband DC-1HMz Safety Probes for any scope or digital display or VTVM. Also available complete with large 4½-digit display 0.1% to 5% AC/DC accuracy, safety handle digital voltmeter. Battery/AC with charger. Removable Digital Display or Multimeter. 0.0001 volt to 200KV.



VMDP 200-J-KU-CA-A
200KV PK OPERATE



4 CHANNEL FIBER OPTIC SYSTEM ALSO AVAILABLE:

Each channel is independent, self-contained, and removable for separate operation. Powered by 115V/230V 50/60Hz.

*See our additional products in **Volume B,** Fiber Optic Equipment & Accessories – Sect. 2475, Switches – Sect. 5100; and **Volume D,** Instruments, Test & Measuring – Sect. 2900.*

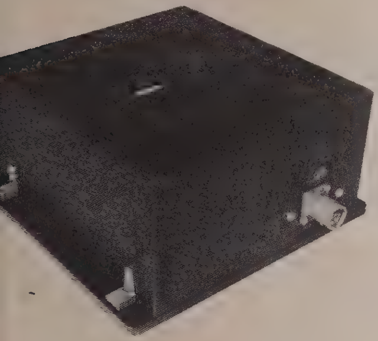
SCIENTIFIC TECHNOLOGIES INCORPORATED

ELECTRIC POWER MONITOR



SPECIFICATIONS

INPUT VOLTAGE: 115 VRMS line to neutral ± 5.8 VRMS, 400 Hz ± 20 Hz, 3 phases plus neutral, phase sequence A-B-C (pins 1, 2, 3 & 8)
NORMAL OUTPUT: 28 VDC ± 2.8V, 4.5 to 5.0 AMP max. (pin 5), voltage regulation and ripple: 10% and 1V peak-to-peak max.
ALARM OUTPUT: 28 VDC nominal, 1.8 to 2.0 AMP max. (pin 7)
RESET SWITCH: Customer will supply a momentary normally open switch to permit normal operation when the switch is activated providing none of the fault conditions exist and the input voltage is applied (switch across pins 6 & 4)
MATERIAL AND FINISH: Housing is aluminum with black anodized finish.
OPERATING TEMP. RANGE: 0°C to +85°C
DIELECTRIC STRENGTH: 1250V, 60 Hz between contacts and case and between isolated circuits
VIBRATION: 5 to 55 CPS with DA of .06 in along any axis.
SHOCK: 20G'S for 11 MS
FAULT CONDITIONS: The monitor will supply the alarm output when any of the following conditions exist:
OVER/UNDER VOLTAGE SENSOR; Voltage is above 126.5 VAC ± 1.5V or below 105.5 VAC ± 1.5V across any one or more of the phases with respect to neutral.
PHASE SENSOR: Improper phase sequence (C-B-A) or if any one phase is open with the remaining phases closed.
FREQUENCY SENSOR: Frequency is above 420 Hz +0 Hz/–5 Hz or below 380 Hz +5 Hz/–0 Hz
VOLTAGE DROP: Any one or more of the phases drop to 95 VAC, the voltage regulation and ripple will be 10% and 1 volt peak-to-peak max. Any one or more of the phases drop to 80 VAC, the voltage regulation and ripple will be 30% and 3 volt peak-to-peak max. Any one phase is open while these conditions exist, the voltage regulation and ripple will be 30% and 6 volt peak-to-peak max.

FLASHERS

FLASHER
PART NO
INPUT VOLTAGE D.C.
FLASHING RATE C.P.M. ±10%
DATE OF MFG.
CUST REF NO.

FEATURES:

- High reliability
- Rugged
- Hermetically sealed
- Compact and lightweight
- Solid state and relay outputs
- Long life

SPECIFICATIONS
SOLID STATE FLASHER
INPUT VOLTAGE: 18 to 32 VDC
POWER CONSUMPTION: 3 Watts (Not Including Lamp Power).
FLASHER OUTPUT: 200 ma, 500 ma, 2 AMP, or 5 AMP Lamp or Relay Load.
OUTPUT POLARITY: Positive or Negative Types.
NOT DAMAGED BY REVERSE POLARITY.
FLASHING RATES: AS SPECIFIED.
ON:OFF RATIOS ARE: AS SPECIFIED
OPERATING TEMPERATURE RANGE: –55 C to +71 C.
OPERATING LIFE EXPECTANCY: 10,000 Hours Min.
SHOCK: 100 G's for 11 Milliseconds
VIBRATION: 10 G's at 10 to 500 CPS.
HERMETICALLY SEALED.
MOUNTING: Stud or Flange.
SOLDER HOOK TEMINALS.
WEIGHT: 4 Ounces Nominal.
VOLTAGE DROP: 1.5 Volts Maximum.

RELAY TYPE FLASHER
INPUT VOLTAGE: 18 to 32 VDC.
POWER CONSUMPTION: 4 watts (not including lamp power).
FLASHER OUTPUT: 500 ma, 2 AMP, 5 AMP, lamp or relay load.
CONTACTS ARE S.P.S.T. normally open.
NOT DAMAGED BY REVERSE POLARITY.
FLASHING RATES: AS SPECIFIED.
ON: OFF RATIOS ARE: AS SPECIFIED
OPERATING TEMPERATURE RANGE: –55 C to +71 C.
OPERATING LIFE EXPECTANCY: 500,000 cycles minimum at rated load.
SHOCK: 15 G's for 11 milliseconds.
VIBRATION: 10 G's at 10 to 500 CPS
UNIT: Hermetically sealed.
MOUNTING: Studs or flange.
SOLDER HOOK TERMINALS.
WEIGHT: 8 ounces nominal.

PHASE SEQUENCE INDICATORS

430-530
VAC
FREQUENCY
54-66
HZ
PART NO

DESCRIPTION

A unique passive element circuit within the housing allows the indicator to illuminate only when the phase sequence of power being monitored is A-B-C. The phase sequence indicator will not illuminate when any one or more of the power inputs are opened or if the phase sequence is C-B-A.

The indicator will provide trouble-free instantaneous indication with no warm-up time required. The units are potted in an aluminum housing with no moving parts. Designed to meet severe environmental requirements of military applications.

SPECIFICATIONS
POWER CONSUMPTION: 2 watts
OPERATING TEMPERATURE: –55 to +125 C
WEIGHT: 2 ounces
MOUNTING: ⅝ inch dia. hole, panel thickness to ¾ inch
LEADS: 18 inches long, teflon insulated
HOUSING MATERIAL: aluminum, black anodized
FREQUENCY AND VOLTAGE: per customer specifications
INDICATOR: lights up when all input leads are energized and phase sequence is A-B-C

SCIENTIFIC TECHNOLOGIES INCORPORATED

PHASE SEQUENCE RELAYS

FEATURES

- Designed for use in severe environmental conditions
- Automatic monitoring of phase sequence
- Solid state sensing circuit
- Hermetically sealed
- Light weight, small size
- Many voltages and frequency combination available

SPECIFICATIONS

Relay picks up when all input terminals are energized and phase sequence is A-B-C. Relay drops out if one or more power leads are grounded, opened or if the phase sequence is C-B-A.

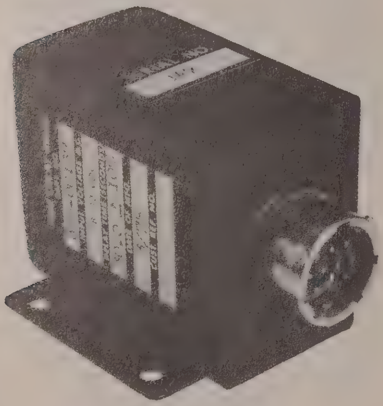
POWER CONSUMPTION: 10 watts maximum.
OPERATING TEMPERATURE: –55 C +71 C
CONTACT RATINGS: (Per MIL-C-5757)

28 VDC	Resistive (Form C)	Inductive
2 AMP	2.0 AMPS	1.0 AMPS
3 AMP	3.0 AMPS	1.0 AMPS
10 AMP	10.0 AMPS	5.0 AMPS

115 VAC	Resistive (Form A&B)	Resistive (Form C)
2 AMP	2.0 AMPS	0.2 AMPS
3 AMP	3.0 AMPS	0.2 AMPS
10 AMP	10.0 AMPS	2.0 AMPS

VIBRATION: 10 G's to 500 Hz.
SHOCK: 30 G's for 11 milliseconds stud mount.
100 G's for 11 milliseconds flange mount.
SEAL: Hermetically sealed.
CONTACT RESISTANCE: .08 ohm maximum.
INSULATION RESISTANCE: 100 megohms minimum between terminals and case, between open contacts.
DIELECTRIC STRENGTH: 1000 Vrms 60 Hz, between terminals and **CASE;** 500 Vrms 60 Hz, between open contacts.
LIFE: 100,000 operations minimum.
WEIGHT: 11 ounces maximum.
Relays per MIL-R-5757.
Environmental testing per MIL-E-5272.
Test methods per MIL-STD-202.
Marking per MIL-STD-130.

TIME DELAY RELAYS



FEATURES

- Solid state sensing circuit
- Transient protected
- 2 amp, 3 amp, and 10 amp relay contacts, dpdt.
- Hermetically sealed.
- Light weight (3.5 to 9 oz).
- Choice of 3 operating modes.
- Designed for use in severe environmental conditions.

SPECIFICATIONS

INPUT VOLTAGE: 18 to 32 vdc
POWER REQUIREMENTS AT 28 VDC: 5 watts max, 2 amp relays
6.5 watts max, 10 amp relays
TEMPERATURE RANGE: –65 F to +185 F
VIBRATION: 20 G's, 10 to 2000 Hz
SHOCK: 100 G's for 11 milliseconds
CONTACTS: DPDT
LIFE: 100,000 cycles minimum at rated load
DROP-OUT TIME: 10 milliseconds max.
DROP-OUT VOLTAGE: 1 volt min.
PULL-IN VOLTAGE: 18 volts max.
INSULATION RESISTANCE: 100 megohms min.
DIELECTRIC STRENGTH: 500 volts 60 Hz case to terminals and across open contacts
CONTACT RATING:
2 amp & 3 amp unit: 2 amp & 3 amp resistive at 32 vdc
1 amp inductive at 32 vdc
10 amp unit: 10 amp resistive at 28 vdc or 115 vac
5 amp inductive at 28 vdc or 115 vac
CONTACT RESISTANCE: 0.050 ohms at rated current
RESET-TIME: 0.050 sec. max.
TRANSIENT PROTECTION: Will not be damaged by transients per Mil-Std-704
INTERNAL RELAYS: Per MIL-R-5757

AC Output Interface Module

3 A/400 V

THE MOST EFFICIENT SOLID STATE RELAYS ON THE MARKET

Model SSOA3

Standard Features

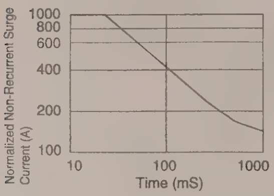
- Inverse parallel SCR output
- High transient immunity
- High input to output isolation voltage
- Very low turn-on current
- Very low leakage current
- High blocking voltage
- Rated for 3 A steady state
- SIP package, fits into a standard 16-pin IC socket
- No heat sink required

Applications

- Interface between computer and AC loads
- Switching lamps and small motors
- Driving small pumps
- Medical electronics

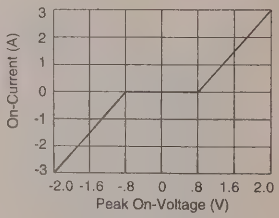
Absolute Maximum Ratings

Storage Temperature: -55°C to 125°C
Operating Temperature: -40°C to 100°C
Continuous Input Current: 4 mA
Transient Input Current: 400 mA
Reverse Input Control Voltage: 7 V
Output Voltage: ±400 V
Output Power Dissipation: 3.5 W

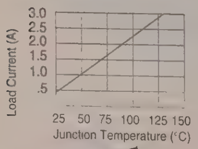


Maximum Allowable Non-recurrent Peak Surge Current Rated at Load Conditions

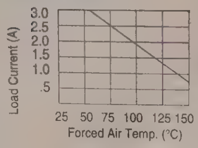
Maximum Peak Voltage Vs. On Current



Load Current Vs. Junction Temperature



Maximum Current Derating Curve



Description

The SSOA3 solid state relay is a highly advanced relay designed to eliminate false triggering upon applying AC voltage to the output. The input is composed of an LED driving a photo sensitive IC chip that controls the firing of two back-to-back SCRs connected to the output. The circuit is designed to work well with either inductive or resistive loads without the need for a snubber network. The relay is ideally suited for applications where high density packaging is desired.

AC Input Module

90-140 V AC

THE MOST EFFICIENT SOLID STATE RELAYS ON THE MARKET

Model SIA1

Standard Features

- Exceeds VDE spacing and voltage requirements
- All solid state construction
- Auto insertable 16-lead DIP package outline
- Optically isolated
- Output rated to switch 200 mA
- High immunity to false triggering
- Open DMOS transistor output
- Surface mount option (SIA1-S)

Applications

- Robotics
- Process control
- Programmable controllers
- Energy management
- Automatic test equipment
- Medical electronics
- Reed relay replacement

Absolute Maximum Ratings

Storage Temperature: -55°C to 125°C
Operating Temperature: -40°C to 85°C
Continuous Input Current: 40 mA
Transient Input Current: 400 mA
Reverse Input Control Voltage: 6 V
Output Voltage: 60 V
Output Power Dissipation: 1.2 W

Description

The SIA1 circuit is a highly advanced optically coupled input/output module. It is designed to monitor the status of AC/DC loads and provide medium power switching capability. It is supplied in an epoxy molded package that fits into a standard 16-pin IC socket. The input circuit is composed of two back-to-back light emitting diodes connected in series with a limiting resistor. The output is an open MOS transistor controlled by photo sensitive circuitry.

Form "A", AC Output Solid State Relay

1 A / 400 V (S642)
600 V (S742)

THE MOST EFFICIENT SOLID STATE RELAYS ON THE MARKET

Models S642/S742

Standard Features

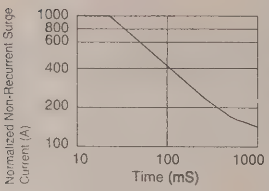
- Inverse parallel SCR output
- High transient immunity
- True zero volt turn-on
- Input-to-output isolation meets or exceeds VDE requirements
- Very low leakage current
- Blocking voltage of 400 V or 600 V peak
- Standard 16-pin DIP package
- U.L. listed
- Internal 300 Ω resistor option (S642-1)
- Surface mount option (S642-5)

Applications

- Interface between microprocessors and logic circuits
- Drive small lamps / solenoids
- Medical electronic equipment
- Communication equipment

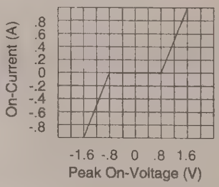
Absolute Maximum Ratings

Storage Temperature: -55°C to 125°C
Operating Temperature
(see derating curve): -40°C to 100°C
Continuous Input Current: 40 mA
Transient Input Current: 400 mA
Reverse Input Control Voltage: 6 V
Output Voltage: 400 V/ 600 V
Output Power Dissipation: 1.2 W

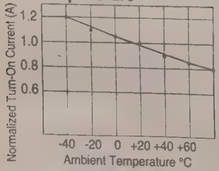


Maximum Allowable Non-recurrent Peak Surge Current Rated at Load Conditions

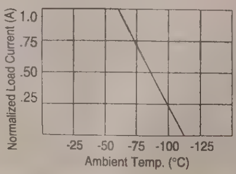
Maximum Peak Voltage Vs. On Current



Turn-On Current vs. Temperature



Maximum Load Current vs. Ambient Temperature



Description

The S642/S742 are multipurpose, bi-directional, single-pole, single-throw, normally open relays. The circuit is composed of one LED on the input side which activates an optically coupled IC circuit on the output side — controlling the firing angle of two pairs of back-to-back SCRs. This circuit assures no false triggering under most adverse conditions, and a tight zero volt window not exceeding 5 V peak.

Solid State Optronics, Inc.

1 Form "C", AC/DC Solid State Relay

400 V / 8, 20 Ω

THE MOST EFFICIENT SOLID STATE RELAYS ON THE MARKET

Model AD4-C113

Standard Features

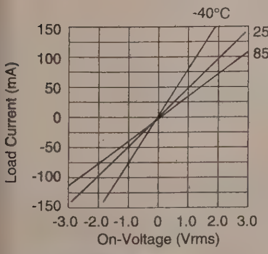
- Single pole, double throw bi-directional solid state switch
- "Break before make" contacts
- High input to output isolation
- High off-contact impedance
- Very low contact offset voltage: < 0.5 μV
- Load current rated at 300 mA
- Inrush current capability rated at up to 5 A
- High transient immunity: >2000 V/μS
- Very low control current
- 8 Ω maximum on-resistance on normally open, 20Ω on normally closed relay
- Auto insertable 8-pin DIP package outline
- Surface mount option (AD4-C113-S)

Applications

- Telecom tip/ring control circuits
- Robotics
- Process control
- Programmable controllers
- Energy management
- Automatic test equipment
- Medical electronics
- Reed relay replacement
- Highly inductive loads

Absolute Maximum Ratings

Storage Temperature: -55°C to 125°C
Operating Temperature: -40°C to 85°C
Continuous Input Current: 40 mA
Transient Input Current: 400 mA
Reverse Input Control Voltage: 6 V
Output Voltage: ±400 V
Output Power Dissipation: 400 m W



On-State I-V Characteristics

Description

The AD4-C113 is composed of two totally isolated relays: one normally open and one normally closed. Each relay has bi-directional, single-pole, single-throw contacts. Totally independent of its counterpart, each relay consists of an LED driver that activates an integrated circuit that drives a pair of DMOS transistors. These transistors are protected with free wheeling diodes that can handle up to 1.5 A inrush current, making the relay ideal for switching lamps and highly inductive loads.

AC POWER CONTRACTORS

Fig. B. Type 75—2PNO: screw power terminals, #8 solid wire max. Quick connect or 13″ lead coil termination. Protective contact cover. Hardware included.
Size: 2½″ × 2⅛″ × 2¼″ overall.

Fig. C. Type 154—3PNO (40 amps type also with(2PNO). 20 and 25 amps, screw connectors line and load side for #14 through #8 wire; ¼″ double quick connect auxiliary and coil terminals. 30 and 40 amps, pressure connectors on line side for #14 through #4 wire: screw connectors on load side (pressure connectors for 40 amps): ¼″ double quick connect auxiliary and coil terminals. Non-positional type 154 power contractors come with interchangeable mounting: low coil wattage and non-corroding structure. Type 154 has low temperature rise: riveted terminal assemblies. Hardware included in boxed quantity only. **Size:** 3¾″ × 3⅛″ (3¼″ for 40 amps) × 2¾″ overall.

Fig. D Type 122—2PNO Straight-Thru Wiring, Low Cost ¼" Auxiliary Quick-Connect Terminals Screw Power Terminals. For #10 Solid Wire Max.Double-Make Contacts Small Size. Wt. 10.5 oz (Approx).

- Max. Pick Up 75% rated coil voltage.
- Design Ambient—40°C to 65°C
- Maximum Continuous coil watts. 12 @ rated voltage.
- Recommended Mounting Position: Unit in vertical plane with coil terminals up. Horizontal plane is acceptable.
- Design meets U.L. 583 Industrial Truck Standard. Dust and splash proof cover.
- Application: Controlling D.C. starting motors on gasoline engine driven auxiliaries. Battery charging power circuits, motor reversing circuits as found in winch applications.
- The 124 is also applicable where ruggedness and high current capacity is required for D.C. mobile equipment such as: in-plant lifts, industrial equipment, recreational vehicle—golf carts, camp trailers, motor homes.
- Contact Termination: 5/16" -24 UNF-2A stud.
- Coil Termination: #10-32 UNF-2A tread.

TYPE 586

Sealed Solenoid is Dust and Splash Proof

Continuous Duty Coil Silver Contacts

Pole Form: SPNO, SPDT

Incorporates double-make or double-break contacts

Type 568 coil is rated approximately 12 watts continuous duty.
Contact rating 200 Amps. continuous. 600 Amp in rush N.O. contacts.

STANDEX REED RELAYS

- ❑ Widest range of pin-outs, contact configurations and contact ratings
- ❑ Versions to meet US, CSA, FCC and European Standards – up to 5000 VDC contact to coil breakdown voltages
- ❑ Standex relays use our own reed switches with contact ratings for dry circuit and power switching applications
- ❑ Competitive pricing & delivery from stock
- ❑ Most recognized under Component Program of Underwriters Laboratories

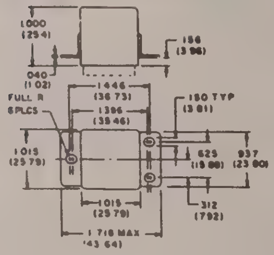
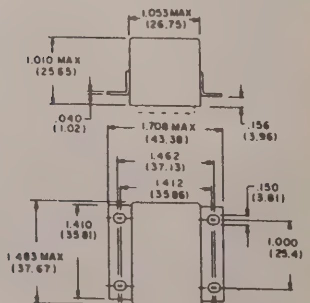
MIL SENSORS

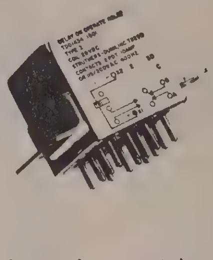
No.1



No.2



MIL SENSORS FOR VOLTAGE, CURRENT OR FREQUENCY



Struthers-Dunn custom designs and manufactures various sensors, to monitor AC and DC circuits and detect and signal when the parameters of voltage, current, or frequency deviate from the required nominal range. All are designed to meet the environmental specifications for military and aerospace applications.

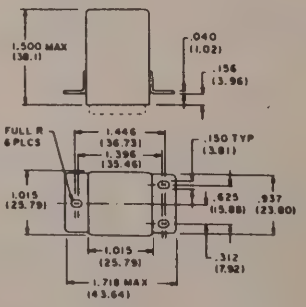
These sensors typically employ some appropriate version of our extensive line of MIL-approved relays, combined with the sensing and relay control circuitry. A time-delay option can be added to hold off relay operation when an abnormal condition is transient or can be tolerated for some longer preset time.

Sensor relay contacts are available in many configurations, from S.P.D.T. reed contacts, suitable for control of signal lights, to 4-pole 10 amp or 3-pole 25 amp power contacts, to control 3-phase circuits. Magnetic latching relays can be provided for all contact arrangements.

Enclosures are hermetically sealed with terminals for socket plug-in, circuit-board mounting, or solder hooks. Three enclosure types suitable for sensor assemblies are dimensioned below: No. 1 can provide up to D.P.D.T., 10 amps; Nos. 2 and 3 up to 4PDT, 10 amps; and No. 3 3 PST-NO, 25 amps plus auxiliary S.P.D.T. 2 ampere contacts, or 3PDT, 25 amps

Dimensions in inches ± .010 and (MM ± .25) except as noted.

No.3



COMBINATION ELECTROMECHANICAL/ SOLID-STATE RELAY 30 AMP 1PST

- **180 kW Max. Switching Capability**
- **500 Vpk 30 AMP Contacts (AC or DC)**
- **5 Million Operations**
- **Bounce & Chatter Free Operation**
- **Arcless Design**
- **-55°C to +125°C Operating Temperature**
- **Hermetically Sealed**
- **Weight 4.0 Oz. Max.**

HV-1A30

The HV-1A30 Series relay is a high voltage device that combines electromechanical contacts with solid state electronics for increased performance over traditional relays. The result is a high power contactor in a small relay package which has a 100 times longer life than conventional relays and features bounce-, chatter- and arc-free operation to reduce EMI.

This relay can make and break up to 1000% of its rated current, and is capable of carrying extremely high overloads for short periods. Its current carrying ability does not derate at extreme temperatures or for different types of loads.

Struthers-Dunn can custom design and manufacture product variations, such as adding time delays or various sensors to monitor AC and DC circuits and to detect and signal when the parameters of voltage, current or frequency deviate from the required nominal range.

All HV-1A30 Series relays are designed to meet the environmental specifications for military and aerospace applications.

Type of Load	Life (Min) Cycles X10^6	at 500 VDC* (AMPS)	At 350 VAC rms (AMPS)
Resistive	5	30	30
Inductive	5	30	30
Motor	5	30	30
Lamp	5	30	30

*Inductive spike clamped at 500 V across contacts

Overload Current: 300 AMPS DC or AC
Max. Contact Drop at 30 AMPS: 0.180 Volts
Rupture Current: 300 AMPS DC or AC
Absolute Max. Contact Voltage: 600 Vpk
Contact Bounce: None
Absolute Max. Switching Capability: 180 kW
Nominal Switching Capability: 15 kW

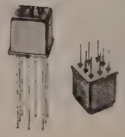
Centigrid®

TR® Established Reliability Relays

· General purpose 114 Series
· Sensitive 134 Series



The Centigrid® 114 Series relays are subminiature, hermetically sealed armature relays featuring low profile, .275" (6.99mm) high by .370" (9.4mm) square, with .100" grid spaced terminals. The sensitive 134 Series is .375" (9.55mm) high and features ultra-low coil power dissipation. Both Centigrids® feature all-welded construction, hermetic sealing, and high force/mass ratios for excellent resistance to environmental extremes. Gold plated precious metal contacts assure reliable switching of loads from dry circuit to 1 ampere. Contact geometry and low intercontact capacitance provide RF switching capability well into the UHF spectrum.

TELEDYNE RELAYS

CMOS Compatible Centigrid®
TR® Established Reliability Relays

- **CMOS compatible general purpose 116C Series**
- **CMOS compatible sensitive 136C Series**
- **CMOS compatible magnetic latching 122C Series**

CMOS compatible Centigrid® relays are subminiature, hermetically sealed, armature relays capable of being directly driven by most IC logic families. Their low profile height and .100" grid spaced terminals, which precludes the need for spreader pads, make them ideal for applications where extreme packaging density and/or close PC board spacing are required. The 116C and 136C Series incorporate internal silicon planar epitaxial type diodes for coil suppression, zener diodes to protect the MOSFET gate inputs, and N-channel enhancement-mode MOSFET chips. The 122C, which incorporates the same interface circuitry as the 116C and 136C, is a magnetic latching relay which is actuated by a short duration voltage pulse. The magnetic "memory" of this device precludes the need for constant bias and or battery backup in the event of system power failure.

RF Relays

- **RF120 Series Aerospace Centigrid® Relays**
- **RF170 Series Commercial Centigrid® Relays**

The RF120 and RF170 Series relays are subminiature, hermetically sealed Centigrid® relays featuring extremely low intercontact capacitance that have been optimized to provide exceptional RF performance over the full UHF spectrum. These Series combine microwave switching capability with Teledyne Relays' superior all-welded construction, proven magnetic-latching design, and high force/mass ratios for ruggedness and performance stability in severe environments. Gold plated precious metal contacts ensure reliable DC switching from low-level to 1/2 amp, as well as low, stable insertion loss.

TELEDYNE RELAYS

Surface Mount Centigrid® Aerospace Relays

- General purpose S114 Series
- Sensitive S134 Series

Teledyne Relays S114 and S134 Series are subminiature, hermetically sealed, surface mountable relays, which combine the proven reliability of the Centigrid® Series relays with pre-tinned leads specifically formed in compliance with MIL-STD-454 to make them ideal for all types of surface mount reflow processes. The basic design and internal construction are identical to the 114 & 134 Series Centigrid® relays as described on Page 1.

High Environmental Aerospace TO-5 Relays

Designed to withstand severe environmental conditions of shock, vibration, or elevated temperature in excess of normal military specification levels. The following versions are available, all of which are capable of meeting the other requirements of MIL-R-39016:

412H Series--High Temperature (200°C)
412K Series--High Shock (4000 g's/0.5ms)
412V Series--High Vibration (380 g's @ 200 Hz)
432H Series--High Temperature (200°C)
432V Series--High Vibration (380 g's @ 200 Hz)
422H Series--High Temperature (200°C)
422K Series--High Shock (2000 g's/0.5ms)

TELEDYNE RELAYS

Ultraminiature Attenuator Relays

The A150 is an ultraminiature attenuator relay designed for operation in 50 ohm systems over a usable frequency range of DC to 3 GHz. The attenuation values vary from 1 - 20 dB and can be used singly or in combination to achieve any value desired. In the de-energized position the A150 provides a "0 loss" path. The energized position is a predetermined attenuation value which eliminates the need for external resistors.

SERIES	COIL VOLTAGE	ATTENUATION VALUES (dB)	IMPEDANCE (Ohms)	FREQUENCY RANGE	INSERTION LOSS (dB)	VSWR	
						THROUGH PATH	ATTENUATED PATH
A150	5, 12, 15, 26.5	1, 2, 4, 8, 10, 16, 20	50	DC-3 GHz	0.55 MAX.	1.30 MAX.	1.45 MAX.

Low Cost 172 Series Centigrid® Commercial/Industrial Relays Standard and Surface Mount

Low cost commercial versions of the DPDT Established Reliability Centigrid® relays. Hermetic sealing, all welded construction, and gold plated precious metal contacts assure reliable switching of loads from dry circuit to 1 ampere. Contact geometry and low intercontact capacitance provide RF switching capability well into the UHF spectrum.

TELEDYNE SOLID STATE

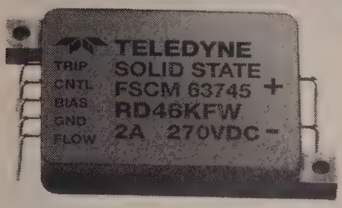
Military Solid State Relays



- Temperature-Independent Current Rating and Overload Protection
- Integrated Short Circuit Protection
- Surge Tolerant Overcurrent Protection Prevents Nuisance Tripping
- Optically Isolated Output and Status Lines
- Output Capable of Sourcing and Sinking Load Current
- Extremely Low ON Resistance
- Flow and Trip Status
- TTL-CMOS Compatible Control
- Meets Surge and Spike Requirements of MIL-STD-704

COMPUTER LOGIC

Teledyne Solid State C76 DIP I/O™ Modules are designed for use in computerized control systems for noise-free isolated interfacing of computer logic elements to harsh industrial environments. Modules employ custom microcircuits in a TO-116 DIP. Eliminates mounting tracks for low "per-point" cost. Meets VDE requirements. Features CMOS and TTL compatibility, optical isolation, high noise immunity and an ENABLE function on input modules. For use in robotics, computerized process control, machine tool control, programmable controllers and ATE.

OPTICALLY ISOLATED SOLID STATE RELAYS

Customized for medium and high-power needs and

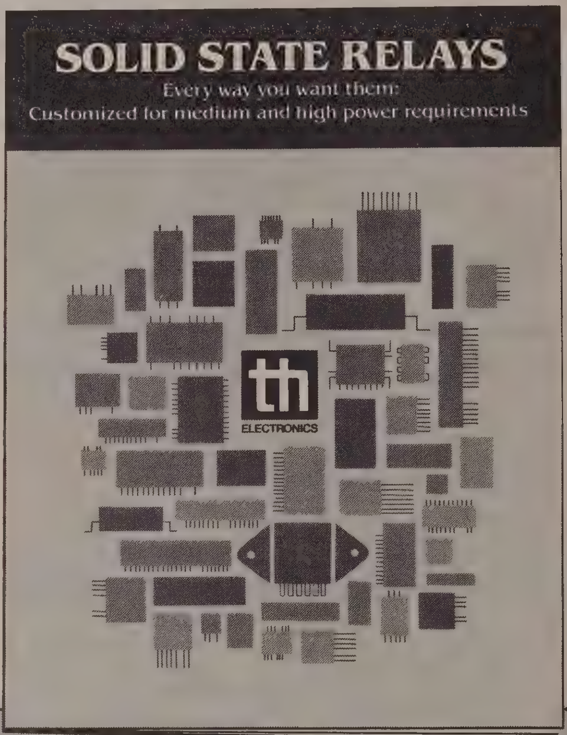
Off-the-shelf • Competitively cost-effective • On-time delivery • Performance-proven reliability • Dialogic engineering

WHAT YOU WANT IS WHAT YOU GET... Maximum customizing-power -- including the "smart" options! Now we enable you to practically "design your own" SSR.

The basic building blocks of an OISSR are:

- LED input network
- PDA generator (including Turn-Off circuit)
- MOSFET/IGBT/SCR output section

Using these, plus any other elements required, we at TH can manufacture for you a relay that precisely fulfills your custom needs.



SOLID STATE RELAYS
Every way you want them:
Customized for medium and high power requirements
th
ELECTRONICS

The variables you can "play with" are:

- **Output elements** (MOSFETs, IGBTs or SCRs) to match your load needs
- **Packages** (SIP, DIP, power pack, or your-choice design) to create the power dissipation and form factor you need
- **Input stages** (3V logic, 5V logic, or constant current) to fit your system signal levels.

From your concept - or your-and-our dialogized idea – to a sample in your hands ... 6 to 8 weeks! ... The time it takes some companies to give you a quote!

Talk to us - we love to serve!

Compare!

	MOSFETS	BIPOLARS
Temperature coefficient	Positive: thermal stability	Negative: thermal runaway
Safe operating area	No secondary breakdown	Pronounced secondary breakdown
Gain variance	±20% from −55 to +125°C	Changes by 2 to 3 times from −55 to +125°C
Leakage current	Low at high temperature — high upper temperature operating limit (175 to 200°C)	Gain multiplication at high temperature — medium upper temperature limit (125 to 150°C)
Switching time	Independent of temperature	Changes by 2 to 3 times from 25 to 125°C
Turn-on signal	High voltage, low current — easier circuitry	Low voltage, high current
Latch	Do not latch, easy to turn on and off	SCRs and Triacs latch Main power must be turned off before reuse
False turn-on	Do not misfire by rise in temperature	SCRs and Triacs can misfire by rise in temperature
Paralleling	Direct paralleling	Need current sharing resistors

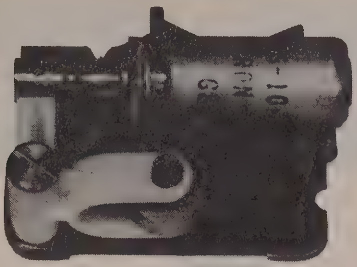
LINEAR MOTION SOLENOIDS

INFORMATION



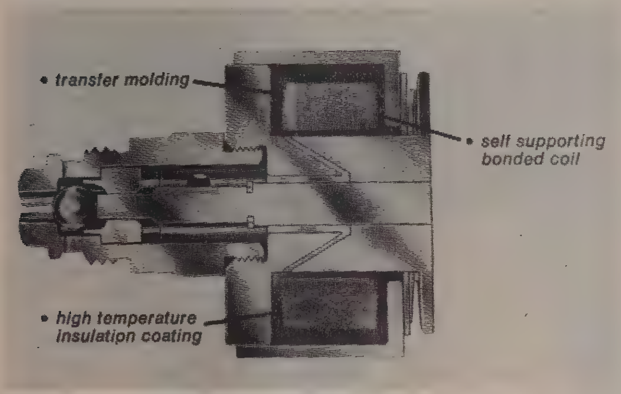
BICRON™

"Excellence Through Teamwork"

IMPORTANT ADVANTAGES FOR YOUR PRODUCT

- High Performance at High/Continuous Duty—Power Levels
- Tough—Durable—Dependable
- Exceptional Force vs. Size
- Harsh Environment Applications
- Mil-S-4040 Capability
- Value Priced
- ISO 9001 Quality System

QUALITY/RELIABILITY DESIGNED INTO BICRON SOLENOIDS:



• transfer molding
• self supporting bonded coil
• high temperature insulation coating

FOR YOUR DESIGN

- Custom Designed Configurations to
- Your Requirements
  - Power
  - Envelope
  - Temperature
  - Submersible
- Your Construction
  - Box Frames
  - C Frames
  - Tubular Frames
  - Poppet Valves
- Your Insulation Systems
  - Including Class H

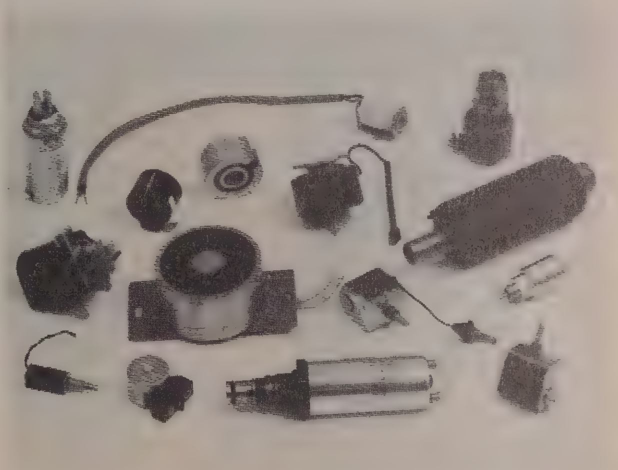
BICRON, established in 1964, is a manufacturer of "Modified Standard" and "Special Solenoids". Our products have found application in the Aerospace, Automotive, Door Hardware, Medical, Military, Off-highway and Trucking markets. The Total Quality Management process at BICRON has enabled us to be certified by numerous customers.

WITH BICRON

- Custom Designed Products at Standard Product Prices
- Personal Indepth Commitment
- Design Engineer Assigned to Your Project Until Completion
- Fast Prototype Deliveries
- Capacity to Meet Your Most Demanding Production Runs
- Proven Computer Aided Designs
- State of the Art Machining and Tooling Facilities
- 25 Years Solenoid Product Know-How

CUSTOM SOLENOIDS

We provide the expertise you expect and the delivery you require.



A selection of products produced for many of our OEM customers.

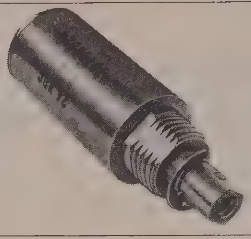
Tubular Solenoids*

PULL-TYPE



D.C. tubular pull-type solenoid is designed to provide up to 90 lbs. of force with a maximum stroke of .500 in.

Actual usable force will depend on the stroke and power level.

Coils are available from 6 to 115 VDC with a continuous duty power level of 2.2 to 54 watts and an intermittent duty power level of 12 to 585 watts.

PUSH-TYPE

D.C. tubular push-type solenoid provides up to 50 lbs. of force with a maximum stroke of .562 in.

Actual usable force will depend on the stroke and power level.

Coils are available from 6 to 115 VDC with a continuous duty power level of 3 to 36 watts and an intermittent duty power level of 9 to 240 watts.

SWITCH-TYPE

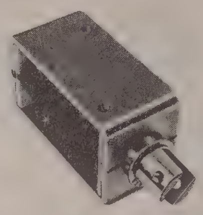
D.C. tubular switch-type solenoid provides up to 120 lbs. of force with a maximum stroke of 1 in.

Actual usable force will depend on the stroke and power level.

Coils are available from 12 VDC to 115 VDC. Each solenoid utilizes two coils, one energized at pull-in for extra force and a holding coil for continuous operation. Intermittent pull-in duty power level is 112 to 700 watts and continuous power level of 3 to 14 watts.

Box & C-Frame Solenoids

BOX-FRAME (PULL-TYPE)

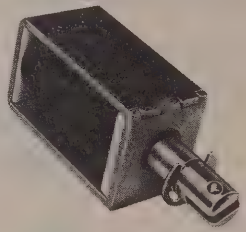


D.C. box-frame pull-type solenoid. Provides up to 170 ozs. force with a maximum stroke of .250 in.

Actual usable force will depend on the stroke and power level.

Coils are available from 6 to 115 VDC with a continuous duty power level of 8 watts and an intermittent duty power level of 18 watts. Pulse-type coils are also available.

BOX-FRAME (PUSH-TYPE)

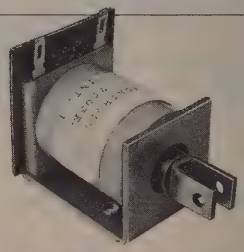


D.C. box-frame push-type solenoid. Provides up to 20 ozs. force with a maximum stroke of 200 in.

Actual usable force will depend on the stroke and power level.

Coils are available from 6 to 115 VDC with a continuous duty power level of 3.0 watts and an intermittent duty power level of 9.0 watts.

C-FRAME



C-frame (open) pull-type solenoid, available for DC or AC operation, is designed to provide up to 65 oz. (D.C.) — 34 oz. (A.C.) with a maximum stroke of .250 in.

Actual usable force will depend on the stroke and power level.

Coils are available from 6 to 115 VDC and 6 to 240 VAC with a continuous duty power level of 5 watts (D.C.) — 7 VA (A.C.) and an intermittent duty power level of 15 watts (D.C.) — 20 VA (A.C.)

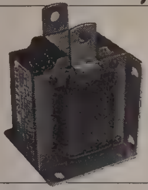
AC Solenoids*

100 SERIES (PULL-TYPE)



The **100 Type AC** laminated solenoids provide up to 6 lbs. of force with a stroke of .875 in.

Actual usable force will depend on the stroke and power level.

Coils are available from 24 to 230 VAC and power levels of 230 VA to 550 VA.

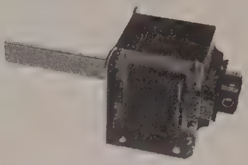
200 SERIES (PULL-TYPE)

The **200 Type AC** laminated solenoids provide up to 20 lbs. of force with a stroke of 1 in.

Actual usable force will depend on the stroke and power level.

Coils are available from 24 to 440 VAC and power levels of 518 VA to1840 VA.

100 & 200 SERIES (PUSH-TYPE)

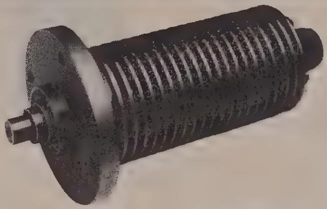


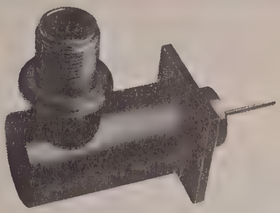
By utilizing a stainless steel shaft the **100 and 200 Series** are available as push-type solenoids. The solenoids provide up to 20 lbs. of force with a stroke of 1 in.

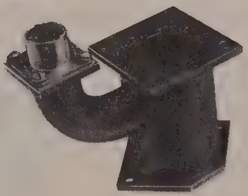
Actual usable force will depend on the stroke and power level.

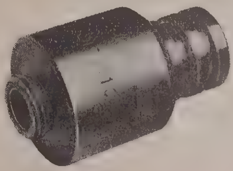
Coils are available from 24 to 440 VAC and power levels of 230 to 1840 VA.

Custom Solenoids*









Communications Instruments, Inc., can provide customized solenoids with many of the following features:

SOLENOID STYLES

- High temperature
- 400 Hz AC
- Commercial AC
- Air frame
- Heavy duty
- Pressure sealed

CONNECTOR STYLES

- Flexible leads
- Connector assemblies
- Right angle AN connectors
- Square flange AN connectors
- Screw terminals
- Solder terminals
- Stud terminals

MOUNTING STYLES

- Round flanges
- Square flanges
- Threaded flanges
- Shaped flanges

PLUNGER STYLES

- Internal threads
- External threads
- Clevice plungers
- Extension plungers

DELTROL

SOLENOIDS

ENGINEERING MANUAL

Deltrol Controls offers a wide selection of popular solenoid models which produce linear push and pull motion. They are categorized in three frame designs – "C", "D", and "ME" (tubular). Designers specify Deltrol solenoids because of their quality and proven reliability in literally thousands of OEM applications.

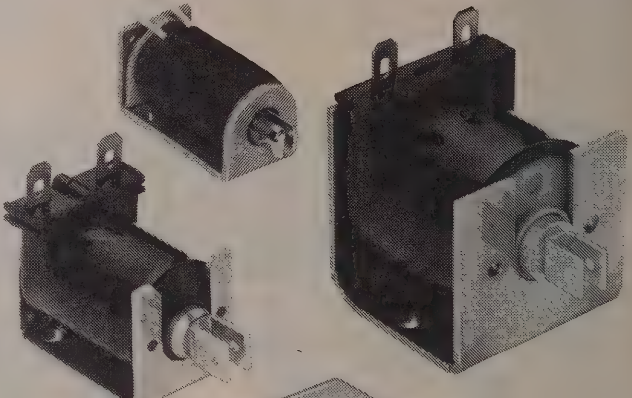
Depending on specific product design requirements, Deltrol will provide "special type solenoids" on request. It is important that complete data on the solenoid be submitted for design proposal requirements. In addition, factory engineering assistance is available when the customer finds it difficult to determine all of the operational requirements of a solenoid which are needed for a particular requirement. Our test laboratory is equipped to make accurate stroke-force, temperature rise or other tests required on a solenoid for special application.

We urge you to call, write or fax your request for our extensive Solenoids Engineering Manual, Bulletin 1846-9.

ALL DELTROL SOLENOIDS ARE MADE IN THE U.S.A.

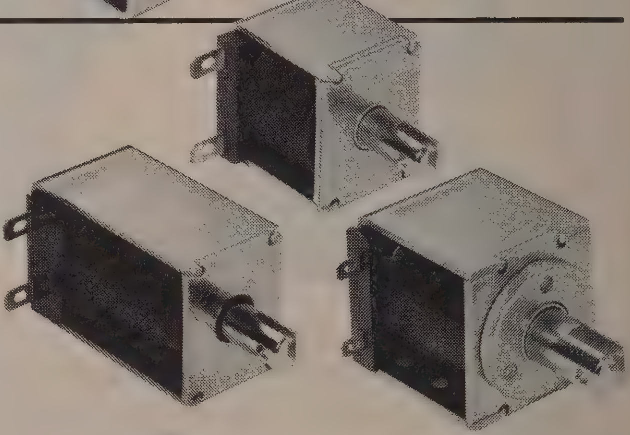
"C" FRAME SOLENOIDS

This category of solenoids is designed primarily for volume applications (appliances, vending machines, valve operators, etc.) where low cost is essential. Many of the types listed incorporate molded coils as a standard feature. Long operational life (in the millions of cycles) can be expected in most applications because of the low friction, high wear capabilities of the plastic plunger guides which are provided. Residual magnetism characteristics are kept to a minimum by using high quality magnetic iron in the frames, plungers and backstops.



"D" FRAME SOLENOIDS

This group of solenoids is the "standard" of the industry for high quality applications (business machines, tape decks, industrial controls, recorders, etc.) Molded coils are standard on some types and available without premium on others. High permeability iron is used exclusively providing fast, reliable operation and negligible residual magnetism. Hard finish on plungers and low friction metal or plastic guides promote long, reliable life expectancy. "D" frame construction provides excellent magnetic characteristics for high operating efficiency, particularly in DC applications.



"ME" FRAME SOLENOIDS

For DC applications only. Designed to provide greatest possible force in limited space. Solenoids are completely metal enclosed and are highly resistant to shock, vibration and moisture. All units available in "pull" or "push" types are standard. Stock types incorporate Class B temperature rated insulation. Plunger guides are wear-resistant plastic with optional stainless steel. Low plunger mass and high magnetic power provide fast, accurate response. Easy mounting with threaded bushings and hardware provided.

ALL NEW with this edition of EEM

GET ORGANIZED!

Are your catalog files organized? Can you find any given catalog in a matter of seconds? If your answer is "Yes," you probably already have the EEM File System. But, if you said "No," you really ought to look into this simple system. It will save hours of time and tons of aggravation.

The EEM File System was invented over twenty-five years ago to help people who specify, buy, or work with electronic products and equipment. It is upgraded on a constant basis to reflect the current state of the art. It's easy to use and easy to customize to your particular needs.

You say you want to file catalogs by type of product? That's easy to do with the System. But, what are you going to do when there are multiple products in one catalog? Take Mallory for example. There are all kinds of products in the Mallory Short Form Catalog. With the EEM File System all you do is file the catalog under "M" for Mallory and refer to it on all of the cross reference cards that apply.

There are thousands of EEM File Systems in everyday use in engineering and procurement offices all over the world. Shouldn't you be using this proven system?

The EEM File System is shipped in one neat package. The package contains everything you need to set up your very own filing system. Best of all, it's easy to get and very affordable. Send a check or money order for $25.00 and EEM will pay the postage and sales tax. If you must use a purchase order, please add $5.00 for postage and handling. An invoice will be mailed to you under separate cover.

Don't waste any more time. Get organized now!

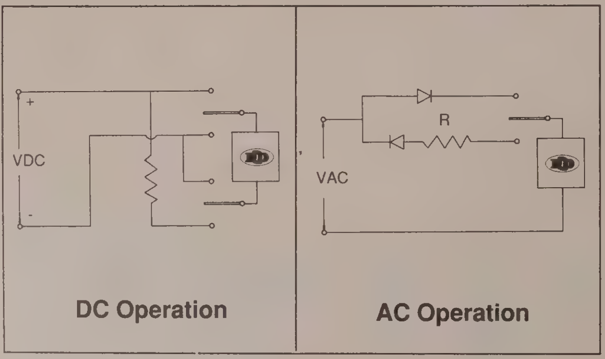
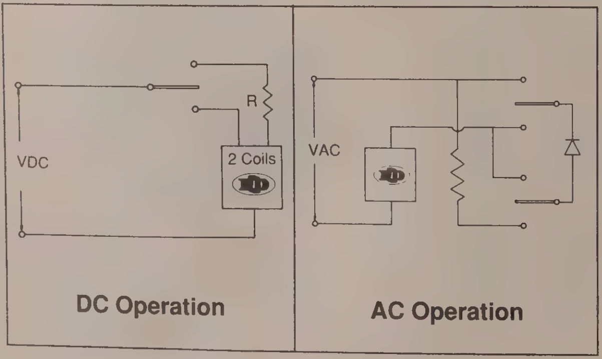
State-of-the Art Magnetic Latching Solenoids

Dormeyer magnetic latching solenoids are available in a variety of styles.

Suggested one coil operation



Suggested two coil operation



Demand is up for energy-saving improvements in powered products. The need to save energy has fueled the electronics industry with the powerful desire to produce more energy-efficient components.

And on the leading edge of the trend is Dormeyer, with the latest and best in Magnetic Latching Solenoid Technology.

A short pulse of power provides the electro-magnet with enough force to pull and hold 20 lbs., saving up to 100% power consumption, depending on the application, while providing a reduction in temperature rise.

Dormeyer's advanced magnetic technology provides 10% more hold and pull force than conventional magnetic latches, with the same life expectancy.

Dormeyer has the flexibility to manufacture custom solenoids that fit exacting requirements. Complete, ready-to-install assemblies are also offered. These products are American-made in Rockville, Indiana.

Applications Include:

- Appliances
- Vending machines
- Business Equipment
- Power distribution
- Disk drives
- Battery-driven Devices
- Security systems
- Fire protection
- Medical equipment, and more

Dormeyer offers a wide range of standard solenoids featuring magnetic latch, with pull forces ranging from 0.4 oz. to 240.0 oz. Tubular, C-frame, and box frame styles are offered. DC or AC input voltage, encapsulated coils, and many termination options are available. All Dormeyer solenoids meet UL and CSA requirements.

Dormeyer is a leading manufacturer offering a variety of quality linear solenoids, including laminated versions which are not available with magnetic latching. The Company produces custom and standard transformers and custom coils as well.

SPECIALS

ELECTRO-MECHANISMS, INC., is completely equipped, both engineering and production wise, to supply you with variations of our solenoids that you might need for your application. We are also capable of designing special types that you might need within the size range of our products. We would appreciate the opportunity to help you solve design and application problems you may have in the area of miniature solenoid actuators.

The force charts below represent three different duty cycles.

Nominal voltage represents continuous duty.

2X Nominal voltage represents a 25%, intermittent duty cycle 4X Nominal voltage represents a 6% intermittent duty cycle.

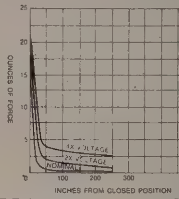
The duty cycle consists of two factors:

1. Percentage of time solenoid is energized in one complete operating cycle.

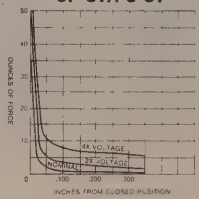
$$\text{(Ref: DUTY CYCLE} = \frac{\text{Time On}}{\text{Time On + Time Off}} \text{ X 100)}$$

2. Length of time of the longest single energization in one complete operating cycle.

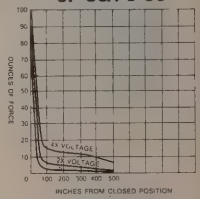
SP-25/PO-25



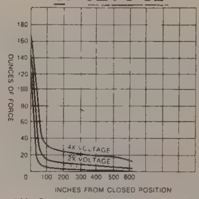
SP-37/PO-37



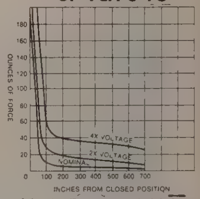
SP-50/PO-50



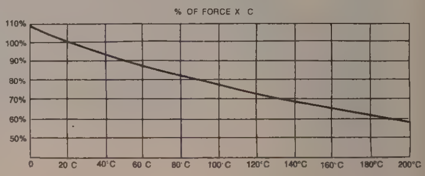
SP-62/PO-62



SP-75/PO-75



All forces shown are at 25° ambient. For use at higher ambient temperatures use the chart below to determine force at any given temperature.



FEATURES

ELECTRO-MECHANISMS micro-miniature solenoids offer you static and impact forces equal to standard solenoids 2 to 3 times the size of these units.

Because of their small size, they have extremely fast reaction time. As fast as 2 msec at 4x nominal voltage.

The unique design of PUSH or PULL action, offers many applications beyond the conventional pull type solenoid.

A complete line of 15 solenoids from ¼" O.D. to 1¼" O.D. allows you to choose the correct solenoid with the force you require, from stock items.

The units are highly reliable with life of many millions of operations.

The solenoids are also available with coils in Class F and Class H for high temperature requirements.

Simplicity of design helps keep the costs down and allows us to pass these savings on to you, our customer.

TYPICAL APPLICATIONS

- Hammers for high speed printers
- Camera shutter actuators
- Locking mechanisms for switches, adding machines and typewriters
- Interpossers for card punching and tape perforation
- Cam actuation
- Pen lifters for plotters
- Event markers for chart recorders
- Key actuators for numerical readouts on typewriters and adding machines
- For life testing different devices
- For indicator flags
- Sensing devices
- Remote switching and actuation

Solenoid Selector

(Stroke in inches vs. Force in ounces)

Made in U.S.A.

LIBERTY CONTROLS, INC.

500 Brookforest Avenue, Shorewood IL 60435
Phone 815-725-2241 Fax 815-725-6571

The charts on this page were developed as an aid for solenoid selection and were derived from the typical force curves presented throughout this catalog. These values should not be interpreted as minimum values. Deviations can be expected due to normal manufacturing, and coil winding tolerances.

Due to differences in size, the wattage for continuous, intermittent, and pulse duty coils will be different from one type of solenoid to another.

Although only 3 wattages (duty cycles) are described in the catalog for each type of solenoid, other possibilities are available. Contact Liberty Controls for help in determining a solenoid to fit your application.

Contact Liberty Controls for help with the specification, and for complete part numbers. Push type solenoids available in all series shown. Dimensions shown are in inches

eem

COMMONLY USED ELECTRICAL/ELECTRONIC ABBREVIATIONS AND ACRONYMS

A
A/D acrylonitrile butadiene-styrene
A/D analog to digital
ADC analog to digital converter
ADP automatic data processing
AFC audio frequency control
AFT automatic filter test
ALGOL algorithmic language
AM a logical operator
AQL acceptable quality level
ASCII American national standard code for information interchange
ASIC application specific IC
ATE automatic test equipment
ATG automatic test generation
AWG American wire gauge

B
BALUN balanced to unbalanced
BASIC beginners' all-purpose symbolic instruction
BCD binary-coded decimal
BNC baby "N" connector
BUS basic utility syste

C
CAD computer-aided design
CAE computer-aided engineering
CAM computer-aided manufacture
CAMAC computer-automated measurement and control
CAPP computer-aided process planning
CAT computer-aided test
CATV cable television or community antenna television
CCC (leaded) ceramic chip carriers
CCD computer-controlled display
CERMET ceramic metal element
CIE computer-integrated engineering
CIM computer-integrated manufacturing
CLCC ceramic leadless chip carriers
CMOS complementary metal-oxide semiconductor
Comm. communications
CPS characters per second
CPU central processing unit

D
D/A digital to analog
DAC digital to analog converter
DBMS data base management system
DC direct current
DFT design for testability
DIAC bidirectional trigger diode
DIL dual in-line
DIN Deutsche Industrie Normenausschuss
DIP dual in-line package
DPM digital panel meter
DRAM dynamic RAM
DTL diode transistor logic

E
EDA electronic design automation
EDP electronic data processing
EBCDIC extended binary coded decimal interchange code
EEPROM electrically erasable PROM
EIA Electronic Industries Association
EMC electromagnetic compatibility
EMI electromagnetic interference
EMP electromagnetic pulse
EPROM erasable programmable ROM
ESR equivalent series resistance

F
FEP fluorinated ethylene propylene Copolymar, 200° Teflon
FET field-effect transistor
FM frequency modulation
FORTRAN formula translator

G
GaAsFET gallium arsenide FET
CMIP commn management information protocol
GPIB general purpose interface bus
GPS global positioning system

H
HF high frequency (3 to 30 MHz)
HIPOT test, measurement, and diagnostic equipment
HLL high level language
HV high voltage
Hz Hertz

I
IAB Internet Activities Board
IC integrated circuit
IDC insulation displacement contact
IF intermediate frequency
IO input/output (devices)
IR insulation resistance (or) infrared
ISDN integrated services digital network
ISO International Standards Organization

J
JEDEC Joint Electronic Device Engineering Council
JFET junction FET
JMOS junction MOS

K
kHz kilohertz (10^3 hertz)
KSR keyboard send /receive

L
LAN local area network
LC (filters) inductance/capacitance
LCC leaded chip carrier
LCD liquid crystal display
LED light-emitting diode
LF low frequency (30 to 300 kHz)
LIF low insertion force
LNA low noise amplifier
LNB low noise band
LSI large scale integration
LVDT linear velocity displacement transformer

M
MASER microwave amplification by stimulated emission of radiation
MATV master antenna television
µF microfarad
MHz megahertz
MIC microwave IC
MIPS million instructions per second
MIB microcomputer interface board
MOS metal oxide semiconductor
MOSFET metal oxide semiconductor FET
MOSIGT metal oxide semiconductor insulated-gate transistor
MOV metal oxide varistor
MPU microprocessor unit
MSI medium scale integration

N
NBS National Bureau of Standards
NEMP nuclear electromagnetic pulse
NIM national instrumentation module
NOR not OR
NTC negative temperature coefficient

O
OCR optical character reader
OEM original equipment manufacturer
OR a logical operator
OSI open systems interconnection

P
PAL programmable array logic
PC printed circuit
PCB printed circuit board
PCM pulse code modulation
PCS plastic clad silica
pF picofarad
PGA pin grid array
PIN positive-intrinsic-negative (transistor)
PLA programmable logic array
PLCC plastic leaded chip carrier
PLL phased lock loop
PPI plan position indicator
PROM programmable ROM
PTC positive temperature coefficient
PUT programmable unijunction transistor

Q
QAM quadrature amplitude modulation
Q (meter) quality-factor meter

R
RAM random access memory
RC resistance-capacitance
RFI radio frequency interference
RMS root mean square
ROM read only memory
RF radio frequency
RFC radio-frequency choke
RFI radio-frequency interference
RTD resistance-temperature detector
RTL resistor transistor logic
RTV room temperature vulcanizing
RW read/write

S
SAS silicon asymmetrical switch
SBC single board (micro) computer
SBS silicon bilateral switch
SCR silicon-controlled rectifier
SCS silicon-controlled switch
SDA source & detector assemblies
SGMP simple gateway monitoring protocol
SIDAC bidirectional voltage-triggered switch
SIMM single in-line memory module
SIP single in-line package
SMD surface mount device
SMT surface mount technology
SNMP simpole network management protocol
SO small outline
SOIC small outline IC
SOT small outline transistor
SSI small scale integration
SSR solid-state relay
STL Schottky transistor logic
SUS silicon unilateral switch

T
TC temperature coefficient
TCE thermal coefficient of expansion
TXCO temperature compensated crystal oscillator
TFE tetrafluoride ethylene propylene Copolymer, 250° Teflon
TRIAC bidirectional AC switch
TTL transistor-transistor logic
TTY teletypewriter

U
UHF ultra high frequency (300 MHz to 3 GHz)
UJT silicon unijunction transistor
UL Underwriters Laboratory
UPS uninterruptible power supply

V
VAC volts (of) alternating current
VAN value-added network
VAR volt-ampere reactive
VCR video cassette recorder
VDC volts (of) direct current
VHF very high frequency (30 kHz to 300 MHz)
VHSIC very high speed integrated circuit
VLF very low frequency (3 to 30 kHz)
VLSI very large scale integration
VME virtual machine environment
VRM voice recognition module
VTVM vacuum tube volt meter
VU volume unit
VSWR voltage standing wave ratio

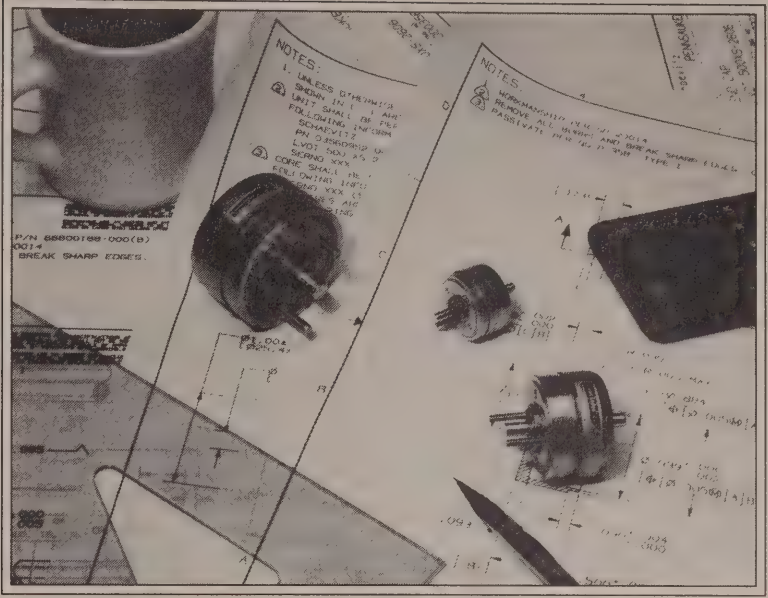
W
WPS word processing software

Y
YIG yttrium iron garnet

Z
ZIF zero insertion force

Problem:

Need a solenoid for a project, and you're out of time.



Solution:

Ledex stock prototypes

- *The industry's largest variety of solenoids*
- *Over 400 designs*
- *Same day shipment available*

Don't rely on design guide procedures to evaluate a solenoid for your project. Use the quick, cost-effective way– order a stock Ledex prototype.

We offer over 400 stock models to cover almost any solenoid application:

- **Rotary solenoids**– up to 117 lb-in. Choose from hundreds of stock models or custom designs for prototype work.
- **Tubular solenoids**– force ratings to 11.5 lbs at 0.30". Push and pull models rated life is 25 million actuations.
- **Low profile solenoids**– force to 30 lbs at 0.30" stroke. Push/pull, flat face, or conical designs built for high force to size, and fast response.
- **Brushless Torque Actuators**– field proven at over 100 million cycles. Quick, shock-free operation.
- **Soft Shift® solenoids**– proportional control as well as on-off. Rated for up to 50 lbs of force.
- **Open frame solenoids**– pull force to 7.5 lbs at 1.0 in stroke. 42 models offer economical, long-term service.
- **Magnetic latching solenoids**– maintain energized position without current draw.

More than inventory...

We provide the added services that give you the exact product you want– quickly, easily, economically.

Unique customer specifications

- 80% of Ledex solenoids are designed to customer specifications
- We offer a short order prototyping service which can deliver custom prototypes in 2 weeks or less, for a small service charge

Quick Delivery

- Same day delivery on most stock models

No credit hassels

- Use your Visa or Mastercard and save time

MasterCard VISA

Quality...our measure of leadership

- Ledex has received numerous awards for exceeding on-time deliveries with zero rejects
- Our goal is to achieve zero defects

Refer to the following pages for more details and specifications on many Ledex solenoid designs.

Rotary Solenoids

- *Millisecond-fast, high torque actuation*
- *Nine sizes from 3/4" to 3-3/8" diameter*
- *Clockwise or counterclockwise strokes*
- *Choice of economical bobbin wound coil, standard precision coil, or elongated precision coil for lower power consumption*
- *Variety of standard configurations and modifications available*

Bobbin Coil Selection

[1] Without armature cover

[2] Torque values shown are for Standard Life units (1 million actuations life rating). Long Life models provide approximately 10% less torque, but offer 50 to 100 million actuations life ratin g. Long Life models are only available in strokes up to 45°.

Tubular Solenoids

- *New STA Series has enhanced design features and improved performance*
- *Push and pull models*
- *Strokes up to 2-1/2"*
- *Life rating of 25 million actuations*
- *Prototypes on the shelf*

Low Profile Solenoids

- *Space-saving, low profile linear actuation*
- *Ideal for high force, short stroke applications*
- *Push/pull, flat face, or conical designs built for high force to size*
- *Fast response*

Brushless Torque Actuators

- *Controlled velocity and position*
- *Quiet, shock-free operation*
- *100 million plus cycle life*
- *High-speed cycle rate*
- *No axial stroke*
- *Low power consumption*
- *Completely enclosed ball bearing construction*
- *Right or left hand strokes available*

Size	Package Dimensions (in)		Maximum Stroke	Gross Starting Torque (lb-in) at Specified Duty Cycle

Open Frame Solenoids

- *Pull forces to 15 pounds*
- *Strokes to 1 inch*
- *38 models offer economical, long-term service*
- *Magnetically latching models remain latched without energy – ideal for locking mechanisms*

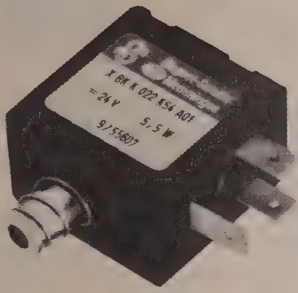
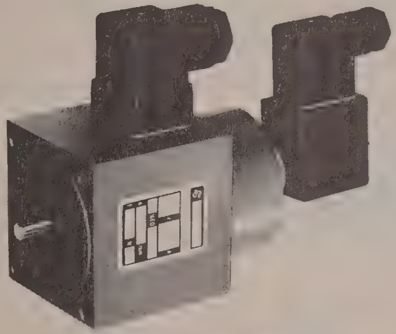
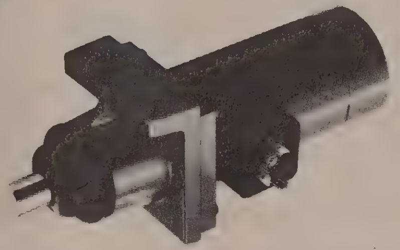
Specialists in Electromagnetic Devices



XBRX
- Pneumatic Solenoids for Valve Applications.
- Operating Pressures from 100psi to 189psi.
- Valve Orifice: 2.5mm.



GRFY & AW
- Proportional Solenoids for Hydraulic and Pneumatic Applications.
- Wet and Dry Armature Designs.
- Pressure Proof Armature from 43.5psi Static up to 4500psi-static.



GHUZ
- Machine Tool Safety Solenoid or Deadbolt Solenoid.
- Heavy Duty Interlocking Device.
- Designed to Withstand 750 lbs sideload.
- Available in de-energize to lock or de-energize to unlock.

- **Linear & Rotary Designs**
- **Experts in Magnetic Latching Solenoids**
- **Special Vibrating Solenoids**
- **Three Phase Single Acting Solenoids**
- **Holding Magnets (1/2 lb to 65 lb holding)**
- **Air Dampened Solenoid-With Adjustable Air Dash Pot.**
- **Trip Latch Solenoids**
- **High Speed (ms), Long Life (100 million cycles) Designs**

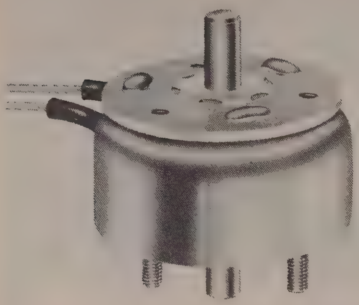
Solenoids

OAK GRIGSBY



Rotary Solenoids

- Rapid response, high torque actuation
- Eight sizes available
- Right or left stroke from 25° to 95°
- Torque output to 30 lb./in.
- Modifications available

			Torque at 25° Stroke		Torque at 35° Stroke		Torque at 45° Stroke		Torque at 67 1/2° Stroke		Torque at 95° Stroke	
Type	O.D. (in.)	Height (in.)	100% Duty	5% Duty	100% Duty	5% Duty	100% Duty	5% Duty	100% Duty	5% Duty	100% Duty	5% Duty

BOX FRAME

Box Frame Solenoids

- A.C. and D.C. available
- Leads or terminals available
- Pull up to 3 3/4# at 1" stroke
- Nine sizes available
- Modifications available

FLAT PACK SOLENOIDS AND SOLENOID SELECTROS ARE ALSO AVAILABLE.

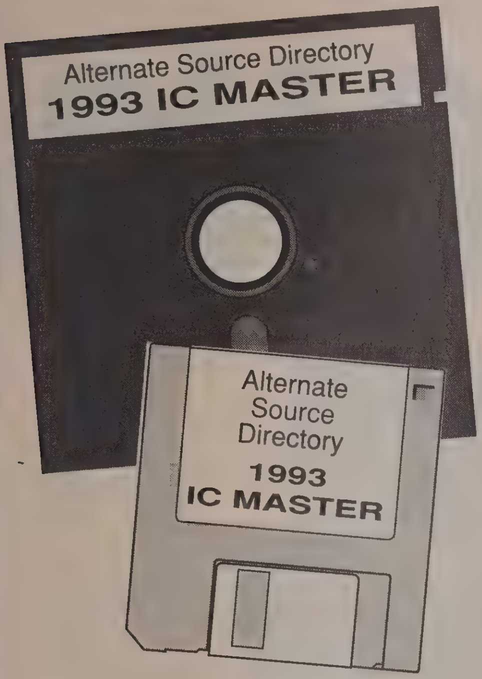
Hearst Engineering Software

ICMASD

Alternate Source Directory



The all new 1993 ICMASD-IC Alternate Source Directory on Disk is identical to the Alternate Source Directory Section contained in Volume Two of the printed version of the 1993 IC Master. All you need is an IBM XT/AT or 100% compatible personal computer with hard drive.

ICMASD is the most comprehensive and reliable guide available to all ICs known to have a realistic replacement or alternative. The 1993 version contains over 106,000 listings to help you find the functional equivalents for both current and discontinued parts.

The electronic ICMASD is fast, convenient...and can be customized for your specific needs!

ENHANCED FLEXIBILITY

ICMASD is organized in a similar fashion to the printed version in the IC MASTER. The database is arranged by manufacturer, showing the manufacturer's original basic part number. All known replacements for that part are listed in alphanumeric order.

The enhanced flexibility of the electronic ICMASD allows you to add comments, up to 19 digits long, to any device listing in the system. These comments can be part numbers, project notes, prices, or any information unique to your application.

USER FRIENDLY

ICMASD is very user friendly. There are no tricky commands to learn. The software is completely menu driven. ICMASD comes complete with documentation that is brief and to the point. It can be ordered on five 51/4" double-sided, double-density disks OR on one 51/4" high-density disk OR on one 31/2" high-density disk.

Published annually in March

FAST AND CONVENIENT

ICMASD includes a complete Manufacturers & Distributors Directory listing the addresses and phone numbers of every manufacturer in the IC industry. With this complete directory any manufacturer or distributor is just a phone call away.

To order your 1993 ICMASD,
contact your local IC MASTER distributor or, send your purchase order and check for $179.50 plus tax* to:

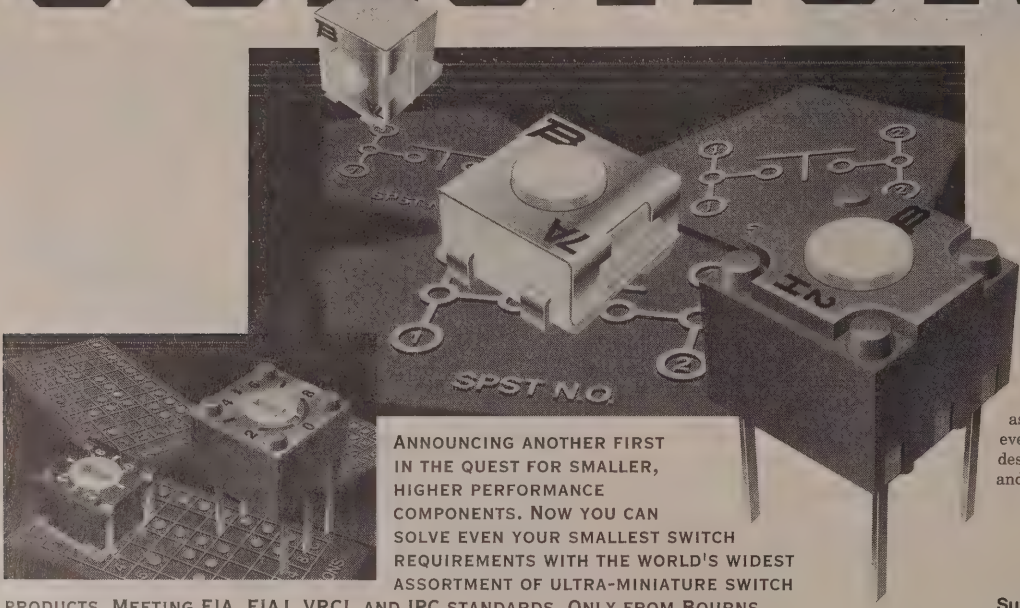
Marie Botta
Hearst Business Publishing
645 Stewart Avenue
Garden City, NY 11530
(516) 227-1300 • FAX (516) 227-1901

*Please add sales tax in NY,MA,IL, CA, or GST tax in Canada
For delivery outside the USA, please add $20 per ICMASD.

For faster service, have your VISA or MasterCard handy, and call our CREDIT CARD HOTLINE: 1-800-833-7138

ULTRA-MINIATURE SWITCH

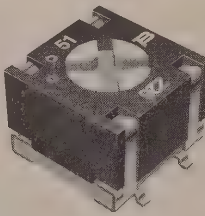
SOLUTIONS



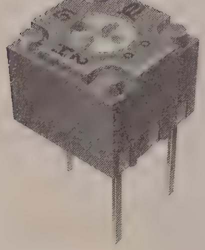
ANNOUNCING ANOTHER FIRST IN THE QUEST FOR SMALLER, HIGHER PERFORMANCE COMPONENTS. NOW YOU CAN SOLVE EVEN YOUR SMALLEST SWITCH REQUIREMENTS WITH THE WORLD'S WIDEST ASSORTMENT OF ULTRA-MINIATURE SWITCH PRODUCTS. MEETING EIA, EIAJ, VRCI, AND IPC STANDARDS. ONLY FROM BOURNS.

Ultra-Miniature Designs
Select from a wide assortment of packages for even the tightest board designs, in 3mm, 4mm, 5mm and 6mm styles.

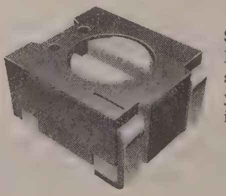
Surface Mount and Through-hole Styles
For maximum design flexibility, choose from both SMT and through-hole configurations. SMT styles are tape and reel packaged for compatibility with pick and place equipment.



Rotary, Selector, Coded and Key Series
A selection of switch functions are offered for a wide range of circuit board level applications.



Seal Integrity
Ultra-miniature switches feature a unique seal design for compatibility with all popular soldering and cleaning procedures.



So Much, So Little
From Bourns. You'll find the biggest selection of the smallest switches. Call your local Bourns office today for more information.

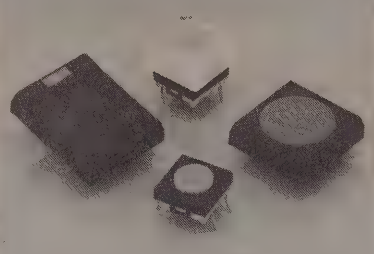
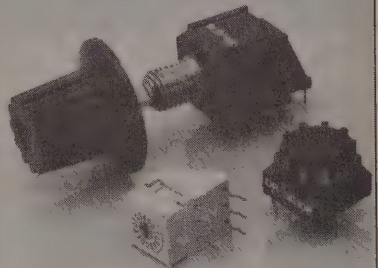
§ Surface Mount
† Wave Solderable

KEYS TO SUCCESS



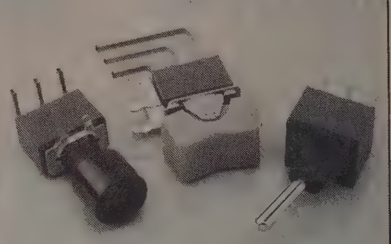
Dome contact, low profile keypad switches. Lighted & non-lighted, round & square. Sub-surface mounting types. Up to 5 million actuations.

FLAWLESS LOGIC



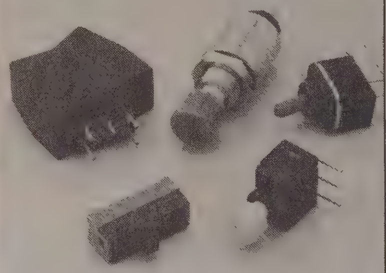
Real or complement coded, decimal or hexidecimal dip rotaries. Screwdriver, shaft or dial actuation. Washable.

WASH AND GO



NKK washables lead the way with the industry's widest range of circuits, actuators, terminals & accessories. Micro thru std. sizes.

LITTLE GIANTS



NKK pioneered the smallest. Toggles, rocker, pushbutton, slides. Washables, SMDs, anti-static & STC contacts available.

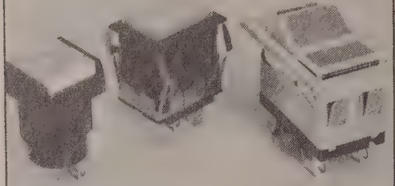
FREE DESIGN TOOL

nkk switches

LIGHT FANTASTICS

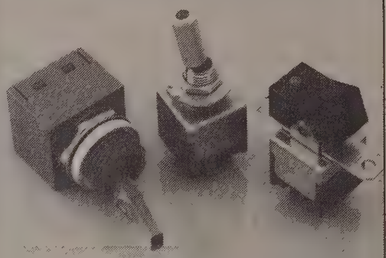
Tiny, but bright. Low-profile snap-in or panel mounting. Numerous actuators, circuits, ratings, terminals and colors.

WAYS TO GLOW



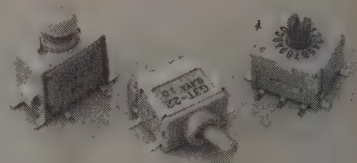
Round, square, rectangle shapes. In all popular colors. Wide choice of terminals, circuits, lamp types & accessories.

POINTS OF LIGHT



Lighted toggle and paddle tips add style and function to designs. Several actuator and circuit options.

STAY ON TOP



The latest surface mount technology. Washable, vapor phase solderable toggles, pushbuttons and dip rotaries. Gull-winged terminals.

DESIGN PARTNERS

We have exactly what every design engineer needs — over one million switch options and more than 40 years of switch know-how. Before you start your design-in, call for our 456-page Design Guide, then call on our experience. Make sure your design-ins go flawlessly. Make NKK your design partner right from the start.

Call NKK Switches,

		Tr-R	OS-5002-2
		IC	OS-5001

OPTO MICROSWITCHES

Solid state alternative to mechanical snap switches

V Type	 1.1 x .39 x .63 in, 28 x 10 x 16 mm	• Long life • Digital output • Open collector (also available with pull-up resistor)		OB-210512
				OB-210532
				OB-210552
				OB-210572
S Type	 .78 x .23 x .51 in 20 x 6 x 13 mm	• Miniature, Long life • Selectable supply voltage of 5V to 24VDC with RF and RL resistor values • Industry standard		OB-600112
				OB-600132
				OB-600152
				OB-600172

J Type	 .51 x .23 x .24 in 13 x 6 x 7 mm	• Subminiature • High reliability • PCB-mount type • Industry standard package		OB-703213
				OB-703233
C Type	 1.2 x .66 x. 66 in 31 X17 X17 mm	• Rotary type • Long life (100 M operations min) • Low operating force • Industry standard package		OR-300112 Clockwise rotation
				OR-310112 Counter-clockwise rotation

Free evaluation samples and design assistance to qualified OEM Designers

SWITCH SEALS

Backed by over 25 years of engineering solutions — for an ever-changing and demanding market.

The wide demand for custom-molded panel and switch seals, threaded inserts bonded to rubber, O-rings, boots and seals, etc., translated is really a demand for talent and know-how to handle the engineering and molding of particularly thorny or unusual custom requirements that frequently plague industry. AME meets the demand. . . with experience, service and unique production techniques.

CUSTOM ENGINEERED PRECISION MOLDED ELASTOMERS

- Color filters for incandescent lamps
- Rubber to metal bonding
- Clear silicone products
- Self-sealing hex nuts
- Self-sealing washers
- Extrusions
- O-rings
- Boots
- Gaskets
- Seals
- Conductive rubber
- Die cutting

*FOR A COMPLETE LISTING OF ALL STYLES AVAILABLE, INCLUDING ROUND BASE SEALS, PLEASE CONTACT THE FACTORY.

MANY OTHER SIZES AND TYPES AVAILABLE

Pressure capabilities: Internal Pressure
1 Atmosphere, 15 psi (103.4 kPa)
External Pressure
2 Atmospheres, 30 psi (206.8 kPa)

For Part #1106 — Internal pressure
.7 Atmosphere, 10 psi (69 kPa)
External pressure
1.4 Atmospheres, 20 psi (138 kPa)

Endurance: Exceeds 100,000 actuations (depending on environment).

Useful life: 20 years to unlimited (depending on environment).

Switch Seals are designed and manufactured to meet or exceed applicable military specifications.

FAX (201) 263-8199

Switch Seals

An elastomeric boot which seals, thus protecting a switch and internal components against hazardous foreign elements. AME's one piece switch seal is constructed of a flexible rubber boot element bonded during molding to a threaded metal insert that fully encapsulates the switch and bushing to the panel.

This assembly replaces the panel mounting nut and seals the mounting hole making it watertight. It protects against moisture, oil, dirt, dust, most solvents, many acids (see elastomer selection guide).

Switch seals provide vibration resistant mounting and act as double insulation with no interference to switch movement.

CAST URETHANE & SILICONE

AME supplies cast urethane and silicone products precision engineered to meet your most demanding requirements.

If you need high tensile/tear strength, excellent resistance to abrasion and high impact capability, our cast urethane is ideally suited for the job. Superb temperature resistance to the damaging sub-zero cold or searing heat extremes is found in the cast silicone custom engineered by AME Corporation.

The world's first intelligent man/machine interface in a DIP . . .

Provides all of the display and switch functions you'll ever need in a single compact device. Stackable and cost-effective.

The secret? A single LSI chip with state-of-the-art CMOS logic. Developed jointly with GE/RCA. Logic that combines a single-character alphanumeric display, thumbwheel switch and pushbutton switch functions in one easy-to-use component. A true peripheral device with a RAM-like CPU interface.

An intelligent thumbwheel switch that will put you miles ahead of the competition. With capabilities they can only dream about. Unless, of course, you tell them.

In a simple application you might directly replace those out-dated mechanical thumbwheel switches. A typical cookbook design. And without a host CPU.

In a more sophisticated application you might use a host processor to provide programmable control over man/machine interactions. Such as formula selection and entry, display of messages, user friendly menus, or a mix of some or all of these capabilities. The possibilities are limited only by your imagination.

No matter how simple or how complex your application is, no other interactive component has so much to offer and is so easy to use.

Concerned about availability? Standard parts are typically off-the-shelf. We've even set up a second source so that you'll receive an uninterrupted supply.

Got a deadline to meet? Our technical support team will help get you on the air in record time. Or maybe one of our off-the-shelf intelligent thumbwheel assemblies will fit the bill.

Whether you need to make a decision fast, or you're just thinking about down the road. Our microcontroller-based evaluation kit will provide you with instant evaluation, complete documentation and everything else you need to get started. Order one right now and experience intelligent interaction.

To place an order or for more information call:
(708) 468-6000

EVALUATION/DESIGNER'S KIT

This handy low-cost kit will save you weeks of time. The kit includes everything you need for evaluating, prototyping and designing with this new technology. A MUST for your engineering lab.

Includes a microcontroller programmed to demonstrate the many functions and capabilities of these devices.

The kit includes:

- 15 assorted intelligent thumbwheels
- A microcontroller-based evaluation board with all components (includes a preprogrammed Signetics S87C751 microcontroller)
- Technical data sheets and specifications
- Application notes

Order # EVAL-SST-KIT $245

MINIGLOSSARY ELECTROMECHANICAL RELAYS

RELAYS

Hybrid: Isolated input and output either with a solid-state input and an electromechanical output or vice versa. Typically a reed switch is used to trigger a solid-state output or a solid-state amplifier is used to trigger an electromechanical relay.

Differential: Have multiple windings to function when voltage, current and/or power difference reaches a specific level or value.

Close-differential: The dropout value is specified close to the pickup value.

Frequency sensitive: Operates at a set frequency or within specific frequency bands. A resonant reed, for example.

Hermetically sealed: Totally sealed by glass-to-metal or metal-to-metal seals to ensure very low rates of gas leakage over long time periods.

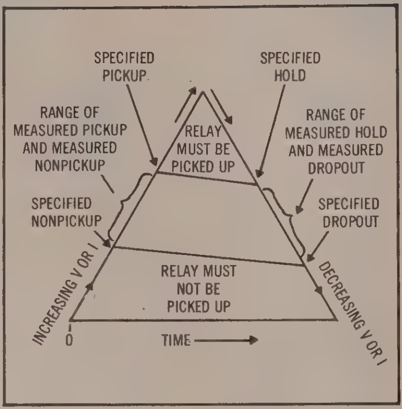
Encapsulated: Imbedded in a suitable potting compound.

Sealed: Enclosed in a relatively airtight cover. (Not the same as hermetically sealed.)

Covered: Unsealed metal or plastic enclosure or housing.

CONTACTS

Dry circuit: contacts that carry current but do not open or close during energizing of the load circuit. Often wrongly used in reference to low level contacts.



SPECIFIED PICKUP
SPECIFIED HOLD
RANGE OF MEASURED PICKUP AND MEASURED NONPICKUP

RANGE OF MEASURED HOLD AND MEASURED DROPOUT
SPECIFIED NONPICKUP
SPECIFIED DROPOUT
RELAY MUST NOT BE PICKED UP
INCREASING V OR I
DECREASING V OR I
0
TIME

Low Level: Contacts controlling relatively low voltages and low currents. Generally below 5 Vdc and 10mA.

OPERATING CHARACTERISTICS

Measured dropout: The value at which all contacts restore to their unoperated position as current or voltage decreases.

Specified dropout: The value at or *above* which all contacts *must* restore to their unoperated position as voltage or current is decreased.

Specified hold: The value that *must* be reached before any contact change occurs as voltage or current is decreased on an operated relay.

Specified nonpickup: The value that *must* be reached before any contact change occurs as voltage or current decreases on an unoperated relay.

Measured pickup: The value at which all contacts function as voltage or current increases on an unoperated relay.

Specified pickup. The value at or *below* which all contacts *must* function as voltage or current increases on an unoperated relay.

Sensitivity: Specified pickup expressed in watts.

Normal bridging: The make-before-break action between adjacent contacts on relays designed for this purpose.

Abnormal bridging: The undesired closing of contacts caused by a metal bridge or protrusion developed by arcing.

Magnetic freezing: Sticking of the armature to the core as a result of residual magnetism.

TIME

Actuation: The interval from coil energization or de-energization to the functioning of a specified contact.

Initial actuation: The interval from coil energization or de-energization to the *first* closing or opening of a previously open or closed contact.

Final actuation: Sum of initial actuation *and* bounce intervals following an actuation.

Contact bounce: The interval from close or opening of a contact to the end of the bounce of "chatter."

Chatter: See bounce.

Operate: Normally taken as the interval between energization and the opening or closing of the last contact to function not including bounce.

Release: Normally taken as the interval between de-energization and the opening or closing of the last contact to function excluding bounce.

Transfer: The interval between opening a closed contact and closing an open contact of a break-before-make relay.

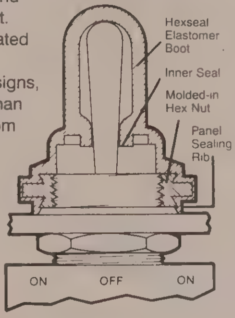
SWITCH SEALING

EXTERNAL ENVIRONMENTAL PROTECTION

HEXSEALS™

These boots contain their own molded-in-hex-nut, and serve mechanically as both a seal and mounting nut. The silicone rubber from which the boots are fabricated also serves as a vibration absorber. Aesthetically, Hexseals blend with the most demanding panel designs, and are available in a wide variety of colors (other than standard colors). Hexseals provide the same freedom of activation as the basic switch, and in no way interfere with its operation. To attenuate spurious signals from either entering or leaving equipment through the switch mounting hole, APM has designed a number of EMI/RFI boots with built-in knitted Monel wire, a rugged material ideally suited to this purpose. All Hexseals feature a panel sealing rib to prevent contamination from penetrating the mounting hole.



Material	Silicone rubber (Snapseel, Neoprene) Per ZZ-R-765 Class III
Temperature	-94 F° to +400 F° -70C° to +205 C°
Shelf Life	25 years
Resistant to	Salt spray, weather, sunlight, ozone and most acids
Mil Spec	Most Hexseal products - Are QPL approved under MIL-B-5423

Metric Sizes Available

Toggle Switch Boots

COMPLETELY COVERS TOGGLE
Thread sizes from 1/4-40NS-2B 5/8-32 UNS-2B
Armor and RF1/EMI Shielding Boots version also available

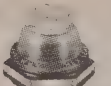
TOGGLE OF SWITCH PROTRUDES
Thread sizes from 1/4-40 NS-2B to 15/32-32 NS-2B

BACK OF PANEL MOUNTED BOOTS-COMPLETELY COVERS TOGGLE (FLUSH MOUNTED)
Toggle of switch products version also available

Push button Switch Boots

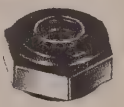
COMPLETELY COVERS PLUNGER
Thread sizes from 8-40 NS-2B to 5/8-24 NEF-2B

ARMORED SEAL FOR PUSH BUTTON SWITCHES
Thread sizes 15/32-32 NS-2B



BUTTON OF SWITCH PROTRUDES
Thread sizes from 7/16-32 UN-2B to 1/2-32 NS-2B
Used primarily for push-pull circuit breakers

Rotary Shaft Switch Boots



NON-LOCKING
Thread sizes from 1/4-28NF-2B to 5/8-24NEF-2B

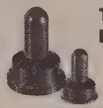
LOCKING
Thread sizes from 1/4-32NS-2 to 3/8-32NS-2

RFI/EMI SHIELDING
Thread sizes from 1/4-32NEF-2B to 1/2-32NS-2B

SnapSeel™ Commercial Switch Boots

Black neoprene boot. Operating temp.: -65° F to +300° F.
Available in push-button, toggle, and rotary models

PUSH BUTTON BOOTS

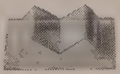


TOGGLE SWITCH BOOTS

ROTARY SHAFT SEALS

Rocker Switch & Circuit Breaker Boots

ROCKER SWITCH SINGLE POLE
Height .359" (9.13mm)



ROCKER SWITCH (LIGHTED) DOUBLE POLE
Height .297" (7.54mm)

ROCKER SWITCH (LIGHTED) SINGLE POLE
Height .297" (7.54mm)

Indicator & Lighted Switch Boots (transparent)

INDICATOR SEAL
Height .359" (9.13mm)
A gasket rib on the underside of this product makes a complete seal against the panel

LIGHTED PUSH-BUTTON SEAL
Customized clear silicone rubber covers that provide dust-tight, splash-proof protection for LPB switches and visual displays.

Circuit Breaker Boots (transparent)

Fits most circuit breakers such as Heinemann Elec., Texas Inst., Wood Elec., AIRPAX, & Carlingswitch

SINGLE SWITCH HANDLE
Height sizes from 7/8" to 1-1/22"

DOUBLE SWITCH HANDLE
Height sizes from 7/8" to 1"

TRIPLE SWITCH HANDLE
Height sizes from 7/8" to 1"

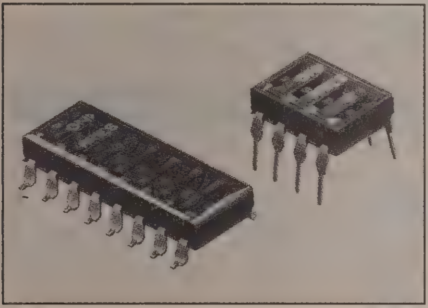
DIP Switches

Aries DIP switches cover the range from premium performance to low-cost applications, and represent the most advanced engineering ever designed into a DIP switch. Designed for exceptional reliability and versatility, all Aries DIP switches incorporate advanced design concepts, highest quality materials, precision manufacture and stringent testing to ensure unrivaled product excellence.

The Series 700 DIP DuraSwitch™: Premium Switch Performance at Standard Switch Prices



The culmination of years of product engineering and refinements, Aries Series 700 DIP DuraSwitches represent the most advanced engineering ever designed into a DIP switch. These switches incorporate a combination of manufacturing advances, design features and operating benefits that yield premium switch performance at standard switch prices.

Application Versatility

To meet virtually every application need, Aries offers its Series 700 in both surface mount and thru-hole versions. The surface mount switches are available with either "J" or gull-wing leads; thru-hole switches feature solder tail terminations.

All versions feature a low profile design — with a height of just .170 (4,71). And, these switches can be stacked end-to-end for added configuration versatility.

The Series 700 is available in 4 thru 10 and 12 positions. Operating temperature is -40° to +100°C, with temperature resistance to 260°C for 10 seconds, making it suitable for infrared soldering.

Fully Sealed Assembly

To ensure highest reliability and long life even in hostile environments, the Series 700 DIP DuraSwitch features fully sealed construction. The molded cover is ultrasonically welded to the base with insert molded and dual sealed terminals. The slider contact features an insert molded slider. KAPTON* (polyimide) sealing tape is furnished as standard with the surface mount version.

Auto Insertion Compatible

The Series 700 is fully compatible with auto insertion equipment. The switches are machine insertable via reel or tube feed and can be furnished for tape and reel packaging per EIA-481-A specifications.

Highest Quality Materials

Base, Cover and Slider: Glass filled high temperature thermoplastic. UL940V-O rated PPS base and cover rated at 500° F (260°C).

Slider Contact: Beryllium Copper alloy with a minimum of 20 μinches selective gold over nickel plating.

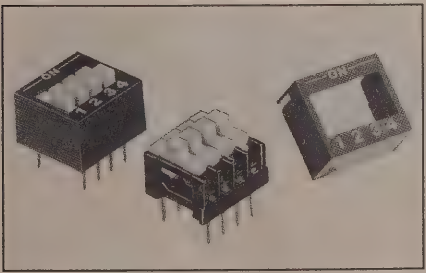
Terminal: Copper alloy with selective 20 μinches gold over nickel plating, and tin plating on leads.

And More...

There are even more features that help make this superior switch series the ultimate DIP switch value:

- Redundant bifurcated slider contacts with self-cleaning wiping action for positive performance every time.
- Each slider features a pre-loaded spring and overstress protection with a solid, positive detent
- Recessed slider travel of .045 (1,14)
- Fully automated assembly and 100% tested
- Competitively priced
- Factory pre-programming available.

Aries Series RA DIP Switches



For outstanding performance in an economy switch, Aries complements its Series 700 DIP DuraSwitch line with the Series RA DIP switch. Available in 2 thru 10 positions, this switch can be furnished as SPST, SPDT, DPST and multiple pole, multiple throw models. These wave solderable switches feature an optimum pressure/wipe contact system with selectively gold-plated contacts, and a snap-on cover.

NOTE: Aries specializes in custom design and production. In addition to the standard products shown on this page, special materials, platings, sizes, and configurations can be furnished, depending on quantities. Consult factory for details.

Turquoise Switch – Next Generation Snap Action Switch

Introducing the turquoise switch—high environmental resistance

Suitable for automatic wave soldering and cleaning

Tough enough to resist dust, water splash and corrosion

- Elastomer double molding technology, an industry first, and ultrasonic swaging technology contribute to uniform sealing in high production quantities.
- Two sealed types available.

IP50 type, dust protected

Size, shape and spacing of the terminals are the same as conventional non-sealed switches.
Suitable for use in non-condensing environments.

IP67 type (NEMA type 6), immersion protected

Leads attached.
Suitable for rain-tight applications.
(Its construction keeps water from entering at a depth of 1 meter for 30 minutes.)

Initial Electrical Characteristics[1]

Contacts:	
DPST	N.O/NO., N.C./N.C, or N.O./N.C
DPDT	2 N.O./N.C (break before make)
Power Rating (Resistive Load):	
DPST	2A @ 125 volts RMS-60 Hz or 2A @ 28 VDC, 1aA @ 250 volts RMS-60 Hz
DPDT	1A @ 125 volts RMS-60 Hz or 1A @ 28 VDC
Contact Resistance (.1VDC-10ma.)	10 milliohms nominal
Contact Bounce	5 milliseconds maximum
Dielectric Withstanding Voltage	MIL-STD-202, Method 301
Sea Level	1500 VAC minimum
Insulation Resistance	1000 megohms minimum

Environmental Characteristics[1]

Operating Temperature Range	0°C to +70°C
Exposure Temperature Range	-65° to +125°C
Vibration (Dual Section)	8G
Contact Resistance	10 milliohms maximum
Contact Bounce	0.1 millisecond maximum
Shock (Dual Section)	20G
Contact Resistance	10 milliohms maximum
Contact Bounce	0.1 millisecond maximum
Rotational Life	25,000 cycles
Switch Actuating Torque (50% Duty cycle @ Rated Power Load)	2-7 oz-in.
Contact Resistance	100 milliohms maximum
Moisture Resistance	MIL-STD-202, Method 106, Condition B
Contact Resistance (0.1VDC-10ma)	10 milliohms maximum
Insulation Resistance (After 24 Hours @ Room Temperature) (500 VDC)	100 megohms minimum
Housing Material	High temperature, flame retardant, thermosetting plastic

Mechanical Characteristics[1]

Actuating Torque (Each Section, Switch Module Only)	5-15 oz-in.
Running Torque (Out of Detent, 2-4 Module Assembly)	0.3-2 oz-in.
Detent	CW or CCW standard
Actuation Angle	25°
Contact Materials	Fine silver with gold overlay
Terminal Styles	Solder lug only
Standard Orientation	In-line with control terminals
Optional	Rotated 90° CCW from standard
Terminal Strength (Before and After Soldering Heat Exposure)	2 lbs. minimum

Specifications are subject to change without notice.

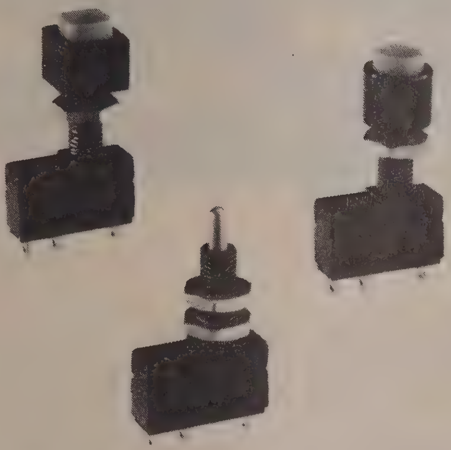
BURGESS-SAIA PRODUCTS MEET **ISO 9001** STANDARDS

Panel Mounted Actuators – Can be fitted to all standard travel **V4N/V4NS** Series subminiature microswitches. Actuators supplied in kit form have a simple clip-on attachment. Complete assemblies, with actuators on a customer-specified V4N or V4NS switch, are also available. OEMs have a choice of either round or square push buttons and bezels. A variety of color buttons are available. Actuators with a long overtravel plunger are available. An actuator and switch assembly can be installed in equipment with single-hole panel mounting (6.35 mm diameter), or by insertion of the assembly in the switch mounting holes.



PANEL MOUNTED ACTUATORS FOR USE WITH V4N/V4NS SERIES

		Reference	Description
KIT	Push Buttons (button color must be specified)	**PBAS4**	Molded frame; actuator; square button and bezel; 1 locknut
		PBAR4	Molded frame; actuator; round button and bezel; 1 locknut
		PB5LK	Sealing kit (O ring and diaphragm)
	Long Overtravel Plunger	**QA4**	Molded frame; stainless steel plunger; overtravel actuator; 2 locknuts
COMPLETE ASSEMBLY	Push Button	**PBS** (add **PBS** to switch eg. V4NS **PBS**)	Switch with square button and bezel
		PBR (eg. V4NT7 **PBR**)	Switch with round button & bezel
	Long Overtravel Plunger	**Q** (add **Q** to switch eg. **Q**V4NST7)	Switch with long overtravel plunger

Low Differential Travel Subminiature Microswitch – V4D Series low differential travel subminiature microswitch features a maximum movement differential as low as 0.04 mm. Like the V4N/V4NS range, the V4D is available in a sealed version, V4DS, meeting IP 67 IEC requirements. The V4D/V4DS switches combine the versatility of the V4N/V4NS range with precise movements of standard size microswitches. There are seven options for terminals, including solder tag, PCB, faston and pre-wired versions to customer specification. All terminals are gold flashed. Clip-on terminal covers are an option. Silver-plated contacts are standard; gold plated contacts are optional for low-current applications. A variety of plain levers, cam follower and roller lever actuators are available. The electrical rating is 250V AC, 5A.

V4D LOW DIFFERENTIAL TRAVEL SWITCH

Reference	Actuator	Actuating Force (N)	Dimensions (mm)		Movement Differential (mm)
			Free Position Height	Lever Length	
V4DT7*	Plunger	1.2	8.7	–	0.04
V4DT7Y	Plain Lever	1.0	9.5	18.0	0.07
V4DT7Y2	Plain Lever	0.75	10.1	25.0	0.09
V4DT7Y3	Plain Lever	0.6	10.8	32.0	0.12
V4DT7YC	Cam Follower Lever	1.0	12.2	18.5	0.07
V4DT7YR1	Roller Lever	1.2	14.85	16.0	0.06

* T7, solder tag terminals; T8, PCB; T6 and T9, faston.

Extremely Long Overtravel Microswitches – V4L/V4LS Series subminiature microswitches provide an extremely long minimum overtravel of 2.2 mm in the small V4 switch dimensions of 20 X 6 X 10 mm. V4L/V4LS switches are available with various types of terminals and mounting arrangements. Contacts are either welded silver, or gold alloy coated silver palladium crossbar. An IP 40 enclosure provides protection for the V4L. The sealed V4LS version has an IP 67 enclosure for protection against water according to IEC standards. Minimum mechanical life of the switches is 10 million cycles. Rating is up to 5A/250 VAC.

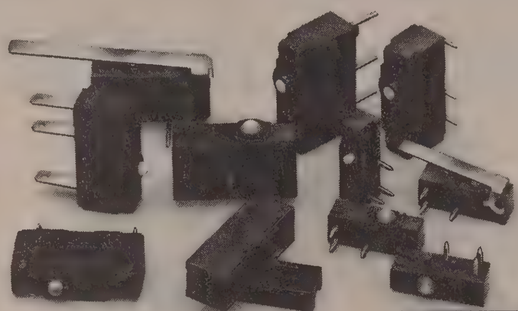
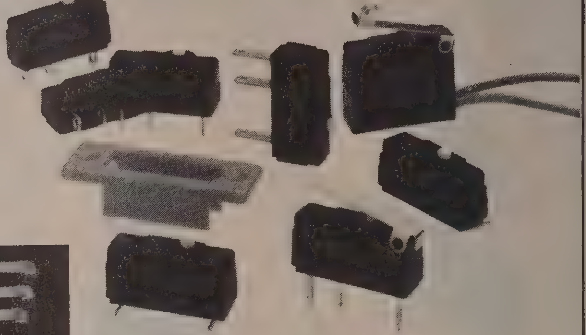
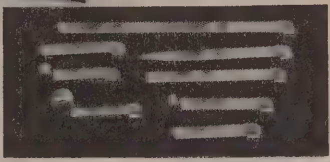
BURGESS-SAIA PRODUCTS MEET **ISO 9001** STANDARDS







The products shown here are a brief selection of our wide range of quality switches.

Sub-Miniature and Ultra Miniature
Features: 10 million cycle life, 9 terminal options, gold cross-point, gold plate, or silver contacts, full over-travel, fully sealed & process compatible models with or without leads, mounting holes or pegs, standard/low force models, wide variety of clip-on levers, snap-on terminal covers, high temp. versions.

Reference	Sealing	Dimensions			Actuating Force		Max. Rating 125/250 VAC	Terminals

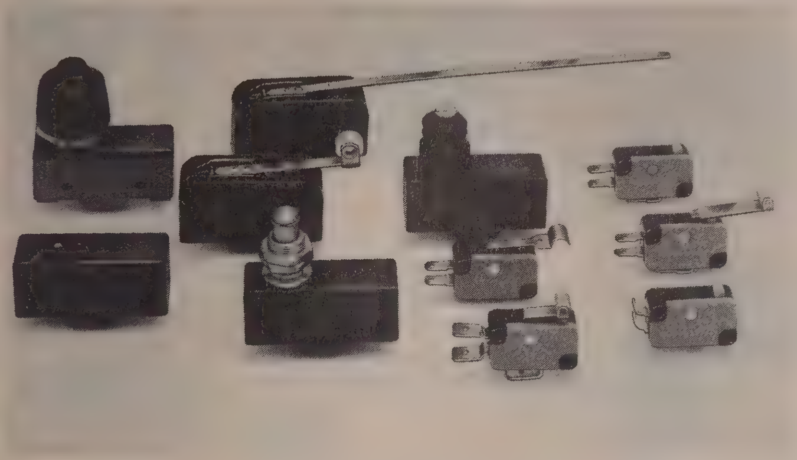
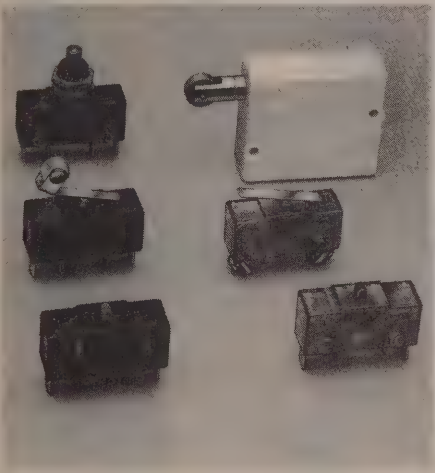
BURGESS-SAIA PRODUCTS MEET **ISO 9001** STANDARDS

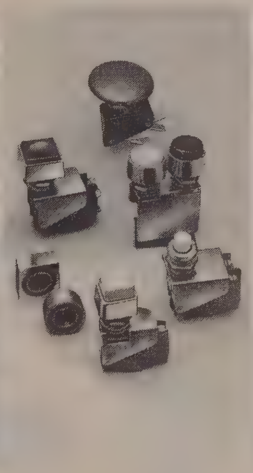


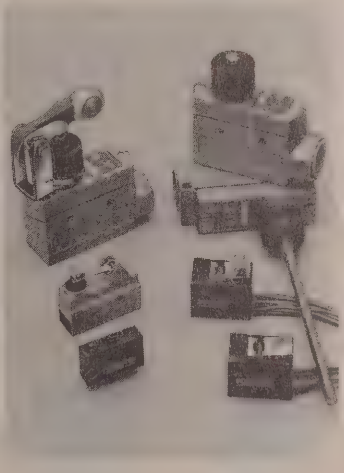
CR – CT Basics – Single-pole, changeover, snap-action with moulded cases and lids, sensitive beryllium copper trident spring mechanisms, flat base with 3 solder tag terminals version, stepped base fitted with 6-32 UNC screw and cup washer , 15A 125/250 VAC rating, broad selection of actuators, sealed models.

XG Miniatures – Single-pole, double or single throw, nine force/current variations 320 cN/45cN - 23A ½ hp/10A 1/6 hp, up to 100 million cycles mechanical life. Silver, gold, or silver-cadmium-oxide contacts, high temperature versions up to 150° C. Wide selection of terminals including PCB mount, large variety of integral lever actuators. Rast 5 connector for European domestic appliance requirements available.
International approvals - UL/CSA, BEAB, VDE, SEMKO, SEV, DEMCO, NEMCO, KEMA, UTE.

XP, XT, XS Multi-pole Security Switches – Intended for use in locations within equipment where doors and covers are opened and personnel are to be protected. XP Single Pole, XT Double Pole and XS Triple Pole versions are available.
Electrical breaking capacity ranges from logic level to 16A 125/250 VAC for electrical mains or power contact. Contact gaps in excess of 3mm for use in main isolation, contact gaps creepage and air gaps up to 8mm for UL / CSA, VDE, BEAB, SEV SEMKO, NEMKO, DEMKO, SETI, KEMA, IMQ, BEAB, and CEBEC approvals. Normally open, normally closed and changeover version, –20° C. to +85° C. and +140° C. on some models.
Contact material can be from silver nickel, silver palladium, pure silver, gold-plated and other materials on request.
Accessories include a multiplug terminal housing connection and a service key for the XT Series. A Rast 5 connector for European domestic appliance requirements is available.







K5 Series – Moulded-case with single-hole, two circuit, double-break mechanisms, plain plunger, wedge-shaped, internally-pivoted cam follower, plain spring plunger, plain and roller lever versions available –10° to +85° C., mechanism enclosed to IP40, mechanical life 1 to 10 million cycles, 25A 125/250 VAC rating.

KB5 Series – Positive action, forced break, normally closed single throw switches for guard interlock duty, 3mm minimum contact separation to meet international specifications, 100,000 cycles UL approvals, interchangeable mounting with similar range snap switches, mechanical life exceeds 10 million cycles, 25A 125/250 VAC rating.

Joysticks – 40 standard options with latching, momentary, lift-to or normal operation, V3 or V4 switching, 2 or 4 gate or 360° stirring action, panel sealing to IB65, accurate down to –50° C., designed for general industrial applications.

EUROPA – Proximity Sensors – Over 500 models, sensing ranges from under 1mm up to 20mm, AC, DC and NAMUR, N/O, N/C and universal outputs, housed in rugged nickel plated brass in compact or standard lengths, models to meet CENELEC EN, plug and socket types for easy installation.
Push-Buttons – Up to 25A 125/250 VAC, reliability over a long life with positive, nonfatiguing operation, single and double pole versions with momentary or alternate actions, a two button version, an emergency stop button unit, and a wide variety of bezels including a sealed bezel.
Protected Switches – A versatile selection of switches for difficult environments, from 15A 250 VAC metal housed with conduit entry and industrial actuators down to 10A 250 VAC compact, and 5A 250 VAC miniature single and double pole pre-wired sealed and pressure tested. Mechanical life up to 10 million cycles, NEMA Type 6, IP 67 enclosures.

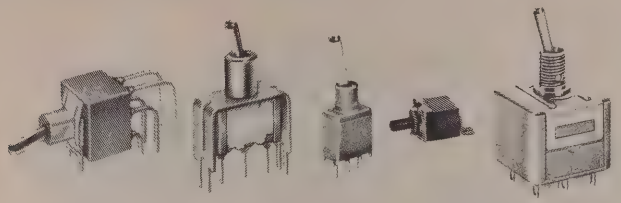
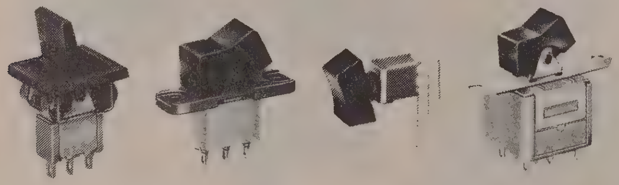
NEWTON DIVISION PRODUCTS



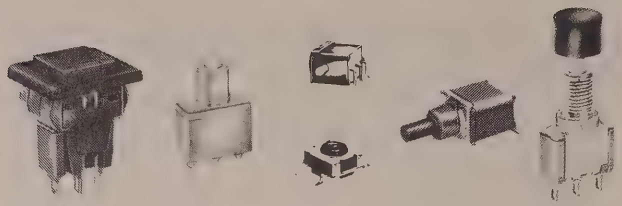
Toggle Switches

A full range of miniature, tiny and ultraminiature models for panel and P.C. mounting, including sealed/process compatible and surface mount. SP thru 4P models with many styles and options available.



Rocker and Lever Handle Switches

A full range of miniature and tiny models for panel and P.C. mounting, including anti-static and sealed/process compatible designs. SP thru 4P models and many options available.



Pushbutton Switches

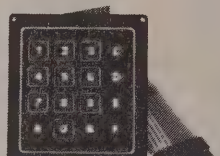
A complete line of miniature, tiny, subminiature and microminiature switches with momentary, snap-acting and alternate action functions—SP thru 4P. Surface mount and sealed/process compatible models available.

Slide Switches

A full range of miniature, tiny and ultraminiature models for panel and PC mount, including sealed/process compatible.

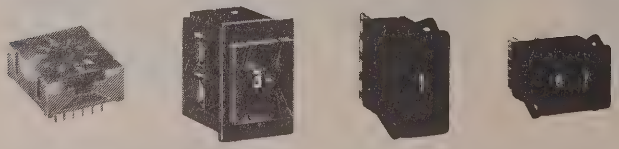
Rotary Switches

A full range of miniature instrument grade rotary switches in one and two pole models with 30 degree indexing (12 positions max) or 36 degree indexing (10 positions max).



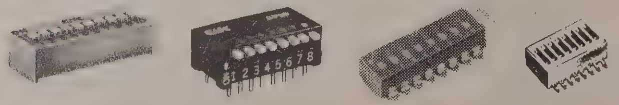
Membrane Switches

Custom assemblies and keypads available in embossed detented or flat non-tactile models.



Coded Switches

A full range of miniature and sub-miniature thumbwheel and pushbutton switches with snap-in front or rear panel and PC mounting.



DIP Switches

A full range of Traditional, Right Angle, Side Actuated, Low Profile and Ultra Miniature Surface Mount DIP switches. Options include machine insertable and fully sealed/process compatible models.

C&K COMPONENTS, INC. 15 Riverdale Ave. Newton, MA 02158-1082 Tel: (617) 964-6400, Telex: 92-2544, Fax: (617) 527-3062

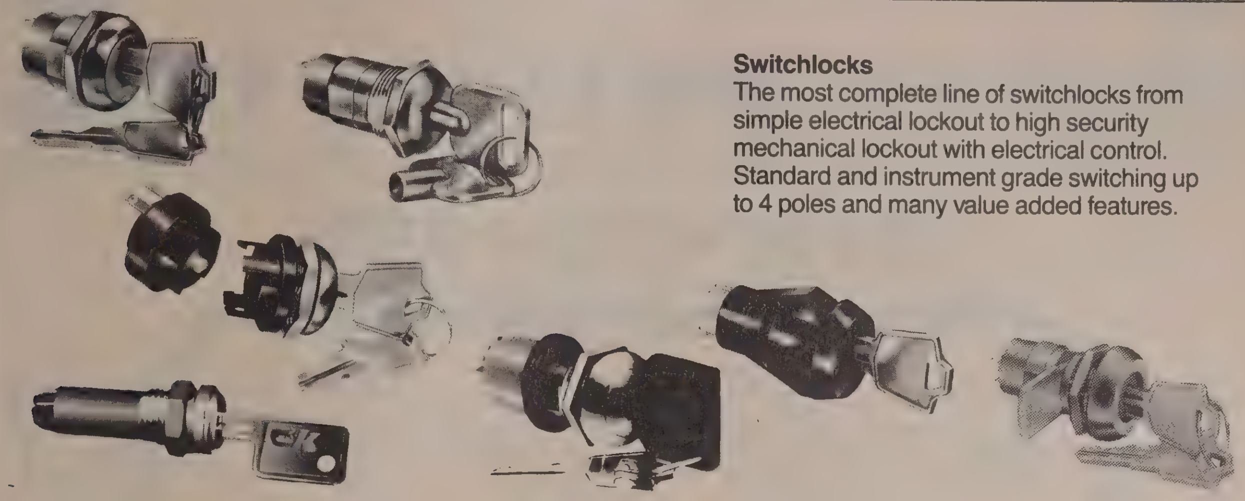
CLAYTON DIVISION PRODUCTS

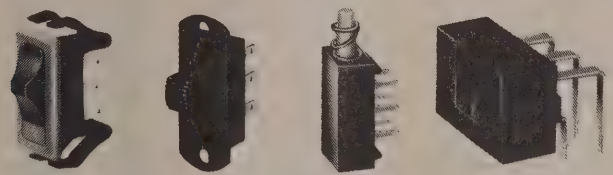


Switchlocks

The most complete line of switchlocks from simple electrical lockout to high security mechanical lockout with electrical control. Standard and instrument grade switching up to 4 poles and many value added features.

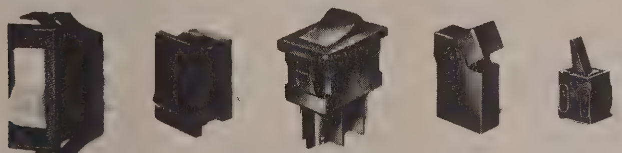
Rotary Switches

All plastic rotary switches adjustable from 2 to 12 positions. ROTA-SLIDE,® Power ROTA-SLIDE and Miniature ROTA-SLIDE rotary switches.



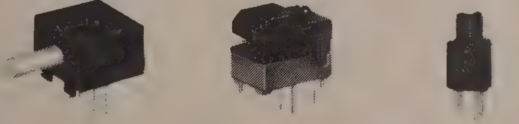
Slide Switches

Power and Line Voltage Select Slide Switches. Miniature and Snap-In Slide Switches.



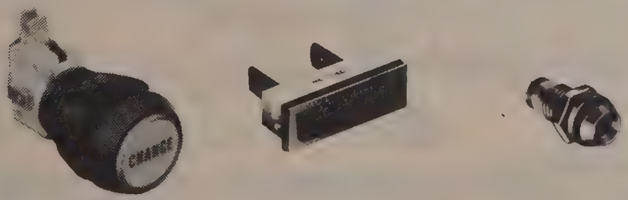
Rocker and Lever Handle Switches

A full range of miniature power rocker and lever handle switches.



Pushbutton Switches

Pushbutton and mechanical pushbutton models and options for panel and P.C. mounting.



Illuminated Pushbutton Switches & Indicators

Many different styles of illuminated and non-illuminated pushbutton snap-acting switches with modular snap-together construction.

CAPITOL
SWITCH INC.

Your Solution Company.

Why Have Problems!!

Use CAPITOL SWITCH to provide economical solutions where reliability — long life — improved quality and M.T.B.F. are of paramount concern.

---

40 Years of Proven Experience with Demanding Customers Like

AT&T, IBM, GE, BOEING, UNISYS, ROCKWELL, FAA, U.S. NAVY, U.S. AIR FORCE AND MANY OTHERS WHERE QUICK RESPONSE AND FLEXIBLE APPROACHES ARE MANDATORY. WE CAN OFTEN SUPPLY A PROTOTYPE FASTER THAN COMPETITORS CAN DECIDE ON SUPPLYING A QUOTATION!

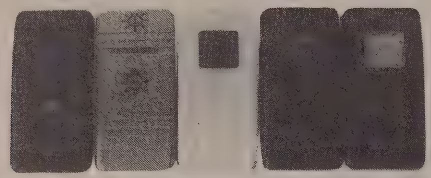
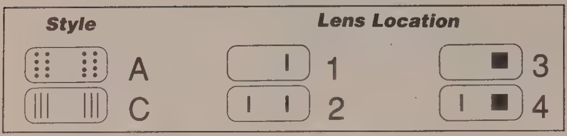
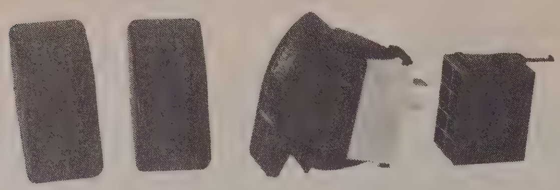
New! V-Series Rocker Switches

10A 250 VAC; 15A 125 VAC;
1/2 HP UL/CSA
12V rating= 20A



Actuators





Base and actuator snap together!

Sealed version with front panel components certified to IP66 and IP68*, signifying complete protection against dust and prolonged submersion under pressure and UL1500, signifying ignition protection for marine products. Mounts in standard industry panel cutout. Features removable actuators in multiple designs with optional "soft-touch" surfaces, illumination with various lens designs, international symbols. Optional lock-on terminal connector, actuator removal tool and mounting hole blank plug.
* Contact factory for panel opening dimensions.

To order Connector Housing, specify **VCH:**
NOTE: Customer to supply connector terminals. Connector housing accepts certain Amp, Packard or other industry standard .250" Q.C. terminals. Please consult factory.
To order Hole Plug, specify **VHP.**

Other circuits, lenses and imprinting available, please consult factory.

This information listed above is for standard Carlingswitch products. Consult Carlingswitch for additional product information.

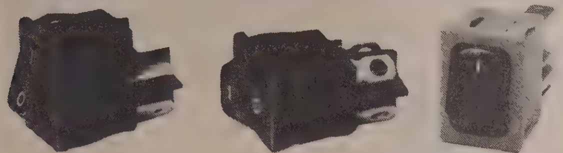
New! MAXI-Series Rocker Switches



The MAXI-Series miniature rocker switches are available in both single and double configurations. The 632 MAXI-Series is illuminated. These new switches provide 100 amp inrush capability, fit into industry standard cut-out dimensions and include a quick-make contact mechanism. Other features include a small, shallower base, a contemporary actuator design and availability with a single pole circuit and an independent lamp.

Nylon Insulated Toggle Switches

D-Series

D-Series switches have self-cleaning wiping action contacts suitable for both power and low-level switching, nylon flat or bat lever actuators and bushing/frame super structure for double insulated requirements-UL recognized, CSA certified. Series rated @ 10amp 125 VAC 5 amp 250 VAC ½ H.P. 125-250 VAC 10 amp 28 VDC.

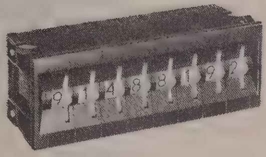
SERIES T10 THUMBWHEEL

Industrial Size Back Mount

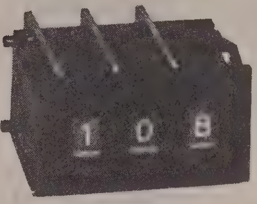
- 8, 10, 12 and 16 dial positions
- Variety of output codes
- Wide window version
- Stops to limit rotation
- Dimensions: 1.36″ (34.55mm)H x .500″ (12.7mm)W



SERIES T75 THUMBWHEEL

Standard Size Front Mount Snap-In

- 8, 10, 12 and 16 dial positions
- Variety of output codes
- Lighted version
- Stops to limit rotation
- Dimensions: 1.30″ (33mm)H x .394″ (10mm)W



SERIES T55 PUSHWHEEL

Sub-Subminiature Size Front Mount Snap-In

- 8, 10, or 16 dial positions
- Variety of output codes
- Lighted version
- Stackable units without mounting hardware
- Dimensions: .591″ (15mm)H x .300″ (7.62mm)W

SERIES T59 PUSHWHEEL

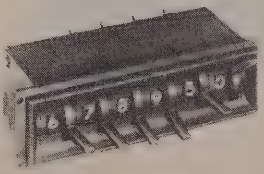
Sub-Subminiature Size "Dustproof" Front Mount Snap-In

- 8 or 10 dial positions
- BCD or octal codes
- PC pin outputs
- Stackable units without mounting hardware
- Dimensions: .709″ (18mm)H x .236″ (6mm)W

SERIES T20 THUMBWHEEL

Miniature Size Back Mount

- 8, 10, 12 or 16 dial positions
- Variety of output codes
- Lighted version
- Stops to limit rotation
- Dimensions: .960″ (24.4mm)H x .500″ (12.7mm)W



SERIES L20 LEVERWHEEL

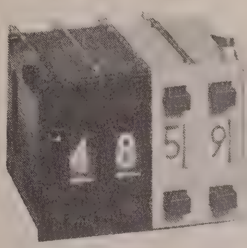
Miniature Size Back Mount

- 8, 10, 12 or 16 dial positions
- Variety of output codes
- Quick re-set lever action
- Stops to limit rotation
- Dimensions: .960″ (24.4mm)H x .500″ (12.7mm)W

SERIES T50 THUMBWHEEL

Subminiature Size Back Mount

- 8, 10 or 16 dial positions
- Variety of output codes
- Most popular series
- Stops to limit rotation
- Dimensions: .709″ (18mm)H x .315″ (8mm)W



SERIES T56 PUSHWHEEL

Sub-Subminiature Size Front Mount Snap-In

- 8, 10 or 16 dial positions
- Variety of output codes
- Lighted version
- Stackable units without mounting hardware
- Dimensions: .945″ (24mm)H x .300″ (7.62mm)W

Other Series available upon request.

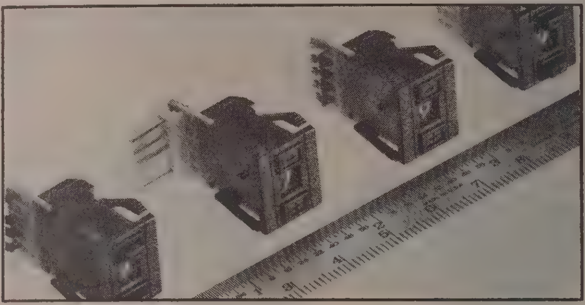
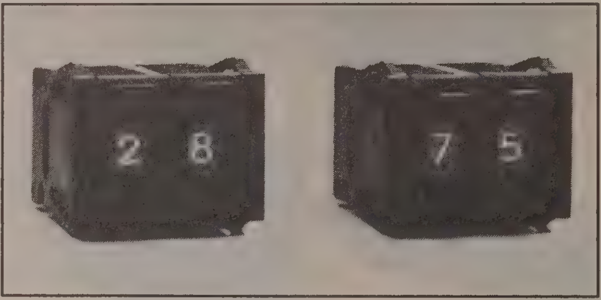
SERIES PB PUSHWHEEL
Sub-Subminiature Size
Front Mount Snap-In

- •Minimum mounting depth, low mounting height (.614", 15,6 mm)
- •Connection through integrated solder pins, automatic soldering possible
- •Stackable unit without mounting hardware
- •Printed circuit board mounting
- •Dimensions: .709" (18 mm)H x .236" (6 mm)W



SERIES PH PUSHWHEEL
Sub-Subminiature Size
Front Mount Snap-In

- •Recessed buttons available
- •End caps built-in
- •Multiple termination options
- •Full rotation 0-7, & 0-15 switch positions
- •Dimensions: .591" (15 mm)H x .500" (12,7 mm)W



Series PA Front Mount Snap-In with Standard and Recessed Buttons

SERIES PA PUSHWHEEL
Sub-Subminiature Size
Front Mount Snap-In

- •Flexibility of output codes
- •Electrostatic discharge protection optional
- •Stackable unit without mounting hardware
- •Recessed buttons available
- •Full rotation 0-15 switch positions
- •Multiple termination options
- •Dimensions: .591" (15 mm)H x .300" (7,62 mm)W

SERIES PF PUSHWHEEL
Sub-Subminiature Size
Back Mount Snap-In

- • Recessed buttons available
- •Variety of output codes
- •Stackable units without mounting hardware
- •Full rotation 0-15 switch positions
- •Multiple termination options
- •Dimensions: .551" (14 mm)H x .300" (7,62 mm)W

COLE INSTRUMENT: YOUR SOURCE.

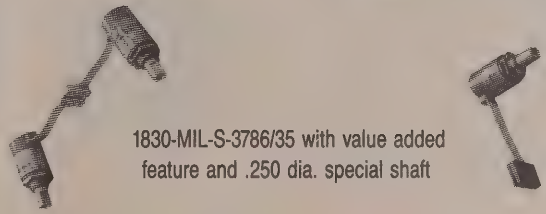
with PC and solder terminations

3900 MIL-S-3786/39
Special with add-a-pot
features



1830-MIL-S-3786/35 with value added
feature and .250 dia. special shaft

MIL-S-3786 is the guiding principle of our rotary switch design engineering group. COLE gives you a complete choice of MIL-S-3786 certified configurations; /4,/13,/20,/35,/39,/41. An integrated family of miniature precision rotary switches with common, state-of-the-art features that others are trying to catch up with.

- FLUX CONTAMINANT PROOF
- IMMERSIBLE; WASHABLE
- EMI / RFI PROTECTED
- PRE-TINNED TERMINALS, MEET THE REQUIREMENTS OF MIL-STD-2000, PER MIL-STD-202, METHOD 208
- HIGH, LOW LEVEL AND DRY CIRCUIT SWITCHING

PRECISION

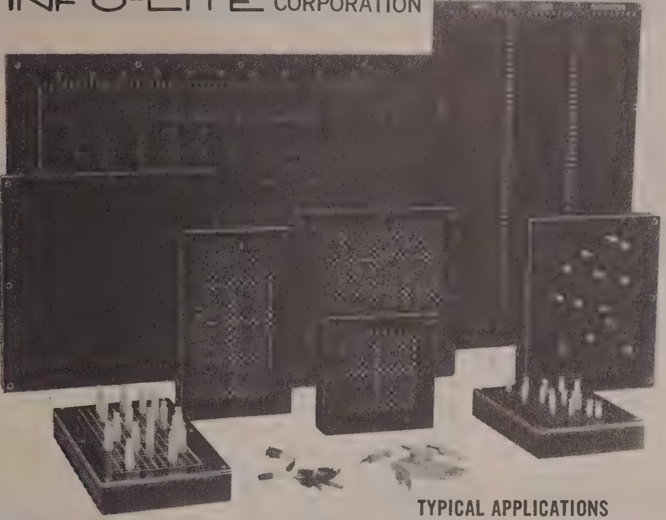
CROSSPOINT

THE PROGRAMMING PRODUCTS DIVISION OF
INFO-LITE CORPORATION

PROGRAMMING PRODUCTS

MATRIX PINBOARDS



INFO-LITE has developed a most convenient, compact and economical system for reliable programming and switching • The Matrix Program Board allows a wide variety of switching/programming functions to be performed by simply inserting programming pins (shorting or diode type) into a 2 to 10 deck contact matrix • No accessories such as "read" "write" equipment are required • Matrix Board features have led them to be favored over such devices as patchboards, card readers, toggle and thumbwheel switches, mag/punched tape and electronic memories • The two basic uses for Matrix Program Boards are: (1) Cordless patching (input-output switching), using shorting pins; (2) Programmable diode matrices (logic memories), using diode pins • Units with up to 100 x 100 crosspoints can be supplied to meet your requirements, whether for prototype or production quantities.

See Data Sheet MB3 for detailed specifications.

FEATURES

- Reliable closed entry contact
- Rugged programming pins that will not bind
- Rapid and convenient method of programming/switching
- Permits insertion of components into network without soldering
- Replaces costly complex switching hardware
- Attractive and compact package
- Low capacitance for high frequency applications
- Ease of visual program checking

TYPICAL APPLICATIONS

Numeric Controlled Equipment
Logic Memories
Power Distributors
Circuit/Component Test Programmers
Lighting Systems
Code Generators
Programmable Diode Matrices
Communications Distributors
Status Indicators
Data Logging
Vending Machine Control
Thermo-Couple Selectors
Batching Programmers
Function Generators
Sequence Programmers
Pulse Code Programmers

STANDARD SPECIFICATIONS & STOCK MATRICES FOR 1000 & 2000 SERIES

STANDARD SPECIFICATIONS

1 — Contact Type: Closed Entry
2 — Contact Material: Be-Cu, Alloy 25
3 — Contact Finish: a - .0002" Ag over Cu Flash
b - .00002" Min. Au over Ni Flash
4 — Contact Support Material: Silicone Rubber
5 — Contact Resistance: .040 Ohm, typ.
6 — Contact Capacitance: 1 uuf [2 uuf]/in. at 1 MHz, typ.
7 — Bussing: 1st (top) Deck Vertical; 2nd Deck Horizontal
8 — Breakdown Voltage: 1000 VRMS
9 — Current Rating: 5 [2] Amps standard; 10 [4] Amps available
10 — Terminals: Combination Taper Pin Socket/Solder Cup [Solder Cup]
11 — Panel Material: Black XX Grade Phenolic
12 — Panel Marking: Alpha-Numeric/Grid, White Epoxy Ink Screened

NOTE: Values in brackets [ ] are for 1000 Series if two values are given.

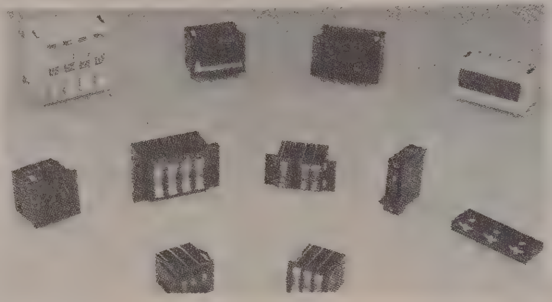
Crouzet® Digital Switches

Thumbwheel, Rocker, Push Button, L.E.D. Readouts



Crouzet Digital Switches, including thumbwheel, rocker, pushbutton models, and LED readouts are highly regarded in our customer community for aesthetics and ease of assembly (no hardware required). A variety of colors, options and accessories has made this line popular with the medical equipment and instrumentation industries. For more complete information, please request our Digital Switch catalog.

	P/N	Height	Width	Voltage (V)	Current (mA)
 Thumbwheel	84210	1.30 in.	.31 in.	.1 to 50 V	.1 to 100 mA

	P/N	Height	Width	Voltage (V)	Current (mA)
Rocker	84211	1.30 in.	.39 in.	.1 to 50 V	.1 to 100 mA

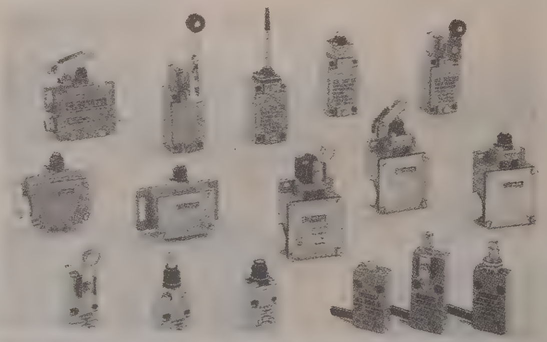
Limit Switches



Crouzet manufactures a wide range of limit switches. Most notable is our Sealed Miniature Limit Switch line, which includes the following features:

- wide variety of actuators
- completely sealed
- oil tight
- immersion proof (3 ft.)
- rugged metal housing

In addition, these miniature limit switches come complete with 6 ft. pre-wired cable and are rated at 6 amp 250 VAC. Most versions are available from stock.

Crouzet® Snap Action Switches

Miniature and Sub-Miniature

Snap-Action Switches

Crouzet's line of snap-action switches includes standard miniature and sub-miniature switches, double-break, waterproof, splashproof, and other "specialty" switches. Most switch types are available from stock in substantial quantities. For complete information, please request our Snap-Action Switch catalog.

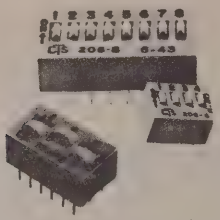
CTS® CORPORATION DIP SWITCHES

ELECTROCOMPONENTS, ELKHART, IN.

CTS SERIES 206

CTS DIP PROGRAMMABLE SWITCHES



FEATURES

- Contact wiping on make and break
- Suitable for flow soldering on PC board or mounting with standard DIP sockets
- Long term contact corrosion resistance provided by gold plated contact arms
- All U.L. 94V-O plastic used
- Integral terminal and contact locked into plastic base rails
- Crisp, positive slide actuators
- Available with flush (low profile) actuators—SPST styles

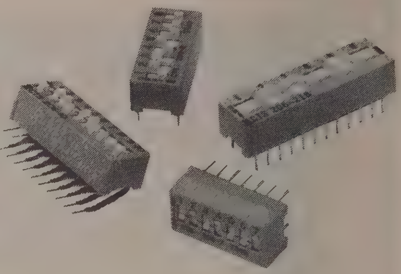
Description
From 2 thru 10 and 12 SPST; 1 thru 6 SPDT; 1 thru 6 DPST; 1, 2, or 3 DPDT and 1, 2 or 3 4PST slide switches per switch package on .100" DIP centers

Initial Contact Resistance
50 milliohms

Maximum Contact Resistance
100 milliohms after 10,000 cycles switching 800 mA @ 24 VDC

Maximum Non-Switching Rating
Maximum Rise of 30° C @ 5A

Insulation Resistance
Across open switch and between adjacent closed switches: 1×10^9 ohms



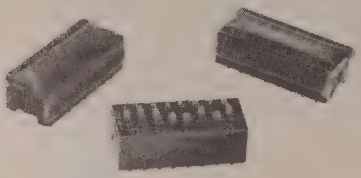
RA's available for all 206 series versions.

Dielectric Breakdown
Between adjacent switches minimum: 500 VDC

Switch Capacitance
Between adjacent switches maximum: 5.0 pF

CTS SERIES 208

CTS DIP PROGRAMMABLE SWITCHES



FEATURES

- Contact wiping on make and break
- Suitable for flow soldering on PC board or mounting with standard DIP sockets
- Economical version with non gold contacts
- All U.L. 94 V-O plastics used
- Integral terminal and contact locked into plastic base rails
- Crisp, positive slide actuators

Description
From 2 thru 10 and 12 SPST switch package on .100″ × .300″ DIP centers-SPST Styles

Initial Contact Resistance
100 milliohms

Maximum Contact Resistance
500 milliohms after 2000 cycles switching 50 mA @ 15 VDC

Maximum Non-Switching Rating
100 mA or 50 VDC

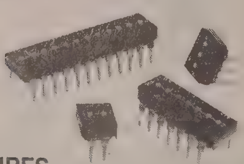
Insulation Resistance
Across open switch and between adjacent closed switches: 1×10^9 ohms

Dielectric Breakdown
Between adjacent switches minimum: 500 VDC

Switch Capacitance
Between adjacent switches maximum: 5.0 pF

CTS SERIES 209 AUTO-DIP™ SWITCH

AUTOMATICALLY INSERTABLE, WAVE SOLDERABLE, BOARD WASHABLE DIP SWITCH



FEATURES

Optimized Contact System

- Redundant, wiping contacts
- Contactor does not deflect during actuation

Optimized Mechanical Features

- Fully sealed to withstand insertion shock, wave solder temperatures, board washing
- Positive detent separate from contactor
- Closed windows prevent particle contamination
- .027" actuator travel
- Molded .300″ integrated circuit package outline

Premium Materials

- Gold contacts, solder coated terminals
- Beryllium copper contactor
- 260°C housing heat deflection temperature assures contact and seal integrity after wave soldering
- All plastics rated U.L. 94 V-O

ELECTRICAL AND MECHANICAL SPECIFICATIONS

Contact Resistance
25 milliohms maximum initial
50 milliohms maximum at end of life

Actuation Life
2000 cycles switching
100 mA @ 20 VDC or .1 mA @ 5 VDC

Nonswitching Rating
100 mA or 50 VDC

Insulation Resistance
$1 \times 10^9 \Omega$ minimum between insulation terminals

Dielectric Strength
500 VAC minimum

Switch Capacitance
5 pF maximum between adjacent closed switches

Temperature Range
-20 to 85° C operation – 40 to 85° C storage

Allowable Wave Solder Time
Up to 4 seconds with 260°C solder

Shock
Per MIL-STD-202F, method 213B, condition A 50 G's with no contact inconsistencies greater than 1 microsecond

Vibration
Per MIL-STD-202F, method 204D, condition B (.06" or 15 G's between 10Hz to 2 KHz) with no contact inconsistencies greater than 1 microsecond

CTS CORPORATION, ELECTROCOMPONENTS • 1142 Beardsley Avenue, Elkhart, Indiana 46514 • 219-295-3575 • FAX: 219-295-3580

CTS® CORPORATION DIP SWITCHES

ELECTROCOMPONENTS, ELKHART, IN.

CTS SERIES 194

CTS DIP SWITCHES

FEATURES

- Electrical switching occurs at 50% of actuator rotation angle
- Contact wiping on make and break
- Enclosed actuators shield contacts from foreign particles throughout life of switch
- The gold plated, over-center design provides positive detent action
- Reliable tape top seal optional/ bottom epoxy seal standard
- Insert molded base halves of thermoset material ensure mechanical integrity of contacts and terminals through soldering operations
- All U.L. 94 V-O plastics used

Description

Side actuated 2 thru 10 and 12 section SPST switching functions per package on .100″ × .300″ DIP centers

Initial Contact Resistance

50 milliohms maximum

Insulation Resistance

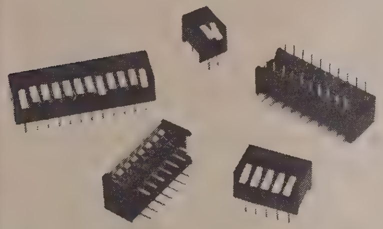
Across open switch and between adjacent closed switches: 1 × 10^9 ohms minimum

Maximum Contact Resistance

100 milliohms after 7000 cycles switching 50 mA @ 24 VDC

CTS SERIES 195

CTS DIP SWITCHES



FEATURES

- Electrical switching occurs at 50% of actuator rotation angle
- Contact wiping on make and break
- Enclosed actuators shield contacts from foreign particles throughout life of switch
- Economical version with non gold contacts over-center design provides positive detent action
- Reliable tape top seal optional/ bottom epoxy seal standard
- Insert molded base halves of thermoset material ensure mechanical integrity of contacts and terminals through soldering operations
- All U.L. 94 V-O plastics used

Description

Side actuated 2 thru 10 and 12 section SPST switching functions per package on .100″ × .300″ DIP centers

Initial Contact Resistance

100 milliohms maximum

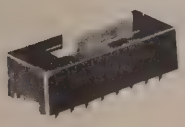
Insulation Resistance

Across open switch and between adjacent closed switches: 1 × 10^9 ohms minimum

Maximum Contact Resistance

500 milliohms after 2000 cycles switching 50 mA @ 24 VDC

CTS SERIES 197



FEATURES

- Integral terminal and contact locked into thermoset base rails
- Contact wiping on make and break
- Break before make contacts
- Useful in "service/operate" applications, low level signal routing, digital circuit programming, etc.
- Long term contact corrosion provided by gold plated/inlaid contacts
- All U.L. 94 V-O plastics used

Description

4PDT slide actuated switch package on .100″ × .300″ DIP centers

Initial Contact Resistance

50 milliohms maximum

Maximum Contact Resistance

100 milliohms after 2000 cycles switching 50 mA @ 24 VDC

Insulation Resistance

Across open switch and between adjacent closed switches: 1 × 10^9 ohms minimum

Dielectric Breakdown

Between adjacent switches minimum: 500 VDC

Switch Capacitance

Between adjacent switches maximum: 5.0 pF

YOUR SOURCE FOR SWITCHES

A Full Range of Standard, Minature, and Sub-Minature Models

WE HAVE THEM ALL-IT'S THE CUI STACK DIFFERENCE

Miniature Toggle and PC Mount Toggle	Contact Rating: 5A with resistive load @ 120VAC or 28VDC. Electrical Life: 50,000 Make-and Break cycles at full load. Contact Resistance: 10mΩ max. initial @ 2-4VDC, 100mA for both coin silver and gold plated contacts.	Miniature Rocker and Paddle & PC Mounted Rocker and Paddle	Contact Rating: 5A with resistive load @ 120VAC or 28VDC. Electrical Life: 50,000 Make-and Break cycles at full load. Contact Resistance: 10mΩ max. initial @ 2-4VDC, 100mA for both coin silver and gold plated contacts.	Sealed Toggle Switches	Contact Rating: 0.4VA max. @ 20VAC or 20VDC max. Electrical Life: 40,000 Make-and Break cycles at full load. Contact Resistance: Below 10mΩ typical initial @ 2-4VDC, 100mA for both coin silver and gold plated contacts.	Snap-Acting Pushbutton Switches	Contact Rating: Q power model—1A with resistive load @ 120VAC or 28VDC. R DRY CKT models 0.4 max. @ 20VDC max. Electrical Life: 50,000 Make-and Break cycles at full load. Contact Resistance: 10mμ max. initial @ 2-4VDC.	Sub-Miniature Rocker Switches	Contact Rating: 3A with resistive load @ 120VAC or 28VDC. Electrical Life: 30,000 Make-and Break cycles at full load. Contact Resistance: 20mΩ max. initial @ 2-4VDC, 100mA for both coin silver and gold plated contacts.	Sub-Miniature Pushbutton Switches	Contact Rating: 1A with resistive load @ 120VAC or 28VDC. Electrical Life: 60,000 Make-and Break cycles at full load. Contact Resistance: 20mΩ max. initial @ 2-4VDC, 100mA for both coin silver and gold plated contacts.	Rotary Switches	Contact Rating: 350mA @ 110 Volts (AC or DC), 150mA @ 250V (AC or DC). Electrical Life: 15,000 cycles at full load up to 30,000 detent operations. Contact Resistance: 20mΩ max. initial. Current Carrying Capacity: 5A continuous.	Slide Switches	Contact Rating: 6A with resistive load @ 120VAC or 28VDC. 2A with resistive load @ 250VAC. Electrical Life: 30,000 cycles at full load. Contact Resistance: 10mΩ max. initial.	Miniature Slide Switches for PC Board	Contact Rating: Silver contacts 2A 250V, gold contacts: 100mA 30V-with resistive load. Mechanical Life: Silver 20,000 operations, gold/brass 20,000 operations.	DIP	2 to 12 poles available. Electrical Life: 5,000 Make-and-Break cycles per Pole. Dielectric: 500VDC min. between adjacent terminals	Power Rocker Switches	Contact Rating: 10A @ 250VAC, 16A @ 125VAC Electrical Life: 20,000 Make-and-Break cycles at full load. Contact Resistance: 50mΩ.	Push Button Key Switches	Contact Rating: 25mA max. @ 50VAC or 50VDC max. Mechanical Life: 100,000 cycles. Contact Resistance: 20mΩ typical initial @ 2-4VDC, 100mA	Tact Switches	Contact Rating: 0.5A @ 12VDC. Mechanical Endurance: 100,000 cycles @ 10 cycles per minute. Contact Resistance: 100mΩ @ 1A, 2-4VDC	
The CUI STACK Difference is:

- SERVICE
- QUALITY
- EXPERIENCE

CUI STACK also carries adaptors speakers, switches, oscilloscope probes, din connectors, molded cable assemblies, jacks and plugs, and rotary encoders.

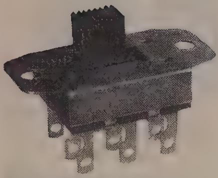
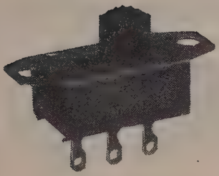
DISCOVER CW



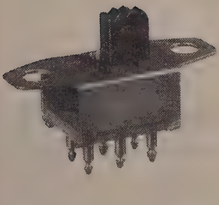
STANDARD SLIDE SWITCHES (Catalog S2120-II)

- DPDT body size .880" x .550" x .310"
- One thru four poles
- Two thru four positions
- For switching up to 13A - 125V AC
- Top, side, front, or rocker actuation
- Panel or PC board mount
- U.L. recognized, C.S.A. listed
- Solder, solderless PC board or wire wrap termination



MINIATURE SLIDE SWITCHES (Catalog S2120-III)

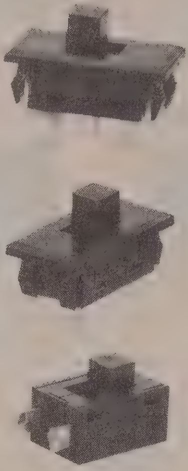
- DPDT body size .628" x .400" x .285"
- One thru four poles
- Two thru five positions
- For switching up to 8.5A - 125V AC
- Top, side, end, or toggle actuation
- Panel, PC board, or bushing mount
- U.L. recognized, C.S.A. listed
- Solder, solderless, or wire wrap termination



MICROMINIATURE SLIDE SWITCHES (Catalog S2120-IV)

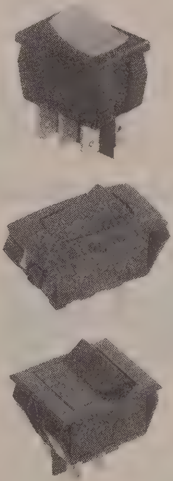
- SPDT body size .380" x .220" x .200"
- DPDT body size .380" x .312" x .228"
- One and two pole
- Two and three positions
- For switching up to .5A AC/DC - 125V
- Top or side actuation
- U.L. recognized, C.S.A. listed
- Solder or PC board termination

See volume C, page **C•1304** for our Connector products



MICROMINIATURE SWITCHES FULLY ENCLOSED (Catalog S2120-V)

- SPST body size .505" x .305" x .255"
- Single pole
- Two position
- For switching up to .5A AC/DC - 125V
- Mounting options - PC board or panel
- Solderless, solder, or PC termination
- Contacts protected



PLASTIC ENCLOSED POWER SWITCHES (Catalog S2121)

- Body size: .745" x .500" x .460" or
  1.120" x .547" x .632" or
  1.060" x .866" x . 582"
- One or two poles
- Two or three positions
- For switching up to 16A - 250V; 3/4 HP 250V; 10A 14V (T)
- Rocker, slide, paddle actuation
